

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

MAYOR'S MESSAGE

MAYOR'S MESSAGE.

Executive Department.

Mayor's Office.

St. Louis, November 26, 1909.

To the Honorable the Municipal Assembly.

Gentlemen:—In accordance with the provisions of the City Charter, I have the honor to transmit to you, for your information, the annual reports of the various municipal departments for the fiscal year ending April 12, 1909.

They are forwarded to your honorable body through the Council.

Very truly,

FREDERICK H. KREISMANN,

Mayor.

CITY FINANCES.

Report of the Comptroller

OF THE

CITY OF ST. LOUIS

FOR FISCAL YEAR 1908-1909
(Year Ended April 12, 1909.)

SUBMITTED TO THE MUNICIPAL ASSEMBLY.

COMPTROLLER'S OFFICE, St. Louis, June 18, 1909.

To the Municipal Assembly of the City of St. Louis—

GENTLEMEN—In compliance with the requirements of Section 48, Article IV, of the Charter, I herewith submit for your consideration the annual report of my predecessor, Hon. Jas. Y. Player, showing the financial condition of the city for the fiscal year ended April 12, 1909.

I also submit my estimates of the total revenues of the city from all sources for the fiscal year ending April 11, 1910; together with the estimates of the heads of the various departments as to the appropriations necessary to maintain their respective departments during the current year.

TAXATION

The assessed valuation of real and personal property for the taxes of 1909 will be, approximately, \$501,707,640.00, of which \$411,257,100.00 is assessed as the valuations of real estate, and \$90,450,540.00 as the value of personal property.

The State Board of Equalization assessed the value of railroad, bridge, telegraph, express and street railroad property for the year 1908 at \$34,400,130.00.

The rates of taxation for 1908 and 1909 on the \$100.00 valuation are here given in connection with valuations, etc.:

VALUATIONS.

	1908.	1909.
Value of land and improvements.....	\$403,455,980 00	\$411,257,100 00
Value of personal property.....	88,486,280 00	90,450,540 00
Value of railroads and other property assessed by the State Board.....	34,400,130 00	*34,500,000 00
Total	\$526,342,390 00	\$536,207,640 00

TAX RATES.

Rates of taxation for State, School and City, for the year 1908 and 1909 (Fiscal Year 1908-1909 and Fiscal Year 1909-1910):

STATE.

	1908.	1909.
Revenue	\$0 15	\$0 15
Interest	02	02
Total State rate	\$0 17	\$0 17

PUBLIC SCHOOLS.

General	\$0 60	\$0 60
---------------	--------	--------

CITY.

Municipal purposes	\$1 10	\$1 12
Interest on valid indebtedness (existing prior to April 7, 1890)	15	15
Interest and sinking fund, World's Fair bonds.....	07	06
Interest and sinking fund, Public Buildings and Public Im- provement bonds	07	08
Public Library	04	04
Art Museum	02	
Total City rate	\$1 45	\$1 45
Total rate for State, Schools and City.....	\$2 22	\$2 22

ESTIMATED MUNICIPAL REVENUE FOR CURRENT YEAR.

The estimate of the total revenues from taxation for municipal purposes is based upon the assessed valuation of property as fixed by the Board of Assessors for 1909. The report of the State Board of Equalization fixing the assessment on the class of property which comes under its jurisdiction was not received in time to include the actual assessed valuation in this statement; but judging from past experience the estimate will be found to be approximately correct.

*Estimated.

THE REVENUE TO MEET GENERAL EXPENSES IS ESTIMATED AS FOLLOWS

Unappropriated surplus at the beginning of the		
fiscal year		\$ 210,397 84
Current taxes, 1909	\$5,344,916 75	
Delinquent taxes	490,000 00	
Licenses	2,064,150 00	
Boiler and elevator inspections.....	20,030 00	
Building permits	32,583 00	
Collections on franchises	391,937 61	
Fines, fees and commissions.....	158,611 42	
Markets	38,199 57	
Recorder of Deeds	73,052 55	
State's portion of cost of assessing the revenue...	35,580 52	
All other sources	444,292 74	9,093,354 16
Total available for appropriations.....		\$9,303,752 00

The estimated increase in municipal revenue, based upon the increase of about \$9,000,000.00 in the assessed valuation of property and an increase of 2 cents in the tax rate for purely municipal purposes, will amount to approximately \$183,024.52, increase from all other sources is estimated at \$78,217.01, making a total estimated increase in revenue over last year's receipts of \$261,241.53. This increase, however, is more than offset by a decrease in the balance available at the beginning of the fiscal year of approximately \$300,000.00. At the opening of the fiscal year 1908 the balance in the treasury for municipal purposes was \$517,527.44. At the opening of the current year 1909 the balance amounted to \$210,397.84. The total revenue available for appropriations, according to the estimate, amounts to approximately \$9,303,752.00.

ESTIMATED EXPENSES FOR CURRENT YEAR.

When the statements of the various heads of departments setting forth their requirements for the year were summarized it was found that the total amounted to \$10,576,084.97, which is \$1,272,332.97 in excess of the estimated income, as shown in the following table:

Ordinance and Statute Obligations:

Hospital Fund	\$ 88,321 12
Police (requisition of the Board of Police Commissioners)	2,102,954 61 \$2,191,275 73

*General expenses incident to exercising the functions of a County
in its relation to the State:*

ADMINISTRATION OF JUSTICE—

Costs in misdemeanor cases.....\$	55,000	00	
Circuit Court, Circuit Court for Criminal Causes, Court of Criminal Correction and Pro- bate Court	211,771	91	
Justices of the Peace Courts....	95,442	75	
Jury Commissioner	23,150	00	
Jury and witness fees	70,000	00	
Jail	41,827	25	
Maintaining boys at the State Reform School	16,000	00	
Maintaining girls at the State In- dustrial Training School.....	2,700	00

Total available for appropriation	9,303,752 00
Deficiency	\$ 1,272,332 97

Confronted with the necessity of distributing appropriations and expenditures so as to keep safely within the resources available for municipal purposes, the heads of the several departments were consulted, with a view to bringing their estimates within available revenue and at the same time making such reduction as would least impair the service. In most cases they gave me their hearty co-operation. Careful consideration was given in the first place to the appropriations necessary to meet the fixed obligations of the city; secondly, to the absolutely necessary running expenses of the city; and, finally, to those improvements which are eminently desirable but not actually imperative. Ample provision was made in the estimates to meet the interest on the public debt and provide a sinking fund. The Water Works Revenue and the Harbor Funds are sufficient to meet the demands made upon those departments—and a sum sufficient to meet unforeseen emergencies has been reserved.

On December 1st next, \$675,000.00 city 3½% bonds will mature. The revenue reserved for sinking fund purposes will be amply sufficient to redeem this issue at maturity.

Many desirable and much-needed improvements are only partially provided for; such as sewer extension, collection of ashes, planting and care of street trees; park maintenance, public buildings, public baths, comfort stations, and many other urgent demands. These improvements, much to our regret, will have to await an increase in the available revenue or a decrease in the running expenses of the City Government. We hope by means of a close scrutiny of all appropriations and a careful observance on the part of the various departments of all expenditures, to be able within a year to provide funds for some of these urgent necessities.

The fiscal year of the city, according to the Charter (Article V., Section 48), is the third Tuesday in April "the opening of each stated session of the Assembly." The Comptroller is required at this time to submit his estimates of the "necessary appropriations to meet the wants of the current year." This means that every four years a Comptroller elected on the first Tuesday in April must determine upon his estimates for the fiscal year within two weeks after his election and submit them to the Municipal Assembly. Annual appropriations cannot be accurately made under such arrangements. Either the beginning of the fiscal year or the date of the election should be changed, so as to give a new official sufficient time to become at least slightly acquainted with the needs of the various departments, so that he can make a more intelligent estimate of the appropriations needed. This is a matter which should be called to the attention of the Board of Freeholders now engaged in framing a new Charter for the city.

I desire to take this opportunity to express my appreciation for the courtesy shown, and the valuable assistance rendered me, by my predecessor, the Hon. Jas. Y. Player.

Respectfully submitted,

B. J. TAUSSIG,

Comptroller.

CITY FINANCES.

Report of the Retiring Comptroller

OF THE

CITY OF ST. LOUIS

FOR FISCAL YEAR 1908-1909

(Year Ending April 12, 1909.)

SUBMITTED TO THE MUNICIPAL ASSEMBLY.

COMPTROLLER'S OFFICE, St. Louis, June 17, 1909.

To the Municipal Assembly of the City of St. Louis:

GENTLEMEN—In conformity with the requirements of Section 48, Article IV, of the Charter, I have the honor to submit the accompanying annual report on the condition of the City's finances at the close of the fiscal year ending April 12, 1909; and further, statements in detail showing, by various methods of classification, the main facts relating to the administration of the revenues for the past eight years; also, comparative statistical tabulations from 1887 to 1909, which will enable you to determine in a fairly satisfactory manner, after an impartial investigation, if the income of the city from all sources has been so distributed as to meet the needs for improvements and the enlargement and extension of departments, as occasion required.

The following statement shows, in a condensed form, the resources of the four revenue funds, the total of appropriations and disbursements from these funds and the balances in the Treasury at the close of each fiscal year for the past four years:

FUNDS.	Year End'g April 9, 1906.	Year End'g April 8, 1907.	Year End'g April 13, 1908.	Year End'g April 12, 1909.

*Now being charged to Municipal Revenue Fund.

You will note at the commencement of the fiscal year just closed that the balance in the Treasury to the credit of the Municipal Revenue Fund was \$70,922.62 less than the balance to the credit of the same fund at the beginning of the preceding year; also, that the total of balances and receipts, less transfers, was \$259,122.04 more than for the same period of the previous year. Taking into consideration, as we must, the serious financial disturbances which marked the year, the results of the year's collections by the various departments are extremely gratifying.

The Financial Transactions for the last fiscal year are classified, in the statement which follows, in conformity with the methods employed by the United States Bureau of the Census.

FINANCIAL TRANSACTIONS LAST FISCAL YEAR.

(For Classification as to Revenue and Special Funds,
see Statements A and B).

Total disbursements	15,276,197 10		
Balance in Treasury April 12, 1909			<u>\$9,425,284 87</u>

CONDITION OF THE TREASURY.

As is shown by the preceding statement, the balance in the Treasury at the end of the fiscal year, April 12, 1909, was \$9,425,284.87. To this amount is to be added for uncollected special tax bills for the opening, sprinkling and changing grades of streets, and for maintaining boulevards, \$294,361.80, making the total resources of the Treasury \$9,719,646.67. To be charged against this amount is the balance standing to the credit of special funds and accounts aggregating \$7,913,995.26. After deducting this amount from the resources of the Treasury, an unappropriated surplus of \$1,805,656.41 remains, belonging to the respective revenue funds, as follows:

Interest and public debt revenue.....	\$ 578,271 38
Municipal revenue	210,397 84
Water Works revenue	963,149 89
Harbor Fund	53,832 30
	<u>\$1,805,651 41</u>

REVENUE AND APPROPRIATIONS.

The receipts of the revenue funds for the fiscal year ending April 12, 1909, including unappropriated balances, April 14, 1908, were as follows:

Interest and public debt revenue.....	\$ 2,198,219 33
Municipal revenue	9,700,523 90
Water Works revenue	2,734,218 85
Harbor Fund	153,197 24
	\$14,786,159 32

The appropriations and transfers from the revenue funds during the fiscal year were as follows:

FROM INTEREST AND PUBLIC DEBT

Unappropriated balances belong- ing to the revenue funds.....		\$	1,805,651 41

BONDED DEBT.

At the close of the fiscal year ending April 13, 1908, the bonded debt of the City was \$18,344,178.30. During the year just closed there was sold at par and accrued interest, \$9,000.00 of the \$1,083,000.00 3.65% Water Works Renewal Bonds remaining unsold April 8, 1908. The looked-for improvement in the money conditions has not resulted in enabling the City to market these 3.65's at a price which would justify their disposal.

Pursuant to advertisement, sealed proposals were received at the office of the Mayor on June 10, 1908, for the purchase of \$5,500,000.00 4% twenty-year Public Buildings and Public Improvements Bonds, to be dated July 1, 1908, and to be issued for the purpose of carrying out the various public undertakings authorized by Ordinance 22,674, approved November 26, 1906. The bonds were sold to local investors at an average rate of \$1,016,073 per \$1,000.00 bond, netting \$88,403.50 premium.

From the foregoing it will be seen that the Bonded Debt was increased during the year \$5,509,000.00, making the total outstanding bonded debt of the City April 12, 1909, \$23,853,178.30, the annual interest charges on which was \$794,539.88, an average rate of 3.793%.

SINKING FUND

During the year just closed there was placed to the credit of the Sinking Funds \$913,994.22—of this amount \$816,590.72 was derived from the revenue applicable to Sinking Fund purposes under authority of Charter and Ordinance provisions; \$88,403.50 was premium received from sale of \$5,500,000.00 Public Buildings and Public Improvements Bonds, \$9,000.00 was received from sale of that amount of 3.65% Water Bonds, and was placed, temporarily, in Water Works Sinking Fund, pending an adjustment of this particular Sinking Fund, depending on the sale of \$1,074,000.00 3.65% Water Works Renewal Bonds, issued in renewal of Water Bonds maturing, dated June 25, 1907. Through inability to dispose of these bonds we were obliged to borrow from the other Sinking Funds \$890,850.25 in order to redeem that amount of these maturing bonds. We hope to dispose of these unsold Water Bonds during this year and thus be enabled to adjust the balances due the various Sinking Fund accounts.

On account of the large sum advanced to Water Works Sinking Fund, the previous fiscal year, the \$300,000.00 due it annually from Water Works Revenue was not credited to the Fund the present fiscal year.

CONCLUSION

At the close of eight consecutive years of service as Comptroller the hope is entertained that the management of the department will prove of some real and lasting benefit to the community at large. Unceasing endeavor has been made by everyone in the department with that end in view.

Credit is neither taken or desired for any part of the work which may appear meritorious—except in so far as might redound to the honor of the administration of which the department was a part.

Nor are any apologies offered, for best efforts were invariably directed to perfecting every detail of the work in recognition of the requirements of the oath of office and in sincere appreciation of the honor conferred by elections to the office.

To members of the Municipal Assembly, executive officials, heads of departments and my assistants and the clerical force in my department—and most particularly to the Chief Executive of the City and the City Counselor and his assistants—who have rendered me valuable aid on many occasions, grateful acknowledgment is here made of my obligations.

Respectfully submitted,

(Signature)

JAMES Y. PLAYER,
Comptroller.

SPECIAL ACCOUNTS.

(Accounts for which appropriations are made for special purposes. These special appropriations stand until the object is accomplished, when the unexpended balance is transferred to the fund from which the appropriation was made. Accounts of the various appropriations are condensed according to their general purposes. By the term "appropriation," whenever it occurs, is meant the net amount, after transferring unappropriated balances set apart for the general purpose out of the revenues of the fiscal year, 1908-1909.)

CITY AUDITOR'S ANNUAL REPORT

FOR THE
Fiscal Year Ending April 12th, 1909

CITY AUDITOR'S OFFICE,

ST. LOUIS, JUNE 1st, 1909.

To the Honorable, the Municipal Assembly of the City of St. Louis:

GENTLEMEN:—In compliance with the provisions of the City Charter, I have the Honor to submit herewith my report of the business of this office for the fiscal year ending April 12th, 1909.

Very respectfully,

W. R. HODGES,

City Auditor.

CITY AUDITOR'S ANNUAL REPORT

For the Fiscal Year Ending April 12th, 1909.

RECEIPTS.

TREASURER, Dr.

	40.82		40.82	
Total trackage, United Railways Co.....	342.65	7.90	350.55	19.06

The Central Traction Company of St. Louis was incorporated March 11th, 1898.

Its name was changed to United Railways Co. of St. Louis, July 8, 1899.

By ordinance No. 19,352, vetoed by His Honor, the Mayor, April 8, 1898, but passed by the Municipal Assembly over his veto April 12, 1898, the Central Traction Company of St. Louis was authorized to acquire and convey by lease, purchase or sale its own property and franchises, or the property and franchises of other street railway companies in the City of St. Louis and to operate the same.

After acquisition of all the other street railway companies, excepting the Fourth Street and Arsenal Railway Company, and the St. Louis and Suburban Railway Co. System, the property was leased to the St. Louis Transit Company, incorporated March 6, 1899, and was to expire April 1, 1909, but the lease was relinquished and the property reverted back to the United Railways Company in October, 1904, by which it is now operated.

Since the 1st of January, 1907, the United Railways Company operates also the St. Louis and Suburban Railway System which was acquired by purchase in October, 1906.

In the suit of the City against the Fourth Street and Arsenal Railway Company (quo-warranto proceedings), the suit has been decided in favor of the City, but the proceedings have not been made public yet.

List of Dentists who have registered in this office from April 14th, 1908, to April 12th, 1909, in compliance with the Act of the Legislature approved February 20, 1883.

ANNUAL REPORT
OF THE
Law Department of the City of St. Louis
FOR THE
Fiscal Year Ending April 12th, 1909.

HON. FREDERICK H. KREISMANN,
Mayor City St. Louis.

Sir:—I have the honor to transmit to you the 32nd Annual Report of the Law Department of the City of St. Louis for the fiscal year ending April 12th, 1909.

One Hundred and Seven written opinions have been rendered during this fiscal year, upon requests of the various officials and departments, and the Department has performed an unusual amount of office work not requiring written advice.

The following is a tabular statement of all the cases in court, together with a detailed statement of each case pending during the fiscal year.

Respectfully,
CHAS. W. BATES,
City Counsellor.

TABULATED STATEMENT OF CASES IN COURT.

Totals.....	200	164	364	137	227

SUPREME COURT OF THE UNITED STATES.

1016 United Railways Co. and St. Louis Transit Co., appellees, vs. City of St. Louis, appellant. Injunction to restrain the City from asserting or enforcing Ordinance 21087, which said ordinance provides, among other things, for the imposition of a tax of one mill for each cash passenger carried. This cause comes to this Court on appeal from a decree of perpetual injunction against appellant (defendant). May 18, 1908, cause was reversed, and on November 5, 1908, the bill was dismissed at complainant's (appellees here) cost. Pending on appellees' motion to modify decree.

- 1039 St. Louis and Suburban Railway Co., appellee, vs. City of St. Louis, Appellant. Injunction to restrain the City from asserting or enforcing Ordinance 21087, which said ordinance provides, among other things, for the imposition of a tax of one mill for each cash passenger carried. This cause comes to this Court on appeal from a decree of perpetual injunction against appellant (defendant). May 18, 1908, cause was reversed and on November 5, 1908, the bill was dismissed at complainant's (appellee here) costs. Disposed of.
- 1040 St. Louis and Meramec River Railroad Co., appellee, vs. City of St. Louis, appellant. Injunction to restrain the City from asserting or enforcing Ordinance 21087, which said ordinance provides, among other things, for the imposition of a tax of one mill for each cash passenger carried. This cause comes to this Court on appeal from a decree of perpetual injunction against Appellant (defendant). May 18, 1908, cause was reversed, and on November 5, 1908, the bill was dismissed at complainant's (appellees here) cost. Disposed of.

UNITED STATES CIRCUIT COURT OF APPEALS, EIGHTH CIRCUIT.

- 1062 Solomon W. Johnson, plaintiff in error, vs. City of St. Louis, defendant in error. Action for \$20,000.00 damages for injury to building numbered 1008-10 Locust Street alleged to have been caused by the City's contractor excavating in an alley along the west side of said building for sewer purposes. Cause comes to this Court on plaintiff's petition for writ of error to the United States Circuit Court. Said writ of error was allowed April 5, 1908. Pending.
- 1287 Samuel F. Hauser, Jr., et al. vs. City of St. Louis. Action to recover one-fifth interest in the property on which the Union Market is situated and to quiet title to same. Cause comes to this Court on appeal from an order of the U. S. Circuit Court for the Eastern Division of the Eastern District of Missouri dismissing complainants' bill. On January 14, 1909, submitted on briefs without oral argument. Pending.

UNITED STATES CIRCUIT COURT, EASTERN DIVISION, EASTERN DISTRICT OF MISSOURI.

- 1144 City of St. Louis vs. Kern Incandescent Gas Light Company and The National Surety Company. Action on bond for \$200,000.00 for breach of contract for City lighting. Pending.
- 1165 Chicago House Wrecking Co. vs. City of St. Louis. Injunction to restrain defendant City from removing sewer pipes, drains, etc., from the site of the Louisiana Purchase Exposition in Forest Park. Pending.
- 1287 Samuel F. Hauser, Jr., et al. vs. City of St. Louis. Action to recover one-fifth interest in the property on which the Union Market is situated and to quiet title to same. April 23, 1908, demurrer to plaintiffs' amended bill filed and sustained. June 9, 1908, complainant declined to plead further. Decree entered dismissing bill and appeal granted complainant to the U. S. Circuit Court of Appeals, where cause is now pending.
- 1355 Lafayette Ward vs. National Fire Proofing Co. and City of St. Louis, et al. Action for \$15,000.00 damages for personal injuries received by being struck with a falling iron bar while passing on sidewalk in front of building on Washington Avenue between 16th and 17th Streets. This cause was originally brought to the City Circuit Court, but was removed to this Court on petition by defendant Fire Proofing Company. On April 3, 1908, motion to remand back to the City Circuit Court was filed, and on May 11th, 1908, said motion to remand was sustained, the cause being eventually dismissed as to defendant City. Disposed of.

SUPREME COURT OF MISSOURI.

- 400 John C. Heman vs. City of St. Louis. Action on account, for \$5,073.68, for extra work claimed to be due for laying granitoid sidewalks under annual contract with City. Appealed from judgment of the Circuit Court of the City of St. Louis confirming report of Referee, whose finding was in favor of plaintiff and against the City in the sum of \$6,071.15, which judgment was affirmed by this Court July 3rd, 1908. Disposed of.
- 547 State of Missouri at the relation and to the use of the City of St. Louis vs. John M. Dieterle and Edward W. Dieterle. Action on bond to collect fees not returned to the City Treasury by Robert Lindsey, Constable Ninth District. On appeal from judgment of the Circuit Court confirming the report of the Referee, whose finding was in favor of the defendants. Pending.
- 577 City of St. Louis vs. William M. Anderson, Andrew Anderson and The United States Fidelity & Guaranty Company. Action on bond to recover difference between contract price for construction of DeHodiamont sewer and the actual cost of same under contract of re-letting. On appeal from judgment of the Circuit Court in favor of defendants. Pending.
- 662 Flanagan Milling Co. vs. City of St. Louis. Action for \$25,000.00 damages to plaintiff's milling property on Third Street near Geyer Avenue by alleged bursting and overflowing of Lesperance street sewer on July 24th, 1899. On appeal from judgment of the Circuit Court of St. Charles County in favor of defendant. Argued and submitted. Pending.
- 910 Daniel C. Clayton vs. City of St. Louis. Action of account for \$23,709.00 for salaries claimed to be due and unpaid for services of plaintiff and twenty other employees (his assignors) in the Street Department (Excavating Division). December 8, 1906, there was a judgment for defendant City on all counts. April 7, 1908, plaintiff's motion for a new trial overruled. On June 3, 1908, plaintiffs allowed an appeal to this Court. Pending.
- 951 Bridget McGrath and John J. McGrath vs. City of St. Louis, et al. Action for \$4500.00 damages to property caused by contractor in excavating for alley improvements. On appeal from order of Circuit Court setting aside a non-suit as to the City. December 15, 1908, reversed and remanded to the Circuit Court, where the cause is now pending.
- 960 James G. Hall vs. City of St. Louis. Action on five counts for salaries claimed to be due plaintiff and his assignors as Inspectors in the Sewer Department; (total amount, \$4,000.00). On appeal by plaintiff from an order of the Circuit Court overruling a motion to set aside non-suit. Pending.
- 1000 Harry Troll, Public Administrator in charge of the Estate of Murdock & Dickson vs. City of St. Louis, et al. Ejectment to recover property known as the Brazeau Reservation including certain streets and the public wharf therein. From the overruling of defendant City's motion to modify decree and motion in arrest the City was allowed an appeal to this Court. Plaintiff took cross-appeal. Pending.
- 1002 Con P. Curran Printing Co. vs. City of St. Louis. Action for \$6,375.00 for printing and binding Mayor's message and accompanying documents for the year 1901-2. From a judgment in favor of plaintiff in the Circuit Court defendant City took this appeal. On June 16, 1908, the judgment of the lower court was affirmed. Disposed of.

- 1005 Edwin F. Merritt vs. Kinloch Telephone Co. and City of St. Louis. Action for \$4450.00 for personal injuries received in falling into an excavation at Newstead Avenue and Lucky Street. Cause comes to this Court on appeal from Audrain County Circuit Court, where on February 7, 1905, judgment was rendered against both defendants for \$4000.00. On December 23, 1908, judgment of the lower Court was affirmed. Disposed of.
- 1008 City of St. Louis vs. Eagle Packet Co. Action for \$194.79 for wharfage dues. Cause comes to this court on appeal by defendant from a judgment in favor of plaintiff. On November 25, 1908, the judgment of the lower court was affirmed. Disposed of.
- 1011 Raymond Mohan, by next friend, vs. City of St. Louis, et al. Action for \$10,000.00 damages for personal injuries alleged to have been sustained in falling over old building material in alley alongside of Engine House at Easton and Leonard Avenues. Defendant appealed from an order of the Circuit Court setting aside a nonsuit. On February 25, 1909, this Court affirmed the order of the court below, which remands the cause back to the Circuit Court, where it is now pending.
- 1072 State ex rel St. Louis Transfer Co. vs. Clifford, License Collector. Mandamus to compel defendant to issue wagon licenses to relator and to test Section 1708 of the Municipal Code (Wide Tire Ordinance). Judgment in the Circuit Court for defendant. The relator appealed to this Court. On January 9, 1908, the case was argued and submitted. Pending.
- 1084 State ex rel Peter T. Barrett vs. Bernard Dierkes, Auditor. Mandamus to compel Auditor to audit and allow the warrant of relator for \$1855.00 for services, as attorney, rendered a committee of the House of Delegates appointed to investigate tax returns. Transferred to this Court from St. Louis Court of Appeals, where appeal had been taken from a judgment in favor of defendant. On November 25, 1908, the judgment of the lower court was affirmed. Disposed of.
- 1085 State ex rel William J. Gavigan vs. Dierkes, Auditor. Mandamus to compel Auditor to audit and allow warrant of relator for \$1060.00 for services as clerk rendered a committee of the House of Delegates appointed to investigate tax returns. Transferred from St. Louis Court of Appeals, where appeal had been taken from a judgment in favor of defendant. November 25, 1908, the judgment of the lower court was affirmed. Disposed of.
- 1091 City of St. Louis vs. The St. Louis & San Francisco R. R. Co. Suit on bond for defendant's pro rata share for building of viaduct over tracks at Kings Highway. On appeal from judgment in favor of plaintiff for \$17,507.50. Pending.
- 1095 Josephine Peltier vs. City of St. Louis. Action for \$10,000.00 damages for personal injuries received by being thrown from wagon at intersection of Euclid Avenue and Kings Highway by reason of the wheels of her wagon dropping into an alleged hole in the street. On appeal from judgment for plaintiff for \$1500.00. Pending.
- 1104 City of St. Louis vs. Herman Ruecking, et al. Action on bond for breach of contract. The cause comes to this Court on appeal by plaintiff from a judgment in favor of defendants. Pending.
- 1115 William K. Kavanaugh, Trustee, vs. City of St. Louis, et al. Injunction to restrain defendants from tearing up tracks and taking down poles and wires of the Fourth and Arsenal Street Railway. Cause comes to this Court on defendants' appeal from the judgment of the Circuit Court granting a perpetual injunction. February 25, 1909, the judgment of the lower court was affirmed, but cause was transferred to Court in Banc. Pending.

- 1121 J. E. Williams vs. City of St. Louis. Action for salary as Deputy Boiler Inspector. Plaintiff was non-suited in court below and appealed to this Court. On July 3, 1908, the judgment was reversed and remanded back to the Circuit Court, where, on November 16, 1908, a trial was had resulting in a judgment for plaintiff for \$628.33. Motion for a new trial filed. Stipulation to abide the result of the case of Gracey vs. City of St. Louis in the Supreme Court. Pending.
- 1122 J. E. Butterfield vs. City of St. Louis. Action for salary as Deputy Boiler Inspector. Plaintiff was non-suited in court below and appealed to this Court. On July 3, 1908, the judgment was reversed and remanded back to the Circuit Court, where, on November 16, 1908, a trial was had resulting in a judgment for plaintiff for \$700.00. Motion for new trial filed. Stipulation to abide the result of the case of Gracey vs. City of St. Louis in the Supreme Court. Pending.
- 1123 Philip Basse vs. City of St. Louis. Action for salary as Deputy Boiler Inspector. Plaintiff was non-suited in court below and appealed to this Court. On July 3, 1908, the judgment was reversed and remanded back to the Circuit Court, where, on November 16, 1908, a trial was had resulting in a judgment for plaintiff for \$700.00. Motion for a new trial filed. Stipulation to abide the result of the case of Gracey vs. City of St. Louis in the Supreme Court. Pending.
- 1124 James G. Gracey vs. City of St. Louis. Action for salary as Deputy Boiler Inspector. Plaintiff was non-suited in court below and appealed to this Court. On July 3, 1908, the judgment of the lower court was reversed and remanded back to the Circuit Court, where, on November 16, 1908, a trial was had resulting in a judgment for plaintiff for \$628.33. Motion for a new trial overruled and appeal allowed defendant to this Court, where the cause is now pending.
- 1164 City of St. Louis vs. Gust Cool. Writ of error to Court of Criminal Correction to review judgment in favor of defendant, charged with violation of the Wide Tire Ordinance. January 9, 1908, argued and submitted. Pending.
- 1166 City of St. Louis vs. St. Louis Blast Furnace Co., et al. Action for ejectment and \$5,000.00 damages. (Carondelet Tow-path case.) On appeal from a judgment in favor of defendants. Pending.
- 1168 City of St. Louis vs. Whitman Agricultural Co., et al. Action for ejectment and \$5,000.00 damages. (Carondelet Tow-path case.) On appeal from a judgment in favor of defendants. Pending.
- 1169 City of St. Louis vs. Frank Feuerbacher. Action for ejectment and \$5,000.00 damages. (Carondelet Tow-path case.) On appeal from a judgment in favor of defendant. Pending.
- 1172 Elizabeth Vonecky vs. City of St. Louis. Action for \$10,000.00 damages for personal injuries received by falling on a snow and ice covered sidewalk on Ewing Avenue between Locust Street and Washington Avenue. Plaintiff was non-suited in the court below and appealed to this Court. January 13, 1909, submitted on briefs. March 13, 1909, the judgment of the lower court was affirmed. Disposed of.
- 1183 H. W. and Eva A. Benton vs. City of St. Louis. Action for \$5000.00 damages for the death of their minor son, George, who was drowned in a sink hole on Bruno Avenue. On appeal from an order overruling motion to set aside non-suit. March 31, 1909, reversed and remanded back to the Circuit Court, where the cause is now pending.

- 1187 Giovanni Cottone vs. James Johnson (Captain of Police). Action for \$10,000.00 damages for false arrest and false imprisonment. Plaintiff appeals from a verdict and judgment in favor of defendant. Pending.
- 1204 John W. Peters et al. (Commissioners of the South Market) vs. City of St. Louis, et al. Injunction to restrain the tearing down of the market house at Broadway and Chouteau Avenue. On appeal from a judgment in favor of defendants. Pending.
- 1213 City of St. Louis vs. Mary E. Sessinghaus. Action on special assessment for opening alley in City Block 3604. On appeal by defendant from a decree in favor of plaintiff in court below. December 15, 1908, reversed and remanded back to the Circuit Court, where the cause is now pending.
- 1217 City of St. Louis vs. Caroline E. Calhoun, et al. Appealed from the judgment of the Circuit Court affirming award of damages made by Commissioners in a proceeding to open alley 1307. Argued and submitted. Pending.
- 1221 Catherine Cappelle vs. City of St. Louis. Action for \$5000.00 damages for personal injuries received by falling upon an alleged defective sidewalk at northwest corner of Broadway and Courtols Streets. From a judgment in favor of plaintiff and against defendant City for \$2,000.00 the defendant brings this appeal. Pending.
- 1225 Laclede-Christy Products Co. vs. City of St. Louis, et al. Injunction to restrain the City from opening up Sulphur Avenue through plaintiff's property. July 8, 1908, motion to dissolve injunction was overruled and decree entered in favor of plaintiff making the injunction permanent. Upon motion for a new trial being overruled, on January 27, 1909, the defendant City was allowed an appeal to this Court. Pending.
- 1227 James T. Roberts vs. Malcolm W. McDonald and City of St. Louis. Action for \$15,000.00 damages for personal injuries received by an alleged rotten tree near the northwest corner of Leffingwell and Lucas Avenues falling on plaintiff. From a verdict and judgment in favor of defendants plaintiff was allowed an appeal to this Court. Pending.
- 1231 City of St. Louis, plaintiff in error, vs. Henry Wortman, defendant in error. Writ of error to Court of Criminal Correction for violation of milk ordinance. June 6, 1908, judgment of the court below was affirmed. Disposed of.
- 1232 City of St. Louis, plaintiff in error, vs. William Klausmeier, defendant in error. Writ of error to Court of Criminal Correction for violation of milk ordinance. June 6, 1908, reversed. Disposed of.
- 1233 City of St. Louis, plaintiff in error, vs. Union Dairy Company, defendant in error. Writ of error to Court of Criminal Correction for violation of milk ordinance. June 6, 1908, reversed and remanded. Disposed of.
- 1234 City of St. Louis, plaintiff in error, vs. Thomas Dumont, defendant in error. Writ of error to Court of Criminal Correction for violation of ordinance. Pending.
- 1235 City of St. Louis, plaintiff in error, vs. Jesse Leon, defendant in error. Writ of error to Court of Criminal Correction for violation of Section 1454 of the Municipal Code. (Playing billiards for gain.) Pending.
- 1236 City of St. Louis, plaintiff in error, vs. Morris Newberger, defendant in error. Writ of error to Court of Criminal Correction for violation of ordinance. Pending.
- 1237 City of St. Louis, plaintiff in error, vs. Charles Heberer, defendant in error. Writ of error to Court of Criminal Correction for violation of ordinance. Pending.

- 1238 *City of St. Louis vs. Charles A. McCann, et al.* Appeal to this Court taken by respondents Bradley and Quinette from an order overruling motion for a new trial of exceptions to commissioners' report in the opening of McCausland Avenue. December 16, 1908, appeal dismissed and final judgment on commissioners' report entered in the Circuit Court. Disposed of.

ANNUAL REPORT
OF THE
Inspector of Boilers and Elevators and
Board of Engineers.
FOR THE
Fiscal Year Ending April 12th, 1909.

Office of the Inspector of Boilers and Elevators.

St. Louis, Mo., June 3rd, 1909.

HON. FREDERICK H. KREISMANN,
 Mayor City of St. Louis.

Dear Sir:—I have the honor to submit to you my annual report of the receipts and disbursements of this office for the past fiscal year ending April 12th, 1909, together with a statement of the services rendered by the Board of Engineers.

EXPENDITURES.

Pay Rolls, Inspector, Deputies and Clerks.....	\$12,520 97
Pay Rolls, Board of Engineers.....	688 00
Harness and Repairs.....	69 80
Stabling, Shoeing, etc.....	894 74
Apparatus and Repairs.....	120 15
Office Expenses, Furniture, etc.....	779 05
Car Tickets.....	275 00
Printing and Stationery.....	407 87
Total.....	\$15,753 58
Bills Unpaid at Beginning of Fiscal Year.....	15 75
Total.....	\$15,769 33

RECEIPTS.

Paid into Treasury, Acct. Boilers.....	\$10,690 00
Paid into Treasury, Acct. Elevators.....	9,229 00
Paid into Treasury, Acct. Examination Fees.....	658 00
Total.....	\$20,577 00
Expenses.....	\$15,769 33
Paid Treasury Over and Above Expenses.....	\$4,807 67

WORK DONE BY DEPARTMENT.

Numbers of Boilers Collected for.....	2138
Numbers of Boilers to be Collected for.....	118
Numbers of Boilers in City Institutions, Parks, Street Rollers, etc.....	74
Numbers of Elevators Collected for.....	9229
Numbers of Elevators to be Collected for.....	145
Numbers of Applicants Collected for.....	329

BOARD OF ENGINEERS.

Numbers of Licenses Renewed.....	1376
Numbers of Applicants for Licenses.....	329
Numbers of Applicants for Licenses, Rejected.....	132
Numbers of Applicants for Licenses, Passed.....	200
Numbers of Applicants for Licenses, not yet Examined.....	57
Numbers of Special Permits Issued.....	145

NOTE:—There were 60 applicants not yet examined at the beginning of this fiscal year. Some of these applicants did not finish their examination for various reasons and the remainder are being examined by the Board at the present time.

WARREN A. TYRRELL,
 Inspector of Boilers and Elevators.

GEO. KINGSLAND,
 Member of the Board of Engineers.

ANNUAL REPORT
OF THE
Superintendent of the Workhouse
FOR THE
Fiscal Year Ending April 12th, 1909.

HON. FREDERICK H. KREISMANN,
Mayor, City of St. Louis.

Sir:—In compliance with the provision of the Charter and ordinance governing the City of St. Louis, I have the honor to herewith submit this my annual report of the City Workhouse, together with a complete account of the appropriation made, and manner of its expenditure, and the necessary social and other statistics.

Finally, my suggestions for its betterment and improvement.

All of which is most respectfully submitted.

JAMES L. DAWSON,
Superintendent.

NEW CELL HOUSE.

On April 1st, 1908, there was in the City Treasury the sum of \$19,000.00 available for the erection of a New Cell House and an additional \$25,000.00 was appropriated in May, 1909, to complete the work, which is now under way. When completed we expect to have the most modern and up to date prison building in the country. The plans and specifications were by me exhibited at the Chicago meeting of the National Prison Association.

Our new building follows the general plan of the Chicago House of Correction, and combines all the new and modern ideas embraced in the Virginia State Prison of Richmond, Virginia, now nearing completion. In addition we have adapted all the best ideas used in the construction of the model prison buildings I have recently visited in the following cities: Detroit, Chicago, Minneapolis and also the up to date State Prison at Richmond, Virginia.

RELIGIOUS SERVICES.

During the two years of my experience in connection with the work of this Institution, I have tried to make a study of criminology in its various phases and to use this knowledge toward greater efficiency in my department and find that there is no more difficult branch of the work, than that of uplifting the moral status of the unfortunate who are committed to our care.

There is no regularly appointed Chaplain at this Institution, as is to be found in all well-regulated Institutions of the kind, in all the large Eastern cities.

We are fortunate, however, in this respect, in having regularly ordained clergymen, of different denominations in regular attendance at our Sunday services, who are all to be greatly commended for the zeal and energy with which they try, if possible, to effect the uplift and reformation of the men and women, gathered from the four quarters of the earth, each with disposition and character as widely different as can be imagined, alike only in that they have been convicted of some offence against society.

The purpose of our Sunday services is to effect, if possible, the reformation of our charges, lifting them to a higher state of morality, that they may go out from the Institution, better fitted to take their place as citizens and do their share of the world's work. Between the visiting clergymen, their associates in this religious work, and

myself, there is a very pleasant unity of purpose in formulating plans of work and directing our efforts, that the most good could be accomplished.

Although criminals are varied in character and individuality, we find two general classes:

The first is composed of those whose only occupation seems to be to violate the laws of the state, and whose term of imprisonment, no sooner ends than new crimes and misdemeanors, too often planned while in prison, again put them in restraint. This constitutes what might be called the chronic criminal class, and although not beyond the power of the gospel from the clerical view, they are hard to deal with, and cases of true reformation are seldom met with.

The second class which includes the greater part of first offenders are easier dealt with, and happily present a more hopeful indication that a permanent reformation is not only possible, but probable. Space forbids the mention of all the persons who have gladly lent their aid to this work in the past year but this part of my report would indeed be incomplete if I did not mention the following:

Right Reverend Bishop Tuttle (Episcopal) who is at all times interested in the uplift of the unfortunate, and who by his moral support and assistance, has and is, doing so much for the inmates of this Institution.

Reverend Arthur Britain, Mr. F. A. Fanning (Episcopal) and others associated with them.

Reverend Father Martin (Catholic) of St. Anthony's Church and Meremac Street Monastery.

Reverend T. H. Hagerty (Methodist) who for over thirty years has been in constant attendance at this Institution.

Reverend S. A. Bernard (Presbyterian) of the Home for the Friendless and Prisoners Aid Society.

The Queens Daughters (Catholic) an association of ladies who frequently visit the Institution.

Reverend L. Samuels (colored) and Mr. Griff H. Jones and their associates of the St. Louis Christian Willing Workers (undenominational).

CHAPEL.

Under this head I wish to say there is not even a semblance of a chapel within this Institution, but the present plans and specifications for the New Cell House in course of erection provide for a basement chapel of 650 seating capacity.

COOK, ASSISTANT COOK, ADDITIONAL GUARDS.

In last year's expenditures the largest item is one for \$42,500.60 for groceries and provisions. Under the ordinance no provision is made for the employment of a competent cook and assistant, through whose hands these provisions should pass, in at least the economy of the Institution.

In the past and at present this kitchen work has to be entrusted to the hands of such self-styled cooks as may be found among the prisoners. By reason of expiration of time, fines paid, etc., the prisoners are constantly changing and at the best have no interest in the Institution, their naturally careless, indifferent and improvident habits on the outside, prevail also on the inside.

On a moment's reflection it will be seen that a painstaking, competent cook and assistant would save in the course of a year's time, enough considering the large amount of provisions used, to amply justify the City in employing them.

In my estimate for this year's expenditures for salaries I asked for \$25,600.00, which the Honorable Comptroller deemed wisest to reduce to \$24,000.00. Had I received the additional \$1,660.00 it was my purpose to take up this matter with your Honor with a view of securing your approval to the appointment of a competent cook and assistant.

Owing to the greatly increased number of prisoners received here in excess of last year and former years; owing also to the fact that during the past few years steam derricks and drills have been installed and that the daily average number of commitments to this Institution are 25 per cent greater than ever before, makes it very necessary indeed that at least four additional guards be appointed to insure the safe guarding of the prisoners. Under Section 1777, Chapter 21 of Article 5, M. C. guards may be appointed by myself subject of course to the approval of the Mayor. I hope to take this up with you soon to see what can be done.

NIGHT SCHOOL.

In all well regulated Eastern institutions of this nature that I have had the opportunity to visit, I find that night schools have been introduced with excellent results.

The Alleghany County Workhouse of Pittsburg, Pa., for instance, has a school with 80 desks always occupied during the school term. When a seat is vacated by discharge or otherwise it is immediately filled from a reserve list. About 75 per cent of the attendants of the school are foreigners, anxious to learn the English language, they are a diligent and very successful class of pupils. During the past year 175 persons were given the advantage of school instruction with an average attendance of 97% per cent of the enrollment, which is an indication of the interest taken by prisoners, as the attendance is voluntary.

Such a night school should be established in the St. Louis Workhouse without unnecessary delay.

ENTERTAINMENTS.

On the general principle that the influences that tend to the intellectual and moral improvement on the outside, may be relied upon to accomplish the same purpose within prison walls.

It would be well in my judgment to arrange for occasional entertainments during the winter months, such entertainments to be limited to lectures and musicals. The New Cell House, now in course of construction will have a basement chapel of 650 seating capacity, in which if it be deemed best, night schools and entertainments of the nature suggested may be established.

IMPROVEMENTS.

A new and modern cell house has been planned and is now in course of erection. This building is calculated to increase the cell capacity of the Institution by 250.

The addition of a new and modern mess hall and basement chapel will add to the improvement over present conditions.

The building will be of reinforced concrete, 3/16" steel plate, and ample provision has been made for ventilation, light and air.

OLD BUILDINGS.

The present buildings are very old, but are in first class repair, as we keep a large force of men constantly employed in repairing, whitening and painting buildings and fences. And the old cell house is kept in the best possible sanitary condition.

IMPROVEMENTS SUGGESTED.

The present over-crowded condition of the Institution does not permit the establishment of a hospital although it is one of our greatest necessities. At present we average about twelve patients at the City Hospital all the time. Prisoners who are taken suddenly and violently ill must be transferred from the comfortable indoors, no matter what the climatic condition might be, and then removed in an ambulance to the City Hospital, a distance of 25 blocks. We have no de-

partment for the observation of epileptic or insane prisoners, who are from time to time committed to our care. We should have an eye and ear clinic and a well equipped dispensary.

LIBRARY.

There is a great necessity of a library and the books could be secured from the discarded volumes of the City Hospital at little or no expense, but the present overcrowded condition will not permit space for the purpose.

CO-OPERATION.

The co-operation of the Street Department through its Superintendent, Mr. Travila, in the matter of furnishing valuable equipment for the quarry and assistance in other respects, has contributed very much to whatever success I may have had in the management of this Institution during the past year, and in this manner I wish to express my thanks.

JAMES L. DAWSON,
Superintendent City Workhouse.

HON. FREDERICK H. KREISMANN,
Mayor, City of St. Louis.

Sir:—In making an annual medical report of this Institution, the sanitary and prophylactic cleanliness of the buildings, grounds, and persons of the inmates must be taken into consideration, as well as the medical and surgical aspect of the situation.

As is both proper and necessary to the health of an institution of this character, the sanitary condition of the buildings, inside and out, must be of a high order and increasing efforts are made to keep things in spotless cleanliness. Besides the daily sweeping and scrubbing of all the buildings, a constant warfare with chemicals is waged against vermin of all kinds. The cells are white-washed frequently, and once a year at least a complete disinfection with burning sulphur is carried out.

All inmates are given a bath on admission with special disinfectants for the hair, and weekly thereafter.

The general health has been very good and with a daily population of 697 there have just been ten deaths in the past twelve months. There has been no outbreak or spread of a contagious disease in any sense of the word. Tuberculosis alone is responsible for 40 per cent of the mortality, and for a great deal of the morbidity as we have several inmates at present suffering from this malady. Next to this, venereal diseases occasion most sickness and incapacity, with accidents of all kinds probably occupying third place.

All seriously sick and injured prisoners are turned over to the Health Department and are not cared for on our grounds. For this reason I will not give any tabulated report of the various diseases and accidents which have prevailed in the past year.

This work of caring for the sick and injured should be done, and done properly at our own Institution. For this purpose we need urgently a well-equipped hospital. This is dependent on a new building on the grounds, as there seems no possibility of housing a hospital of any description in our present quarters, filled as they are to overflowing now. Along this line and following it out, I would suggest that more work of the specialties be done, particularly dental, aural and ocular. For this, special equipment is needed and a staff of visiting, or at least consulting, specialists.

This report cannot be concluded without an acknowledgment of the able and proficient help and suggestions of the superintendent and guards in carrying out the sanitary and medical work in which I have been engaged.

F. N. GORDON, M. D.,
Physician to Workhouse.

THE CITY WORKHOUSE.

SUPERINTENDENT'S ANNUAL REPORT
OF THE
St. Louis Industrial School
FOR THE
Fiscal Year Ending April 12, 1909.

St. Louis, Mo., April 12, 1909.

HON. FREDERICK H. KREISMANN,
Mayor, and the Board of Managers of the
St. Louis Industrial School.

Gentlemen:—In compliance with the City Charter, I herewith submit my Annual Report, as Superintendent of the St. Louis Industrial School, for the fiscal year ending April 12th, 1909, which includes the work accomplished and improvements made during the past year; also table showing the movements of the population and financial statement.

The health of the children has been very good, which is attributed to the plain but substantial diet, plenty of out-door exercise, regular habits and sanitary conditions in general; not one death having occurred during the past year, and only one during the past six years.

The regular public school course, from the kindergarten to the eighth grade is taught in our Grammer School.

On the day that the children arrive at the Institution, they are immediately placed in the School grade from which they came and on their release are given a transfer to the public school in the district in which they reside. Therefore, children who for various causes become wards of the City have the same opportunity of gaining an education as the more fortunate ones who have all the advantages that can be given them by well-to-do parents.

All the children under the age of fourteen years attend an all day session of six hours; all those over the age of fourteen years attend a half day session of four hours and are taught some useful trade or occupation the remaining half.

The boys are given instruction in Manual Training such as carpentry, shoemaking, painting, baking, machine shop, planing mill work, and gardening.

The girls are given instruction in Domestic Science, which includes cooking, sewing, and general housework.

The Boys Band composed of forty pieces gave a series of Concerts in the different public parks and play-grounds during the Summer months, and have a regular schedule of thirty-nine Concerts assigned them by the Park Commissioner for the present Summer.

The following improvements have been made during the past year:

Chapel Building refurnished with folding benches made by the boys in the Training School, to take the place of old chairs formerly in use.

A new double draw-plate oven installed in Bakery.

The Paint Shop, which formerly adjoined the Stable, has been moved to safer quarters and is now located in a detached building with plenty of light and ventilation, and is much less dangerous from fire.

The space left vacant by the removal of the Paint Shop has been added to the Stable, thereby providing ten large and roomy box stalls for the stock used in the Bakery Wagons and garden.

All the City Institutions were furnished with bread.

All the children of the School were provided with shoes and clothing made in our Shoe Shop and Tailor Shop.

Propagated about 50,000 plants in our greenhouses with which to beautify the lawns of the Industrial School and other City Institutions.

A large well ventilated library room is maintained on the first floor of the boys building, books being supplied by the Public Library, and is in charge of a competent librarian. The children are issued library tickets, and a list by the librarian from which to draw such books as they ought to read.

The Public Library wagon calls twice weekly to exchange books.

In conclusion would add the following:

Since the establishment of the Bakery, about four years ago, the City has been enabled to provide all the City Institutions with bread for approximately \$50,000.00 less per year than it would cost them to purchase this bread in the open market.

A great saving has been accomplished by manufacturing all the shoes and clothing worn by the children, keeping buildings and steam heating apparatus in general repair, but the prime object of having all the work done by the instructors and their classes, is to enable us to teach the boys the different trades, and habits of industry whereby they will be able to make an honest living after leaving the Institution.

It is a common impression that a boy who is sent to the Industrial School, is vicious, a menace to society and altogether unfit for the associations of his fellows.

The boy comes to the school with anger in his heart and prepared to stubbornly resist any attempt to correct him. He is taken in hand, and after a chat he begins to feel that his lot is not such a bad one, and when he has learned the work of the school his interest is aroused, the incorrigible becomes a manly boy, anything but vicious and with an ambition to do something that grows constantly.

A visitor to the school, who goes, as do most of persons, prepared to see bad boys locked up in cells or wandering about in a high walled inclosure with dull and sullen faces, is astonished, almost before he has taken a dozen steps inside the grounds, at the happiness and perfect order that prevail. He sees boys at work in the Bakery and Shops, he sees others at their studies in the school-rooms, others in the libraries and still others romping about in the playgrounds like real boyish boys. There is contentment on all faces and an enthusiastic ring in all voices that is altogether foreign in jails, penitentiaries and strong-barred cells.

Because a boy or girl is sent to this School, it should not be taken for granted that their whole time is taken up with work, for their schooling is taken care of as well as if they were outside the influence of the Institution, and more so, for many a boy and girl gets an education that would never be theirs but for the intervention of this School.

A full public school course, beginning with the first and ending with the eighth grade, is given to each inmate. The girls have their classes removed from those of the boys, and all are compelled to attend. Then when classes are over, and in some cases before classes, the boys and girls are taken into the workrooms and there receive instruction in practical things, preparing them for the time when the Industrial School days are over.

Every boy and girl in the Institution is learning something of a practical nature outside of their studies. However, that Jack may not become a dull boy nor Mary a dull girl, plenty of healthful recreation hours are provided, and so the boys and girls are not alone built up mentally and morally, but physically as well.

For the boys there is band practice, military drill and all sorts of games, and for the girls, dancing, music, fancy work and the libraries

for all. The study, work and recreation hours are so divided that nothing becomes monotonous—work, play and studies become a pleasure.

All the children are given religious instruction, Protestant and Catholic services being conducted in the Chapel at different hours every Sunday morning. A regular ordained priest holds Mass at 8 o'clock in the morning, and twenty odd ladies from the Queen's Daughters instruct the Catholic children in the catechism at 10:30 o'clock in the morning. For the Protestant children regular services are held and a number of Sunday school teachers from the various city churches instruct them in the International Sunday School Lesson.

Hereto attached is statement of movement of population and financial statement.

St. Louis, Mo., April 12, 1909.

The following is the financial statement of the St. Louis Industrial School for the fiscal year beginning April 1, 1908, and ending March 31st, 1909.

A. P. RICHARDSON,
Superintendent.

ANNUAL REPORT
OF THE
Commissioner of Supplies
FOR THE
Fiscal Year Ending April 12th, 1909.

St. Louis, Mo., April 13, 1909.

HON. FREDERICK H. KRIESMANN,
Mayor of the City of St. Louis, Mo.

Dear Sir:—In accordance with the requirements of Section 47, Article 4, New Charter, I have the honor to hand you, herewith, a tabulated report of the business of the office for the fiscal year ending the 12th inst.

By reference to Table No. 1, it will be seen that 12,098 requisitions were received and filed, and purchases under 11,387 of the above were made, vouchers for same being forwarded to the Auditor. Vouchers to cover the remaining requisitions could not be made for the reason that the invoices had not yet reached this office, or that the articles were intended for use during the new fiscal year and were not properly chargeable in this year's appropriation. The aggregate amount of purchases for the fiscal year 1908-1909 is \$1,193,850.72.

Table No. 2 is an exhibit of the items of Condemned Property sent to this department for sale, the proceeds of which, amounting to \$23,536.00, have been paid into the city treasury as per receipts on file in this office.

Table No. 3 is an exhibit of the items of Condemned Property sent to this department for sale, but finding where they could be used to better advantage were transferred to various other departments.

The estimated aggregate amount of transfers for the fiscal year 1908-1909 is \$7,552.90.

Respectfully submitted,

JNO. P. BOYCE,
Commissioner of Supplies.

ANNUAL REPORT
OF THE
Board of Commissioners of Penal and
Charitable Institutions
OF THE
CITY OF ST. LOUIS
1908-1909.

Office of Penal and Charitable Institutions,
St. Louis, July 22nd, 1909.

HON. FREDERICK H. KREISMANN,
Mayor City of St. Louis.

Sir:—Pursuant to the provisions of the Charter and Ordinances of the City of St. Louis, the undersigned Commissioners of Penal and Charitable Institutions, beg leave to submit herewith their report for the year of 1908-1909.

The Board has visited the various institutions within their jurisdiction and has given careful consideration to the general condition of each, and has from time to time submitted such suggestions for their improvement, as in their judgment seemed wise. The general conditions of all Charitable and Correctional Institutions are good.

At the Poor House were many improvements. The Hospital was in first-class condition and new base boards had been placed in most of the rooms which served the purpose of eliminating insects.

At the St. Louis Industrial School, there is not sufficient separation of dependents and incorrigibles. We instance the case of a young girl about 17 or 18 years of age, who was very backward in her studies and there was no means of instruction for cases of this kind. The girl was too old and too large to be placed in the class suitable to her intellect. The Board is of the opinion that special arrangements should be made at the Industrial School to give special instructions to backward and defective children.

The Work House having been built many years ago, its space is now too limited for the adequate care of its over crowded population, a condition that should not exist as we found from 10 to 14 inmates in one cell. We are pleased to state, however, that since our last report an ordinance was passed providing an additional cell house which will relieve the congestion.

At the City Hospital marked improvement is shown, \$800,000 having been set aside under the recent Bond issue which will be used for improvement and the erection of new buildings for the hospital. These additional buildings are greatly needed as the accommodations are inadequate for the many patients housed there.

We desire to express our thanks to the officers and employees at the various institutions who have been very courteous at all times, and we commend the good showing made under the existing conditions. The Board takes this occasion of calling attention of the Superintendents of the various institutions to Section 1719 of the Revised

Code, wherein it is required that institutions shall consult the Commissioners when desiring an appropriation other than that given annually, and that this section of the law has not been complied with. In all of the recent bills for construction, purchase of equipment, etc., the Board has not always been consulted.

During the last three or four years the Board has not been called upon for information by the Municipal Assembly, but is ready any time to respond to such request.

We assure you of most hearty co-operation in all steps that you may take for the betterment of the institutions.

Respectfully submitted,

W. H. McCLAIN,

President.

HARVEY L. CHRISTIE,

LEE SALE,

G. CRAMER.

Attest:

LOUIS C. HEHL,
Secretary.

Thirty-Second
ANNUAL REPORT
of the
Health Commissioner

For the Year Ending March 31st, 1909.

41ST ANNUAL REPORT OF THE DEPARTMENT.

H. WHEELER BOND, M. D.

I.**Health Department.****REPORT FOR THE FISCAL YEAR ENDING**

April 12, 1909.

St. Louis, June 22, 1909.

HON. FREDERICK H. KREISMANN,
 Mayor, City of St. Louis, Missouri.

Sir:—I have the honor to respectfully submit the thirty-second annual report of the Health Commissioner, which in conformity with the provisions of the City Charter embraces a comprehensive summary of the various operations of the Health Department for the fiscal year ending April 12, 1909.

General improvement in the efficiency of the work of every Division of the Department has been apparent throughout the year, and was made possible only by the unfailing support received from His Honor, the Mayor, in establishing and maintaining the merit system for all employees, along with the earnest and efficient devotion to duty by the various division heads.

The latter gentlemen have been permitted to select all the help employed in their respective divisions, but with the definite understanding that they were to be held responsible and accountable for the proper conduct of the institutions under their charge. The result has been gratifying in every particular, and is demonstrative of the wisdom of placing responsibility where it belongs.

The health of the city as shown by a comparison of population with mortality was even better than for the previous year, during which latter period a smaller death rate was recorded than in any preceding year in the history of the city.

The total number of recorded births for the year was 15,392, an increase of 1,200 over 1907-08.

This increase we believe to be due to both an increase in population and to more faithful returns being made by accoucheurs. The latter has been brought about by reason of a determined effort on the part of the Department to secure more accurate and prompt returns of all births.

The number of deaths from all causes during the year aggregated 9,987, a decrease of 68 as compared with the number for the year immediately preceding.

There were 10,546 cases of infectious diseases reported, which shows an increase of 1,979 over the same report for 1907-08.

Small-pox showed a decline as it has in the last few years, the total number amounting to only 51 in all, and six less than for the previous year.

Tuberculosis cases showed an increase of 99, the total number reported being 2,084. This increase was less than usual.

Upon an estimated population of 722,200 the death rate per thousand was 13.82 as against 13.92 for the preceding year.

It is interesting and gratifying to note the fact that the number of deaths, as well as the death rate, has been on the decline for not only the last but for some years past, and especially as the increase in the city's population during the last decade has been almost phenomenal.

The increase in the number of infectious diseases is explained by the fact that during the winter months an epidemic of measles prevailed. This epidemic was of a very mild type of the disease and by virtue of this fact the Department experienced great difficulty in enforcing quarantine regulations upon infected persons.

There was at the same time a very slight but inappreciable increase in the number of the other infectious diseases, excepting small-pox and cerebro-spinal fever.

The death rate from infectious diseases, however, was very low, barring tuberculosis, which fact should be considered with reference to the reduction in mortality from all causes.

As published in the last annual report of the Department, I desire to again ascribe the general healthfulness of the city to the constantly increasing efficiency of the sewer facilities, the gradual elimination of stagnant ponds and other disease breeding nuisances, the rapid progress being made in permanent street construction and cleaning, the purification of the water supply and the increased vigilance and energy with which the sanitary and quarantine laws are enforced.

The great decrease in diarrhoeal diseases, and especially typhoid fever, the latter of which has been reduced in the number of cases by two-thirds in the last five years, is directly due to the purification of the water supply and the consequent elimination of house filters, the great majority of which in addition to clarifying water acted as collectors and incubators as well as dispensers of disease producing bacteria.

The gradual but decided decrease in the number of small-pox cases that has been noted for several years past is attributable to the promptness with which each case is detected and isolated, and to the thoroughness with which the exposures have been immunized by vaccination. The fact that all public school children have been required to vaccinate for many years past has produced an immunity in a large percentage of the population, and is another reason for the appearance of so few cases. Could we but have compulsory vaccination small-pox would disappear at once and the community be relieved of the present necessity of maintaining a small-pox hospital.

During the year the question of the advisability of instituting a system of medical inspection of schools by the Health Department for the purpose of better control of contagious diseases was taken up with the Municipal Assembly and received much favorable consideration, and an ordinance providing for the same would no doubt have been enacted had not the School Board come to the front with the proposition to inaugurate a system of its own. This will be put into effect with the advent of the coming scholastic year, and if fully co-operative with the Health Department will not only accomplish the desired results along the lines of control of contagion amongst school children, but will also be of material aid to their ability for mental development by searching out previously undetected physical defects.

This move is, however, only the beginning and should be closely observed with the view of requiring, if effective, its establishment in all schools where large numbers of children are congregated together.

The city is very much in need of an infectious disease hospital. Every case of these various diseases that the city is now called upon to care for is treated in one building at the City Hospital known as the "Contagious Building," and it is manifestly impossible to properly isolate and protect patients suffering from one variety of disease from those suffering from another. Immediate steps should therefore be taken to provide at an early date a group of well separated hospital buildings, each to be used for the care of an individual class of infection only.

The individual reports of the ten divisions of the Department comprising the greater part of this report are comprehensive and fully descriptive of the work done by each. In directing your attention to them I shall in consequence refer only to such subjects as I deem to be of the greatest importance to be commented upon.

SANITARY DIVISION.

The discussion by the Assistant Health Commissioner, Dr. G. A. Jordan, of the subjects of contagious and infectious diseases, dairy and veterinary service, nuisances, groceries, bakeries, restaurants and meat markets, schools and school inspection, hospital inspection, meat inspection, inspection of cars and car sheds and fumigation and disinfection is concise and clear and covers well the most important points to be considered at this time. The bills now under consideration by the Municipal Assembly amending the contagious disease and hospital regulation ordinances, and the fly screening bill, will if enacted do much to aid the Department in its effort to control and limit infectious diseases.

The merit system of employing the officers and inspectors of this division has done much to encourage the men to more intelligent and efficient work, and I am quite sure that the personnel and capability of the division as it exists to-day has never before been equaled.

This is shown particularly by the marked success attained in securing the abatement of nearly all nuisances without the necessity of condemnation proceedings by the Board of Health, as well as the increased per-capita volume of work accomplished.

Marked increase in efficiency has been attained with the employment of the permanganate-formaldehyde method of disinfection after contagious disease and the cost of the same has been diminished two-thirds as compared with former methods.

The total volume of work of the division has been doubled within the last three years and it is with some degree of pride that I am enabled to state that it has been efficiently done without the necessity of increasing the number of persons employed.

DISPENSARY AND AMBULANCE DIVISIONS.

The report of this division shows a constant increase in the volume of work done by both the Central and five Branch Dispensaries, the total number of consultations amounting to 16,911 in excess of the previous year.

This increase is largely accounted for by the establishment of the two new Branch Dispensaries located at No. 4919 Easton and No. 907 Manchester Avenue. These dispensaries have supplied a long felt want in their respective localities, and repeated requests have been received from business organizations in the neighborhoods of all the branches to supply a third physician for each in order that they may be operable throughout the twenty-four hours. The latter has unfortunately been impossible owing to the limited appropriation for salaries. The great increase in the work of the Central Dispensary and the Tuberculosis Clinic located at the Old City Hall shows plainly the necessity for the employment of additional physicians and an assistant druggist in the near future. It is eminently advisable to establish special tuberculosis clinics in several different localities of the city as advised by the Tuberculosis Commission, but on account of the additional funds required this has so far been impossible.

The ambulance service covering the entire city is in its organization and efficiency a special pride of this division, and with the addition of the automobile ambulance now assured, and which is to be used for long emergency runs, will be unequalled by any similar service in the country.

To the vigilance and persistent activities of the vaccine corps of physicians is due the credit for the remarkable control and suppression of small-pox. The quarantine launch is still rendering valuable service to those unfortunates whom we are compelled to remove to the Small-pox Hospital for isolation and treatment.

The free administration of anti-diphtheritic and anti-tetanic sera to the poor suffering from diphtheria, and to those receiving injuries likely to bear tetanus infections, has saved so many lives that only the few who are in immediate touch with this work can have any accurate conception of the great value of the service.

CHEMICAL DIVISION.

Both the operating force and the general equipment of the Chemical Laboratory are adequate and highly efficient.

The number of milk inspectors is, however, too small, and on this account the proper surveillance of the milk supply is impossible.

This work should not be confined merely to the inspection of milk sold by the dairies, jobbers and venders of the city, but it is important that efficient inspection be extended to all sources of its supply. The volume of work done during the year has been increased, and the time is at hand when the functions of this division should be extended to the general analysis and control of the quality of all food products.

BACTERIOLOGICAL DIVISION.

The work of the Pathological and Bacteriological Laboratory during the year has not only been on the increase, but is constantly demonstrating its great value as both a diagnostic and research agent. The medical profession of the city has come to rely upon it for assistance otherwise unobtainable in their charitable work, and the importance and value of its Pasteur Department is generally conceded.

The equipment of the laboratory is of the first class, from its library to the most minute mechanical device, and upon the whole ranks amongst the most approved.

CITY HOSPITAL.

Relative to the volume and merit of the work of the City Hospital during the past year to the advantages and disadvantages presenting themselves in the accomplishment of the same, to the improvements made and those still necessary to the reasonable adjustment of proper conditions for the ensuing year, I take pleasure in referring you to the report of the Superintendent, which shows steady improvement in its already high decree of efficiency, and which is to be found further on under this cover.

As stated in my last report, the present group of buildings is inadequate for the proper care of the constantly increasing demands made upon the institution. During the year it has been the common misfortune of the architect for the long since authorized new buildings and myself to have devoted much valuable and unrequited time to the perfection of plans for the completion of this magnificent plant, but it is pleasing to note the apparent energy and earnestness with which the new President of the Board of Public Improvements has grasped the situation and is to all appearances endeavoring to push the work of construction.

It is to be devoutly hoped that the completion of the group may be accomplished within the shortest space of time, in which event the plant will provide ample space in satisfaction of all demands for some time to come, excepting those made by contagious disease, and will permit of the absorption of the Female Hospital as well.

Early in the year I was advised by the management of the St. Louis Training School for Nurses of its intention to sever its official connection with the Hospital.

Fortunately for the Hospital I was successful in making such adjustments as were sufficiently satisfactory to induce the school to continue its operations for at least a year longer, and I sincerely hope that they may find good reason to continue indefinitely.

As the result of the above stated notice immediate steps were taken for the erection of a suitable building for the housing of nurses, and although a year's time has elapsed since provision was made for the building, ground has not yet been broken for its erection.

I am advised, however, that its construction will be begun this summer.

FEMALE HOSPITAL.

The general condition of the Female Hospital continues much the same as that of the preceding year. The building though very old has been kept in good repair and some improvements made. The efficiency with which the work of the institution has been conducted is a credit to the Superintendent as well as the force under his command.

QUARANTINE.

About four years ago means were provided and authority given for the erection of a new fire-proof hospital at Quarantine. After two years of unaccountable delay work of construction was actually begun on this building in the spring of 1907. I was given to understand that the building would be completed and ready for occupancy early in the following winter. This information proved to be erroneous.

With the approach of spring of the last year I was again informed that the building might be used after the first of June, but it was explained that it would be impossible to put in operation the power plant until the fall of 1908. This meant no running water, no heat and no light being provided throughout the summer months. Being of the opinion, however, that the building could be used with advantage temporarily without these conveniences, I purchased out of the savings of the appropriations for Quarantine for that year a complete furnishing equipment for the hospital with the expectation of making practical use of them from that time on. This entire equipment is, sad to say, at the present time stored in the basement of the building without ever having been used for any purpose, and has been there since the day of its delivery.

The power plant was installed within reasonably expected time after the first delay, but the occupation of the hospital has been prohibitive by reason of the lack of a water-tight roof. As a result of the latter fact the ceiling, walls and floors of the three stories above the basement have been drenched with every rain and melting snow during the past twelve months, which has caused the plastering throughout the building to separate and fall from its position, and the attractive hard wood floors to warp and buckle out of useful shape. The total damage done to the building by this defective roofing is to be estimated in the sum of several thousands of dollars, but it is also to be sincerely hoped that its restoration and the ultimate completion of the building may be accomplished during his summer, in order that the plant may be finally put to practical usage.

INSANE ASYLUM.

With respect to any and all observations relative to the operations of this institution during the year, as well as suggestions for future improvements, I take the greatest pleasure in referring you to the masterly treatment of the subjects by the Superintendent, and which is to be found in the written portion of his report.

I have, however, this one piece of information to give, to-wit: that unless the additions to the Asylum are completed and assigned for occupancy with the utmost haste there will arise the necessity for providing an emergency branch to the institution.

This statement is evidenced by the fact that the insane division of the Poor House is filled to its limit, and the State Asylums, where we are boarding some 300 patients, have given notice that they are unable to care for any additional number.

POOR HOUSE.

It is with much pleasure that I am enabled to refer you also to the report of the Superintendent of the Poor House, which is in itself complete in every detail.

Too much credit cannot be given Mr. William Anderson for the many improvements he has accomplished.

FINANCIAL EXHIBIT.

APPROPRIATIONS, EXPENDITURES AND BALANCES FOR THE FISCAL YEAR 1908-1909.

	Appropriated	Expended	Balance
Board of Health and Commissioner.....	\$ 32,500.00	\$ 25,102.27	\$ 7,397.73
Bacteriological Division	13,970.00	11,539.57	2,430.43
City Chemist	16,660.00	14,861.76	1,798.24
City Dispensary	73,690.00	71,783.08	1,906.92
Branch Dispensaries	11,000.00	10,022.17	977.83

Dear Sir:—I beg to submit herewith summary of the work done by the clerical force of the Health Commissioner's office for the fiscal year ending April 12th, 1909, and to call especial attention to some figures and comparisons noted in compiling the above report. Notwithstanding the fact that the population of St. Louis has increased two hundred and twenty-two thousand (222,000) in the last seventeen years, the deaths for the year ending was 9,987, which is 228 deaths less than occurred seventeen years ago, or in the year 1892, when there were 10,225 deaths. The death rate was 13.82 per thousand for the year ending, which is the lowest death rate St. Louis has ever had since vital statistics were kept. The first record we have was in 1867,—42 years ago, when the population was 220,000, and the death rate 29.70. For the fiscal year 1908-1909, the population was estimated to be 722,200 and the death rate was 13.82 per thousand. The total number of births reported for the fiscal year was 15,392, which is an increase of 1,200 over the previous year. For the year ending there were 2,224 deaths of children under five years of age, the lowest number ever recorded in proportion to population. There were 430 deaths during the year 1908-1909 from contagious diseases.

The records of some previous years show the number of deaths from contagious diseases to have been 3,025.

Respectfully submitted,

H. M. EDMUNDS,

Clerk, Health Commissioner and Board of Health.

HON. H. WHEELER BOND,
Health Commissioner.

ABSTRACTS OF PROCEEDINGS OF THE BOARD.

On the regular meeting day of the Board, April 23rd, 1908, Dr. H. Wheeler Bond, Health Commissioner, submitted the following rules for the government of the Junior Assistant Physicians at the Female Hospital. After being corrected to read as follows, the rules were on motion, duly seconded, approved:

RULES GOVERNING JUNIOR ASSISTANT PHYSICIANS AT THE FEMALE HOSPITAL.

No. 1—Junior Assistant Physicians are expected to devote their entire time to Hospital work.

No. 2—No Junior shall absent himself from the Hospital more than 6 hours at any time without obtaining permission of the Superintendent.

No. 3—He shall register his name and that of his alternate together with the time of his departure and return in a book kept for that purpose in the main hall of the Hospital.

No. 4—The Junior will, with the exception of those in Division 3 and Division "O", serve in turn as officers of the day.

No. 5—The officer of the day shall remain within the Hospital the entire day on which he serves.

No. 6—He shall also serve in the capacity as an escort to visitors who have the permission of the Superintendent or Assistant Superintendent, to see the Hospital.

No. 7—As Officer of the Day he shall receive all new patients, examine them and make necessary entries in reception book, direct proper bath in the reception bath room and assign them in proper divisions. When in doubt as to the assignment of patients to the division or in cases of poisoning or suspected contagious disease, the Officer of the Day shall notify the Senior in charge of Division 1, who shall see the case in the Reception Room before it is assigned.

No. 8—The Officer of the Day shall decide whether patients are to be carried to the division on a stretcher or whether they shall walk.

No. 9—No patient, after the permit has reached the office, can be moved to another division without the formality of a transfer.

No. 10—No surgical operation shall be performed without consulting the Superintendent or in his absence the Assistant Superintendent.

No. 11—He shall examine and prescribe for the patient immediately upon her arrival on the division, or as soon thereafter as is possible.

No. 12—A complete history with diagnosis shall be written by him within 24 hours after patient has entered the division.

No. 13—All Juniors must be on their Divisions before 8:00 a. m.

No. 14—Morning orders shall be written by 9:00 a. m.; evening orders by 7:00 p. m.

No. 15—The Junior, on finishing his work on the Division must not loiter in the Hospital.

No. 16—Specimens for the laboratory shall, as a routine, be sent by 11:00 a. m., but Juniors serving in the Laboratory shall do emergency work of any kind sent them at any time.

No. 17—In the absence of both Laboratory Juniors, one of the Juniors in charge of Division 4 shall answer for same.

No. 18—All patients who do not show evidence of vaccination, must be vaccinated.

No. 19—Juniors are not allowed to give general anesthesia except by permission of the Superintendent, and under the supervision of a Senior Physician.

No. 20—To leave the Hospital between the hours of 8:00 a. m. and 12:00 m., permission must be obtained from the Superintendent through your Senior Physician.

No. 21—Juniors shall not issue letters or certificates regarding the condition of patients under their charge, but shall refer all such requests to the Superintendent's office.

No. 22—Juniors shall not let instruments out of Hospital and shall use economically materials entrusted to their disposition.

No. 23—Junior's rooms shall be subject to the same rules as the rest of the Hospital in regard to defacing walls or the destruction of furniture and as to order and quiet.

No. 24—Juniors in the Divisions shall complete all histories by proper notations and sign them before changing to new Divisions. And as a routine all histories must be noted every Saturday.

No. 25—If the nursing of any patient is neglected, the Junior is expected to politely notify the Head Nurse on his division of the conditions and if the same are not attended to, he is then expected to notify his Senior Physician.

No. 26—Juniors must make out their morning reports on the blanks for that purpose and have them in the hands of their Senior Physicians no later than 8:15 a. m.

No. 27—All obstetrical cases must be delivered under the direction of a Senior Physician.

No. 28—Histories must be taken according to the prescribed table found on history boards and all important histories must be noted daily. If the history is not satisfactory, it must be re-written.

No. 29—All histories of patients to be discharged or transferred must be properly noted and signed by the Division Juniors and Seniors.

No. 30—Three Junior Physicians must be in the hospital at all times.

The following divisions alternate:

Div. 1, with Old Ladies and Children.

Div. 2, with Division 3.

Div. 4, east with Division 4, west.

No. 31—When examining any of your patients in the Clinic Rooms you must have a nurse present at all times.

No. 32—When the diagnosis of insanity has been made positive by the Junior and Senior, the Junior will fill out the insanity paper in detail and get the Senior's approval, and then send it to the Morning Conference with your next Morning's Report.

No. 33—When a patient has been determined to be a fit subject for the Poor House, you will make out a Poor House card and send it to the Morning Conference with your next Morning's Report.

No. 34—No person, adult or infant, shall be admitted to the Hospital as a patient without Dispensary permit, except in cases of extreme emergency, and then only upon the order of the Superintendent or in his absence the Acting Superintendent.

No. 35—Smears of the vaginal secretions must be made at the first examination and sent to the Laboratory for bacteriological diagnosis. Smears of the lochia must be made on the 1st and 5th of the puerperium of all obstetrical cases, and sent to the Laboratory.

On the regular meeting day of the Board, May 28, 1908, the following communication from the Health Commissioner was read to the Board:

St. Louis, Mo., May 28, 1908.

HON. BOARD OF HEALTH,

HON. ROLLA WELLS,

Mayor and Presiding Officer.

Gentlemen:—I have the honor to submit for your approval the following appointments as Jr. Assistant Physicians at the City and Female Hospitals:

City Hospital: Dr. P. G. Hereford.
 " Roy Lee Gleason.
 " Rolla H. Henry.
 " Theo. C. Hempelman.
 " C. Walter Gaertner.
 " I. D. Kelley, Jr.
 " W. R. Hewitt.
 " W. K. Hale.
 " James S. Archibald.
 " H. McC. Young.
 " Arthur H. Juengel.
 " Randall S. Tilles.
 Female Hospital: Dr. Barnet Lemchen.
 " William H. Foster.

Very respectfully,

(Signed) H. WHEELER BOND,

Health Commissioner.

On motion, duly seconded, the rules were suspended, and the appointments of Junior Assistant Physicians at the City and Female Hospitals were confirmed.

On the regular meeting day of the Board, August 6th, 1908, the following communication addressed to the Health Commissioner was read, and on motion, duly seconded, the Board approved the transfer of the patients:

St. Louis, Mo., August 5, 1908.

H. WHEELER BOND, M. D.,
Health Commissioner.

Dear Sir:—Below please find the names of one hundred patients, (60 female and 40 male) for your approval, to be transferred from this institution to State Hospital No. 3, Nevada, Missouri:

FEMALE.

Ahern, Lizzie
Albrecht, Antoinette
Beenken, Sophie
Brisbois, Julia T.
Broeg, May E.
Carter, Susie
Cosby, Mary T.
Davis, Ella
Dally, Ella
DeHatre, Lillie
Dickenson, Mary
Dobson, Lucretta
Drees, Minnie
Emmett, Sidonia
Fahrenkamp, Sadie
Frick, Clara
Goedell, Pauline
Hines, Mary
Hyatt, Mary
Henry, Gertrude
Humphrey, Julia
Hession, Bridget
Hanrahan, Lizzie
Joyce, Mamie
Kenney, Mary E.
LaPoint, Maggie
Lanzis, Lena
Muehlbauer, Kate
Mottmueller, Emily
Moorman, Minerva
Moeves, Lena

MALE.

Beck, Aloys
Butler, Thos. Thurston
Connelly, James O.
Duffy, James J.
Drilling, Wm.
Fredericks, Henry
Frey, John W.
Fliser, Chas.
Gibbs, Wm. R.
Galvin, Grant
Gallagher, John
Hablutzel, Robert
Hubert, Fred
Ilovitz, Sam.
Keleher, Timothy
Kluger, Herman
Lane, Chas. M.
Landgraf, John A.
May, James F.
Nihill, Patrick

FEMALE.

Murphy, Rosa
Meyer, Louisa
Natoli, Sophia
Nybak, Anna
Nagel, Cora
Neubauer, Blanche
Prenzel, Pauline
Padget, Lilly
Reidy, Marie Katherine
Roseman, Mary
Rieke, Dora
Rohlfing, Eva M.
Rigney, Marcella
Smith, Jane
Stansbury, Susie
Spizel, Minnie
Sleber, Carrie
Sleber, Jennie
Schmidt, Caroline
Snowden, Kate
Saettele, Rose
Shatoo, Lena
Stoecker, Emma
Scheer, Catherine
Turner, Anna
Turner, Catherine
Voyard, Josephine
Westerheide, Fredericke
and Minnie Parker from the Insane
Division of the Poor House.

MALE.

Norling, Bertel
Probst, August
Rosenblatt, Leon
Reinschmidt, Frank I.
Repp, August
Stramp, Walter
Stock, Gustave E.
Sulise, Joseph
Scharfenberg, George
Shalkop, Charles
Schumacher, August
Schulte, John
Sinich, John
Schock, Wm. F.
Tela, Antonio
Tedder, Joe (Pleasant Harper)
Wallrapp, Frank
Waytus, Tom
Warner, Christ.
Williams, Robert T.

Sincerely yours,

(Signed) H. S. ATKINS,
Superintendent.

On the regular meeting day of the Board, September 3rd, 1908, the following communication from the St. Louis Provident Association, in relation to Miss Mary Merrell an insane, non-resident patient, confined in the Observation Ward at the City Hospital, was read, and on motion, duly seconded the Board ordered her returned to her home, Boston, Mass.

St. Louis, Mo., August 28, 1908.

DR. WINN,
Health Department,
City.

Dear Sir:—This will introduce Miss Mary Merrell, at present stopping at No. 3517 Olive Street. We have had correspondence with the Associated Charities of Boston, and with some friends of Miss Merrell's, and are convinced that Boston, or Charleston, a nearby town, is the home of Miss Merrell. The applicant gave evidence of deranged mental condition before she left Boston. Indeed, her reason for leaving Boston was that she feared being poisoned, and this fear incapacitated her for doing any kind of work there. She induced some friends and relatives to raise a fund for her of \$200.00 with which to start business here. It is quite evident that her friends wished to get rid of her. You will probably find that she is not capable of caring for herself and that she will become a public burden, and we feel that she does not belong to St. Louis, as she has been here only since the first of July.

She is very desirous of keeping her condition quiet. She does not wish the people where she is stopping to know that she has to ask for aid. I think that if you think it necessary to place her in the Observation Ward that it can be arranged through our Nurse, Mrs. Crane, who accompanies Miss Merrell, so that you would not have to send an ambulance to the house.

Thanking you in advance for the trouble you may take in behalf of this poor lady, I am,

Yours very truly,
ST. LOUIS PROVIDENT ASSOCIATION.
W. H. McClain, General Manager.

On the regular meeting day of the Board, November 25th, 1908, the following communication from the City Bacteriologist was read to the Board.

On motion, duly seconded, the appointment of Dr. A. D. Long, as Assistant City Bacteriologist was confirmed:

St. Louis, Mo., November 23, 1908.

To the Honorable Board of Health,
HON. ROLLA WELLS,
Mayor and Presiding Officer,
St. Louis, Mo.

Gentlemen:—Dr. J. P. Simonds has resigned the position of Assistant City Bacteriologist to accept the position of Bacteriologist for the Indiana State Board of Health, the same to be effective December 1st, 1908.

As his successor, I hereby appoint Dr. A. D. Long, subject to your approval. Dr. Long has been very highly recommended for this position by Dr. F. B. Mallory of the Harvard Medical College and the Boston City Hospital. Dr. Long is a graduate of the Harvard Medical School, and has had the advantage of European training, and is at present an assistant in the Pathological Department of the City Hospital. He would be able to assume the duties of the office December 1st, provided his appointment is approved by your honorable Board.

Respectfully submitted,
(Signed) D. L. HARRIS,
City Bacteriologist.

On the regular meeting day of the Board, October 29, 1908, the following communication from the Hon. Rolla Wells, Mayor, appointing Committees for the Board of Health was read, and on motion, duly seconded, ordered filed:

St. Louis, Mo., October 26, 1908.

To the Honorable Board of Health,
St. Louis, Mo.

Gentlemen:—I hereby appoint the following Committees for the Board of Health:

City and Female Hospitals—Dr. Harry McC. Johnson and Mr. H. A. Forman.

Insane Asylum, Poor House and Sanitary Office—Dr. Harry McC. Johnson and Mr. B. F. Gray, Jr.

Dispensary, Quarantine and Health Commissioner's Office—Mr. B. F. Gray, Jr. and Dr. John Young Brown.

Legislation and Rules—Mr. H. A. Forman and Dr. John Young Brown.

City Chemist's Office and Milk Inspection Division—Dr. John Young Brown and Dr. Harry McC. Johnson.

Bacteriological Division—Dr. John Young Brown and Mr. H. A. Forman.

Poor House Rules—Dr. Henry McC. Johnson and Mr. B. F. Gray, Jr.

Very truly,

(Signed) ROLLA WELLS,
Mayor.

On the regular meeting day of the Board, January 28th, 1909, Dr. H. Wheeler Bond, Health Commissioner, offered the following resolution, which on motion of Mr. Gray, duly seconded, was adopted:

January 28, 1909.

Whereas, in the opinion of the Board of Health it is necessary for the prevention of the spread of contagious and infectious diseases that all premises be fumigated that have been occupied by any person or persons suffering from tuberculosis, typhus fever, croup, cerebro-spinal fever, diphtheria, measles, small-pox, scarlatina, yellow fever and cholera.

Be It Resolved, that the Health Commissioner is hereby directed to cause to be fumigated any and all premises that have been occupied by any person or persons suffering from tuberculosis, typhus fever, croup, cerebro-spinal fever, diphtheria, measles, small-pox, scarlatina, yellow fever and cholera, when he has good and sufficient reasons to believe that such a person or persons suffering from any of said diseases, has or have fully recovered and are no longer capable of communicating the disease to others, or when any such person suffering from any of the said diseases shall have been removed from such premises.

On the regular meeting day of the Board, March 4th, 1909, the following communication addressed to the Health Commissioner, was read to the Board:

St. Louis, Mo., March 4, 1909.

DR. H. WHEELER BOND,
Health Commissioner.

Dear Sir:—I have the honor to hand you hereto attached application for permit under Ordinance No. 22,998, which I submit without recommendation:

201, 203, N. 12th St., by Dr. S. R. Chamlee, per Dr. E. H. Spooner.

Very truly yours,

(Signed) G. A. JORDAN,
Ass't. Health Commissioner.

Dr. G. A. Jordan, Assistant Health Commissioner, testified that Dr. S. R. Chamlee's license was revoked on September 12th, 1907, by the State Board of Health for method of treatment given at his institution and now pending appeal. That the present Superintendent, Dr. E. H. Spooner, gave his name to the officers of the Health Department as Dr. Ernest Howard, and only admitted his real identity when threatened with arrest for not being a licensed physician. Dr. E. H. Spooner stated to the Health Department officials that Dr. S. R. Chamlee had not been at the institution since December, 1907, and Dr. E. H. Spooner and Mr. Jones Parker (attorney for Dr. S. R. Chamlee) stated that Dr. E. H. Spooner had no authority for making application for the permit. After evidence produced and testimony heard, the Board, on motion, duly seconded, refused to grant the permit.

On the regular meeting day of the Board, April 1st, 1909, Dr. Peter Junghans made application to the Board of Health to take the internship examination to be held on April 5th, 1909. After evidence produced showing that he is not a citizen of the United States, the Board, on motion, duly seconded, approved a former ruling made by the Board, to wit:

Applications for examinations for internships are limited to citizens of the United States.

On the regular meeting days of the Board of Health, held during the fiscal year, beginning April 13th, 1908 to April 12th, 1909, the following named persons were ordered admitted to the Insane Asylum by the Board:

- April 16, 1908—Patrick Malloy, Bertha Detzel, Thomas R. Palmer, Henry B. Temmen, William Connell, Amelia Mueller.
- April 23, 1908—George J. Eberle, Charlotte Reid (Colored), John R. Klein, Lena Etzel, Antoinette Albrecht, John Masnica, Charles Just, Anna Haley.
- April 30, 1908—Jermiah F. Shea, Richard Fuegner, John Thomas, Ada Williams (Colored), Anthony Neunzerling, Ada M. Watts (Colored).
- May 7, 1908—Max Creil, Wm. Henry Henderson (Colored), Rosa Murphy, Margaret Armbruster, John Jones (Colored), Edward E. Allen, Sophie Beenken.
- May 14, 1908—William Irwin, Patrick Nihill, John J. Hagerty, Ella Martin (Colored), Fred Meyer, Andrew Belejik, Fay Kent Waller.
- May 21, 1908—George Goll, John Snider (Colored), Mose C. Howard (Colored), Mary Dickenson, James Glasiner, James Edward Mells, Leona Wolford (Colored), Lizzie Hanrahan.
- May 28, 1908—Geo. W. FitzRoy, Lena Blase, Susie Carter, Jane Smith, Ben Walter (Colored), William Flynn, James Leathers, Frank Manestar, Wortley G. Horrell.
- June 4, 1908—Annie Ten Broek, Louisa Meyer, Maggie Finch, Ethel Allen, Mitchell Davis (Colored), Sarah Wolff.
- June 11, 1908—Julia Hartnett, Marcella Rigney, Frank W. Tanner, Henry Palmer, Henry Wollman, Thomas Klukamp, Lloyd Bowen, George Dettleff.
- June 18, 1908—Theodore Klein, Herman Ezra Pitts, Mary Zulpo, Thos. H. McGuire, Frank Borden, Horace Tanner, Bridget Hession, Mary Boyer, Emma Bauser, Frank Mellin, Joe Tedder (Pleasant Harper).
- June 25, 1908—James Forsyth, Herman Dickhaner, Frank Jaeger, Barbara Tiskacek, Frank Minniti.
- July 2, 1908—Herman Kunz, Gustav Wirtz, Thomas Waytus, Sam Helovitz, Walter Springmeyer, Catherine Scheer, John Gailigan, F. W. Corey.
- July 9, 1908—Mary Eliza Maxton, Sarah Hill (Colored), Margaret Sommer, Hugh Powderly, George Abbey.
- July 16, 1908—George Heckemeyer, Augusta Soeding Bolle, Laura Franke, Charles Reiser, Viola Helm, Geo. Sherrell Phyfer, Elizabeth Lane, Minnie Magoon, Albine Wrnisch, Henry Anderson (Colored).
- July 23, 1908—Kate Hansen, Margaret C. Drasdau.
- July 30, 1908—Frank G. Boehm, Anna Egan, Wm. Joseph Sutter, John Blend, August Carlton, Mary Lansing, Claudia Askren, Katie Scott.
- August 6, 1908—Charlotta Stegemeyer, Samuel Tobin (Colored), Frederick Hermann, Robert Lee Brant, Moses Warga, Lena Rickley, Ada Barbee (Colored), Mary Rumel.
- August 13, 1908—Victor Wm. Harrison, Pauline Weinheimer, Mary McDonald, Joseph E. Koons, Edward A. Vaughan, Harry Feters, Ida Wolff, Bridget Reilly, Annie McMahon.
- August 20, 1908—Paul Buol, Carrie Hoffmeister, Barbara Kullmann, Eugene Vermont Olsen, Carl Pallien, William Ringeiser, Chas. St. John (Colored), Christopher H. Tranel.
- September 3, 1908—Mary E. Gordon, Edward J. Kaltenbach, John Lamb Minor, Amanda Meyer, Richard S. Warren.

- September 10, 1908—Stephen Pero, Jacob August Christman, Claude Frier.
- September 17, 1908—George Wilkes, Charles Henry Baurichter, William Minsler, Charles Sosnovec, Rose Lamversick, Josephine Hutchins, Mamie Roland, Nellie Cochran, August Luking.
- September 24, 1908—Emily E. Whitaker, Mrs. Florence W. New, Annie Kiel, Kate Glenzer, Mary Corridan, Valerno Tunon, John Newcomb, James Gass.
- October 1, 1908—Charles H. Wilson, Minnie Wodicka, Max Zillman, Chas. Doward, Joseph Greiser, Lena Burkhardt, John Connelly, Mary McCabe.
- October 8, 1908—Mary Keating, Henriette Leitner.
- October 15, 1908—Mary Luhmkühl, Annie Albert, John Nienstiedt, Mrs. Ella Bryant, Mrs. Della Irene Mumford, Fred H. C. Stegman, Frank Zaviel, Lillian Rickert Woehrmann.
- October 22, 1908—John H. Watchorn, Catherine E. Ostendorf, Mrs. Emma Teich, Mrs. Rosa Schoenbeck, Mrs. Annie Miller, Henry L. Tuemler, Sarah Blumfeldt.
- October 29, 1908—Elizabeth Schulze, Aurelia Gabriels, Roy Scott, Edwin Grundemeyer, William Kennedy, Ellen Carroll, Mollie Weltin.
- November 5, 1908—Joseph Benjamin Wilkins (Colored), Parthenia Johnson (Colored), Mrs. Ida May Eichler.
- November 12, 1908—Antonio Niarhos, John J. O'Brien, Elizabeth Albers, Carrie K. Hinsman, Margaret Sanguinette, Michael J. Fetcher, Armand Bouligny.
- November 19, 1908—Clara Gieselman, Nettie Wilson (Colored), Mrs. Robinson (Miss Rose Bryan), John J. Banks.
- November 25, 1908—Otto Mertz, Elizabeth Detert, Anna Heuermann, Gustave Sundberg, Benjamin Bartold, John Pisciotta, Anna Hoedinghau, Mrs. Minnie Scheerin, Susie Bowman.
- December 3, 1908—Minnie Wasem, William Williams (Colored), Ella Tossick, Riley C. Wallace, Elizabeth Fischbacher.
- December 10, 1908—Hugo Schade, Jr., Walter Sidney Jones, Jeremiah Sheehan, Jr., Margaret McEnroe, Mary Walsh, Mrs. Margaret Ella Clark, Minnie Hamilton.
- December 17, 1908—Louis Brugger, Walter Kron, Clara Ungar, James D. Carroll.
- December 24, 1908—Bertha Miesner, D. Daniel Angell, Marie Byrnes, Joseph Nash, Margaret Thier, Fred Krug, James H. Harris (Colored), Menato Zilli, Johanna Kirchhofer.
- December 31, 1908—Annie Stergeretch, Vincent Thums, Catherine Voelker, Sarah Fagan, Claudia Jackson (Colored), Gustave Kiel, Jacob Weiland, Eli Mirich, Elbert S. Carter, Minnie Ashbrook, Anna Rolf.
- January 7, 1909—Camille Golly, Emil John Beck.
- January 14, 1909—James P. Kennedy, James Joyce, J. M. Moore.
- January 21, 1909—Pauline Belk, Samuel Tobin (Colored), Paul Barnholzer, John F. Crabill, Conrad Schlemmer, Annie Newport, Frederick E. Kuehne, Mrs. Nellie Martin, John Riley, Cornelia Walker.
- January 28, 1909—Marx Frank, Margaret Lowenstein, Jeremiah Sheehan, Sr., Herman H. Weise, Joseph Peplawsky, Chas. A. Bridell.
- February 4, 1909—Joseph Delarber, Bridget McSharry, Edward Jacobs.
- February 11, 1909—Joseph Rutkosky, Bolder Lewis Wagner (Colored), Albert Mugford, John R. Coussens, John Carroll.
- February 18, 1909—Annie Kempe, Kate Prvor, Joseph Sanders (Colored), Robert Brearton, Blanche Brown, Wm. Cattrall, Edward House (Colored), John Phelan.
- February 25, 1909—Abraham Thomas (Colored), John Hannon, Harry A. Schroeder, Walter Saville (Colored).
- March 4, 1909—Linus Kelley, Louis Bergman, Xavier Doerer, Mildred Evans, Max Fogelman, Sarah Wolff, Mrs. Magdalena Kurtzeborn.

March 11, 1909—John Hauser, Catherine Craig, Andrew Robinson (Colored), Louisa Wiethar, Thomas O'Donnell, Grace Hogan, John King, William Cammack, Elizabeth L. Barrett.

March 18, 1909—Ben Trotter (Colored), Minnie Bradley, George W. Williams.

March 25, 1909—Louis Hirt, Ortel Williams, George Austin (Colored), Annie Geyer, Elizabeth Ferrenbach, Kate J. Yates, Gustave Bowen-kamp, Mary Berling, Charles Wilson, Joseph N. Brown (Colored).

April 1, 1909—Minnie Marchand, Ethel Gross, Andrew Fuller, Ross McCabe, Harry Kurth, Callie Alexander (Colored), William H. Greg-son.

April 8, 1909—Michael Connor, Oscar E. Layton, Albert McCleare (Colored), John Roach, Edward Hawkins (Colored), Maggie Kullo, Herman Koch.

On the regular meeting days of the Board of Health held during the fiscal year, beginning April 13th, 1908, ending April 12th, 1909, there were thirteen cases condemned as nuisances and detrimental to public health; no cases dismissed; and one case laid over.

**HOSPITALS AND OTHER INSTITUTIONS TO WHICH PERMITS
WERE GRANTED UNDER ORDINANCE No. 22,998, DURING
THE FISCAL YEAR, APRIL 1st, 1908, TO MARCH 31st, 1909.**

Allen Medical & Surgical Institute.
Alexian Brothers' Hospital.
Association Hospital.
Association Dispensary.
Anti-Narcotin Sanitarium.
American Medical College Dispensary.
Barnes' Dispensary.
Bethesda Hospital.
Bethesda Foundling Home.
Blind Girls' Industrial Home.
Bethesda Maternity Hospital.
Colored Hebron Home.
College of Physicians and Surgeons.
Christian Orphans' Home.
Clark's Sanitarium.
Centenary Hospital.
Chouteau Avenue Dispensary.
Christian Hospital.
Dodd's Hygean Home.
Electro Hygeanic Home Co.
Elleq Osborn Hospital.
Emergency Home.
Evangelical Deaconess Hospital.
Evening Dispensary for Women.
Episcopal Orphan's Home.
Frisco Hospital.
Frisco Dispensary.
Father Dunne's Newsboys' Home.
Finley Dispensary.
German General Protestant Orphans' Home.
German St. Vincent Orphan Asylum.
Girls' Industrial Home.
Holy Cross Mission Dispensary.
House of the Guardian Angel Hospital.
Homoeopathic Medical College Dispensary.
Haley Eye Infirmary.
Hebron Home.

Josephine Hospital.
Jones, A. H., Memorial Home.
Jefferson Hospital.
Jewish Dispensary.
Jefferson Avenue Sanitarium.
Jewish Hospital.
Keely Institute of St. Louis.
Kahn's Sanitarium.
Lutheran Hospital.
Laurie Sanitarium.
Maternity Home.
Missouri Pacific Hospital.
Missouri Pacific Hospital Dispensary.
Mechanico-Therapeutic Institute.
Methodist Orphans' Home.
Methodist Orphan Boys' Home.
Mission Free School.
Mayfield Sanitarium.
Mullanphy Orphanage.
Mothers' and Babies' Home.
Market Street Dispensary.
Missouri Baptist Sanitarium.
Martha Parsons Hospital.
O'Bar Sanitarium.
O'Fallon Dispensary.
Provident Hospital.
Protestant Hospital.
Rebekah Hospital.
St. John's Hospital.
St. John's Dispensary.
St. Louis Mullanphy Hospital.
St. Louis Orthopedic Hospital.
St. Louis Children's Free Hospital.
St. Mary's Infirmary.
St. Anthony's Hospital.
St. Ann's Lying-In Hospital.
St. Ann's Foundling Asylum.
St. Louis Baptist Hospital.
St. Luke's Hospital.
St. Louis Obstetric Dispensary.
St. Louis University Dispensary.
St. Louis Colored Orphan's Home.
Salvation Army Rescue Home.
Salvation Army Nursery.
St. Louis Skin & Cancer Hospital.
St. Louis Skin & Cancer Dispensary.
St. Joseph's Male Orphan Asylum.
St. Mary's Female Orphan Asylum.
Salvation Army Dispensary.
St. Louis Maternity Home.
Union Mission Home.
Vanderbeck's Infirmary.
White's Dispensary.
Washington University Hospital.
Washington University Dispensary.
Welfare Dispensary.
Drs. Lewright & Whiteners' Sanitarium.
L. C. McLean Orthopedic Sanitarium.

Hospitals and other institutions Filing Applications for Permits under Ordinance 22,998, which were rejected by the Board of Health, during the Fiscal Year, April 1st, 1908, to March 31st, 1909.

Missouri Sanitarium & Private Maternity Home (Dr. Ira C. Young).
Franklin Hospital (Dr. Smith Bruegel).

LIST OF REGISTERED PHYSICIANS AND MIDWIVES RECORDED DURING
THE FISCAL YEAR, 1908-1909.

III.

SANITARY DIVISION.

St. Louis, Mo., May 20, 1909.

DR. H. WHEELER BOND,
Health Commissioner.

Dear Sir:—I have the honor to submit, for your consideration, the following report of the work accomplished by the Sanitary Division of the Health Department for the fiscal year of 1908-1909, with such comments and suggestions as have occurred to me looking to more efficient service for the year to come.

Twenty-five statistical tables give the year's work in detail.

DEATHS AND DEATH RATE.

There were 9,987 deaths during the past year, a death rate of 13.82 per thousand.

CONTAGIOUS AND INFECTIOUS DISEASES.

Of the diseases recognized as being contagious or infectious, there has been an increase in diphtheria, scarlet fever, typhoid fever, measles and consumption and a decrease in small-pox and cerebro-spinal fever. Such increase, however, is no more than might reasonably be expected in considering the increase in population, with the exception of measles which became epidemic during the last few months of the year. It is to be regretted that a much better showing cannot be made along the lines of these diseases, but the handicap under which the department labors in this class of cases is practically insurmountable. If every case of this class could be controlled as they should be, the number of cases would be almost nothing, but so long as people fail to understand what are proper precautions, or understanding fail to heed, just so long will the number be formidable.

It seems to me that to any one who has labored along the line of the contagions, the fact must appeal that compulsory segregation is the only dependable method of control. This, of course is, at this time at least, impossible in the majority of our contagions and we must in lieu thereof institute and enforce to the extent of our ability what restrictions and safeguards we are able to secure.

The ordinance recently introduced in the Municipal Assembly in which the old ordinance for the control of these diseases is amended and additional power conferred, will, if made a law, be helpful in our labor along these lines.

The campaign of education and the tendency to confer power of regulation in the matter of consumption which has recently been taken up is commendable and will, after a time, show its advisability. It is extremely difficult to change any long standing condition and the complacency and indifference with which this disease has been regarded by the people has been such that time will be needed for a thorough awakening.

It appeals to me that there is one undoubted factor in the dissemination of many diseases, especially consumption and typhoid fever, which has too long been disregarded, and that is the house fly. From the knowledge we have of the causative agents in these diseases and the habits of the house fly it is indisputable that this insect can and does spread widely these two formidable diseases at least. The sputum of the consumptive and the excreta of the typhoid patient are both attractive to this insect and this, when taken into consideration with our knowledge of how busily he traverses all food which is exposed, easily explains his agency in the spread of disease. War should be made on him in his breeding places and screens should protect at least all food from his contamination.

A section of the ordinance previously mentioned covers this ground and it is to be hoped its protective provision in the matter of enforced screening of all places where food may be contaminated will be recognized.

The mosquito is another agent, but to my mind a far less formidable one, and fortunately the matter of screening also protects against this agency.

The continued campaign of segregation and vaccination in the matter of small-pox has kept this disease well in check, nearly all of the cases being those which were exposed outside of the city and coming here in the stage of incubation, or in the actual eruptive stage. At one time during the winter months it is known that two cases, in homeless men, spent the night in the old "holdover" of the Four Courts Building in the eruptive stage with some three hundred others without a resulting case so far as is known. This speaks highly for existing conditions in this city in the matter of vaccinal protection as such an occurrence could reasonably be expected to form the basis of an epidemic.

Cerebro-spinal fever has, while the cases have been few, shown, it seems to me, an inclination to be on the increase especially since October of last year. The diagnosis, however, in this disease is open somewhat to question in any case where spinal puncture is not resorted to and it may be that some of these cases were in reality some other form of meningitis. The promise held forth by the Flexner serum in this formidable affection seems well founded and when used in the incipency has borne out in many cases all that was hoped for it. A confirmation of this will mark a large stride forward in the combatting of disease.

The handling of measles is one of our most difficult problems. This disease, while exceedingly formidable in the very young and very old, is considered so insignificant by the population at large that no co-operation of any account can be had. This was shared largely by the medical profession I am afraid, but as a result of our constant efforts it seems now that they are realizing that this disease should be reported and protective measures instituted.

Scarlet fever, a most formidable affection, is often so mild as to escape recognition, and by reason of the return to school of a desquamating child or the remingling of such a child with others, epidemics are continually threatened. Parents do not seem to understand that a child who looks well and feels well can be a menace to others and as soon as the child is able to be up and about, the physician is continually importuned to report the contagion ended. Unfortunately too often such pressure is effective and children are reported well and fumigation asked while desquamation is still progressing. Under such conditions it is really remarkable that the cases are so few.

Your attention is directed to Tables No. 1 to No. 12 inclusive, which give detailed information of the contagious diseases.

DAIRY AND VETERINARY SERVICE.

The question of pure, clean milk from healthy cows must be admitted to be of paramount importance. No one article of food perhaps is so universally used. We may say, I believe, that it is used daily by every person in either its raw state or in combination in the preparation of food. In addition it is most widely used in the young and the sick, individuals of weak resistance, where contamination is easy and means disaster. Notwithstanding the multitude of reasons, which are without argument, why this one product should receive the most painstaking attention from every standpoint, the labor of securing pure milk has been and is to-day a most uphill task. It is gratifying, however to be able to say that progress is being made and at some not far distant day, I trust the people will awaken to the extreme importance of this question and, by demanding, secure a clean, pure, wholesome article.

Until that time the progress will necessarily be slow and financial considerations will outweigh considerations of the safeguarding of health.

For years and years the dairies of this city have been in a condition that has been appalling, but the labors of this department and the gradual awakening of the people has wrought an improvement until now they are in comparison, cleanly.

Dr. R. A. Kammerer, the department veterinarian, and the dairy inspectors report conditions improved over the preceding year; the cows have never before been so clean; dairymen who previously never cleaned their cows are now cleaning them daily. The high price offered has compelled the dairymen to use what is known as the balanced ration method and are feeding less swill and more by-products such as cotton seed bulbs, cotton seed meal, hominy gluten meal, etc., also more roughage such as alfalfa.

This change alone has eliminated many objectionable odors from the barns caused by souring or fermenting swill.

The question of ventilation of the cow barns is an important question difficult of regulation. During the winter months not one cow barn in the city is properly ventilated and in the majority the atmosphere is foul and vapor laden, in many so much so as to interfere with the proper inspection of cows. The moisture condenses on the ceiling and walls continually dripping on the cows and floors, a self-evident unhealthy surrounding, conducive of coughs and colds and to injuries from falls. The cubic feet of air space per cow is insufficient, 800 cubic feet at least is necessary for each animal and ventilation should be so arranged as to admit of frequent changes of the air.

Many of the barns and stables are poorly lighted, so poorly in some, as to make it impossible to inspect more than sixty per cent of the animals properly. In some sections they are so dark as to make it impossible to see that proper sanitation is carried out and that the cows are clean, especially the udders. Proper light and proper ventilation is essential to all animal life and both are essentially lacking in most dairies of this city.

Many of our dairymen would be glad I believe to wreck their present quarters and build proper buildings for the better conduction of their business, and it would seem that if we must have our dairies in the city, it would be well to allow them to do this rather than conduct them in quarters lacking in sanitary possibilities.

It has appealed to me that inasmuch as a large proportion of the city's milk is furnished from dairies out of town a more thorough knowledge should be had of the conditions of the dairies from which it comes. As it is, we labor to improve our local product while lacking control of the source of the major part of the supply. In my opinion we should have a corps of dairy inspectors for outside dairies, whose duty it would be to see that incoming milk is what it should be. While the majority of the product is now handled for final distribution in sealed bottles, this bottling and sealing is done largely at our so-called milk depots, places having no dairy but handling only outside milk shipped into the city. We have no knowledge of its handling before bottling. All milk should be bottled at the source of its production and there sealed. The more often it is handled, the less likely it is to be clean and free from contamination. One or two typhoid or tubercular laden flies can fall into a can of milk, with a possibility of untold harm, be strained out at the bottling depot, and nothing remains to warn of the danger.

I wish to call your attention to the improved relations which have been obtained between the dairymen and this department during the past year. It has always been, or at least for years, there has been between the producers of milk and this department, either open war or an armed truce, prosecutions were frequent, and there was always lack of co-operation. In the past year not one court case has been presented and the dairyman has been impressed with the fact that we want to help him and co-operate with him and not to fight him. In this way we have made much greater progress in eradicating evils and establishing reforms, and in accomplishing this I wish here to acknowledge

the valuable assistance of Mr. Korte and Mr. Staats, Presidents of the South and North St. Louis Dairymen's Associations respectively.

These gentlemen have co-operated with us and have been a great help as intermediaries between the department and their members. During the year our force of dairy inspectors was increased from two to four which has enabled us to make more frequent inspections. An increase of two Inspectors for dairies outside the city would be a helpful aid and is recommended.

Under the system of scoring we find an improvement of at least 60% since December, 1907, when the scoring system was introduced here. Cow lots are much cleaner, especially those with sewer connections that do not have to drain over the surface to a creek.

The scoring is done quarterly; the inspections made every ten to twelve days. The milk plants are, with few exceptions below what they should be in that they are mainly in cellars, without proper light and ventilation, although they are as well kept and cleanly as their location and construction will allow. Your attention is directed to tables No. 13 and No. 14.

NUISANCES.

Legally a nuisance is defined to be "anything that worketh hurt, inconvenience or damage."

While many other duties fall within the province of this division of the department, it is in the regulation of nuisances we are supposed essentially to deal. Fortunately experiences of the past have resulted in the establishing and defining, by ordinance, what are nuisances and under what conditions they are so legally recognized. The department has in the past directed its energies especially to certain recognized major nuisances and they are gradually and surely disappearing as a result.

The question of ponds for an instance has for years been a subject upon which much labor has been expended and has resulted in almost eradicating them within the city limits. A few remain and these are gradually disappearing. They are recognized as the breeding place of the mosquito and as such they should be abolished. The few remaining are almost without exception on property of non-residents who were impossible to reach in the way of service in notices to abate, but I am satisfied that a plan is now being worked out whereby this difficulty can be overcome and if I am correct in this and the courts sustain the stand I take, in another year the pond will be a thing of the past.

The same may be said of the weed nuisance and others where the same difficulty exists in abating and I believe the remedy will equally apply.

The vacant lots, of which there are many, is a condition in my opinion needing regulation. These lots are made the dumping ground of all manner of rubbish, tin cans, etc. This in itself cannot be declared a nuisance and abated unless some decaying material exists, but the cans, bottles, etc., gather rainwater which decomposes, and are also a favorite breeding place for the mosquito. There should be legislation compelling owners of vacant lots to keep them free from rubbish of any character and also to see that they are kept in a cleanly, slightly condition.

The open sewer-connected privy vault is, as always, a major nuisance and it seems a proposition almost insurmountable. It is self-evident that they are a menace to health and a nuisance in its most pronounced form, but they must be viewed also in this way: the privy vault was constructed because buildings which they serve were built when no sewer was available or before the establishment of modern sewer-connected plumbing. The sewer followed later and they were connected. Later follows the attempt to pass legislation to abolish the sewer-connected vault and to compel the installment of modern sewer-connected closets. If such a law was passed it would mena practical

confiscation of a large section of our down town buildings, or a proceeding equal to it, and I am satisfied that such a law would not be held to be constitutional. We must, I believe, control this question by rigidly enforcing proper cleaning and a law should be enacted forbidding the further construction of any privy vault in a district where a sewer is accessible, enforcing there the installation of water closets only.

I do not believe, however, any vault is to-day constructed where a water closet is possible. Even in the unsewered districts this desire to abandon the vault for the closet is daily evident in attempts to drain sewage into creeks, ravines or openings in the ground commonly known as sink holes. The vault then must be recognized, undesirable as it is, as the relic of a past necessity and dealt with accordingly.

As with the regulation of the dairies we have found a conference more beneficial than a prosecution and few cases are compelled to be sent for condemnation by either the Board of Health or the Police Court. Pointing out the objectionable condition and explaining the law is as a rule sufficient for the abatement to be made.

I intend this coming summer to wage especial war upon the manure heap, the breeding place of the house fly, and endeavor to have all manure moved within a week or have it so treated as to destroy the eggs deposited therein. The fly lays its egg in these deposits and a week is necessary for its development, so I reason if we can move it or treat it within that time, we can wage successful war upon the fly, which as I have before remarked, I consider an exceedingly dangerous insect.

GROCERIES, BAKERIES, RESTAURANTS AND MEAT MARKETS.

There has been a great improvement in the past year in these places, until within the last two years practically free from this department's supervision. This is especially noticeable in the restaurants and bakeries. The premises are more cleanly and the general sanitary conditions are much improved.

The provisions of the bill now pending providing for rigid screening of these places will be a marked benefit if enacted. Toilets in connection with these places are dangerous and should be abolished; the fly is attracted equally to filth and food and further comment along this line is needless. Tables No. 18, No. 19, No. 20 and No. 21 give this work in detail.

SCHOOLS AND SCHOOL INSPECTION.

Médical inspection and supervision of school children, long recognized as a most important measure, is about to be inaugurated. It was a question at first whether this department or the Board of Education was to supervise this work but the decision placed the matter in the hands of the Board of Education. A competitive examination is to be held and several physicians appointed. The matter is to be tried out on a small scale at first and later enlarged to embrace the inspection of all the schools.

That this matter has finally been inaugurated is gratifying for it means much to the children and much also to this department.

It has long been recognized that the school room is our most potent factor in the dissemination of the contagion of the eruptive fevers and these become formidable in number shortly after the opening and markedly diminish with the closing of the school term.

Recognizing this and endeavoring to combat it I secured a detail of two physicians during the past winter and put them to work on this problem so far as it could be done with so small a force. The district most affected was selected and all schools in that district asked to report all absentees of more than one day. These were visited and investigation made as to whether or not contagion was causing the absence. If such was found, the case was reported and quarantine re-

strictions instituted. Once the case is reported all other children are stopped from school and the case needs no further attention from us until all contagion is ended and it is ready for release. In this way we seek to prevent children entering the schools while contagious or while contagion exists in the family.

In order to exclude as few children as possible I also have inaugurated a system of inspection in children who have been exposed, have temporarily changed their residence and are still well. These children are allowed to attend on a daily certificate of the physician that they are free from any evidence of contagion.

When the schools open in the coming fall I shall make an earnest endeavor to catch these outbreaks in their incipiency in the different school districts, and, I believe, in this way a great deal can be done to cut down the cases of contagion. At that time a small force of physicians laboring conscientiously and systematically can, I believe, accomplish a great amount of good along this line, especially now when we may count on the co-operation of the physicians of the Board of Education.

HOSPITAL INSPECTION.

Aside from the matter of actual hospital supervision this subdivision has accomplished a large amount of most important work, such as the investigation of improperly reported births, illicit and objectionable advertising in the daily press and the apprehension and prosecution of illegal unlicensed practitioners who are constantly endeavoring under various guises, to prey upon a gullible public.

The matter of a full and correct registration of births is most important. Many of these are evidently faulty as to information, many are found unreported and occasionally we find fraudulent attempts to register a birth which has never occurred.

The objectionable and illicit advertisements have about disappeared under a vigorous campaign made against them by the department. Every advertisement which could be construed as open to suspicion has been thoroughly investigated.

Without the advertising column of the daily press the malpractitioner cannot thrive and the discontinuance of one means the practical elimination of the other.

During the year many persons were found practicing medicine illegally, either representing themselves as being duly authorized practitioners or claiming, and offering, to heal by various methods not in the line of the regular recognized practitioner.

Twenty-nine persons practicing without license were investigated; prosecutions instituted in twenty-seven cases and sixteen convictions secured with fines to the amount of two thousand, ninety-five (\$2,095) dollars as a result.

I consider the work done by this subdivision very valuable and will continue to carry out and improve upon it in every way possible. Your attention is directed to table No. 22 as setting forth this line of the work in detail.

MEAT INSPECTION.

The report of the meat inspection subdivision shows a decrease of 13,881 pounds of meat received at the city institutions, which, at the average price of \$.0721, means a saving of \$1,000.82 per month. This is attributed to three causes:

1. The merging of the Emergency Hospital with the City Hospital.
2. The quality of the meats received.
3. The rigid inspection at the institutions.

The inspectors are at the institutions at 7 A. M., daily, inspect the meat and ascertain that it is wholesome and up to contract in every particular.

As a result of rigid inspection, contractors are careful as to the quality of the meat sent and the rejections necessary have been much less than in previous years.

Meat shops and market places are in a more cleanly and sanitary condition and the condemnations here are also much less than in former years.

Your attention is directed to table No. 23 as giving this branch of the work in detail.

INSPECTION OF CARS AND CAR SHEDS.

Two inspectors are detailed to daily visit the car sheds and inspect the cars going into service and these men also are licensed as officers empowered to arrest for violation of the ordinances. In addition to their inspections, they ride the cars and enforce the prohibition of spitting in public places. Anyone who will compare the conditions of the floors of cars, sidewalks, theaters, etc., now with their condition of a few years ago must be impressed with the effectiveness of this work.

Unquestionably a large proportion of communicable diseases are transmitted by sputum, notably consumption and diphtheria, and I am sure the value of restraining its careless disposition is an efficient measure.

The men detailed for this work have rendered painstaking, efficient service. Table No. 24 details this work.

FUMIGATION AND DISINFECTION.

This very important branch of the service has, during the past year, maintained its high efficiency, and the work accomplished here I am sure will rank with the highest. The fumigation by the formaldehyde-permanganate of potassium method is being used, as formerly, by reason of its efficiency and safety. Notwithstanding the very great number of houses fumigated, complaints of any character are remarkably few. The only objection that close observation can sustain is the deposit of a dust as the result of the chemical action and as this is easily removed with a cloth, that objection is a minor one.

That this fumigation is effective is constantly being proven by placing in houses cultures of the disease for which the fumigation is being done. These cultures are grown on plates and exposed under various conditions and are invariably killed.

Perhaps the greatest gain in this method is in the amount of work a crew of men can do as compared with the older methods and the consequent economy. No fire being used makes it safe to leave a house after the charge is started and where formerly a crew spent the entire day on one house, they now do from four to six.

I cannot refrain from remarking the fact that while houses to the number of forty or more a day are turned over unreservedly to the men engaged, I have yet to hear the first complaint of any misconduct of any character. This is to me, and I am sure is to you, a source of pride and gratification and speaks volumes for the personnel of the men who are doing this work.

Disinfection in necessary conditions continues to be done, such as foul cellars, drains, ponds, etc., and the work as a whole has proven very satisfactory. Your attention is directed to tables No. 8, No. 9, No. 10, No. 11 and No. 12 which give the work in detail.

In conclusion I wish to thank you for the uniform support, consideration and courtesy which you have at all times extended me, and to acknowledge my appreciation of the conscientious, efficient work of those associated with me in this division of the department to whom is due, in a great measure, the credit of the large amount of good work accomplished during the year.

Very respectfully,

G. A. JORDAN,
Asst. Health Commissioner.

IV.

DISPENSARY DIVISION.

CHIEF PHYSICIAN AND STAFF.

C. D. Scott, Chief Dispensary Physician.

St. Louis, Mo., April 27, 1909.

H. WHEELER BOND, M. D.,
Health Commissioner,
City of St. Louis.

Dear Sir:—Permit me to submit for your consideration a brief report of the work of the Dispensary Division of the Health Department for the fiscal year 1908-1909, embracing, in addition to certain general considerations, a series of eleven tables setting forth graphically the scope and amount of work actually accomplished in each of the several branches. The tables speak for themselves, and will, I believe, need no elucidation.

In a general way, it may be said that a large amount of work has been accomplished by the various Dispensaries during the year, the total number of consultations held by the physicians on duty, exceeding that of the year previous by 16,911. This increase is to be accounted for by the establishment of two new Branch Dispensaries, increased care on the part of physicians, as evidenced by more frequent consultations, and in the natural increase of population. While the number of Dispensary consultations have thus materially increased, the same cannot be said of the total Hospital admissions, there being less than for the preceding year by 279. This increase is not peculiar to any one Dispensary, but is common to each of the five now in operation, showing that the demand for public medical aid is general in its increase throughout the city.

DISPENSARIES.

During the past year, two new Branch Dispensaries were opened at No. 4919 Easton Ave., and No. 907 Manchester Ave., thus covering a large portion of the city that had hitherto been without Dispensary or First Aid service. At each of these Ambulance Service is continuous throughout the twenty-four hours. Not long since it was found advisable to station a physician at Branch Dispensary No. 1, No. 3618 North Broadway, between the hours of 11:00 P. M. and 7:00 A. M., Dr. M. F. Kouri being appointed for that purpose. The amount of work that he has done since his appointment justifies the action fully; and it is my opinion that the remaining three Branch Dispensaries should have a continuous medical service as well, this night watch having at each of them been unfilled to the present time.

The Central Dispensary has during the past winter been equipped with a modern and thoroughly satisfactory dressing sterilizer, the old apparatus having been found inadequate for the purpose. It is my desire, at an early date, to install an apparatus for the heating of water, there being at the present time no means of securing hot water, but by resorting to the expedient of heating it in vessels.

The work having grown to its present proportions, I find that the services of an additional druggist will be required in order that our prescriptions may be properly prepared, and it is my intention to recommend to you the appointment of one of the immediate future.

AMBULANCE SERVICE.

This branch of the Division is one of which we may be justly proud, it being, according to the statements of unbiased and competent judges superior in point of effectiveness to that possessed by any other city in the United States. At the present time there are nineteen Ambulances in daily use, with a reserve of two. As announced to you in a recent communication, it is my earnest wish to secure one automobile Ambulance, for use in the long trips, and in cases of great emergency. The advantage of such a vehicle are known to yourself already, and I will here merely signify it as my sincere belief that there is, at the present time, no other need, involving anything like a similar outlay, that will equal this in practical value.

Several minor accidents have occurred during the year most of them having taken place during the absence of the driver from his team while attending the patient in doors or elsewhere. It would be a distinct advantage if the police were instructed to see to the placing of the patients in the Ambulance, thus allowing the driver to direct his attention solely to the management of his team. Such an arrangement would, I am sure, prevent many more or less severe accidents. This plan, as you are probably aware, has been found eminently satisfactory in the City of New York.

I also desire, at an early date this spring, to equip each Ambulance with a bell superior in quality, and more readily heard, than the one at present used, hoping thereby to diminish the danger of collisions.

VACCINATION AND INSPECTION SERVICE.

The number of small pox cases in the city this year has been somewhat less than for last year, there having been but forty-eight (48). In this connection, it may be mentioned that but four of these bore any mark of vaccination, and these four very faint scars. Of these cases, twenty-two were imported, and, indeed, gave rise to a large per cent of the remaining twenty-six. In this connection I would pause to remonstrate against the growing tendency observed in several states to do away with Isolation Hospitals for small pox. As soon as this country is sufficiently enlightened to possess a compulsory and uniform vaccination law throughout the States then small pox hospitals may and should be abolished; but until that probably remote period, it is in my opinion not far short of criminal to advocate the abandonment of these hospitals.

Of all persons vaccinated by the physicians of this Division during the year, including school children, the total is 11,993, 2,535 less than for the preceding year. The total number inspected shows an increase of 10,000 over the number inspected last year, with an excellent showing of good scars as the result of previous vaccinating campaigns.

ISOLATION WARD.

The Isolation Ward, as at present conducted, while an instrument of great good in the handling of the Quarantine diseases, leaves something to be desired, as respects its management. At the present time, while under the practical control of the Chief Dispensary Physician, it is nominally a branch of the Quarantine & Small Pox Hospital, and supported by its funds. The Superintendent of the Quarantine & Small Pox Hospital, therefore, finds himself in the somewhat unsatisfactory position of sponsor for an institution, the management of which he can know but little, and in whose regulation he has little voice, beyond the payment of its bills. I, therefore, recommend that steps be taken looking toward the establishment of this Ward as an integral part of the Dispensary Division, and supported from its funds, as being more just to the heads of both Divisions concerned.

CITY JAIL.

I desire to call attention again to the unsatisfactory system prevailing with regard to the medical service of the City Jail. The care of the health of the inmates of the City Jail, has for a number of years, all too long, been under the supervision of the Chief Dispensary Physician. Permit me here to express my belief that the institution should have no connection whatsoever with the Dispensary. The Work House, Industrial School and Poor House, etc., each has its especial physician, and I see no logical reason why the Jail should not also. The duties of the Chief Dispensary Physician have, of late years, become so manifold, that he is unable to attend these unfortunates, having, instead, to delegate this work to one of his assistants. It not infrequently happens, that an Assistant Dispensary Physician is called to the Jail at night, leaving the Dispensary service entirely uncovered, for a time more or less brief, thus seriously impairing its efficacy. I would earnestly recommend that this matter be taken up by the proper authorities, to the end that the position of Jail Physician be created and filled by one who can devote his entire time to that work.

In the matter of the hospital designed to be established at the City Jail, I would say that the necessary equipment has been purchased, and is at the present time in the rooms designed for its accommodation. Thus far, I have been unable to make any use of it, owing, apparently, to certain objections on the part of the Jail authorities. It is my belief that this hospital should be put in operation at the earliest possible moment, as, otherwise, the care of the sick confined there, is, of necessity, but unsatisfactory.

TUBERCULOSIS CLINIC.

The work at this Clinic is steadily growing in scope as shown by Table No. 9, the total volume of work being double that of the previous year. An important innovation during the year was the employment of a nurse to assist the physician in charge of the Clinic.

Arrangements have been effected whereby the services of a Laryngologist will be procured for this Clinic at an early date, insuring skilled treatment for those patients manifesting throat symptoms, of whom there are a considerable number.

The further growth of this department, will, in all probability, before a great while, require the services of an additional physician. At the present time the services of one, or probably two visiting nurses could be utilized to advantage, as those supported by the Society for the Prevention of Tuberculosis are not sufficient for the work.

ADMINISTRATION OF ANTITOXIN.

A consideration of Tables No. 7 and No. 8 show that this work has increased markedly within the year with respect both to Anti-Diphtheritic and Anti-Tetanic Serum, but particularly the former; an increase, due to some extent, at least to the more general knowledge throughout the medical profession as to the Department's willingness to supply these serums gratis to the needy poor.

CLINIC FOR THE TREATMENT OF VENEREAL DISEASES AND SYPHILIS.

As you are aware, it is my desire to place in operation in the near future a clinic for the special treatment of Venereal Diseases and Syphilis. As to the desirability of affording the large class of persons afflicted with venereal diseases proper treatment, both for their own sakes, and more particularly for the multitude of innocent persons who will otherwise become their victims, through no moral obliquity of their own, it is quite unnecessary to speak in a report of this sort. It is my conviction, that properly conducted, no other channel of activity carried on by this Division will be productive of results of equal importance. The Clinic will not be concerned with treatment merely, but will attempt, by means of advice and the distribution of printed matter to promote the prevalence of a wholesome knowledge of the painful consequences of the transgression of the precepts of morality, a branch of public education, all too long neglected, and, even now, for ill-advised reasons opposed by many. For this work the services of another physician will probably be necessary.

In conclusion, permit me to express to you my sincere thanks for your unvarying support and assistance in the many matters pertaining to the proper management of this Division, that have arisen throughout the course of the year; and also to my assistants in the work for their cheerful and efficient co-operation at all times.

Respectfully submitted,

C. D. SCOTT,

Chief Dispensary Physician.

V.

CHEMICAL DIVISION.

St. Louis Mo., April 27, 1909.

To the Honorable Board of Health,

HON. FRED H. KREISMANN,

Mayor and Presiding Officer.

Gentlemen:—I have the honor to submit the following report of the work conducted in the City Chemist's Office during the fiscal year 1908-1909.

Number of Analyses of Water.

From Tap, at City Chemist's Office	52
From St. Louis Water Works, Chain of Rocks.	
Intake	52
Conduit Chamber	52
From Cisterns for Sanitary Division	43
From Wells, for Sanitary Division	32
From Wells in Tower Grove Park	16
From Pond at Baden and Kenrick Streets	3
From Drain at Baden and Kenrick Streets	3
From Artesian Well	1
From Tank at Butler Bros., 18th & Olive Streets	1
From Well at Portland Cement Company	1
From River Des Peres and Tributaries	11
Distilled Water, used in the manufacture of Ice	1
Number of Analyses of Ice	1

NUMBER OF ANALYSES OF DAIRY PRODUCTS.

Samples taken by Inspectors from Wagons.	
Milk	1758
Skimmed-milk	1473
Cream	1887
Samples taken by Inspectors from Stores.	
Milk	61
Skimmed-milk	63
Cream	73
Samples submitted by St. Louis Pure Milk Commission.	
Milk	255
Samples submitted by City Institutions.	
Milk	72
Cream	1
Samples delivered at City Institutions.	
Milk	17
Samples submitted by Citizens.	
Milk	196
Skimmed-milk	1
Cream	42
Samples taken at Union Station as received from shippers	42
Number of Wagons inspected	2198
Number of Stores inspected	125
Number of Dairies inspected	178
Number of Milk Depots inspected	26
Number of Analyses, for Sanitary Division.	
Formaldehyde	21
Cresylic Acid	19
Disinfectant (Proprietary)	1
Preservatives of Meat	1
Meat, for Preservatives	5
Mixture of cold-storage eggs	1
Number of Analyses, for City Attorney.	
For identification of opium	1
Number of Analyses for Police Department.	
For identification of cocaine	56
For identification of alcohol	5
For identification of morphine	2
For identification of opium	1
For identification of chloroform, in tea	1
Toilet Cream	1
Number of Analyses on which prosecution for violation of milk ordinance were based	107
Number of Convictions	80
Number of Cases untied	4

STAFF AND EMPLOYEES.

Thos. A. Buckland	City Chemist.
Otto A. Daudt	Assistant City Chemist.
C. B. R. Fritz-William	Assistant City Chemist.
Seth E. Moody	Assistant Chemist.
E. A. Reder	Inspector.
John W. Hubbard	Inspector, to January 1, 1909.
Lincoln T. Baker	Inspector, from January 16, 1909.
Joseph F. Sondag	Clerk.
Ryland D. Rash	Assistant Clerk.
Chas. McKinney	Laboratory Cleaner.
James Mitchell	Water Collector.

FINANCES.

	Appropriation.	Expenditures.	Balances.
Salaries	\$12,160.00	\$12,119.52	\$ 40.48
Chemicals & Apparatus	700.00	430.80	269.20
Office Expenses	2,500.00	2,082.21	417.79
Equipment, etc	500.00	229.23	270.77
Horses & Vehicles	800.00	000.00	800.00
	\$16,660.00	\$14,861.76	\$1,798.24

DISPOSITION OF MILK CASES.

Fined Costs	29	Discharged	7
Fined \$5.00 and Costs	1	Continued Generally	6
Fined \$10.00 and Costs	8	Nolle Prossed	10
Fined \$25.00 and Costs	34	Untried	4
Fined \$50.00 and Costs	7		
Fined \$100.00 and Costs	1		107

WATER ANALYSES.

Analysis of the St. Louis water supply has been continued, weekly, samples being taken from the intake tower at the Chain of Rocks, the outlet basin of the reservoirs at the water works and tap in the City Chemist's Office.

The results of these analyses have been reported monthly to the Board of Health and to the Water Commissioner.

At the request of the Sanitary Division water from various wells and cisterns has been analyzed and when deemed unfit for domestic use condemnation of the source has been recommended.

At the request of the Board of Commissioners of Tower Grove Park an examination of the quality of water of 16 wells located in the park was made in co-operation with the City Bacteriologist.

For the purpose of determining the extent to which the River Des Peres is polluted with sewage analyses of eleven samples from this stream and tributaries were made for the Sewer Department, the City Bacteriologist co-operating.

A few other miscellaneous water analyses were made by direction of the Health Department.

MILK INSPECTION.

When the last annual report was presented appeal cases were pending in the Supreme Court of Missouri in which the conflict of sections of the Revised Code of St. Louis in regard to milk standards and the adulteration of milk with the "Adulteration of Foods and Drugs Act" and the "Dairy and Food Commissioner Act" were involved.

Attorneys for certain dairymen maintained that the acts of 1907 and 1909 repealed the milk ordinance of St. Louis. (Ordinance 20808.)

The city maintained that the ordinance was valid and operative notwithstanding the above-mentioned acts.

The Supreme Court handed down decisions in the pending cases as follows:

June 6, 1908, City of St. Louis vs. Wm. Klausmeier, 212 Mo. 724.

June 26, 1908, City of St. Louis vs. Wm. Klausmeier, 213 Mo. 119.

June 26, 1908, City of St. Louis vs. Hy. Wortmann, 213 Mo. 131.

June 26, 1908, City of St. Louis vs. Union Dairy Co. 213 Mo. 148.

The effect of these decisions, two of which were favorable and two unfavorable to the city, was to seriously impair the effectiveness of the ordinance and renders successful prosecution for sale of impure milk very difficult. To bring the ordinance in harmony with the state law the three ordinances following were on July 26th, 1908 introduced in the House of Delegates.

House Bill 302, "An Ordinance to amend Section 505, Article 5, Chapter 11, of the Revised Code of St. Louis, in relation to skimmed-milk, by striking out said section and inserting in lieu thereof a new section to be known by the same number."

House Bill 303, "An Ordinance to prohibit the sale, exposure for sale, exchange, delivery, disposition, transportation, conveying, carrying or with such intent having in his or her care, custody, control or possession of milk or cream having therein or containing any added substance which is poisonous or injurious to health, and to prescribe penalties to prevent such."

House Bill 342, "An Ordinance to prohibit the sale of milk and cream which are adulterated or misbranded within the meaning of this ordinance and prescribing penalties for violation thereof."

Two of these ordinances, 303 and 342, passed both houses and were approved by the Mayor on March 26th, 1909.

No. 302, relating to skimmed-milk, failed of passage, never having been reported by the Committee on Legislation of the House of Delegates.

As the standard for skim milk had been declared repealed in part by the Supreme Court and as the rest of the standard was of doubtful

validity the failure of the Municipal Assembly to pass House Bill 302 was a severe blow to milk inspection in this city.

The Legislature now in session has under consideration numerous bills relating to the subject of food and dairy inspection and among them several relating especially to milk and it is hoped that their efforts will result in legislation under which our Municipal Assembly will at once pass an effective ordinance.

It is the purpose of the City Chemist to prepare a new ordinance for introduction in the Municipal Assembly immediately after the adjournment of the Legislature when the limitations of the city's power in that direction are ascertained. Then with an effective state law and city ordinances in harmony with the same the state and city can co-operate very effectively in the cause of pure milk. As has been stated in previous reports much good has resulted from the enforcement of the imperfect ordinance so far as it was possible and with an inadequate force. While a few years ago the use of formaldehyde by shippers of milk as a preservative was almost universal it is now very uncommon. The use of other adulterants has markedly decreased. The accompanying tables show the quality of milk and cream as taken by the inspectors.

POLICE DEPARTMENT.

Sixty-six analyses were made for the police department, most of these being for the identification of cocaine in cases of criminal prosecution. Generally a conviction was had and much good has resulted in the curtailment of the sale of this drug to those addicted to this pernicious and degrading habit.

SANITARY DIVISION.

Disinfectants and other supplies have been regularly analyzed for this division.

Respectfully,

THOS. A. BUCKLAND,
City Chemist.

HON. H. WHEELER BOND,
Health Commissioner,
St. Louis.

Sir:—I herewith submit my annual report for the fiscal year ending April 12th, 1909.

A comparison of these tables with those of last year shows a substantial increase in the use of this laboratory by the physicians of the city.

During the year Dr. J. P. Simonds resigned to accept the position of State Bacteriologist of Indiana. Dr. A. D. Long was appointed his successor. Miss E. A. Watkins also resigned and Miss L. R. Moyle was appointed her successor.

I take pleasure in publicly expressing my appreciation to all of those in this Division for their faithful assistance. To you I gratefully acknowledge my indebtedness for your unfailing support and guidance.

Respectfully,
(Signed) D. L. HARRIS,
City Bacteriologist.

DR. H. WHEELER, BOND,
Health Commissioner,
City of St. Louis.

Dear Sir:—I have the honor to submit herewith the thirty-second annual report for the fiscal year ending April 12, 1909. As a part of the report are included seven tables summarizing the work and operations of the hospital in the various departments. In the last annual report of the hospital the institution and its workings were described more or less in detail, and it seems unnecessary to reiterate what was stated at that time.

The work of the hospital has progressed steadily and as rapidly as means and facilities would permit. The institution is crowded in every department and the demand for more room is urgent. In contemplation of the erection of new buildings and the consequent readjustment of affairs, it seems inadvisable to institute radical changes and an effort is being made to tide over the affairs of the institution until such improvements have been made so that a permanent and stable adjustment is possible. This state of unsettled conditions and unrest works to the detriment of the institution, and it is earnestly hoped that by united effort, work on the new buildings may be begun without delay so that more definite plans may be formulated.

The aim has been to interest every one connected with the institution in the welfare of the patient and the institution, and it is the general opinion that the patient has been receiving greater consideration than ever before. This has been made possible by the systematization of the work in the various departments, but more especially by the policy which the Health Commissioner and Board of Health have adopted in placing the appointments at the hospital on a nonpolitical basis and permitting the superintendent to have a voice in recommending applicants for the various positions. This policy has redounded to the good of the hospital and we trust that it may be continued and that the hospital appointments be kept free from political influence.

In controlling the work in the wards and looking after the needs and interests of the patients, it is essential that the nursing force be adequate. This is also essential for the general welfare of the nurses. In protecting their health and conserving their energies. From his own observation and by comparison and direct examination of similar work in institutions in other parts of the country, the Superintendent was convinced that the number of nurses at the hospital should be materially increased. The St. Louis Training School for Nurses, from which the nurses for the hospital are selected, for several adequate and sufficient reasons has found it impossible to supply the hospital with the required number of nurses, and the Health Commissioner with the aid of the Mayor and the Training School has found means of adjusting conditions until the city shall build a new nurses' home and until other arrangements as to management shall be made. We trust that the work on the new nurses' home may proceed without delay so that this very important feature of hospital work may be properly organized.

During the past two years the hospital authorities have been installing a regular staff of visiting physicians, and in the past year their number has been increased. Several meetings of the visiting staff have been held and it is hoped that by closer contact with the internes and a better understanding of the workings of the hospital the work in the institution may be made more efficient. Without active co-operation and a prime interest in hospital affairs the work of a visiting staff can avail but little.

The observation ward represents a distinct yet important phase of hospital work. The character of the work is of such a special nature and the complications arising are often so complex that specialists as part of the hospital staff should have direct responsibility of this department. The appointment of a competent alienist at a salary to per-

mit him to devote his entire time to looking after the class of cases coming to the observation ward would serve a distinct purpose in hospital work, but this regulation would require special ordinance enactment. At times also there are legal phases attending these cases which make the decision of a special commission very desirable.

During the past year the hospital has had a great deal to contend with in the handling of cases of tuberculosis and of infectious diseases. The time has come in this city when these two classes of disease should be treated in separate hospitals and independent of a general hospital. The isolation building on the present hospital grounds should be used only for cases of emergency and for isolation of cases of infectious diseases developing in the hospital. The treatment of infectious diseases as it pertains to the public at large is so important that special hospitals for the proper care of cases of infectious diseases and of tuberculosis should be established. The need is so urgent that this feature of hospital work should receive consideration at the earliest possible time and the prevailing crowded conditions remedied by the establishment of hospitals for infectious diseases and for tuberculosis.

The material improvements of the hospital consisted in the building of a spacious cellar for the storage of coal, the building of a garbage house, paving court in front of commissary department, building a watchman's house, sodding grounds around present buildings, equipping laundry with additional mangle, extractor and washing-machine, improving arrangements in store-rooms and clothesroom and in refurnishing the drug store. The capacity of the present ice-plant is insufficient for present needs, and measures for enlarging the output or the building of a large ice-plant are matters for immediate consideration.

In conclusion I wish to thank the members of the staff, my Assistants, Dr. Cleveland H. Shutt and Dr. Rodney J. Bunch, Miss Emma L. Warr, Superintendent of Nurses, and others associated with me in the hospital work for their kind co-operation.

Respectfully submitted,

WALTER C. G. KIRCHNER, M. D.,

Superintendent.

H. WHEELER BOND, M. D.,
 Health Commissioner.

Dear Sir:—In compliance with the City's Ordinance, I respectfully submit herewith the Fortieth Annual Report of this City's Insane Asylum, ending April 12th, 1909.

This year, in the annals of the Institution, is the most eventful one as it chronicles the inception of the Additional Buildings, East and West Wings, and an Isolated Building for the acute and disturbed insane. This commencement was made October 6th, 1908, without formalities, since when the construction has proceeded rather faster than expected as the weather conditions were favorable, and the work dispatched well both by the City and Contractor, until at the present date it is seemingly ahead of the scheduled time. Both Wings are being simultaneously constructed, and the brick work, stone work, iron construction and floor fire-proofing of Basement and Sub-basement are seemingly completed.

The building for acute insane is well under way, the work being finished up to the first floor. Though promised specifications and plans of the building by the President of the Board of Public Improvements, they have never been sent, so any opinion of the intended buildings must be formed on general information rather than specific, and any assistance I have or can render in an advisory way must be toward the general outlines, or on specified material. Some of the specific work has been taken up in this way, such as the hardware and plumbing fixtures. The class and quality of these are of the very highest, and far better and more modern than is found in Public Institutions, even better than I have seen in many of the best private sanitariums throughout the country. If the remainder of the new work is in parallel with this, this Institution will be second to none of the kind of this country. The most pleasant part is the cost of such institution, in consideration of the accommodations it will contain, to-wit:

It will afford room for 2000 patients and 300 employees requisite for their care; cost \$962,000. The remainder of the Million Dollar Issue was required and expended for architect fees, and the purchase of about twenty acres of adjoining land, but as the present contract calls only for East and West Wings to the Main Building, in conjunction with the above mentioned expenditures for fees, land, etc., the entire appropriation will be consumed, leaving no funds for the erection of buildings for heat and power plant with equipment, or for general kitchen, laundry, storeroom, employees dining room, cold storage plant, chapel, entertainment hall, superintendent's residence, and their equipments. Fortunately part of this insufficiency will be supplied through the kindness of the water department whose attention was called, a few months since, to the inadequate water pressure for fire protection for this Institution, Female Hospital and Poor House. In lieu of this, that department will erect and install a modern pumping station with stand pipe for fire protection to the neighboring three eleemosynary Institutions. This will be sufficiently large to house the equipment for the local Heating and Power Plant, and will, no doubt, be finished before the Main Buildings are in readiness, but in the mean time the heating equipment will be connected up with the Isolated Building in order to have that ready for service for the coming winter. As an adjunct to the Power Plant, an ice making plant should be installed, the capacity sufficient to supply the three institutions, for it is essential not only on the basis of convenience but on the basis of economics.

There should be no further delay in the other mentioned buildings. for without them the institution has no source of maintenance; the appropriation should be made at once and building begun. In their furnishings and equipment, more consideration should be given to plain, practical usefulness than to gaudy and costly luxurious appearances.

It is scarcely necessary to call attention to the necessity of any of these buildings, unless it be to those for a Chapel, Entertainment Hall and Superintendent's Residence. At first thought it might seem that these are unnecessary, but on mature reflection when one considers there will be 2000 patients and approximately 300 employees without any resource for worship, for on account of their continuous and confining employment they can not avail themselves of the churches in the city, and one can not but realize and deny they are barred from conditions

which are undeniably necessary, and at the same time afford them relief from much of their arduous, routine life. These unfortunates are not all Dements, the major portion are not. While I feel their emotions are not under as complete control as the more fortunate, yet they think, feel, enjoy and suffer much. Their realization of life is not severely changed. Only for them this Institution is destined as their life time home; for this reason, and many others, I cannot conceive of anything more essential to the welfare of the Institution than a suitable place for worship and entertainment.

As to the Superintendent's Residence, I feel sure that when the entire institution is completed, the necessity of it will be recognized.

Though several times promised, as mentioned above, I have never been able to get hold of specifications or general plans, but from indirect information, I fear there has been too little, if any, consideration given to the living quarters of the officials. While the present quarters of the Superintendent are ideal in many respects, they would be far from that when the Institution is finished, as the intended general elevator will pass through the largest and most used room in the Apartments, requiring all public passengers for the third floor to land and pass out through these private rooms, which is scarcely a reconcilable condition. In the new organization of the Institution, it would seem better to build a separate residence for the Superintendent, and use the present quarters for the Medical and Clerical forces. The present plans, I understand, intend their quarters to be on the Basement floor. Their quarters should be centralized at a central location, where they could render the most immediate service.

Again as in my report of last year, I wish to call especial attention to the increasing population of the Institution. The limit of accommodations is not far distant, as heretofore this excess has been relieved by either a transfer to the Insane Department of the Poor House, or to one of the State Institutions. During this closing fiscal year this has not been possible, as the building at the Poor House has been under fire-proofing construction, and the State Institutions have been filling up from their county resources. This present condition could have been obviated had the Insolated Building for the acute insane been completed. The immediate necessity of this building, I have emphasized for three years, and funds have been available for two years. Though the sufferance of the Institution was emphatically made known, this building was not begun until February. The responsibility of this delay must rest with the officials under whose order and supervision its construction was, as I am aware all efforts of the Honorable Mayor and yourself have been toward its speedy completion. At the present time, though under construction, there is nothing to indicate any hastening to completion, as seemingly it is secondary to other work when it should be finished first. Under the most favorable conditions, it can not be completed and equipped before the winter, if then.

The heretofore method of conduction of the Institution has been closely followed, and every opportunity taken advantage of to advance the welfare and comfort of the patients. With this principally in view, I have chosen what was deemed best of the practical and scientific, hoping to combine them into a happy unison. This method has shown many improvements, especially so in the placing of Lady Attendants in charge of the male insane. At present there are 181 male patients under the care of Lady Attendants. This has been one of the Institution's most beneficial changes, for no matter how efficient a man may be, he never attains the height of excellence in nursing possessed by a woman. These nurses accompany their patients in their daily walks and visits to the park, and it is not an unusual occurrence to see one nurse alone in charge of seventy-five patients. At the same time the general house-keeping and surroundings are neater and more home-like, and the atmosphere of conversation more guarded and cleaner. It has been so favorably received by both patients and nurses that I would advise

extending it further as the opportunity presents itself. Of course this system has its limits among the extreme violent and untidy classes, in charge of whom male attendants should be retained.

The intimate relationship between patients and friends existing prior to admission is being encouraged as much as possible, by privileging them to visit their homes, often alone, and encouraging return visits from their families, especially on Sunday afternoons during the summer months when lunch and picnicing parties can be seen promiscuously about the park. Several of the patients taking advantage of the Sunday privilege visit the resorts of pleasure, Shaw's Garden, Art Museum, Y. M. C. A., etc. For those who are not so fortunate as to be able to take advantage of such pleasures, many forms of entertainment have been featured, in addition to the many former ones, to-wit: A pair of up-to-date Bowling Alleys, bowling beginning in the afternoon, and lasting until ten o'clock in the evening; benefits, both mental and physical, can already be seen in the regulars, and as the season progresses efficiency is becoming marked, and we expect to have at least two teams in one of the City Leagues next year.

For the ladies, a Box Ball Alley was installed, proving an enjoyable diversion from their Concert, Piano Playing, etc. Recently an Edison Moving Picture Machine was purchased, films rented weekly, and shows given in connection with the regular weekly dances. It has proven the most interesting of all the intertainments as patients are now attending who for years have shown no interest in such pleasures, so with the daily drives through the city during the spring and summer months in the coach, the Institution has the principal entertainments of the day.

The general health of the patients remains good. Though there was a prevalence of pneumonia in the senile, the death rate shows low, the principal cause of death being general paresis. The latter disease is steadily on the increase, and the more terrible as it is always fatal. Special and original work is being done by the Assistant Physicians along pathological lines as to its specific etiology. While the Institution's statistics show a slight increase in the number of Tubercular patients, the number is small and not up to the normal percentage. The tabulation of the Movement of Population is very apt to mislead, as the recoveries are much less than is normally found in the usual statistical records. This is because the "temporarily recovered" are included in the "Improved", and those whose normal mental return is thought to be permanent are classified as "Recovered".

The work of the physicians, especially the Assistant Superintendent Dr. Geo. A. Johns, I wish especially to note, on account of the ethical and close attention which they have rendered. Their study and attention to patients have been both practical and scientific. Their pathological and microscopical, besides laboratory work, has been thorough and extensive, much better than was ever before rendered the Institution, as can be readily seen by reference to the tabulation of their respective work. The service throughout all the Departments has mostly been satisfactory, approving the method of advertising for employes and then selecting the best. On account of insufficient salaries for competent men, I have had some trouble in retaining male attendants.

The general condition of the Institution is such that I have recommended only one Special Appropriation, i. e., for two green houses. The inside of the building is neat, clean and nicely decorated, as the building has been painted throughout by the local painter.

I wish to express the appreciation of the patients to the Public Library for its thoughtful and kind contribution of at least seven hundred volumes of good reading matter, containing quite a number of the best volumes and works of fiction. These were distributed equally among the Halls, where they have and will render many enjoyable moments. Also to the number of private citizens who have contributed magazines, and to the Republic and Globe Democrat, who contribute a number of newspapers daily.

Changes in the Medical corps during the fiscal year have been as follows: Dr. F. L. Whelpley, Asst. Superintendent, resigned June 15th, 1908; Dr. Geo. A. Johns was promoted to the position of Asst. Superintendent, June 16th, 1908. Dr. Percy Newman appointed Asst. Physician June 4th, 1908; Dr. C. C. Nash, appointed Asst. Physician, June 15th, 1908, and resigned Nov. 30th, 1908. Dr. G. W. Flinn was appointed Asst. Physician Dec. 2nd, 1908.

FINANCIAL STATEMENT.

This year shows a total expenditure of \$113,656.72, as against \$108,402.40 of the year previous, an increase of \$5,254.32. This is due to the increase of salaries in the Engineer's Department, an additional Night Watch and an unexpected expenditure from Labor Material for main Delivery Road from Brannon Ave. to Engine Room—\$5,034.50. Deducting this from \$106,479.26, which is the total expenditure minus the amount spent in Special Appropriation and Unpaid Bills, shows an expenditure for actual maintenance of \$101,444.76, and in comparison with same expense, \$103,359.40, the year previous, will show a difference of \$1,914.64 less than the amount expended for actual maintenance of the year previous.

The average amount of patients per diem being 643.9, there would result a direct maintenance year per capita of \$165.36, monthly \$13.78 and daily \$0.453. The gross per capita, figured on the entire amount expended, \$113,656.72 shows \$176.51 yearly, \$14.71 monthly and \$0.484 daily.

In noting these expenditures, I can not commend too highly the vigilance of Catherine Rodgers, the Chief Clerk, who has so carefully looked after its responsibility.

MOVEMENT OF POPULATION.

The number of patients remaining under treatment April 1st, 1908, was 377 men and 272 women; total 649. During the year, 384 patients—210 men and 174 women were admitted, showing the total number under treatment—1033.

The number of dischargals, with classification of their conditions at time of leaving the Institution, was as follows: percentage based on the year's admissions.

	Male.	Female	Total	%
Improved	80	58	138	35.9
Unimproved	10	12	22	5.7
Recovered	5	1	6	
	95	71	166	

Of the above number five (men) were deported; three (men) eloping.

Number of deaths—70, (48 male and 22 female); percentage of total number under treatment—6 4/5%.

Transferred to the Insane Department of the Poor House—as incurables—21, (12 male and 9 female).

Transferred to State Hospital No. 3, Nevada, Mo., 102 patients (40 male and 62 female). Transferred to City Hospital, 1 (female), showing 673 (392 male and 281 female) as the number of patients remaining April 1st, 1909. Daily average patients, 643.9, (376.6 male and 267.3 female). Bed capacity—589, (349 male and 240 female).

Before ending this report and in the event of Mr. Wells' intended retirement into private life, I should hold myself guilty of gross negligence did I not acknowledge his many beneficences to the inmates of this Institution. Many fail to recognize "with honor comes responsibility", but this he recognized early in his official term by assuming the care of a class that in the wear and tear of city life had become the wards of the city through physical and mental sickness. For these he conceived a home and a hospital, as fellow-duty, to him, demanded it, and its realization is now in progress of building. Many such acts and evidences of his kindly feeling, the city will acknowledge and appreciate more in the future, for it is losing its best executive, and the eleemosynary institutions their greater benefactor and friend.

As in my report of the previous year, I wish to acknowledge my appreciation of your many courtesies and kindnesses to the Institution, and to me as its Superintendent.

Sincerely yours,
H. S. ATKINS,
Superintendent.

DR. H. WHEELER BOND,
Health Commissioner.

Dear Sir:—I have the honor to submit herewith the 33rd Annual Report of the St. Louis Female Hospital, for the fiscal year ending April 12th, 1909.

During the year we were enabled, by Special Appropriations allowed, to make the following improvements:

Asbestolith Flooring for the wards and halls in the Surgical Department.
Plastering the two Operating Rooms.
Re-cementing our Reservoir Cistern, which is a reserve water supply for fire purposes.
Repairs to Boiler and Boiler Furnaces.
Installing Shower Bath for Reception Room.
Repairs to all sashes and frames on fourth floor windows.
Installing copper coil in Receiver Tank, which means much economy in fuel, for we are now enabled to harness much return steam which was formerly allowed to go out of exhaust pipes and is now re-used.
Wire Guards on all Laundry Machinery, for protection of Laundresses.
New Wash Stands for Operating Rooms, which are thoroughly modern.
Two Shower Baths in Assistant Physicians' Cottage.
General repairs to plumbing throughout the building.
Installing 5 new mill-made dish cupboards in patients' dining room.
One machine turning lathe for Engineer's repair department.
One vegetable peeling machine for the kitchen, which means much economy in labor and time.
Storage batteries for telephone system.
New water sterilizer in Division "O."
Instrument sterilizer and surgical utensil sterilizer for Operating Rooms.
Microscope and Microtome for Laboratory.
Linoleum for Front Hall.
25 New Hospital Beds.
Operating Table.
Surgical Instruments.
Yellow pine flooring to renew some old floors.
Hotbed frames and sashes for the Garden.
New wagon for hauling refuse.
New stable to replace one destroyed by fire.
New fence, Manchester Avenue and January Avenue.

It will be noted that none of the above mentioned improvements represent anything in the way of extensive improvements, as we are only recommending such features as are absolutely necessary to maintain proper repairs to the building, in contemplation of the time when the

additional hospital buildings on the City Hospital site will be ready for occupancy, which we hope may be realized in the next few years.

We are governed by this same policy in making our recommendations for the new fiscal year, as we realize that only those things which will keep the building intact, in the way of repairs and equipment, should be installed. We practiced the strictest economy during the year in our Maintenance Accounts, which were cut to amounts that denied us of much latitude in the purchase of necessary supplies.

It is to be hoped the appropriations for this year will be more liberal, so that our finances will be on a more satisfactory basis.

If our recommendations for appropriations are not heeded, we feel at the outset of our fiscal year that we will be compelled to ask for more money when the time for Supplementary Appropriation arrives, which is as undesirable to us as it is to the various departments who are in control of our finances.

For the fiscal year, 1909-1910, we respectfully request the following amounts:

**GENERAL APPROPRIATIONS.
(MAINTENANCE FUND.)**

Salaries	\$24,900.00
Groceries	26,000.00
Drugs	4,500.00
Dry Goods	5,000.00
Forage	2,000.00
L. and M.	2,000.00
General Repairs	2,000.00
Traveling Expenses	250.00

"SPECIAL APPROPRIATIONS DESIRED FOR PARTICULAR PURPOSES."

100 New Iron Beds.....	\$500.00
50 New Mattresses.....	300.00
Household furniture—Small Tables, Chairs, Bed-screens, etc.....	500.00
New hose for hose reels in Main Hospital Building.....	750.00
12 20-inch brass pipe with Nozzle for Fire Hose.....	60.00
One 3 Fire Range and Kitchen Apparatus.....	500.00
One vegetable steamer.....	125.00
Milk Box and New Refrigerator for kitchen.....	300.00
Operating Table	150.00
New Shelf Bottles for Drug Store and Shelving.....	250.00
Utensil sterilizer for Division "O".....	125.00
Instrument Sterilizer	75.00
Cabinets for Surgical Dressings and Utensils and other Ward Apparatus..	300.00
6 Medicine Cabinets.....	350.00
Surgical Furniture	300.00
15 Invalid Chairs.....	300.00
Pipe Cutting Machine, Drill Press and Machinist's tools.....	300.00
Circular Saw, Foot Power.....	90.00
Sprinkling wagon—two-horse	300.00
Spring Wagon	150.00
Driving Vehicle	250.00
1 Double set harness, heavy.....	50.00
1 Double set harness, medium.....	70.00
1 three-horse power motor.....	125.00
Automatic Dumb Waiter	250.00
Repairs to plastering.....	300.00
Connecting Stand Pipe to Pump for Fire purposes.....	150.00
Fly screens, for doors and windows.....	300.00
Collar and Cuff Machine for Laundry.....	150.00
New Dry House for Laundry, all metal.....	700.00
General Plumbing Repairs.....	600.00
Repairs and alterations to Steam Pipes.....	400.00
Repairs to Boiler Furnaces.....	400.00
Repairs to Elevator No. 1.....	150.00
Addition to Mens' Quarters (2 rooms).....	600.00
Brick Alley between Boiler House and Kitchen.....	450.00
Platform Scale	300.00
Brick Furnaces and shed as Crematory for soiled dressings and refuse...	150.00
Hot Bed Frames and Sashes.....	200.00
Repairing fence, North and East Side Hospital Grounds.....	400.00
Granitoid Walk from main path to Hospital, including steps and walks to cottage	400.00
One flag pole, iron.....	125.00
One Microscope and Accessories.....	150.00
One Horse	150.00
New set Storage Batteries.....	75.00

Hereto appended find our Financial Balance Sheets, including Cost to Operate, with itemized accounts of Special Improvements; also Medical and Surgical Tables and such other tables as will be of interest in connection with the detailed operations of the hospital during the year just closed.

Permit me to express my thanks for your co-operation and support, for with this, the management and discipline were strengthened and improved.

I also desire to extend my sincere thanks to my Assistant Superintendent, Dr. O. R. Englemann, who has rendered very faithful service to the institution in that capacity and wish further to express my gratitude to the Supervisor of Nurses, Miss A. Mauer, to the clerical force and to the heads of the various sub-departments for their faithful work and the interest they have manifested in the welfare of the institution.

Respectfully submitted,

(Sd.) O. H. ELBRECHT, M. D.,
Superintendent.

St. Louis, Mo., April 1, 1909.

H. WHEELER BOND, M. D.,
Health Commissioner.

Dear Sir:—I have the honor to submit herewith the 32nd Annual Report of this institution for the fiscal year ending April 12, 1908.

Very material progress has been made looking to the better care of the inmates of this institution during the past year which could not have been accomplished without your concurrence and aid for which I am deeply grateful.

While there is still room for improvement, yet I feel safe in saying that the inmates of this institution are as contented as it is possible for the inmates of an institution of this character to be.

The single objectionable feature has been the over crowding, which was rendered more acute by reason of having to abandon a section of the main building while the work of fire proofing is in progress.

BUILDING IMPROVEMENTS.

Since the last report, the fire proofing of the east wing and connecting porch rooms has been completed, and this wing is now occupied by the female patients formerly in the west wing. This part of the building is for all practical purposes new. New and sanitary plumbing, including white enamel bath tubs, shower baths and automatic flushing

closets have been installed and concrete floors have replaced the unsanitary wood floors and as a result this part of the building is entirely free of vermin. For the first time in its history not a roach, bed bug, nor rat is to be found on the premises.

The new heating system installed is all that could be desired. The attendants' rooms have a connecting bath room, adding much to their comfort.

The new chapel has also been completed. Sufficient money was left in the appropriation for the erection of the building to furnish it completely, and services are now being held there regularly by the various religious denominations.

The basement of the chapel is used as a paint and carpenter shop and they are models of their kind.

The ware house building which formerly contained the chapel, has been reconstructed and arranged for use as a stable. The upper floor is used as a clothing room for the old people.

A new granitoid floor has been laid in the basement of the kitchen building.

The west wing of the main building is now undergoing reconstruction, but, at the present rate of progress, it will be another year before this building is fire proofed throughout. The completion of the Center Building will give sufficient room for the housing of all the male paupers in one building and will permit of the razing of the barracks building which has been in a rotting condition for several years and which was originally intended only as a temporary shelter.

A direct heating system has been provided for the west male insane building and a new granitoid floor has replaced the old unsanitary wooden floor in the dining hall of the same building.

A new industry, namely, a chicken farm has been added to the industries already established and which promises further reduction in the expense of maintaining the institution.

OTHER IMPROVEMENTS.

A number of shade trees have been provided for the park used as exercise grounds by the inmates, also a number of flowering shrubs have been planted in the inner court along the east side of the Center Building adding much to the general appearance of the grounds.

By the installation of an adequate heating system we were enabled to save enough on blankets in our "Dry Goods" appropriation to purchase white spreads for all the patients' beds and to provide all the dining halls with granite ware in place of the tin ware formerly used.

An electric fan was placed in the kitchen, which proved a great comfort to the kitchen employes during the summer months.

During the year we have manufactured all of the laundry and soft soap at the institution, which, with potato peeling and bread cutting machines introduced during the year, has aided very materially in cutting down the operating expenses of the institution.

All of the supplies delivered to the institution during the year were of the very best quality. The meats could not be better and the meat inspection department especially is to be complimented for prompt and efficient service.

ENTERTAINMENT OF INMATES.

Through the kindness of the Post-Dispatch and the Times, 200 copies of these daily papers are distributed among the inmates of the institution daily.

Also through the kindness of Mr. Richardson of the Industrial School, several concerts were given the inmates by the Industrial School band.

The new Player Piano adds much to the enjoyment of the patients on ball nights.

Thanks are due to the ladies of the Episcopal Church, the Willing Workers, the Sunshine Society, Miss Hoffman, Miss Clark, Mrs. Wm. Stix, Mrs. Ernest Stix, Mrs. Chas. Stix, Mrs. C. C. Hardcastle, and Rev. Dr. Britton for their efforts in furnishing entertainment to the inmates in various ways.

THE HOSPITAL, GENERAL AND SANITARY CONDITIONS.

The physicians make daily rounds seeing all the patients of the institution and at their discretion send any who may be sick to the hospital, where they are given the proper attention.

The hospital is bright, cheerful and attractive, having sixty-five beds. Every effort is made to secure the very best possible sanitary conditions—certain rooms used for the isolation of infectious and contagious diseases are fumigated when patients are discharged.

The male patients are kept in the first floor and the second is used for the female patients, there being a graduate nurse in charge of each floor.

In the main building we have two light and well ventilated wards for the isolation of male and female tuberculous patients each having an attendant in charge.

During the past year we have had mild epidemics of Erysipelas, Measles, Partitis and Pneumonia but on the whole the general health conditions of the patients have been good.

RECOMMENDATIONS.

The general satisfactory condition of the institution is a matter of congratulation and is due in a great measure to the unselfish devotion to duty of all the officers and employees.

Most of them are underpaid and something should be done towards giving them a wage commensurate with their duties and as compared with similar occupations elsewhere.

I take this means of testifying to their hearty co-operation in all efforts to provide better conditions for the unfortunates under their care.

Repairs to the roof of the barracks building is no longer practicable on account of the numerous leaks and a new roof is a necessity.

I would recommend the purchase of a "Wrigley Flexible Drain Pipe Cleaner". We have frequently had to tear up newly laid granitoid to get at stoppages in sewers which a drain pipe cleaner would obviate.

Wash stands are needed in the female wards of the hospital and I recommend the transfer of the wash stands on the first floor to the second and that these be replaced with better and newer designed wash stands. All of the wash stands in the west male insane building are marble, and on account of the hard usage to which they have been subjected, all are either broken or cracked. I would recommend that one long enameled wash sink be substituted for the basins now in use.

New duplex hot water pumps are needed as are repairs to all boilers.

Respectfully submitted,

WM. ANDERSON,
Superintendent.
St. Louis Poor House.

XI.

QUARANTINE AND SMALLPOX HOSPITAL.

H. WHEELER BOND, M. D.,
Health Commissioner.

Dear Sir:—I have the honor to present the annual report of this institution for the fiscal year 1908-1909.

The number of patients admitted the past twelve months has been comparatively small, and the type of Variola of same character as manifested by the disease the two preceding years; a mild form prevailing in the majority of cases treated.

It is to be hoped that these favorable conditions will long continue, but experience of the past inclines me to the belief that the coming year will show a marked increase in number as well as a more virulent form of the disease itself.

In this connection I would call attention to the fact that over two-thirds of the admissions the past month (March) have been non-residents, and coming as they do from neighboring states, where at the present time the disease seems to be prevalent in many of the small towns, emphasizes the danger from this source.

It is true the Department has been particularly fortunate in the early discovery and isolation of this class in the past few years, but there is always the danger that some of them will escape detection and spread the infection to a large number of the unprotected in our own city; and were it not for the known efficiency of the Department in its present system, requiring a complete isolation of the person affected, and the inspection and vaccination of those exposed to a known case, followed by a close surveillance of the latter for a definite period, serious cause for alarm might be apprehended.

The accompanying tables give a brief summary of the admissions, discharges, vaccination data, etc., a comparative statement of the number cared for the past six years, and a condensed account of the expenses of the institution for the fiscal year just ended.

One of the important improvements attained during the year was the erection of a new Boiler House, equipped with new boilers, engines, dynamos, pumps, etc., required in the installation of a new system of heating and lighting, supplying the various buildings from a central plant, in lieu of the former scattered and inadequate system with its coal stoves, hot air furnaces, coal-oil lamps, etc.

Although the above plant was especially designed and constructed to supply the new Hospital, I regret to state that this building is in a far worse condition at present writing than it was a year ago, the roof in particular being in a bad condition owing to the fact that the material covering some having for some cause or another failed to adhere to the underlying substance, a large portion has been turned up or blown off by the winds, allowing the rain and melting snow to seep through thereby causing great damage to walls and ceilings; this combined with other defects renders the building unserviceable to say the least.

In the estimate forwarded a short time ago, covering the various funds required for the ensuing year, I requested an appropriation to cover expenses of grading and sewerage of the grounds, this work being made necessary by the recent laying of steam pipe, etc., to the different buildings, a large portion of which was laid on or near the surface and at the time temporarily covered by heaping dirt directly over them to keep out the frost; these mounds are not only unsightly but cause an interference with the proper drainage of the grounds, and considerable grading, etc., will be required to overcome this difficulty.

Although a great deal of work was accomplished during the past year in the way of minor improvements, tearing down old abandoned buildings, improving roadway leading to the institution, etc., considerable remains to be done of like character the coming year.

Before closing I desire to thank you for kindness shown and especially for the support rendered in my efforts (although futile) to hasten the long delayed improvements contracted for some time ago and earnestly awaited.

Respectfully submitted,

M. J. DWYER,
Superintendent.

REPORT ON THE POOR HOUSE.

St. Louis, Mo., May 7, 1909.

To the Honorable Municipal Assembly
of the City of St. Louis, Missouri.

Gentlemen:—In accordance with the provisions of Section 729, Chapter

THE HEALTH DEPARTMENT.

11, Article 16 of the Charter, which makes it the duty of the Health Commissioner to report annually to the Municipal Assembly a detailed account of the affairs of the Poor House, I have the honor to submit herewith the report for the fiscal year ending April 12, 1909:

FINANCIAL EXHIBIT.

Below will be found a detailed statement showing the expenditures incurred during the year.

RECEIPTS AND EXPENDITURES.

Appropriations	\$152,925.00	
Salaries	\$42,571.13	
Bread	12,224.88	
Meat and Fish	24,613.79	
Groceries	27,634.02	
Milk	5,458.24	
Fuel	11,952.68	
Ice	1,647.09	
Drugs, Instruments and Supplies	1,667.74	
Dry Goods, Clothing and Bedding	7,317.64	
House Furnishing Goods and Furniture	4,311.02	
Forage and Bedding for Horses	833.87	
Repairing Vehicles and Harness, Shoeing horses	172.15	
Printing and Stationery (including Postage)	240.92	
Oils, Packing, Waste and Tools used by the Engineer	209.61	
Lumber and Materials for Coffins	120.00	
Car Tickets	80.00	
Miscellaneous	103.22	
Materials for repairing fences and maintaining Grounds	174.70	
General Repairs	2,341.67	
Special Appropriation	2,370.16	
Traveling Expenses	75.50	
Labor and Materials for repairing Buildings (including Boilers, Machinery and Steam Heating Apparatus) requiring prompt attention	1,416.93	147,536.96
Balance		\$ 5,388.04
Showing the net expenditures after deducting the following amounts turned over to the City.		
Total expenses for the year		\$147,536.96
Board bill private patients	\$4,424.30	
Board bill pauper patients	211.80	
Board bill St. Louis County patients	3,231.15	7,867.25
		\$139,669.71
Showing the cost of Maintenance per capita:		
For one year	\$118.625	
For one month	9.88	
For one week	2.28	
For one day	.325	

PAUPER DEPARTMENT.

The number of inmates at the beginning of the year was 501,—364 males and 137 females. There were 353 paupers admitted during the year, 289 males and 64 females, making a total of 854 cared for, 653 males and 201 females. The number discharged was 214—179 males and 35 females. 93 deaths occurred during the year, 65 males and 28 females. The total average number of persons present was 519—379 males and 140 females.

INSANE DEPARTMENT.

At the beginning of the year this Department housed 748 patients, 281 males and 467 females. The admissions during the year were 24—14 males and 10 females. The total number treated was 772—295 males and 477 females. The number discharged during the year was 13—7 males and 6 females. There were 55 deaths, 22 males and 33 females. There were remaining March 31, 1909, 704—266 males and 438 females. The total average number present was 728—275 males and 453 females.

Very respectfully,

(Signed) H. WHEELER BOND.
Health Commissioner.

PART SECOND.

41st Annual Report of the Health Department.

Containing Statistical Data.

I.

OFFICE OF THE HEALTH COMMISSIONER AND BOARD OF
HEALTH.

Presenting twenty-five tables, as follows:

- Table No. 1—Showing comparative mortality in St. Louis during the last forty-two years.
Table No. 2—Showing reported mortality for fiscal year ending March 31st, 1909.
Table No. 3—Showing reported mortality for calendar year, 1908.
Table No. 4—Showing zymotic diseases by sanitary districts.
Table No. 5—Showing the total number of deaths in different institutions, by months.
Table No. 6—Showing the nativity of diseased, by months.
Table No. 7—Showing the disposition made of decedents, including still births and those from outside of the city, by months.
Table No. 8—Showing number of births reported during 1908, by months.
Table No. 9—Showing comparative statement of zymotic diseases in eleven of the principal cities of the United States.
Table No. 10—Showing mortality for January, 1908.
Table No. 11—Showing mortality for February, 1908.
Table No. 12—Showing mortality for March, 1908.
Table No. 13—Showing mortality for April, 1908.
Table No. 14—Showing mortality for May, 1908.
Table No. 15—Showing mortality for June, 1908.
Table No. 16—Showing mortality for July, 1908.
Table No. 17—Showing mortality for August, 1908.
Table No. 18—Showing mortality for September, 1908.
Table No. 19—Showing mortality for October, 1908.
Table No. 20—Showing mortality for November, 1908.
Table No. 21—Showing mortality for December, 1908.
Table No. 22—Showing cremations and causes of death, by months.
Table No. 23—Showing abstracts of monthly reports made by the coroner.
Table No. 24—Showing decedents received from outside of the city and places of death, by months.
Table No. 25—Showing local meteorological observation for each month.

TABLE NO. 1.
COMPARATIVE MORTALITY IN ST. LOUIS DURING THE LAST 42 CALENDAR YEARS.

YEAR.	Population.	Total Deaths.	Annual Death Rate per 1,000.	Deaths under five years.	Per cent. of Total Deaths.	Small-pox.	Measles.	Scarlatina.	Diphtheria.	Croup.	Whooping Cough.	Typhoid Fever.	Diarrhoeal Diseases (under 5 years).	Diarrhoeal Diseases (other ages).	Total from Foreign Causes.	Per cent. of Total Deaths.	Malarial Fevers.	Per cent. of Total Deaths.	Phthisis Pulmonum.	Per cent. of Total Deaths.	Pneumonia.	Per cent. of Total Deaths.	Stillbirths (not included in mortality).	No. of Births Reported.

NOTE.—The figures of population given above appear in a number of instances—except those for the United States census years—to be little more than guesswork, and the mortality percentage based upon them open to question.
From 1890 to 1900 and for 1901 the increase in local population has been computed from census figures for that year at the rate of two per cent. annually. For 1880 and 1900 the U. S. census figures were used.

TABLE No. 3

TABLE SHOWING REPORTED MORTALITY

The annual death rate per 1,000 during the year was 13.56, this being based on a population of 675,700. During the year there were 531 less deaths than the previous year. 1028 certificates were issued. Percentage of deaths in eleemosynary and other institutions of a public character to the total was 1.24. White population, 675,700. mortality rate per thousand, 12.94.

SANITARY DIVISION.

Index to tables 1908-9.

- Table No. 1—Showing record of communicable diseases, by months.
Table No. 2—Showing cases and deaths from Diphtheria and Croup by districts.
Table No. 3—Showing cases and deaths from Scarlet Fever, by districts.
Table No. 4—Showing cases and deaths from Typhoid Fever, by districts.
Table No. 5—Showing cases and deaths from consumption, by districts.
Table No. 6—Showing sanitary conditions where diphtheria existed.
Table No. 7—Showing sanitary conditions where typhoid fever existed.
Table No. 8—Showing record of houses examined and posted, disinfected and fumigated.
Table No. 9—Showing number of infected houses fumigated and disinfected.
Table No. 10—Showing houses, hospitals and rooms fumigated, giving cubic feet of air space.
Table No. 11—Showing houses infected by typhoid and foul cellars disinfected, and ponds oiled and disinfected.
Table No. 12—Showing disinfectants used.
Table No. 13—Showing condition of dairies, by districts.
Table No. 14—Showing inspections of dairy cattle by Health Department Veterinarian.
Table No. 15—Showing cases and deaths from contagious diseases for thirty-one years.
Table No. 16—Showing statistics relating to Typhoid Fever during past thirty-one years.
Table No. 17—Showing cases and deaths from small-pox, also vaccination record for the past 31 years.
Table No. 18—Showing sanitary condition of tenement houses in 1906-1907.
Table No. 19—Showing number of nuisances found by Sanitary Officers.
Table No. 20—Showing miscellaneous matter.
Table No. 21—Showing miscellaneous matter.
Table No. 22—Showing work done in Hospital Inspection service.
Table No. 23—Showing work done in Meat Inspection service.
Table No. 24—Showing work done in Street Car inspection service.
Table No. 25—Showing appropriations, expenditures and unexpended balances for the fiscal year 1903-1909.

NUMBER OF PLACES VISITED.

Meat Shops.....	7,713
Private Slaughter Houses.....	1,810
Sausage Factories.....	1,096
Beef Coolers.....	2,091
Pork Houses.....	725
Commission and Poultry Houses.....	3,251
Fish and Oyster Houses.....	1,771
Abattoirs.....	891
Market Houses.....	406
Hotels and Restaurants.....	1,165
Stock Yards.....	200
Peddler Wagons.....	100
Total.....	21,219

PRODUCTS CONDEMNED AND DESTROYED BY COAL-OILING.

Beef.....	8,437 lbs.	
Pork.....	6,369 lbs.	
Veal.....	4,424 lbs.	
Mutton.....	5,503 lbs.	
Neckbones.....	1,545 lbs.	
Spare Ribs.....	2,970 lbs.	
Sausage.....	2,169 lbs.	
Beef Brains.....	2,000 lbs.	
Pickled Pork.....	2,509 lbs.	
Beef Tongues.....	250 lbs.	
Ox Tails.....	200 lbs.	
Beef and Hog Kidneys.....	1,000 lbs.	
Back Bones.....	225 lbs.	
Hams.....	809 lbs.	
Corned Beef.....	10,000 lbs.	
Beef Livers.....	1,480 lbs.	
Hog Snouts—Hocks.....	600 lbs.	
Pigs Feet.....	1,304 lbs.	
Hamburger.....	600 lbs.	
Hog Chittlings.....	50 lbs.	
Cut Meat for Sausage.....	1,605 lbs.	
Hog Tails.....	450 lbs.	
Calf Sweet Bread.....	245 lbs.	
Bacon.....	525 lbs.	55,279 lbs.

MISCELLANEOUS CONDEMNATIONS AND DESTRUCTIONS.

Poultry.....	8,025 lbs.	
6,176 Rabbits.....	24,700 lbs.	
31 Cases Eggs.....	1,860 lbs.	
23 Barrels Oysters.....	8,000 lbs.	
Vegetables of Various Kinds.....	6,000 lbs.	
Sauerkraut.....	600 lbs.	
Fish.....	1,200 lbs.	
33 Opposums.....	180 lbs.	
Squabs—Quail.....	600 lbs.	
3 Pigs.....	100 lbs.	51,275 lbs.
Total Condemnations.....		106,554 lbs.

MEATS REJECTED AT CITY INSTITUTIONS.

City Hospital,		
Beef.....	1,976 lbs.	
Hams.....	801 lbs.	
Mutton.....	1,305 lbs.	
Veal.....	272 lbs.	
Bacon.....	356 lbs.	
Pork.....	109 lbs.	
Turkey.....	54 lbs.	4,873 lbs.

TABLE No. 23—Continued.

Poor House,		
Beef	787 lbs.	
Hams	405 lbs.	
Bacon	478 lbs.	
Mutton	424 lbs.	
Veal	205 lbs.	
Pork	23 lbs.	
Turkey	50 lbs.	2,372 lbs.
Insane Asylum,		
Beef	1,466 lbs.	
Bacon	518 lbs.	
Ox Tails.....	65 lbs.	
California Hams.....	1,150 lbs.	
Hams	80 lbs.	
Veal	95 lbs.	
Mutton	201 lbs.	
Fish	7 lbs.	3,532 lbs.
Female Hospital,		
Bacon	280 lbs.	
Beef	350 lbs.	
Mutton	110 lbs.	
Veal	80 lbs.	
Pork	20 lbs.	840 lbs.
Work House,		
Beef	463 lbs.	463 lbs.
Total.....		12,130 lbs.

CONDEMNATIONS FOR THE FISCAL YEAR ENDING APRIL, 1908.

Meats	75,898 lbs.
Miscellaneous—Poultry, Game, Fish, Vegetables, etc.....	149,535 lbs.
Total.....	225,433 lbs.

CONDEMNATIONS FOR THE FISCAL YEAR ENDING APRIL, 1909.

Meats	55,279 lbs.
Miscellaneous—Poultry, Game, Fish, Vegetables, etc.....	51,275 lbs.
Total.....	106,554 lbs.
Less for 1908.....	118,879 lbs.

TABLE NO. 24.

SHOWING WORK DONE IN STREET CAR INSPECTION SERVICE, 1908-1909.

No. Street Car Barns Inspected.....	12
No. Inspections made.....	259
No. Arrests for Violation of Spitting Ordinance.....	218
Amount Imposed as Fines for Violation of Spitting Ordinance.....	\$738.00

TABLE No. 25.

SHOWING APPROPRIATIONS, EXPENDITURES AND UNEXPENDED BALANCES FOR THE FISCAL YEAR 1908-1909

	Appropriation	Expended	Balance
Salaries.....	\$70,000.00	\$30,460.46	\$39,539.54
Office Expenses, etc.....	15,000.00	14,660.99	339.01
Disinfectants, etc.....	7,870.00	6,751.12	1,118.88
Horses, Wagons, etc.....	1,630.00	1,630.00	
Traveling Expenses	150.00		150.00
Totals	\$94,650.00	\$83,502.57	\$11,147.43

III.

DISPENSARY DIVISION.

Presenting eleven tables, as follows:

- Table No. 1—Showing Medical and Surgical cases treated at Dispensaries, by months, for year ending March 31st, 1909.
- Table No. 2—Showing Hospital admissions for the year.
- Table No. 3—Showing ambulance service for the year.
- Table No. 4—Showing admission of insane patients for the year.
- Table No. 5—Showing vaccination and inspection service for the year.
- Table No. 6—Showing statistics in regard to small-pox patients for the year.
- Table No. 7—Showing administration of Diphtheria Antitoxin during the year.
- Table No. 8—Showing administration of Antitetanic Serum during the year.
- Table No. 9—Showing Report of the Tuberculosis Clinic for the year.
- Table No. 10—Showing classified list of diseases treated at the City Jail during the year.
- Table No. 11—Showing classified list of diseases treated at the various dispensaries during the year.

TABLE No. 6.
RESUME OF CASES SENT TO THE SMALL-POX HOSPITAL, WITH VACCINAL HISTORY OF SAME FOR THE FISCAL YEAR ENDING MARCH 31st, 1909.

No. of Cases.				WHERE CONTRACTED			VACCINAL HISTORY			RESULT	
	White	Colored	Male	Female	In City	Outside	Never Vac.	Faint Scar	Good Scar	Recovered	Died
48	36	12	34	14	26	22	44	4		47	1

Besides the above listed cases, 6 additional patients were admitted, who were residing in St. Louis County, at the request of the St. Louis County Court, or, who while living in this city accompanied relatives to the hospital and developed the disease there.

TABLE NO. 7.

ADMINISTRATION OF DIPHTHERIA ANTITOXIN

DURING

Fiscal Year Ending March 31st, 1909.

There were administered during the year:

374 Curative doses of 3,000 Units each.

369 Immunizing doses of 1,000 Units each.

This Serum was administered only on request of attending physicians, who certified in all cases that beneficiaries were in indigent circumstances, and that their parents or guardians were unable to purchase it. The Serum was administered by a physician of this Division, in almost every case, at the home of the patient, and in no case was the subsequent routine treatment of the patient undertaken, it being left in the hands of the family physician attending.

TABLE NO. 8.

ADMINISTRATION OF ANTITETANIC SERUM

AT VARIOUS DISPENSARIES

During Fiscal Year Ending March 31st, 1909.

For injuries due to explosives during festivities incident to the celebration of the Fourth of July, there were given by the Physicians 132 doses of 1,500 Units each.

During the year, and for injuries not due to the celebration of that day, 108 doses of 1,500 Units each were given.

In no instance where the Serum was used was there a known fatality.

TABLE NO. 9.

REPORT OF TUBERCULOSIS CLINIC FOR YEAR ENDING MARCH 31st, 1909.

Number new patients examined 959
 Number old patients for further treatment or examination..... 2,930

Total number patients treated during year..... 3,889

Of the 959 new patients examined—

Diagnosis of Pulmonary Tuberculosis was made in..... 388
 Diagnosis of other diseases was made in..... 517
 Normal 24

Of the 388 in whom diagnosis of Pulmonary Tuberculosis was made—

Tubercle Bacilli were found in the sputum of..... 144
 Tubercle Bacilli were not found in sputum of..... 62
 No examination made of sputum of..... 182
 (The disease was either very evident, or sputum was not received
 in above cases.)

PATIENTS IN WHOM DIAGNOSIS OF PULMONARY TUBERCULOSIS WAS MADE.

COLOR		SEX		SOCIAL CONDITION		
White	Black	Male	Female	Married	Single	Widowed
309	79	306	82	127	234	27

AGES OF PATIENTS.

Up to 10 years..... 3
 Between 10 and 20 years 42
 Between 20 and 30 years 121
 Between 30 and 40 years 117
 Over 40 years..... 105

IV.

CHEMICAL DIVISION.

Annual report on examination of Dairy Products, etc., made in the laboratory of the City Chemist during the period beginning April, 1908, and ending March 31st, 1909.

MILK WAGON INSPECTIONS, 1908-1909.

Table Accompanying Report of City Chemist to Board of Health.
 City of St. Louis, Office of City Chemist.
 ANNUAL REPORT ON EXAMINATIONS OF DAIRY PRODUCTS MADE IN THE LABORATORY OF THE CITY CHEMIST DURING THE PERIOD BEGINNING APRIL 1, 1908, AND ENDING MARCH 31, 1909.

NOTE—Though the best grade of milk has a much greater content of fat and non-fat solids than the minimum legal limit of composition, City Ordinance 20808 permits whole milk, skimmed milk and cream to be legally sold in the City of St. Louis, when they are free from dirt, preservatives, coloring matter or any other foreign additions, and have been kept at a temperature of 50° F. or less, and are of a minimum composition as follows:

WHOLE MILK—Fat not less than 3.0%; non-fat solids not less than 8.3%; ash not less than 0.7%.

SKIMMED MILK—Fat not less than 1.3%; total solids not less than 10.3%.

CREAM—Fat not less than 12%.

Samples contrary to the Ordinance in composition are shown by black figures in totals.

SANITARY WATER ANALYSIS—RESULTS EXPRESSED IN PARTS PER MILLION.

Location—Intake at St. Louis Water Works, Chain of Rocks (Mississippi River). OFFICE OF CITY CHEMIST, ST. LOUIS, MO.
By multiplying the figures given in the Alkalinity Column by the factor 0.365 the number of cubic centimeters of a 0.2% solution of Hydrochloric Acid (or of normal gastric juice) necessary to neutralize one liter of the water can be calculated.

Number of Sample	Date of Collection	RESIDUE ON EVAPORATION					OXYGEN CONSUMED		NITROGEN				Alkalinity as Ca Co		STAGE OF RIVER	
		Loss on Ignition			Total	Suspended	Disolved	Unfiltered	Filtered	As Ammonia		As Nitrates	As Nitrites	Chlorine as Chlorides	Hermann	St. Louis
		Disolved	Suspended	Total						Free	Total

SANITARY WATER ANALYSIS—RESULTS EXPRESSED IN PARTS PER MILLION—Concluded.
 Location—Conduit Chamber, St. Louis Water Works, Chain of Rocks (Mississippi River). Tap at City Chemist's Office.
OFFICE OF CITY CHEMIST, ST. LOUIS, MO.
 By multiplying the figures given in the Alkalinity Column by the factor 0.365 the number of cubic centimeters of a 0.2% solution of Hydrochloric Acid (or of normal gastric juice) necessary to neutralize one liter of the water can be calculated.

Number of Sample	Date of Collection	RESIDUE ON EVAPORATION				OXYGEN CONSUMED		NITROGEN				Chlorine as Chlorides	Alkalinity at Ca Co	STAGE OF RIVER		
		LOSS ON IGNITION				Unfiltered	Filtered	As Ammonia			As Nitrates			As Nitrates	Hermann	St. Louis
		Total						Free	ALBUMINOID	Total						
		Dissolved	Suspended	Total	Dissolved

V.

BACTERIOLOGICAL DIVISION.

Presenting nineteen tables as follows:

- Table No. 1—Showing number of examinations made for Physicians during fiscal year ending March 31st, 1909.
- Table No. 2—Showing comparison of results of Widal Reaction with information furnished by Physicians.
- Table No. 3—Showing day of illness on which blood specimens were taken which gave positive Widal Reaction.
- Table No. 4—Showing day of illness on which blood was taken for examination.
- Table No. 5—Showing age of patients whose blood gave positive Widal Reaction.
- Table No. 6—Showing comparison of results of Diphtheria examinations with information furnished by Physicians.
- Table No. 7—Showing age of patients whose throat cultures showed Diphtheria Bacilli.
- Table No. 8—Showing duration of disease at time Diphtheria Bacilli were found.
- Table No. 9—Showing age of patients whose sputum showed Tubercle Bacilli.
- Table No. 10—Showing duration of disease at time Tubercle Bacilli were found based upon information furnished by Attending Physician.
- Table No. 11—Showing comparison of results of examinations for Tubercle Bacilli with information furnished by Physicians.
- Table No. 12—Showing work done in Bacteriology and Haematology in Hospital Division, April 1st, 1908, to March 31st, 1909.
- Table No. 13—Showing work done in Hospital Division for the year ending March 31st, 1909.
- Table No. 14—Showing Bacteriological Water Count, April 1st, 1908, to March 31st, 1909.
- Table No. 15—Showing number of Autopsies held at the City Hospital April 1st, 1908, to March 31st, 1909.
- Table No. 16—Showing Special Examinations.
- Table No. 17—Showing Lesions found at Autopsies held at city Hospital, Fiscal Year, 1908-1909.
- Table No. 18—Showing Lesions found in Material sent from the Surgical Clinics, Fiscal Year, 1908-1909.
- Table No. 19—Showing the number of Physicians who used the Laboratory during the year.

TABLE No. 1.

NUMBER OF EXAMINATIONS MADE FOR PHYSICIANS, APRIL 1st, 1908, TO
MARCH 31st, 1909.

	WIDAL REACTION			BAC. TUBERCULOSIS			BAC. DIPHTHERIAE			TOTAL
	Pos.	Neg.	Total	Pos.	Neg.	Total	Pos.	Neg.	Total

TABLE NO. 17.

LESIONS FOUND AT AUTOPSIES HELD AT CITY HOSPITAL, FISCAL
YEAR 1908-9.

ABDOMINAL CAVITY—Ascites...	31	BLADDER	
ABDOMINAL WALL		Carcinoma	1
Hernia		Cystitis	14
Inguinal	3	Dilatation	2
Strangulated ..	1	Diverticulum	1
Perforation		Papilloma	1
Appendectomy ..	2	BLOOD	
Laparotomy	8	Anemia—Pernicious	3
Traumatic	5	Leukemia—Lymphatic	1
Sinus		Spleno-myelogenous ..	2
Suppurating....	1	Malaria	4
ADRENALS		BONES	
Abscess	1	Carcinoma—Metastatic	1
Carcinoma—Metastatic	1	Erosion	4
Congestion	1	Exostoses	1
Fatty Degeneration	3	Hyperplasia—Bone-marrow	6
Haemorrhage	2	Necrosis	1
Hyperplasia	2	Osteoporosis	1
Increase of fat.....	2	Rachitis	3
Necrosis	1	Resection	1
Pigmentation	1	BRAIN	
Tuberculosis	5	Abscess—Cerebral	1
AORTA		Atrophy	5
Aneurism	6	Congestion	3
Arterio-Sclerosis	126	Dilatation—Of Ventricles	1
Dilatation	1	Embolus—Cerebro	1
Stenosis	1	Ependymitis	4
APPENDIX		Haemorrhage	10
Amputation	2	Hydrocephalus	1
Appendicitis	16	Laceration	1
Lympho-Sarcoma—Metastatic ..	1	Oedema	14
ARTERY		Softening	11
Aneurism	2	Thrombosis	1
Anomaly	1	Thickening	2
Arterio-Sclerosis	81	Tuberculosis	3
Thrombosis	12		

TABLE No. 17—Continued.

BRAIN-MENINGES & VESSELS		INTESTINE, SMALL—Continued.	
Congestion	1	Enteritis	16
Meningitis—Chronic	15	Haemorrhage	3
Epidemic - Cerebro-		Infarct	1
spinal	2	Intussusception	1
Suppurative	1	Lapoma	1
Syphilitic	1	Lympho-Sarcoma—Metastatic ..	1
Tuberculous	9	Meckel's Diverticulum	1
Oedema	3	Necrosis	1
Thrombosis	1	Obstruction	1
Tuberculosis	7	Oedema	4
BREAST		Parasites	2
Carcinoma	2	Perforation	5
Lactating	1	Polyp	1
BRONCHI—Bronchitis	11	Ulcerations—Amoebic	5
DIAPHRAGM—Trichinosis	1	Ulcerations—Trophic	1
EAR—Media Otitis	2	Tuberculous	9
ESOPHAGUS		Typhoid	3
Carcinoma	2		
Haemorrhage	2	JOINTS	
Perforation	1	Arthritis	1
EYE		Pyoarthritis	1
Contusion	1	Spondylitis	2
Iridectomy	1		
Opacity—Corneal	1	KIDNEY	
Ophthalmia—Neonatorum	1	Adenoma	1
FACE		Amyloid	1
Oedema	2	Arterio-Sclerosis	3
Ulcer—Rodent	1	Atrophy	1
FAT TISSUE—Necrotic	1	Cloudy Swelling	16
FOOT—Gangrene	2	Congestion	27
GALL BLADDER & DUCTS		Cystic	4
Carcinoma	1	Displacement	1
Cholecystectomy	1	Hydro-Nephrosis	1
Cholecystitis	2	Hypernephroma	1
Cholelithiasis	17	Infarct	12
Dilatation	3	Lelomyoma	1
Empyema	1	Nephritis—Acute Productive	
Obliteration	1	Capsular	1
Oedema	1	Acute Toxic	2
Peri-Cholecystitis	9	Chronic Diffuse	138
HEART		Exudative	3
Aneurism	1	Glomerular	10
Atrophy	21	Parenchymatous ..	72
Cloudy Swelling	13	Nephrosis—Hydro	4
Congestion	1	Pyo	6
Degeneration—Parenchymapous	84	Oedema	1
Dilatation	34	Pigmentation—Malarial ..	1
Fatty Degeneration	11	Pyelitis	3
Fragmentation—Of Myocardium	5	Pyelonephritis	5
Hypertrophy	59	Tuberculosis	14
Infarct	2		
Oedema	8	LARYNX	
Thrombus	9	Carcinoma	2
HEART VALVES		Oedema	2
Atheroma	1	LIP—Harelip	1
Endocarditis	57	LIVER	
Fenestration	1	Abscess—Amoebic	2
Foramen Ovale	4	Multiple	3
Insufficiency—Aortic	30	Solitary	2
Mitral	28	Amyloid	1
Tricuspid	1	Atrophy	1
Sclerosis	13	Carcinoma—Metastatic	11
Stenosis—Aortic	1	Cirrhosis—Atrophic	39
Mytral	3	Cloudy Swelling	19
INTESTINE, LARGE		Congestion	66
Colitis	8	Cystic	4
Enlargement	2	Enlargement	5
Erosion	1	Fatty Degeneration	34
Necrosis	1	Fatty Infiltration	105
Perforation	3	Gumma	1
Peri-digmoilitis	1	Haemangioma	3
Peri-typhilitis	2	Haemorrhage	1
Ulcer	1	Infarct	2
Ulceration—Amoebic	1	Malformation	1
Tuberculous	1	Necrosis—Focal	16
Typhoid	1	Oedema	3
INTESTINE, SMALL		Perihepatitis	29
Congestion	15	Pigmentation	12
Enlargement	3	Sarcoma—Metastatic	1
		Sarcoma Lympho—Metastatic ..	1
		Tuberculosis	28

TABLE No. 17—Continued.

LUNG			PROSTATE		
Abscess	3		Abscess	1	
Atelectasis	16		Adeno-myoma	4	
Carcinoma—Metastatic	2		Cyst	1	
Congestion	104		Hypertrophy	6	
Embolism	1		Myoma	2	
Emphysema	25		Tuberculosis	2	
Infarct	14				
Oedema	92		RECTUM		
Pneumonia	6		Erosion	1	
Pneumonia—Broncho	85		Fistula	2	
Lobar	39		Hemorrhoid	2	
Sarcoma—Metastatic	1		Perforation	1	
Sarcoma Lympho—Metastatic	1		Ulcer	1	
Thrombosis	1		SEMINAL VESICLES—Vesiculitis.	1	
Tuberculosis	92		SKIN		
LYMPH GLANDS			Cellulitis	1	
Abscess	2		Decubitus	3	
Carcinoma—Metastatic	11		Desquamation—Measles	1	
Hyperplasia	21		Icterus	5	
Necrosis	3		Leukoderma	1	
Pigmentation—Malarial	3		Lipoma	1	
Sarcoma—Metastatic	2		Oedema	12	
Sarcoma Lympho	1		Pigmentation	1	
Tuberculosis	29		SKULL—Fracture	1	
MESENTARY—Adhesions	1		SPINE—Tuberculosis	1	
Haemorrhage	1		SPLEEN		
MOUTH			Abscess	1	
Sarcoma—Metastatic	1		Amyloid	3	
Stomatitis	2		Atrophy	4	
MUSCLE			Cirrhosis	3	
Abscess—Multiple	2		Congestion	46	
Tuberculous	1		Degeneration	4	
Degeneration	2		Enlargement	23	
Pigmentation	1		Haemorrhage	3	
Trichiniasis	1		Infarct	13	
NECK—Sarcoma	1		Necrosis	7	
OMENTUM			Perisplinitis	39	
Carcinoma—Metastatic	1		Phagocytosis	5	
OVARY			Pigmentation	5	
Abscess	1		Proliferation	7	
Corpus Luteum	4		Spleenoptosis	1	
Cystic	4		Splenitis	63	
Oophorectomy	4		Thrombosis	1	
Oophoritis	3		Tuberculosis	26	
PANCREAS			SPLEENACCESSORY	4	
Atrophy	3		STOMACH		
Fat Necrosis	1		Abscess	1	
Haemorrhage	1		Carcinoma	8	
Pancreatitis Acute	29		Congestion	14	
PAROTID			Dilatation	3	
Abscess—Multiple	1		Fibroma	1	
PERICARDIUM			Gastritis	9	
Hemopericardium	1		Gastro-Enterostomy	2	
Hydro-pericardium	11		Haemorrhage	6	
Oedema	6		Oedema	1	
Pericarditis—Adhesive	7		Polyp	1	
Fibrinous	12		Pylorotomy	1	
Fibrous	3		Ulcer	3	
Obliterative	1		TESTICLE		
PERITONEUM			Enlarged	1	
Peritonitis—Adhesive	4		Undescended	1	
Chronic	6		THORACIC DUCT—Tuberculosis...	5	
Exudative	1		THYMUS		
Fibrinous	11		Atrophy	1	
General	4		Hypertrophy	1	
Pelvic	5		Persisting	3	
Purulent	17		THYROID		
Tuberculous	5		Atrophy	1	
Pneumo-Peritoneum	1		Colloid	2	
PHARYNX			Goltre—Exophthalmic	1	
Carcinoma	1		TOES—Gangrene	1	
Haemorrhage	1		TONGUE—Carcinoma	1	
Inflammation	1		TRACHEA		
PLACENTA			Carcinoma—Metastatic	1	
Retention & Necrosis	1		FALLOPIAN TUBES		
PLEURA			Abscess	1	
Haemo-thorax	1		Amputation	2	
Pluritis	173		Hydrosalpinx	2	
Pneumothorax	4		Pyosalpinx	1	
Sarcoma—Metastatic	1		Salpingitis	9	
			Salpingectomy	1	

TABLE No. 17—Concluded.

URETER		Hysterectomy	2
Anomaly	2	Laceration	2
Dilatation	1	Myoma	3
Hydro-Ureter	1	Polyp	1
URETHRA		Sarcoma	1
Laceration	1	Subinvolution	2
Ulcer	1	VAS DEFERENS	
UTERUS		Lympho Sarcoma—Metastatic	1
Carcinoma	1	VEINS	
Endocervicitis	4	Phlebolith	1
Endometritis	6	Thrombosis	5
Erosion	2	Tuberculosis	1

TABLE NO. 18.

LESIONS FOUND IN MATERIAL SENT FROM THE SURGICAL CLINICS,
FISCAL YEAR 1908-9.

ABDOMEN		SCROTUM	
Granulation Tissue	1	Tuberculosis	1
Sinus	1	Ulcer, rodent	1
APPENDIX		SKIN	
Appendicitis	12	Carcinoma	1
Hyperplasia	1	Epithelioma	7
Sarcoma	1	Lipoma	2
ARM		SPLEEN—Sarcoma	1
Lipoma	1	STOMACH—Gastric pylorus	1
Sarcoma	1	TESTICLE	
BONE		Hydrocele	1
Epulis	1	Tuberculosis	2
Fibro-Sarcoma	1	THYROID—Exophthalmic Goltre	1
Necrosis	1	TUBES, FALLOPIAN & OVARIES	
BRAIN—Endothelima	2	Acute Infiltration	1
BREAST		Hydrosalpinx	1
Carcinoma	1	Papilloma	1
Inflammation	1	Pyosalpinx	5
FOOT—Ulcer	1	Pus tubes	2
GALL DUCT		Salpingitis	2
Carcinoma	2	Tuberculosis	1
Gall Stones	1	UTERUS	
INTESTINES—Carcinoma	1	Carcinoma	6
KIDNEY—Abscess	1	Fibroid	1
LARYNX—Carcinoma	1	Erosion	1
LYMPH GLANDS		Endometritis, hyperplastic	1
Adenitis	3	Endometritis, septic	1
Adenitis, suppurative	3	Fibro sarcoma	1
Inflammation	1	Hypertrophy—adenomatous	1
Necrosis	1	Myoma	1
NOSE—Carcinoma	1	Tissue, Inflammatory	1
OVARIAN CYST	2	Tissue, Placental	1
PENIS—Condyloma	1	Tuberculosis	1
PROSTATE—Fibroma	1	UNKNOWN TISSUE	7
RECTUM			
Condyloma	1		
Epithelioma	1		

TABLE No. 19.

TABLE SHOWING THE NUMBER OF PHYSICIANS WHO USED THE LABORATORY
DURING THE YEAR 1908-1909

Total Number of Physicians who sent Material to the La- boratory for Diag- nosis	Number of Physicians who sent Sputum to be Examined for Tuberculosis	Number of Physicians who sent Blood to be Examined for Typhoid	Number of Physicians who sent Cultures to be Examined for Diphtheria	Number of Physicians who sent Specimens for Examination for Tuberculosis, Ty- phoid and Diph- theria
490	318	211	209	52

Total number of Physicians in St. Louis, 1711.

VI.

CITY HOSPITAL.

Presenting seven tables, as follows:

Table No. 1—Showing patients admitted, discharged, died and transferred.

Table No. 2—Showing Social conditions.

Table No. 3—Showing Nativities.

Table No. 4—Showing Occupations.

Table No. 5—Showing Diseases .

Table No. 6—Showing Principal Operative Cases, Surgical Diagnosis and character of operation.

Table No. 7—Showing causes of death.

Note:—The laboratory reports of the Hospitals have been incorporated in the Annual Report of the City Bacteriologist and Pathologist.

TABLE No. 1.
PATIENTS ADMITTED.

	April	May	June	July	Aug.	Sept.	Oct.	Nov.	Dec.	Jan.	Feb.	March	TOTAL

Toes. Amputation.....	1
Cyst,	
Ovary. Partial Resection.....	5
Ovary. Oophorectomy	1
Ovary. Salpingo-oophorectomy	4
Ovary. Double Salpingo-oophorectomy.....	7
Ovary. Salpingo-oophorectomy, Partial Resection.....	2
Ovary. Double Salpingectomy, Oophorectomy.....	1
Ovary (Infected). Double Salpingo-oophorectomy.....	2
Ovary (Infected). Double Oophorectomy.....	1
Broad Ligament. Excision.....	1
Sebaceous. Removal.....	3
Cystitis, Acute, Putrid. Suprapubic Cystotomy, Urethrotomy.....	1
Cystocele. Repair.....	5
Deflected Nasal Septum. Submucous Resection.....	2
Deformity, Ankle Joint. Resection Bony Protuberance.....	1
Denuded Surface,	
Arm. Skin Graft.....	2
Back. Skin Graft.....	1
Elbow. Skin Graft.....	2
Foot. Skin Graft.....	2
Legs. Skin Graft.....	7
Neck. Skin Graft.....	1

TABLE No. 6—Continued.

Skull. Plastic Operation, Scalp.....	1
Stump, Feet. Skin Graft.....	1
Stump, Leg. Reamputation.....	4
Thigh. Skin Graft.....	2
Dilatation, Stomach (Acute). Exploratory Laparotomy.....	1
Diphtheria,	
Laryngeal. Intubation.....	3
Laryngeal. Tracheotomy.....	3
Ectopic Pregnancy,	
Tubal. Salpingectomy.....	2
Tubal. Salpingoophorectomy.....	1
Tubal. Salpingoophorectomy and Repair Uterus.....	1
Ovarian. Abdominal Section.....	1
Emphysema, Chest, following Gunshot. Thoracotomy.....	1
Empyema,	
Pleural Cavity. Thoracentesis.....	17
Pleural Cavity. Thoracotomy.....	15
Pleural Cavity (Chronic, Cavity Formation). Estlander's Operation.....	1
Endometritis. Curettage.....	7
Endothelioma, Cerebral. Craniotomy, Removal Tumor.....	1
Enlargement,	
Prostate. Suprapubic Prostatectomy.....	2
Tonsil. Tonsilectomy.....	5
Epididymitis, Tubercular. Orchidectomy.....	1
Epithelioma,	
Face. Dissection.....	1
Hand. Removal Tumor and Part of Hand.....	1
Scrotum. Curetment, Skin Graft.....	1
Epulis. Removal.....	1
Faulty Union,	
Fracture of Clavicle. Wiring.....	1
Fracture of Femur. Osteotomy.....	2
Fracture of Tibia. Suture.....	1
Fibroid,	
Uterus. Abdominal Panhysterectomy.....	3
Uterus. Laparotomy, Removal Tumor.....	1
Uterus. Resection Fibroid, Vaginal.....	1
Fibroma, Scalp. Removal.....	1
Fibromyoma, Intestines (causing Intussusception). Laparotomy, Removal Tumor.....	1
Fibrosarcoma, Cervix. Curetment.....	1
Fistula,	
Alveolar. Curetment.....	1
Anus. Incision for Radical Cure.....	6
Anus. Incision for Drainage.....	1
Fecal. Repair.....	2
Rectal. Incision, Packing.....	1
Rectal. Incision, Curetment, Drainage.....	2
Urinary. Repair Bladder, Perineal Drainage.....	1
Foreign Body,	
Abdomen. Laparotomy.....	1
Arm. Incision, Removal.....	1
Bladder. Removal.....	1
Esophagus. Gastrostomy.....	1
Finger. Dissection, Removal.....	1
Foot. Dissection, Removal.....	2
Hand. Dissection, Removal.....	1
Leg. Dissection, Removal.....	2
Trachea. Tracheotomy.....	1
Urethra. External Urethrotomy.....	1
Fracture	
Ankle. Osteotomy, Removal Internal Malleolus.....	1
Clavicle. Suture.....	1
Clavicle. Wiring.....	1
Femur, Impacted with Dislocation. Surgical Reduction.....	1
Femur, Spontaneous. Amputation.....	1
Finger. Amputation.....	1
Humerus. Wiring.....	1
Humerus, with Dislocation. Excision Head, Formation of Flail Joint.....	1
Mandible. Wiring.....	3
Patella. Suture.....	6
Skull. Craniotomy.....	34
Tibia. Wiring.....	2
Tibia. Suture.....	1
Ulna. Wiring.....	1
Vertebrae. Laminectomy.....	2

TABLE No. 6—Continued.

Ganglion,	
Hand. Removal.....	1
Wrist. Removal.....	2
Gaping Laparotomy Wound. Suture.....	1
Gangrene,	
Foot. Amputation.....	3
Leg. Amputation.....	2
Scrotum. Incisions for Drainage.....	1
Toe. Amputation.....	1
Gastritis, Phlegmonous. Exploratory Laparotomy.....	1
Goitre,	
Exophthalmic. Partial Thyroidectomy.....	2
Hyperplastic. Thyroidectomy.....	1
Granulating Surface,	
Foot. Skin Graft.....	1
Hand. Skin Graft.....	1
Hand. Dissection, Suture.....	1
Leg. Skin Graft.....	1
Neck. Skin Graft.....	3
Stump, Arm. Skin Graft.....	1
Stump, Leg. Repair.....	1
Gunshot Wound,	
Back. Exploratory Laparotomy.....	2
Foot and Sepsis. Partial Amputation, Drainage.....	1
Hematocele. Aspiration.....	1
Hemorrhage,	
Intracranial. Decompression Operation.....	2
Intracranial. Exploratory Craniotomy.....	2
Hemorrhoids,	
Hemorrhoidectomy by Clamp and Cautery.....	19
Hemorrhoidectomy by Excision.....	2
Hemorrhoidectomy by Ligation.....	3
Hernia,	
Inguinal. Herniotomy.....	47
Inguinal. Strangulated. Herniotomy.....	5
Inguinal. Strangulated. Laparotomy, Resection Bowel.....	3
Inguinal. Strangulated (Congenital). Herniotomy, Resection Bowel.....	1
Inguinal. Strangulated. Establishment Artificial Anus.....	1
Inguinal. Incarcerated. Herniotomy.....	2
Inguinal. Incarcerated. Laparotomy, Loosening Adhesions.....	1
Inguinal. Double. Double Herniotomy.....	11
Inguinal. Bubonocoele. Herniotomy.....	2
Femoral. Herniotomy.....	4
Femoral and Double Inguinal. Double Herniotomy.....	2
Properitoneal. Strangulated. Supplementary Abdominal Incision, Artificial Anus.....	1
Umbilical. Herniotomy.....	3
Ventral. Herniotomy.....	11
Hydrocele,	
Radical Cure.....	15
Aspiration.....	5
Hydrosalpinx,	
Salpingoophorectomy.....	1
Double Salpingoophorectomy.....	2
Impacted Wisdom Tooth. Extraction.....	1
Induration, Abdominal Wall. Incision for Drainage.....	1
Infection,	
Ankle. Incision for Drainage.....	1
Arm. Incision for Drainage.....	7
Arm. Amputation.....	1
Bacillus Aerogenes Capsulatus. Amputation of Leg.....	1
Elbow. Incision for Drainage.....	4
Face. Incisions for Drainage.....	1
Foot. Incisions for Drainage.....	11
Foot. Curetment.....	2
Hand. Incision for Drainage.....	12
Hematoma, Pelvis. Puncture, Drainage.....	1
Knee. Incision and Drainage.....	10
Leg. Incision and Drainage.....	9
Ovary. Plastic Operation.....	1
Pelvic Bones. Osteotomy, Removal Part of Ilium.....	1
Puerperal. Vaginal Panhysterectomy.....	1
Scalp. Incision and Drainage.....	4
Shoulder. Incision and Drainage.....	1
Stump of Leg. Curetment.....	1
Thigh. Curetment.....	1

TABLE No. 6—Continued.

Infiltration,	
Rectus Muscle, Chronic. Partial Resection Rectus.....	1
Urinary. Suprapubic Cystotomy, External Urethrotomy.....	2
Urinary. Incisions for Drainage.....	1
Urinary. Suprapubic Cystotomy, External Urethrotomy, Incisions for Drainage.....	1
Inflammation, Hip, Chronic. Incision.....	1
Intussusception,	
Laparotomy, Reduction Bowel, Suture Small Intestine.....	1
and Fibromyoma. Laparotomy, Removal Fibromyoma.....	1
Lacerations,	
Cervix. Trachelorrhaphy.....	1
Eye. Enucleation.....	2
Finger. Amputation of Phalanx.....	1
Finger. Repair.....	1
Perineum. Perineorrhaphy.....	5
Thumb. Amputation.....	1
Toes. Amputation.....	1
Lipoma,	
Abdomen and Thigh. Excision.....	1
Axilla. Excision.....	1
Back. Excision.....	1
Scalp. Excision.....	1
Lumbar Puncture.....	58
Mastoiditis,	
Mastoid Operation.....	6
Mastoid Operation, Double.....	1
Necrosis,	
Carpal Bones. Removal Necrotic Bone.....	1
Coccyx. Removal Necrotic Bone.....	1
Femur. Removal Necrotic Bone.....	1
Maxilla. Removal Necrotic Bone.....	1
Maxilla. Incision and Drainage.....	2
Metacarpal Bones. Amputation.....	1
Metatarsal Bones. Removal Necrotic Bone.....	1
Phalanx, Finger. Amputation.....	3
Phalanx, Toe. Amputation.....	1
Phalanx, Toe. Incision, Curetment, Drainage.....	2
Radius. Removal Necrotic Bone.....	1
Tarsal Bones and Tibia. Amputation of Leg.....	1
Tibia. Removal Necrotic Bone.....	1
Obstruction,	
Intestinal, (Splenoptosis, and Tumor Sigmoid). Exploratory, Laparotomy....	2
Intestinal, (Postoperative Adhesions). Laparotomy.....	1
Intestinal, (Volvulus). Laparotomy, Resection.....	1
Intestinal, (Adhesions). Resection, Artificial Anus.....	1
Intestinal, (Adhesions). Loosening Adhesions.....	1
Intestinal, (Tumor Sigmoid). Enterostomy.....	1
Orchitis,	
Suppurative. Incisions for Drainage.....	1
Tubercular. Incisions for Drainage.....	1
Tubercular. Incisions, Curetment.....	1
Tubercular. Orchiectomy.....	5
Osteomyelitis,	
Femur. Osteotomy.....	1
Rib. Resection Rib.....	1
Tibia and Fibula. Amputation.....	1
Tibia, Fibula and Bones of Foot. Incisions, Drainage.....	1
Papilloma, Prepuce. Excision.....	1
Perforation,	
Bladder. Repair.....	2
Diaphragm. Laparotomy.....	2
Diaphragm. Laparotomy, Repair.....	1
Intestines. Repair.....	14
Intestines. Resection, Button Anastomosis.....	1
Intestines. Resection, Suture Perforations.....	2
Intestines (Typhoid). Repair.....	2
Intestines (Typhoid). Laparotomy, Drainage, Artificial Anus.....	2
Liver. Exploratory Laparotomy.....	3
Liver. Packing.....	5
Liver. Repair.....	6
Mesentery. Exploratory Laparotomy.....	2
Mesentery and Omentum. Exploratory Laparotomy.....	2
Omentum. Exploratory Laparotomy, Ligation Omentum.....	1
Rectum. Laparotomy, Repair Visceral Perforations.....	1

TABLE No. 6—Continued.

Spleen. Packing.....	1
Spinal Column. Laparotomy, Repaired Visceral Perforations.....	1
Stomach. Repair.....	11
Uterus (Gravid). Cesarean Section.....	1
Perigastritis,	
Posterior Gastroenterostomy	1
Posterior Gastroenterostomy, Pylorotomy	1
Perihepatitis. Exploratory Laparotomy, Thoracentesis.....	1
Periostitis,	
Femur. (Spontaneous Fracture). Amputation.....	1
Tibia. Osteotomy.....	1
Tibia. Incisions and Drainage.....	1
Peritonitis,	
Acute. Double Salpingectomy, Appendectomy.....	1
Acute. Appendectomy	1
Diffuse. Exploratory Laparotomy.....	2
Diffuse. Laparotomy for Drainage.....	7
Diffuse. Appendectomy	4
Purulent. Appendectomy	4
Purulent. Laparotomy for Drainage.....	1
Pelvic. Incision and Drainage Cul-de-Sac.....	1
Pelvic. Laparotomy for Drainage.....	1
Tubercular. Exploratory Laparotomy, Drainage.....	1
Puerile Effusion. Thoracentesis.....	45
Prolapse,	
Rectum. Cauterization.....	2
Pyonephrosis. Removal Kidney.....	1
Pyosalpinx,	
Salpingectomy	5
Salpingectomy, Double	8
Salpingectomy, Double and Oophorectomy.....	15
Salpingectomy, Double and Resection Ovaries.....	1
Salpingo-oophorectomy	9
Salpingo-oophorectomy, Double.....	23
Rectoceles. Repair.....	5
Relaxed Scrotum. Partial Resection.....	2
Retroversion,	
Uterus. Shortening Round Ligaments.....	16
Ventral Suspension, Temporary.....	2
Rupture,	
Liver. Packing.....	1
Longitudinal Sinus, Laceration Brain. Craniotomy.....	1
Middle Meningeal Artery. Trephining, Ligation.....	1
Spleen. Repair by Encapsulation.....	2
Splenic Vein. Splenectomy.....	1
Tendons. Suture.....	1
Sarcoma,	
Arm. Removal Tumor.....	1
Back. Removal Tumor.....	1
Neck. Removal Tumor.....	2
Scalp Wounds. Exploratory Incision.....	269
Sciatia. Stretching and Massage of Nerve.....	1
Septic Abdominal Condition. Exploratory Laparotomy.....	1
Sequestrum,	
Abdominal. Removal	1
Jaw. Removal.....	4
Severed Tendons. Tenorrhaphy.....	3
Sigmoiditis. Exploratory Laparotomy.....	1
Sinus,	
Abdominal. Removal	1
Abdominal. Incision and Drainage.....	2
Cranial. Plastic Operation.....	2
Hip. Exploratory Incision, Drainage.....	1
Kidney. Removal Sinus Tract.....	1
Leg. Incision. Curetment.....	2
Scrotum (Tubercular). Incision, Drainage.....	1
Splenoptosis (Intestinal Obstruction). Exploratory Laparotomy.....	1
Stab Wound,	
Penetrating Abdomen. Exploratory Laparotomy.....	2
Penetrating Chest. Exploratory Laparotomy.....	1
Stricture,	
Rectum. Divulsion.....	2
Urethra. Suprapubic Cystotomy, Urethrotomy.....	2
Urethra. External Urethrotomy.....	1
Synovitis. Tapping.....	2
Thrombosis,	
and Tumor Hand. Exploratory Incision.....	1
Axillary Region. Incision, Drainage.....	1

TABLE No. 6—Concluded.

Tuberculosis,	
Acromion Process, Multiple Sinuses. Incisions for Drainage, Removal Acromion Process	1
Carpal Bones. Incisions, Drainage.....	1
Fallopian Tube. Salpingoophorectomy.....	1
Femur. Incisions, Drainage.....	2
Femur. Amputation.....	1
Scrotum, Epididymis, Vas Deferens. Dissection.....	1
Tumor,	
Foot. Excision.....	1
Pelvic. Laparotomy, Drainage.....	1
Splenic Flexure. Exploratory Laparotomy.....	1
Ulcer,	
Leg. Skin Graft.....	2
Leg. Incision, Drainage.....	1
Leg. Curetment.....	1
Rectum. Cuaterization.....	1
Scrotum and Thigh. Curetment.....	1
Stump of Leg. Incision	1
Stump of Leg. Skin Graft.....	2
Stomach. Gastroenterostomy.....	3
Stomach. Exploratory Laparotomy.....	1
Varicocele,	
Resection Veins.....	8
Double. Resection Veins.....	1
Varicose Veins, Leg. Excision, Ligation.....	3
Venesection.....	10
Volvulus, General, Visceral. Exploratory Laparotomy.....	1

VII.

INSANE ASYLUM.

Presenting forty-two tables, as follows:

- Table No. 1—Showing financial statement for the year 1908-1909.
Table No. 2—Showing classified report of expenditures.
Table No. 3—Showing movement of population.
Table No. 4—Showing forms of insanity of patients admitted, improved, unimproved and died, during the year ending March 31st, 1909.
Table No. 5—Showing ages of patients admitted during the year.
Table No. 6—Showing nativity of patients admitted during the year.
Table No. 7—Showing occupations of patients admitted during the year.
Table No. 8—Showing duration of treatment of patients discharged improved during the year.
Table No. 9—Showing ages of patients discharged improved during the year.
Table No. 10—Showing causes of death of patients who died during the year.
Table No. 11—Showing ages of patients who died during the year.
Table No. 12—Showing period of residence in asylum, of patients remaining under treatment, March 31st, 1909.
Table No. 13—Showing work done in laboratory during the year.
Table No. 14—Showing tabulation as to the prominence of alcohol and drugs, personal and ancestral, of patients admitted during the year.
Table No. 15—Showing cases of Dementia Parly during the year.
Tables Nos. 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, 35, 36, 37, 38, 39, 40—Showing total exhibit, individually, of anthropological measurements and stigmata of degeneration, present or non-present, in the classified Phychoses admitted during the year.
Table No. 41—Showing work done in Sewing Room during the year.
Table No. 42—Showing garden products.

ANNUAL REPORT OF

TABLE NO. 1.

FINANCIAL STATEMENT FOR THE FISCAL YEAR 1908-1909.

	APPROPRIATIONS.	EXPENSES	BALANCE
Salaries	\$42,000 00	\$41,921 32	\$ 78 68
Groceries	52,000 00	48,817 55	3,182 45
Drugs	1,500 00	1,128 64	371 36
Dry Goods, (\$400. to Lab. Mat.)	7,600 00	6,882 28	717 72
Forage	2,500 00	2,370 97	129 03
General Repairs	2,000 00	1,459 27	540 73
Entertainment	1,000 00	972 05	27 95
Labor Material, (\$400. from Dry Goods)	2,900 00	2,874 68	25 32
Travelling Expenses	100 00	52 50	47 50
Unpaid Bills	363 55	363 55	
Spec. Appr. Sec. 2	114 50	114 50	
Spec. Appr. Sec. 3	6,700 00	6,699 41	59
Total	\$118,778 05	\$113,656 72	\$5,121 33
Less Amount of Unpaid Bills, last Fiscal Year...	363 55	363 55	
Total	\$118,414 50	\$113,293 17	\$5,121 33

TABLE NO. 2.

CLASSIFIED REPORT OF EXPENDITURES OF CITY INSANE ASYLUM FOR FISCAL YEAR 1908-1909.

Salaries	\$ 41,921.32
Bread	6,855.15
Meat and Fish	12,471.54
Groceries	10,206.75
Chickens	727.10
Vegetables	3,415.55
Milk	3,732.64
Fuel	9,746.03
Ice	1,662.79
Drugs, Instruments and Supplies	1,128.64
Dry Goods, Clothing and Bedding	3,977.41
House Furnishing Goods and Furniture	2,904.87
Forage and Bedding for Horses	610.54
Repairing Vehicles and Harness, Shoeing Horses	295.40
Printing and Stationery (including Postage)	334.61
Oils, Packing, Waste and Tools used by Engineer	750.63
Lumber and Materials for Coffins	96.40
Car Tickets	50.00
Miscellaneous	227.64
Labor and Material for Repairing Fences and Maintaining Grounds	5.35
General Repairs	1,459.27
Entertainment	972.05
Travelling Expenses	52.50
Unpaid Bills	363.55
Special Appropriation Section 2	114.50
Special Appropriation Section 3	6,699.41
Labor and Material for Repairing Boilers, Machinery, etc	2,874.68
Total	\$113,656.73

TABLE NO. 3.

SHOWING MOVEMENT OF POPULATION OF CITY INSANE ASYLUM FOR THE YEAR ENDING MARCH 31st, 1909.

	MALE	FEMALE	TOTAL
Remaining April 1st, 1908	377	272	649
Admitted during year ending March 31, 1909	210	174	384
Total number under treatment during year	587	446	1033
Daily average population	376.6	267.3	643.9
Bed capacity of Institution	349	240	589
Discharged during year	95	71	166
" as recovered	5	1	6
" unimproved	10	12	22
" improved, eloped, deported	80	58	138
Transferred to Nevada, Mo.	40	62	102
" Insane Dept. Poor House	12	9	21
" City Hospital	1	1	1
Died	48	22	70
Remaining April 1st, 1909	392	281	673

TABLE No. 4.

SHOWING FORMS OF INSANITY OF PATENTS ADMITTED, IMPROVED, UNIMPROVED AND DIED, DURING YEAR ENDING MARCH 31, 1909.

	Admitted			Improved			Unimproved			Died

FEMALE HOSPITAL.

Presenting twenty-three tables, as follows:

- Table No. 1—Showing medical cases treated.
- Table No. 2—Showing surgical cases treated.
- Table No. 3—Showing number of patients admitted, discharged, and died during the fiscal year, 1908-1909.
- Table No. 4—Showing number of births during the year.
- Table No. 5—Showing social condition of patients admitted.
- Table No. 6—Showing ages of patients admitted.
- Table No. 7—Showing nativity of patients admitted.
- Table No. 8—Showing occupation of patients admitted.
- Table No. 9—Showing record of labor cases.
- Table No. 10—Showing record of pregnancy cases.
- Table No. 11—Showing babies treated during the year.
- Table No. 12—Showing diseases for which operations were performed.
- Table No. 13—Showing character of operations performed.
- Table No. 14—Showing report of anaesthesias given during the year.
- Table No. 15—Showing patients transferred from the City Hospital, during the year, 1908-1909.
- Table No. 16—Showing number of patients transferred to the Poor House, Insane Asylum, etc., during the year.
- Table No. 17—Showing Post-Mortem examination results.
- Table No. 18—Showing surgical specimens examined during the year.
- Table No. 19—Showing analysis of the year's work in Urinalysis done in the Clinical laboratory during the year.
- Table No. 20—Showing analysis of the year's work in Clinical Microscopy done in the Clinical laboratory during the year.
- Table No. 21—Showing visiting nurses who have served at the Female Hospital for their obstetrical training during the year, 1908-1909.
- Table No. 22—Showing Financial Balance Sheet, 1908-1909.
- Table No. 23—Showing cost to operate, not including improvements, etc.

TABLE No. 1.
MEDICAL DISEASES.
 1908-1909.

m. Pyemia.....	1	...	...	...	...	1
4. Parasitic Diseases—						
a. Pediculosis Capitis.....	4	1	1	...	3	9
b. Pediculosis Corporis.....	1	...	...	...	...	1
c. Pediculosis Pubis.....	2	1	...	...	2	5
d. Scabies.....	3	...	...	...	...	3
e. Taenia Saginata.....	1	...	...	...	...	1
5. Poisoning—						
a. Cocainism.....	...	1	1	...	...	2
b. Alcoholism.....	...	4	...	...	1	5
c. Morphinism.....	...	10	9	2	3	21
d. Carbolic Acid.....	...	1	...	...	...	2
DISEASES OF NERVOUS SYSTEM.						
1. Functional Diseases—						
a. Epilepsy.....	...	6	2	...	5	13
b. Hysteria.....	...	3	2	...	2	7
c. Neurasthenia.....	...	23	5	1	6	35
d. Melancholia.....	...	...	1	...	...	1
e. Chorea.....	...	1	...	...	...	1
f. Mental Delinquency.....	...	...	1	...	...	1
g. Migraine.....	1	...	...	...	...	1
2. Diseases of Brain and Cord—						
a. Imbecility.....	...	...	1	...	...	1
b. Hemiplegia.....	...	18	5	9	9	41
c. Dementia, Senile.....	...	2	3	2	1	8
d. Dementia, Alcoholic.....	...	3	...	1	...	4
e. Insanity.....	...	...	1	...	...	1
f. Syphilis of Cord.....	...	1	2	...	1	4
g. Brain Tumor.....	...	...	...	1	...	1
h. Paralysis Agitans.....	...	...	2	...	...	2
i. Multiple Sclerosis.....	...	1	...	...	2	3
j. Tabes Dorsalis.....	...	...	...	1	2	3
k. Ant. Polio-Myelitis.....	...	...	...	...	1	1
l. Paresis.....	...	1	...	...	...	1
m. Tic Doloroux.....	...	...	...	...	1	1
n. Hydrocephalus.....	...	...	1	1	...	2

TABLE No. 1—Continued.

DISEASES	Recovered	Improved	Not Improved	Died	Remaining April 1, 1909	Total
3. Diseases of Blood— VESSELS OF BRAIN.						
a. Cerebral Hemorrhage.....	...	...	...	1	...	1
4. Disease of Nerves—						
a. Neuralgia.....	...	...	...	...	...	0
b. Sciatica.....	1	3	1	...	...	5
c. Neuritis Alcoholic.....	...	2	...	...	...	2
d. Torticollis.....	...	...	...	...	1	1
5. Throphic Diseases—						
a. Marasmus.....	1	3	...	5	1	10
b. Inanition.....	...	...	...	2	...	2
c. Rickets.....	...	5	1	2	...	8
CIRCULATORY SYSTEM.						
1. Diseases of Heart and Pericardium—						
a. Aortic Regurgitation.....	...	4	...	3	2	9
b. Aortic Stenosis.....	...	...	...	...	...	0
c. Mitral Regurgitation.....	2	58	7	27	10	104
d. Pericarditis.....	1	...	...	3	...	4
e. Tricuspid Regurgitation.....	...	...	...	3	...	3
f. Myocarditis.....	...	4	3	8	4	19
g. Acute Dilatation of Heart.....	...	...	...	2	...	2
h. Cardiac Asthma.....	...	1	...	...	...	1
i. Angina Pectoris.....	...	1	...	...	...	1
2. DISEASES OF BLOOD VESSELS—						
a. Aneurysm of Aorta.....	...	1	...	3	...	4
b. Aneurysm of Subclavian.....	...	...	...	1	...	1
c. Aneurysm of Innominate.....	...	...	1	...	...	1
d. Arterio Sclerosis.....	...	7	6	4	4	21
e. Phlegmasia alba Dolens.....	...	1	...	...	...	1
f. Varicose Veins.....	...	3	...	...	1	4
DISEASES OF RESPIRATORY SYSTEM.						
1. Diseases of Larynx—						
a. Laryngitis.....	...	1	...	1	...	2
2. Diseases of Bronchi—						
a. Bronchitis.....	4	24	9	9	13	59
b. Bronchial Asthma.....	...	1	...	1	11	13
3. Diseases of Lungs and Pleurae—						
a. Atelectasis.....	...	1	...	8	...	9
b. Pneumonia-Lobar.....	...	...	...	4	...	4
c. Pneumonia Broncho.....	2	...	...	2	...	2
d. Pneumonia Hypostatic.....	...	...	...	10	...	10
e. Emphysema.....	...	3	...	2	...	5
f. Pleurisy.....	...	5	1	7	...	13
DISEASES OF DIGESTIVE SYSTEM.						
1. Disease of Mouth and Pharynx—						
a. Stomatitis.....	1	...	1	...	...	2
b. Pharyngitis.....	...	2	1	...	...	3
c. Tonsillitis.....	3	4	...	...	2	9
d. Hypertrophy of Tonsil.....	2	...	...	...	...	2
e. Ptialysm.....	...	...	1	...	...	1
2. Diseases of Stomach—						
a. Gastritis Acute.....	...	...	1	...	1	1
b. Gastritis Chronic.....	...	4	1	1	...	6
c. Gastritis Alcoholic.....	1	4	...	...	...	5
d. Gastro-Enteritis.....	...	3	...	1	1	5
3. Diseases of Intestines—						
a. Enteritis.....	2	1	1	2	1	7
b. Enteritis Tubercular.....	...	1	...	1	...	2
c. Entero-Colitis.....	...	...	...	...	...	0
d. Ulcerative Colitis.....	...	...	...	1	...	1
e. Constipation.....	...	3	...	...	2	5
DISEASES OF LIVER AND GALL-BLADDER.						
a. Cirrhosis of Liver.....	...	4	2	15	...	21
b. Cholecystitis.....	2	...	...	2	1	5
DISEASES OF SPLEEN.						
a. Splenitis.....	...	...	...	9	...	9

TABLE No. 1—Concluded.

DISEASES		Recovered	Improved	Not Improved	Died	Remaining April 1, 1909	Total
DISEASES OF URINARY ORGANS.							
1.	Diseases of Kidneys—						
	a. Nephritis, Interstitial.....	1	25	10	45	18	99
	b. Nephritis, Parenchymatous.....	2	3	...	15	...	20
	c. Nephritis, Pyello.....	...	...	...	1	...	5
	d. Renal Asthma.....	...	3	...	2	...	5
	e. Uraemia.....	...	...	...	3	...	3
2.	Diseases of Bladder—						
	a. Eneuresis.....	...	4	...	...	...	4
	b. Cystitis.....	2	5	...	...	...	7
DISEASES OF PREGNANCY.							
	a. Eclampsia.....	3	...	...	1	...	4

TABLE No. 2.

SURGICAL DISEASES.

APRIL 1, 1908—MARCH 31, 1909.

DISEASES OF GLANDS.							
	a. Adenitis Axillary.....	1	...	...	...	...	1
	b. Adenitis Cervical.....	4	...	...	...	...	4
	c. Adenitis Inguinal.....	4	9	1	...	...	14
	d. Adenitis Tubercular.....	...	3	...	...	1	4
	e. Adenitis Femoral.....	...	1	...	...	...	1
1.	Of Thyroid Gland—						
	a. Goitre.....	1	1	3	...	...	5
2.	Of Mammary Gland—						
	a. Abscess.....	...	1	...	...	...	1
	b. Carcinoma.....	...	...	2	1	...	3
	c. Mastitis.....	3	1	...	...	...	4
	d. Parotitis.....	1	...	...	...	...	1

TABLE No. 2—Continued.

DISEASES	Recovered	Improved	Not Improved	Died	Remaining April 1, 1909	Total
DISEASES OF DIGESTIVE SYSTEM.						
1. Diseases of Tonsil and Pharynx—						
a. Hypertrophy of Tonsil.....	2	...	...	...	...	2
2. Diseases of Intestines—						
a. Appendicitis Acute.....	5	...	...	...	...	5
b. Appendicitis Chronic.....	12	3	2	1	...	18
c. Fecal Fistula.....	12	...	2	...	...	14
d. Obstruction.....	...	1	...	...	...	1
3. Diseases of Rectum and Anno—						
a. Hemorrhoids.....	...	10	4	...	...	16
b. Ischio-rectal Abscess.....	...	3	1	...	...	2
c. Fistula-in-ano.....	4	...	1	...	...	10
d. Recto-vaginal fistula.....	...	1	8	1	...	10
e. Prolapse of Rectum.....	...	1	...	...	...	1
f. Stricture of Rectum.....	1	6	...	...	1	8
g. Rectocele.....	1	...	1	1	...	3
h. Ulcer of Rectum.....	...	...	3	...	...	3
4. Diseases of Stomach—						
a. Ulcer of Stomach.....	1	2	...	...	...	3
b. Acute Dilatation.....	...	...	...	1	...	1
5. Diseases of Gall-bladder—						
a. Cholelithiasis.....	9	3	1	8	3	24
b. Cholecystitis.....	...	...	1	...	...	1
DISEASES OF GENITO-URINARY SYSTEM.						
1. Diseases of Bladder—						
a. Cystitis.....	1	...	5	...	1	7
b. Cystocele.....	5	2	2	...	2	11
c. Vesico-vag. fistula.....	2	...	...	...	2	4
d. Gangrene of Bladder.....	...	...	...	1	...	1
2. Diseases of Kidneys—						
a. Cyst of Kidney.....	...	...	...	1	...	1
b. Floating Kidney.....	...	...	1	...	...	1
c. Pyelo-Nephritis.....	...	...	...	1	...	1
d. Amyloid Kidney.....	...	1	...	1	...	2
3. Diseases of Urethra—						
a. Gonorrhoea.....	35	57	12	2	12	118
4. Diseases of Vagina and Vulva—						
a. Vulvo-vag. Abscess.....	4	4	...	...	...	8
b. Chancroids.....	19	57	1	1	5	83
c. Condylomata.....	...	2	...	...	...	2
d. Vaginitis.....	1	3	1	1	...	6
e. Venereal Warts.....	2	5	...	...	2	9
f. Vulvitis.....	2	...	...	...	...	2
g. Gonorrhoea.....	1	...	...	...	...	1
h. Carcinoma of Vagina.....	...	2	1	...	...	1
i. Elephantiasis of Labia.....	...	...	...	...	...	2
j. Edema of Vulva.....	...	2	...	...	...	2
k. Urethral Caruncle.....	5	1	...	...	...	6
l. Vaginismus.....	...	1	...	...	1	2
m. Karosis of Vulvae.....	...	1	...	...	...	1
n. Vulvo-vaginal Cyst.....	1	...	...	...	...	1
o. Colpocele.....	1	1	...	...	...	2
p. Bubo.....	2	2	...	...	1	5
5. Diseases of Uterus—						
a. Antiflexion.....	2	1	2	...	1	6
b. Retroflexion.....	2	3	1	...	...	6
c. Retroversion.....	10	9	2	...	1	22
d. Carcinoma.....	2	2	5	4	3	16
e. Endometritis acute.....	3	...	...	...	3	6
f. Endometritis Chronic.....	14	13	7	1	2	37
g. Endometritis Hypertrophic.....	1	...	...	...	...	1
h. Fibroid.....	5	6	5	6	4	26
i. Prolapse.....	6	2	4	...	1	13
j. Subinvolution.....	3	2	...	...	...	5
k. Hyperinvolution.....	1	...	...	...	...	1
l. Lacerated Cervix.....	5	...	2	...	...	7
m. Erosion of Cervix.....	10	...	3	...	2	15
n. Infantile Uterus.....	...	...	1	...	1	2
o. Leucorrhoea.....	42	10	12	...	6	64
p. Metrorrhagia.....	1	1	1	...	...	3
q. Uterine Polyp.....	1	...	...	...	...	1
r. Atresia Cervix.....	2	...	...	...	1	3
s. Retained Membranes.....	20	1	...	...	...	21
t. Myoma.....	1	...	...	...	...	1
u. Menorrhagia.....	...	3	...	...	...	3

TABLE No. 2—Continued.

DISEASES	Recovered	Improved	Not Improved	Died	Remaining April 1, 1909	Total
DISEASES OF TUBES AND OVARIES.						
a. Tubo Ovarian Abscess.....	27	1	...	2	4	34
b. Ovarian Abscess.....	1	...	...	...	...	1
c. Cystic Ovaries.....	153	...	...	...	8	161
d. Hydro-salpinx.....	20	6	...	...	2	28
e. Pyo-salpinx.....	74	3	17	5	12	111
f. Salpingitis.....	11	11	12	1	3	38
g. Hematoma of Ovary.....	16	...	...	...	...	16
h. Oophoritis.....	2	2	1	1	...	6
i. Intraligamentous Cyst.....	1	...	...	...	1	2
j. Ectopic Gestation.....	2	...	...	1	...	3
k. Papilloma of Ovary.....	1	...	...	...	...	1
l. Tubo-Ovarian Cyst.....	1	...	...	...	...	1
m. Salpingitis Tubercular.....	...	1	...	...	...	1
DISEASES OF PERINEUM.						
a. Laceration.....	10	5	5	...	5	25
DISEASES OF PENIS.						
a. Circumcision.....	8	...	...	...	...	8
b. Phimosis.....	1	1	...	...	...	2
DISEASES OF HEAD, FACE AND NECK.						
1. Of Head.—						
a. Carcinoma of Nose.....	...	...	1	...	1	2
b. Sebaceous Cyst.....	...	...	...	...	...	0
c. Abscess of Jaw.....	...	...	...	...	...	0
d. Cellulitis of Face.....	...	2	1	...	...	3
DISEASES OF EYE.						
a. Iritis.....	1	4	...	...	...	5
b. Conjunctivitis.....	...	4	1	...	...	5
c. Ophthalmia Neonatorum.....	1	...	...	...	...	1
d. Pterygium.....	2	...	...	...	...	2
e. Chalasion.....	1	...	...	...	...	1
f. Glaucoma.....	...	...	2	...	...	2
g. Ulcer of Cornea.....	...	1	...	...	...	1
h. Dacryo-cystitis.....	1	1	...	...	...	2
i. Strabismus.....	...	...	1	...	...	1
j. Mastoid Abscess.....	...	...	...	...	1	1
DISEASES OF ABDOMEN AND ABDOMINAL WALL.—						
a. Abdominal Adhesions.....	8	4	...	1	1	14
b. Hernia Inguinal.....	4	2	...	...	2	8
c. Hernia Femoral.....	1	...	1	...	1	3
d. Hernia Umbilical.....	2	...	2	...	...	4
e. Hernia Ventral.....	5	4	3	...	1	13
f. Post Operative Fistula.....	2	2	1	...	...	5
g. Peritonitis General.....	1	...	...	4	2	7
h. Peritonitis Pelvic.....	3	1	...	1	...	5
i. Ascites.....	...	4	4	7	1	16
j. Pelvic Adhesions.....	11	4	...	1	1	17
k. Psoas Abscess.....	1	...	...	1	...	2
DISEASES OF TRUNK.						
a. Decubitus.....	...	6	4	1	1	12
b. Scoliosis.....	...	1	...	1	2	4
c. Spondylitis.....	...	1	...	1	...	2
d. Coxalgia.....	...	1	...	...	...	1
e. Lipoma.....	1	...	...	...	...	1
DISEASES OF UPPER EXTREMITIES.						
1. Shoulder Dislocation.....	...	2	2	...	...	4
2. Arm-Tubercular Elbow.....	...	1	...	...	...	1
3. Hand Cellulitis.....	...	1	...	...	...	1
4. Kyphosis.....	...	...	...	...	1	1
DISEASES OF LOWER EXTREMITIES.						
1. Of Hip and Thigh—						
a. Tuberculosis.....	1	4	1	...	2	8
b. Dislocation.....	...	1	...	...	1	2
2. Of Knee—						
a. Ankylosis.....	...	2	1	...	...	3
b. Sprain.....	...	1	...	...	...	1
3. Of Leg—						
a. Varicose Veins.....	...	2	...	...	...	2
b. Varicose Ulcers.....	...	25	1	3	17	46

TABLE No. 2—Concluded.

DISEASES		Recovered	Improved	Not Improved	Died	Remaining April 1, 1909	Total
4.	Of Foot and Ankle.....	...	...	...	...	1	1
	a. Sprain.....	...	2	...	...	...	2
	b. Gangrene.....	1	2	...	1	1	5
	c. Amputation of Toes.....	...	2	...	...	...	2
	d. Pes-planus.....	1	...	...	...	...	1
	FRACTURES.						
	a. Femur.....	2	2	1	...	3	8
	b. Humerus.....	...	1	...	...	1	2
	c. Ribs.....	...	1	...	...	1	2
	d. Colles Fractures.....	1	...	...	...	...	1
	e. Pott's Fractures.....	1	1	...	...	...	2
	f. Clavicle.....	...	...	1	...	1	1
	g. Tibia.....	...	...	1	...	...	1
	h. Os calcis.....	...	...	...	...	1	1
	a. Dislocation Elbow.....	...	...	1	...	...	1
	b. Empyema Thorax.....	1	...	...	...	...	1
	c. Carbuncle.....	2	1	...	...	...	3
	d. Abscess of Neck.....	1	...	...	...	...	1
	e. Sulphuric Acid Burn.....	...	1	...	...	...	1
	f. Surgical Shock.....	...	...	...	1	...	1
	g. Spina Bifida.....	...	...	...	1	...	1
	h. Carcinoma Liver.....	...	...	...	2	...	2
	i. Rectal Polyp.....	1	...	...	...	...	1
	j. Naevus.....	...	1	1	...	...	2
	k. Tubercular Spleen.....	...	...	...	1	...	1
	l. Carcinoma Sigmoid.....	...	...	2	...	...	2
	m. Oedema of Lungs.....	...	...	...	4	...	4

TABLE No. 3.

Holland	1	Wales	2
Hungary	14	Unknown	25
Italy	6	United States	1,520
Ireland	71		
Jerusalem	1	Total	1,801

TABLE NO. 8.

SHOWING OCCUPATION OF PATIENTS ADMITTED.

Actress	1	Laborer and Housework.....	1
Attendant, Insane Asylum.....	1	Landlady	1
At home	2	Maid	8
Bag Factory	1	Milliner	3
Bar Maker	1	Music Teacher	2
Basket Maker	1	Needle Work	1
Box Factory	1	Nurse	7
Car Cleaner	1	Nursegirl	2
Carnival Singer	1	Newspaper Vender	2
Cashier	1	Office Girl	1
Cigar Maker	2	Paper Bag Maker	1
Cigar Factory	1	Paper Bag Factory	1
Clerk	7	Pantry Work	3
Chambermaid	8	Pantry Girl	1
Confectioner	1	Presser	1
Cotton Factory	1	Prostitute	29
Cook	26	Restaurant	14
Department Store	1	Rope Factory	1
Demonstrator	1	Saleslady	8
Dish Washer	9	Sack Sewer	1
Domestic	90	Seamstress	9
Dressmaker	8	Sewing	1
Factory	40	Scrub Woman	8
Farm Work	1	Singer	1
Grocery Packer	1	Solicitor	2
Garment Maker	1	Schoolgirl	9
Inmate Industrial School.....	1	Stenographer	1
Hair Dresser	3	Servants	5
Hotel Work	5	Shoe Factory	9
Housekeeper	8	Telephone Operator	2
Housecleaning	1	Tobacco Stripper	1
Housegirl	2	Work, Kitchen	1
Housemaid	2	Washing	6
Housewife	254	Washing and Ironing.....	2
Housework	240	Waitress	31
Ironing	2	Unknown	500
Janitress	2		
Laundress	95		1,801
Laborer	1		
Daily Average No. of Internes			7
Daily Average No. of City Firemen			2
Daily Average No. of Visiting Nurses			4
Daily Average No. of Employes			57.76
Daily Average No. of Patients			225.83
Daily Per Capita Expense of Patients			.80+
Daily Per Capita Expense of Patients and Employes.....			.64+
Daily Average Expense Per Capita for Sustenance of Patients and Employes			.25+

TABLE NO. 9.

RECORD OF LABOR CASES, YEAR 1908-1909.

Total Number of Cases not including miscarriages	331	Average foetal pulse.....	137.3
Shoulder	1	Average Duration of Labor	
Face	3	13 hrs., 46 min.	
Breech	6	Average time delivery of placenta 13.75 min.	
Foot	8	Cord around the neck.. 1 ...	54
Presentations		Cord around the neck.. 2 ...	15
L. O. P.		Cord around the neck.. 3 ...	0
R. O. P.	1	Stillborn	14
R. O. A.	78	Premature	15
L. O. A.	231	Hydrocephalus	2
R. M. P.	3	Asphyxiated	4
Sex		Spina bifida	1
Male	167	Polydactylism	1
Female	164	Eclampsia Cases	3
Average weight of child.....	7.07 lbs.	Twins	4
Multipara	128	Web Fingers	1
Primipara	194	Labor Induced	1
Not known	9	Macerated Foetus	8
Lacerations		Prolapse Funis	3
1st Degree	89	Knot in Cord.....	4
2nd Degree	15	Placenta Previa	2
3rd Degree	0	Average Pulse 79.31, Respiration 22.75, Temperature 98.07, one hour after labor.	
Forceps Cases	3		
Versions	4		

TABLE NO. 10.

RECORD OF PREGNANCY CASES.

Cases Delivered in Hospital (including Miscarriages).....	331
Cases Not Delivered (Discharged or Remaining April 1, '09).....	136
Total Number of Cases.....	467

COLOR OF PATIENTS.

	White	Black
Cases Delivered (with Miscarriages).....	237	94
Cases Not Delivered (Discharged or Remaining April 1, '09).....	94	42
Total	331	136
		467

TABLE NO. 13.

CHARACTER OF OPERATIONS PERFORMED 1908-1909.

Appendectomy, Puncture of Ovary, Gilliam Ventral Fixation.....	1
Appendectomy, Oophorectomy, Thermo-cautery.....	1
Appendectomy, Resection Ovarian Cyst.....	4
Appendectomy, Resection Ovarian Cyst, Curettment.....	1
Appendectomy, Resection Ovarian Cyst, Gilliam Ventral Suspension.....	1
Appendectomy, Drainage	3
Appendectomy, Nephrotomy	1
Appendectomy, Puncture Ovaries.....	2
Appendectomy, Curettment, Gilliam Ventral Suspension	2
Appendectomy, Curettment, Gilliam Ventral Suspension, Puncture Ovary	1
Appendectomy, Curettment, Removal of Fibroids.....	2
Appendectomy, Resection Ovary and Mesenterolith.....	1
Appendectomy, Repair Ant. Abdominal Wall.....	1
Amputation Leg Upper 1/3.....	2
Axillary Glands, Removal and Drainage.....	1
Abdominal Adhesions, Breaking up.....	3
Anal Fistula, Closure.....	3
Ankylosis Knee Joint, Breaking up.....	1
Amputation Thigh Lower 1/3.....	1
Abdominal Exploratory Laparotomy.....	4
Abscess Appendicidal Draining.....	1
Adhesions, Pelvis, Repairing	2
Adhesions, Pelvis, Puncture Ovaries.....	1
Adhesions, Pelvis, Knee Breaking up.....	1
Adenitis Inguinal, Incision of.....	1
Abdominal Cavity, Drainage.....	1
Blood Transfusion	2
Bubotomy Bubectomy	1
Breast Amputation, Removal Axillary Glands.....	2
Cul-de-Sac, Open and Drain.....	1
Cast Plaster, for Clavicle.....	1
Cholecystotomy and Drainage	4
Cholecystotomy, Puncture Ovaries, Appendectomy, Double Salpingectomy.....	1
Cholecystotomy, Salpingectomy, Salpingo-Oophorectomy.....	1
Cholecystotomy, Salpingectomy, Salpingo-Oophorectomy, Appendectomy.....	2
Cholecystotomy, Appendectomy, Salpingo-Oophorectomy	1
Cholecystotomy, Appendectomy	2
Curettment	33
Curettment, Appendectomy, Double Salpingectomy.....	1
Curettment, Resection Cervix.....	1
Curettment, Colporrhaphy	1
Curettment, Cauterization	1
Curettment, Perineorrhaphy	2
Circumcision	1
Cyst of Neck Opening	1
Cyst of Neck, Multilocular Tapping.....	1
Delivery Forceps, Replacement Cord.....	3
Examination, Gynecological	4
Examination, Hip	1
Fibula and Tibia, Wound of.....	1
Fistula Recta-vaginal closure, Perineorrhaphy.....	1
Fistula, Urethro-vaginal closure.....	8
Fistula, Fecal, closure of.....	1
Glass Tube, removing from Post. Cul-de-sac.....	1
Gastro-Enterostomy	1
Hemorrhoidectomy, Perineorrhaphy.....	1
Herniotomy, Ventral	2
Herniotomy, Femoral	2
Herniotomy, Umbilical Circumcision.....	1
Herniotomy, Inguinal	3
Herniotomy, Omental	1
Herniotomy, Ventral, Right Salpingo-Oophorectomy.....	1
Herniotomy, Inguinal, Salpingectomy, Resection Ovary, Appendectomy.....	1
Herniotomy, Umbilical.....	1
Herniotomy, Inguinal, Double.....	1
Hysterectomy, Pan. Vaginal.....	5
Hysterectomy, Supra-vaginal, Suspension of Cervix Stump.....	7
Hysterectomy, Vaginal, Hemorrhoidectomy, Cauterization Urethral Caruncle.....	1
Hysterectomy, Suprapubic, Appendectomy	3
Hysterectomy, Suprapubic, Resection Intestines, Pelvic Adhesions.....	1
Hysterectomy, Suprapubic, Appendectomy, Cholecystotomy.....	1
Hysterectomy, Suprapubic, Repair Sigmoid Leaving Right Ovary.....	1

TABLE No. 13—Concluded.

Hysterectomy, Suprapubic, Left Salpingectomy, Right Salpingo-Oophorectomy and Appendectomy.....	1
Hip, Dislocation of.....	1
Ischial Sinus, Incision of.....	2
Intestines, Resection, Exploring Kidney.....	1

IX.

POOR HOUSE.

Presenting thirty tables, as follows:

- Table No. 1—Showing classification, number, and salaries of Employees of Poor House.
- Table No. 2—Showing Receipts and Expenditures for fiscal year ending March 31st, 1909.
- Table No. 3—Showing cost of maintenance per capita.
- Table No. 4—Showing number of paupers admitted, discharged and died during the fiscal year 1908-1909.
- Table No. 5—Showing nativity of paupers admitted during fiscal year, 1908-1909.
- Table No. 6—Showing nativity of paupers discharged during the fiscal year, 1908-1909.
- Table No. 7—Showing nativity of paupers who died during the fiscal year, 1908-1909.
- Table No. 8—Showing cause of death of paupers during the fiscal year, 1908-1909.
- Table No. 9—Showing age of paupers who died during the fiscal year, 1908-1909.
- Table No. 10—Showing number of paupers from St. Louis County at end of fiscal year, 1908-1909.
- Table No. 11—Showing number of pauper pay patients during the fiscal year, 1908-1909.
- Table No. 12—Showing number of insane admitted, discharged, and died during the fiscal year, 1908-1909.
- Table No. 13—Showing nativity of insane admitted during the fiscal year, 1908-1909.
- Table No. 14—Showing nativity of insane discharged during the fiscal year, 1908-1909.
- Table No. 15—Showing nativity of inmates who died during the fiscal year, 1908-1909.
- Table No. 16—Showing cause of death of insane during the fiscal year, 1908-1909.
- Table No. 17—Showing age of insane who died during the fiscal year, 1908-1909.
- Table No. 18—Showing number of insane from St. Louis County at end of fiscal year, 1908-1909.
- Table No. 19—Showing number of insane pay patients during the fiscal year, 1908-1909.
- Table No. 20—Showing nativity, color and sex of inmates buried in Potters Field during the fiscal year, 1908-1909.
- Table No. 21—Showing nativity, sex, number and color of interments in Potters Field during the fiscal year, 1908-1909.
- Table No. 22—Showing articles of clothing made in Sewing Room during the fiscal year, 1908-1909.
- Table No. 23—Showing articles of clothing (private) made in Sewing Room during fiscal year, 1908-1909.
- Table No. 24—Showing articles of clothing repaired in Sewing Room during the fiscal year, 1908-1909.
- Table No. 25—Showing articles which were sold by the Commissioner of Supplies to the credit of the Poor House during the fiscal year, 1908-1909.
- Table No. 26—Showing articles manufactured during the fiscal year, 1908-1909.
- Table No. 27—Showing number of shoes repaired during the fiscal year, 1908-1909.
- Table No. 28—Showing indebtedness of St. Louis County for maintenance of County patients during the fiscal year, 1908-1909.
- Table No. 29—Showing surgical operations performed at the Poor House Hospital, diagnosis and character of operations performed during fiscal year, 1908-1909.
- Table No. 30—Showing medical cases seen in the Poor House Hospital during the fiscal year, 1908-1909.

OFFICE OF

Assessor and Collector of Water Rates.

St. Louis, April 13th, 1909.

HON. FREDERICK H. KREISMANN, Mayor of the City of St. Louis.

Sir: In conformity with the City Charter and Ordinance, I have the honor to submit for the information of the Executive and Legislative Departments of the City Government the following report on the operations of this office for the fiscal year ending April 12th, 1909.

The subjoined tables will supply the statistics for the year as indicated by the respective headings.

Table No. 1—Receipts for the past year.

Table No. 2—Receipts for the previous year.

Table No. 3—Comparative statement of the resources of revenue for the fiscal years 1906-1907 to 1908-1909.

Table No. 4—Classification of sources of income for fiscal year 1908-1909.

Table No. 5—Number, size and kinds of meters now in use and placed during the year, and number of hydraulic elevators.

Table No. 6—Comparative statement of meters and elevators in use, and the revenue derived therefrom.

Table No. 7—Number and size of taps granted during the year, and the amount received therefrom.

Table No. 8—Daily collections from all sources.

Table No. 9—Yearly and total revenue derived from Water Rates since date of introduction.

Table No. 10—Collections by calendar years.

Table No. 11—Revenue collected each year since 1870, and the per cent of cost for collecting same.

Table No. 12—Public institutions supplied with water free of charge.

Calling attention to the valuable and interesting information contained in the accompanying tables, I would especially refer to Table No. 4, showing a classified statement of the various sources of revenue. Among other things, this table shows collections of \$719,424.45 for use and consumption of water measured by meter. If assessed at flat or schedule rates, the number of subjects yielding revenue, such as residences, stores, offices, saloons, breweries, manufacturing plants, etc., to be itemized, would be nearly doubled.

The decrease occurs principally in collections for water measured by meter, and was due to the depressed commercial and industrial conditions which prevailed during the past year. Evidences of renewed operation of the large industrial plants are now apparent, and I hope to report a gratifying increase during the next twelve months.

I attribute, in a great measure, the small decrease to the employes of this Department, whose faithful performance of their duties has my hearty commendation.

Very respectfully,

A handwritten signature in cursive script, reading "Wm. J. Flynn". The signature is written in dark ink and is positioned above the printed title.

Assessor and Collector of Water Rates.

ANNUAL REPORT

OF THE

WATER COMMISSIONER

OF THE CITY OF ST. LOUIS

For the Fiscal Year Ending April, 1909

Office of Water Commissioner,
St. Louis, June 25, 1909.

Honorable Board of Public Improvements:

Gentlemen:—I have the honor to submit the following report for the year ending April 1st, 1909.

The following table shows the expenditures for operating and maintaining the works:

EXPENDITURES.

OPERATING AND MAINTAINING.

Commissioner's Office	\$ 15,105 83	
Meter and Tap Department	24,091 75	
High and Low Service Engines	362,795 13	
Supply and Purifying Division	266,187 35	
Distribution System	210,810 13	
Inspection Department	22,974 81	
Total gross expenses for operating and maintaining		\$901,965 00

RECEIPTS.

Meter and Tap Department	\$ 18,346 85	
Distribution System	35,418 18	
High and Low Service Engines	1,740 47	
Supply and Purifying Division	249 68	35,755 18
Net expenses of operating and maintaining works ..		\$846,209 82

EXTENSION AND RECONSTRUCTION OF WORKS.

For extending Distribution System	\$ 267,696 23	
For Down Draft Furnaces, Chain of Rocks	3,228 75	
For Machine Shop and Office, Bissell's Point	68 00	
For Boilers, etc., High Service Station No. 2, Bissell's Point ..	26,847 36	30,144 11
For Settling Basins Nos. 7 and 8, Chain of Rocks	589 34	
For Seven Foot Steel Flow Line	100,781 14	101,870 48
For New Pipe Yard		663 79
For Coagulating Plant, Chain of Rocks		80,456 63
For Revetment of River Bank, Chain of Rocks		5,086 98
For Standardizing Fire Plug Nozzles		13,052 76
For Plunger Replacement, Chain of Rocks		3,600 00
For Testing Laboratory		14,812 47
Total expended on Extension and Reconstruction of Works	\$ 516,883 45	
Making a total expenditure for operating, maintaining, reconstruction and extending the Works during the year of		\$1,363,093 27

A detailed statement of the expenditures is given in tables "C" I and "C" 2, and "D" I to "D" 10, inclusive.

PUMPING DEPARTMENT.

The work done by the High Service and Low Service Pumping Stations is given in Tables Nos. 1 to 5, inclusive.

In addition to the reports of the department heads, I desire to supplement them by particularizing the subjects outside of routine work and extension which appear to me most vital.

There seems to have been no material change in the electrolytic conditions so far as the effect on the system by the operation of the street railways. What the ultimate condition will be it is hard to say, but it is safe to predict that unless some action is taken to prevent, serious conditions are liable to result.

The mining of fire clay in the west and southwest end of the city have already shown results sufficient to justify the city in taking such steps as will protect their interest in the future operation of same.

The extreme condition in the river's elevation as was realized on January 12th, last, caused by the formation of an ice gorge at Alton, is the immediate necessity of considering one of two things, if not both: the cutting of another gate in the Inlet Tower at a lower elevation than those we now have, or re-establishing an emergency low service station at Bissell's Point. It is questionable in my mind whether both would not be measures of sound judgment, notwithstanding that toward the latter there seems to be some aesthetic objection.

The plans for a new station to be located at Bissell's Point, for the purpose of serving the southwestern section of the city, will be carried on.

The installation of a high pressure system must, in my opinion, be subservient to conditions which, at the present time, appear more of a necessity.

In view of the above, the question of making changes in the existing water rates which is now being advocated, is a matter of grave importance to be considered.

In conclusion, I desire to state that in my judgment, an investigation should be begun, having for its object the supply of water to Greater St. Louis, even though nothing can be arrived at definitely until its territorial limits shall have been established. Still these are matters which cannot be safely concluded over night, it taking years for construction, and should be taken well in hand, notwithstanding improvements for the immediate future.

BEN C. ADKINS, *Water Commissioner.*

HIGH AND LOW SERVICE ENGINES.

OPERATING DEPARTMENT.

Wm. A. Hoffman,
Engineer in Charge.

Leonard A. Day,
Assistant Engineer.

The details of the cost and amount of labor and materials necessary for the repairs, maintenance and improvements added during the year at the several pumping stations are as follows:

Bissell's Point—High Service Station No. 1.

All pump valves have been overhauled, refaced and renewed wherever necessary, all springs cleaned or replaced and the valve cages painted. All rotary steam and exhaust valves were cleaned and refitted and all crank-pin and cross-head connections taken apart and adjusted.

The old installation of piping and valves for turning over the engines with water from the discharge mains was replaced by a far simpler and more reliable arrangement of connections, doing away with 75 valves, 2000 feet of pipe, a large amount of fittings, and saving time, space and trouble.

The annoyance heretofore caused by the breaking of the cylinder-head stud-bolts has been entirely eliminated by making these bolts of chrome nickel steel.

The feed water filters were cleaned and recharged. A 600 horsepower closed feed water heater with all necessary piping was installed in the boiler room. Only a small amount of repairs has been necessary to keep the boilers in good condition during the year.

The record of water pumped, coal consumed, etc., at this Station is given in Table No. 3.

High Service Station No. 2.

The amount of water pumped at this Station has been decreased over the record of the previous year as shown by Table No. 4.

The renewal of pump valves and springs, and the cleaning and painting of valve cages comprised the ordinary repairs at this Station. Other repairs consisting of magnesia covering on side pipes and replacing lagging about cylinders were made.

Ten old internally-fired boilers, with all valves, fittings and steam pipes were removed from the south side of the boiler house at this Station and the place cleared for the installation of four water-tube boilers of 350 horsepower each.

An opening for a 6x7 foot overhead smoke-flue was cut in the brick stack and brick piers built for supporting the flue between the

stack and boiler house. This flue was encased in brick and covered with corrugated steel roofing. All this work was done by labor employed in the department. A new duplex boiler-feed pump was installed and connected to the new water-tube boilers with new feed-water and steam piping.

Machine Shop:

All the repair work rendered necessary by the operation of this Station was done in this shop and in addition a large amount of work was turned out for the Electric Railway, the Locomotive, Automobiles, Tracks and Switches, Settling Basins, Laboratories and Parks.

Special machinery for Lime Tanks, Iron Feeders, special valves, fittings, clutches and electrical devices, for the New Coagulant Plant at the Chain of Rocks were made in this shop.

High Service Station No. 3 (Baden):

The repairs and changes made during the year at this Station are as follows:

Renewing pump-valves, putting in new exhaust side-pipe on high pressure cylinder of Engine No. 9, installing an entire new set of twelve poppet valve stems with metallic packing, replacing intermediate crank-pin drag-box on Engine No. 10, packing Corliss valve-stems on Engine No. 12 with new metallic packing, repairing the 20-ton traveling crane and changing the turn-over system for Engines Nos. 11 and 12 in a similar manner as had been done at High Service Station No. 1.

The damage to the Engine-house roof by a storm in May, 1908, necessitated the use of new copper to replace that which had been torn and crumpled too much to be used again.

Boiler No. 6 was fitted with a new 20-inch manifold and complete set of new grate bars.

The Waste Cleaning Machine, which was installed in 1906, handled 31,455 pounds of soiled waste from which was reclaimed 1,241 gallons of oil.

The following figures show the work done and saving effected by this machine since it was put in service:

Year.	Waste purchased in pounds.	Cost.	Gallons oil reclaimed.	Value of oil.	Saving effected by machine.
1905-6	15660	\$1387.12			
1906-7	8552	720.12	940	\$150.40	\$817.40
1907-8	8105	848.65	1107½	177.20	715.87
1908-9	6377	799.15	1241	198.56	786.53
Total saving in 3 years					\$2319.60
First cost of machine					250.00
Net saving in 3 years					\$2069.60

Generator House:

A dash-pot was placed on the Governor of the Straight Line Engine, Unit No. 2, and weight added to fly-wheel to balance the Engine.

A panel of the plug switch-board was replaced by a new one equipped with double throw oil-break switches and circuit-breakers.

In order to maintain a constant voltage and thereby increase the efficiency of lighting at Bissell's Point and the Chain of Rocks, two automatic voltage regulators made by General Electric Company were added to this plant. These regulators maintain a voltage at the lamps, practically constant, the greatest variation being only ½ volt. The cost of the regulators was \$900.00.

Machine Shop:

The equipment of this shop was increased by the addition of a new 16-inch motor-driven lathe.

Besides the ordinary repair work of this Station, a large amount of work has been done for the other divisions of the Water Works.

Making valve-stems and seats, nozzles, disc-holders, bonnets and other repair parts for sprinkling plugs, collar nuts, etc., for fire plugs, taps, mandrels, wrenches, spoons and keys, boring out saddles, and repairing tapping machines, all of which was done for the Distribution System, constituted a large percentage of the general work done in this shop. Considerable new work as well as repairs, was turned out for the Testing Laboratory and for the Supply & Purifying Division, and also some heavy machine work for the Low Service Engines.

Low Service Station (Chain of Rocks):

The pump valves of all engines have been renewed, 700 new valve seats were put in and 3,150 seats refaced.

One Deane pit-pump was overhauled, repaired and installed in the north pit.

The Compound Duplex pit-pump in the center pit was fitted with new plungers and rods, and a new Deane pit-pump set in the south pit. A new boiler feed pump was attached to Engine No. 8.

New cast iron plungers 48½" in diameter were placed in Engines No. 8 and No. 9, which resulted in greatly reducing the plunger leakage and increasing the pumping capacity about 2%. A similar installment was made in Engines No. 6 and No. 7 more than a year ago. Engines No. 4, No. 5, No. 8 and No. 9 were painted.

The Ice Conveyors were operated for a total period of 286 hours between the dates of January 7, 1909, and February 18, 1909.

The repairs to boilers consisted of placing a new 20" Manifold and a complete set of new grate bars in Boiler No. 7 and two large patches riveted on the shells of Boiler No. 3.

All brick work of boiler settings, and the ceiling, woodwork and roof trusses in the boiler house have been cleaned and painted.

Machine Shop:

All the repairs for the Chain of Rocks Station were made in this shop, principal among which were the making of 719 new valve seats, refacing 3,151 old valve seats and making check valves for auxiliary pit pumps. Repairs were made for the steam hammer and for the motor car of the Supply & Purifying Division. A large item of repairs done is chargeable to keeping the machinery in the old Coagulant House in running order, while a very considerable amount of new work and alteration had to be done in installing the machinery in the New Coagulant House.

A new 16-inch Combination Lathe was added to the equipment of this shop.

CONSTRUCTION DEPARTMENT.

An official test of the down-draft furnaces at the Chain of Rocks was made on May 15, 1908, resulting in obtaining an efficiency of 67.302%, being 0.302% in excess of contract requirements. Based upon this result a final settlement was made with the John O'Brien Boiler Works Company, who made a contract dated January 24, 1903, to convert all straight-grate furnaces at the Chain of Rocks into down-draft furnaces.

Four new cast-iron plungers, 48½" in diameter for low service Engines No. 8 and No. 9 were purchased from the Bethlehem Steel Company for the sum of \$3,600.00 and were put in place by the working force of the Station.

The four 350 horsepower boilers with Roney Stokers and Foster Super-heaters for high service Station No. 2, for which a contract was let to the Heine Safety Boiler Company of St. Louis on May 7, 1908, for the sum of \$26,488.00, were inspected while being built at the shops and the erection supervised by the Construction Department. The necessary steam valves for this installation were purchased

from the Roe-Stephens Manufacturing Company of Detroit, Kupferle Bros. Manufacturing Company of St. Louis contracting for setting the same and furnishing all other fittings and steam piping necessary. The cost of valves and piping in place was \$1,656.74.

The Construction Department designed and superintended the building of the overhead smoke flue for these boilers, within and without the boiler house, and its connections to boilers and stack.

The use of feed-water heaters at the Baden Station having greatly increased the efficiency and economy of operation, a 600 horsepower feed-water heater was designed and built at High Service Station No. 1. When put in operation, the temperature of the feed water was increased 50 deg. F. during the eight hours each day, while the heater was supplied with the exhaust steam from the Machine Shop engine. This increase in the temperature of the feed water at this boiler house represents a saving in fuel of 2%, sufficient to pay the total cost of the heater and its connections in one year. Also plans have been made for two feed-water heaters to be built in the exhaust pipes of high service Engines No. 5 and No. 6 at Bissell's Point.

Two 800 horsepower feed-water heaters and three new feed-water filters with an entirely new system of piping and connections, have been designed for the Boiler House at the Chain of Rocks, and materials for the same have been purchased.

Plans have been prepared for placing new surface condensers in the discharge pipes of low service Engines No. 6 and No. 7. The tubes of these condensers will be of large diameter, they will need but little attention and the cost of circulating water will be entirely eliminated.

A Sarco CO₂ Recorder was placed in the Boiler House at Chain of Rocks, which has had the effect of making the firemen more attentive in firing and more careful in eliminating sources of air leakage, which means a reduction in fuel consumption.

Plans and specifications have been prepared for an auxiliary pumping station for supplying water at a higher pressure to the Insane Asylum, Poor House and Female Hospital. This plant will be located near the Insane Asylum and will consist of two 1,500,000 gallon pumps discharging into a steel storage tank of 200,000 gallons capacity, 150 feet above the ground level at the pumps. The power house as designed provides room for six 350 horsepower boilers, machinery for electric lighting and refrigeration and capacity for supplying steam heat for all the buildings. The Water Department will install two of these boilers with temporary steel stack, the pumps and the tank, with all necessary piping for the same. The remainder of the installation will be made by the Board of Public Improvements.

Designs for new and improved turn-over stands have been made and built in place on all of the high service engines at Bissell's Point

and Baden except on Engines No. 4, No. 5 and No. 6. The new apparatus is much simpler, is easier of operation and requires much less repairs and attention than the old device.

The coal consumption for the year at the Chain of Rocks Station was 95% of that used during the previous year. This decrease is due to improved conditions in the boiler room and engine house and to the fact that less steam was used in heating water for the Coagulant Plant.

The coal consumption at Baden shows an increase of three-fourths of 1% as compared with 1907-8, while at Bissell's Point there has been a reduction of 4.7%, giving an average rate of decrease for the high service engines of $1\frac{1}{2}\%$.

Indicator work on all pumping engines and electric generator has been kept up and the necessary valve adjustments made.

The work of keeping up and completing pattern records and other office records has demanded constant attention.

SUPPLY AND PURIFYING DIVISION.

SUPPLY AND PURIFYING DIVISION.

Arthur I. Jacobs, Gurdon G. Black, Wilson F. Montfort,
Engineer in Charge. Assistant Engineer. Chemist.

COAGULATING PLANT.

It has been necessary to operate the old Coagulant Plant during the whole year on account of the delay in completing the new Coagulant House. The machinery of the old plant and the building itself have been practically worn out in service, so that the cost of repairs has been unusually high and the difficulty of constant operation materially increased over former years. As soon as the new plant has been operated a sufficient length of time to thoroughly test the efficiency and capacity of the machinery, the old house will be torn down and the old appliances removed. Through this plant there has been added to the water, 11,611 tons of lime and 5,013½ tons of sulphate of iron, which is an average of 5.58 grains of lime and 2.41 grains of sulphate of iron to every gallon of water pumped during the year. The cost of purification per million gallons amounts to \$4.260, which is made up of the following detailed charges:

Lime	per million gallons, \$1.812
Sulphate of iron	1.719
Labor	" " " 0.544
Repairs	" " " 0.029
Water, coal, oil, etc.	" " " 0.062
Light and power	" " " 0.084
Total	\$4.260

The new Coagulant House was completed near the close of the fiscal year, the Cooney Construction Company receiving their final estimate, amounting to \$95,732.32, on March 18, 1909.

Several motors, the switchboard and other electrical appliances, the floor plates, materials for wiring and for the heating system and for other piping were purchased and installed by the Department. The cost of materials thus purchased was \$25,230.15.

On March 22nd the plant was formally put in operation, shortly after which it was found necessary to shut down temporarily for the purpose of making slight adjustments and some minor changes. These being done, test runs will be made to determine the time limit of continuous working for the various machines.

The new Coagulant House as it stands is the product of five years of experiment, study and practice in methods of handling and applying chemicals to the water supply. The methods and appliances

used differ from those used in all other purification plants, being simpler and more direct, without sacrificing anything of accuracy that may be claimed for other devices.

The building is 40x120 in plan and 60 high, built mainly of reinforced concrete, the exterior being faced with brick. There are four circular bins 20' in diameter, at each end of the building, for storing chemicals, the central portion being used for the mixing tanks, pumps, scales, etc. The lime will be stored at one end of the building and the sulphate of iron at the other. Each bin has a capacity of about 350 tons. The building has three floors exclusive of the basement, which contains the crushers, conveyors, elevator boots, sump-pump, air compressor and the motors driving the crushers and conveyors. On the first or ground floor is the switchboard from which the whole plant is operated, the heater tanks and the lime pumps. On the second floor are the mixing tanks, three for lime and two for sulphate of iron, the automatic feeders for measuring a continuous and uniform quantity of iron sulphate, the automatic scales, which load, weigh and discharge constant amounts of lime at regular intervals, and the daily supply hoppers over the mixing tanks containing the chemicals supplied to the mixing tanks through the measuring and weighing devices. On the third or lantern floor are the scraper conveyors for filling the bins, and the motors which drive both the elevators and the scraper conveyors. The head tank from which warm water is supplied to the lime tanks is also on the lantern floor.

The circular bins for storing lime and sulphate of iron are practically air tight, all openings being closed with tight fitting covers. The inside height of the bins is 53 feet, the bottoms being hopper-shaped so that they are self-emptying. Material can be drawn from the bottom of the bins by hand operated screw-conveyors, in case of a break-down in the automatic machinery. All motors are operated from the switchboard under push-button control, and are protected from overload by fuses and circuit-breakers. The connections are so arranged that it is impossible to start the crushers or the conveyors feeding the elevators until after the elevators are in motion, thus eliminating all danger of filling the elevator boots with material before the buckets are moving.

There are two Sturtevant crushers for crushing lime in the basement with a capacity of from 10 to 20 tons per hour each, depending upon the fineness of the crushed material; and one Williams crusher for the sulphate of iron, capable of handling 15 tons per hour.

All drainage collects in a sump which is removed by an automatic, motor-driven centrifugal pump.

A Westinghouse automatic air compressor supplies compressed

air for blowing dust out of motors, operating drills or other pneumatic tools.

The stirring machinery of the lime mixing and heater tanks is driven from the same line shaft, connected to two motors, either of which can be put in service by means of automatic clutches.

The heater tanks are made of steel, 5 feet in diameter and 5 feet in depth. They are equipped with revolving paddles for keeping the lime in suspension and for increasing the efficiency of heating the cold water which passes through a double set of coils inside these tanks, on its way to the head tank on the lantern floor.

Two direct connected centrifugal pumps, each with a capacity of 200 gallons per minute, force the milk of lime through a 6" cast iron pipe from the Coagulant House to the Delivery Well, a distance of about 800 feet. Two pumps have been installed to insure continuous operation. Only one pump will be in service at a time. The lime-mixing tanks, three in number, will never all be in service at one time, one being sufficient during the greater part of the year. These tanks are 8 feet in diameter, and three feet deep, built of steel and fitted with close covers. Each one is fed with crushed lime by a Richardson Automatic Scale, which will weigh at a single charge as desired any weight from 40 to 100 lbs. The scale receives its charge from the daily supply hopper which stands directly above it. Unlike the usual automatic scales, these do not dump as soon as loaded, but are tripped at regular intervals by means of solenoids, the current for which is switched on by clocks. The switch may be set to dump the scales every minute, every two minutes or every four minutes, which admits of each scale supplying its tank with any quantity of lime from 10 lbs. to 100 lbs. per minute.

An exhaust fan is connected to each of the lime-mixing and the heater tanks for the purpose of drawing away the steam and preventing it from escaping into the building, or rising through the pipes connected with the scales, where it would dampen the parts and cause the lime dust to cake and interfere with the operation.

There are two steel tanks 5 feet square and three feet deep for dissolving the sulphate of iron, which is fed into the tank in a continuous stream, by means of a wheel revolving at a constant speed, on the upper surface of which the dry sulphate of iron flows through an adjustable orifice at the base of a pipe connected to the daily supply hopper. The water is supplied to the tank through a system of perforated pipes in the bottom of the tank to obtain a better distribution of the water and to hasten the dissolving of the sulphate by means of the increased agitation.

In order that the daily supply hoppers may not become entirely empty nor be overflowed when being filled, through the inattention of

the attendant, an automatic device for starting and stopping the reclaiming machinery, is attached to each hopper.

The head tank is made of steel 2x4x3' deep and is supplied with water from the high pressure main, which is heated in passing through the coils of the heater tanks. The supply of water to the head-tank is regulated by an automatic float valve which maintains a constant head of water on the pipes feeding the lime-mixing tanks.

The operation of the plant proceeds in the following manner:

The lime and sulphate of iron are delivered in bulk on cars at the unloading chutes at the sides of the building. The lime is shoveled by hand into the chutes connected with the lime crushers, while the sulphate of iron is unloaded from the car with a power shovel operated by the crusher motor. Both the lime and sulphate of iron are delivered by the crushers on belt conveyors which discharge into the elevator boots, where it is elevated to the lantern floor and delivered to scraper conveyors which discharge into the storage bins. All crushers, elevators and conveyors are enclosed in dust-tight casings.

The lime and sulphate of iron are then fed from the bottom of the storage bins on belt conveyors which discharge into the boots of the reclaiming elevators which hoist the material again to the lantern floor and discharge it into the daily supply hoppers, from which it is fed into the mixing tanks, the lime being weighed out by automatic scales and the sulphate of iron measured out by the iron feeders. The solution of sulphate of iron flows by gravity from the mixing tanks into the water in the tunnel through which the entire water supply is drawn from the river. The milk of lime in the mixing tanks, which is at a temperature close to 200° F., drops into the heater tanks on the first floor and from them flows into a wooden tank from which the centrifugal pumps take it and discharge it into the water supply at the delivery well. This wooden tank is supplied with cold water from the high pressure main, controlled by an automatic float valve, for the purpose of diluting and cooling the milk of lime before it is pumped.

The saving in cost of operation of the new plant over that of the old Coagulating House is expected to amount to \$10,000.00 per year.

BUILDINGS, GROUNDS AND ROADS.

All painting necessary for the preservation of the structures of the department has been done, and such repairs made as conditions demanded.

The principal items in the list of paintings are as follows:

At Bissell's Point the bridge over the conduit, the scale house, the interiors of the office of the Construction Department and of the

Machine Shop, the floors of the Chemical Laboratory, of the office of the Operating Department, of one gate house and of No. 2 Engine House, the large doors of the Engine Houses and the roofs of Engine Houses No. 1 and No. 2.

At Compton Hill, the stand-pipe, fences, sheds and steps.

At Baden, the floor, railings and screens of Engine House, the interiors of the boiler room, of the tin shop and of the blacksmith shop, the skylights of the Machine Shop and Engine House and the floor of the office.

At Chain of Rocks, the walls of the pump-pits, skylights and screens of Engine House, the interiors of the new Coagulant House, of the Boiler House, of the Blacksmith Shop, and of the locker and bath-room, the iron work of the Intake Tower and of the Screen Chamber and the skiffs for the tower.

The lower chords and floor beams of the Maline Creek bridge were cleaned and painted and also the office of the Meter and Tap Department at the City Hall.

A new steel ceiling was placed in the cupola of the Compton Hill Water Tower at a cost of \$830.14, and the ornamental terra cotta repointed.

The storage coal sheds at Humboldt Avenue and at the Chain of Rocks were repaired by cutting away the lower end of the posts and cross-beams which had almost entirely rotted away, and replacing them with reinforced concrete. It was only necessary to replace the posts and beams on the west and south sides of these sheds, the timbers on the north and east being in fairly good condition.

The embankments along Basins 7 and 8 and along the Flow Line and the grounds lying next to these basins were leveled and shaped up and a 15-foot macadam roadway 2500 feet long between the old and the new basins was built. The total expenditure on the embankments, grounds and road was \$3,730.89.

The channel of Maline Creek west of the Flow Line Bridge has been deepened and two concrete retaining walls, each about 50 feet long, have been built along the two branches of the creek in order to confine the normal flow of the stream within narrow limits, so as to increase the velocity sufficiently to carry the debris and drift past the bridge and prevent the blocking of the channel as heretofore. The slope between the two channels has been rip-rapped with large stones. The cost of this improvement was \$1,619.98.

The 5-foot cast iron pipe running through the Baden Reservoir has been thoroughly cleaned by sand blast and given three coats of paint at a cost of \$652.70.

The damage done to the revetment of the river bank at the Chain of Rocks, first by the high water and afterwards by the break in Basin No. 8 has been repaired. Over 300 feet of this revetment

was practically washed out by the high water and an additional 150 feet was swept away by the water from Basin No. 8. All of this was replaced by rip-rap and covered with six inches of concrete, making this portion of the revetment superior to the original work. The cost of these repairs was \$4,805.92.

The steel pipe of the Flow Line across Maline Creek was boxed in with heavy oak lumber to protect its coating from abrasion by drift and to minimize the danger from sudden changes of temperature.

An addition was built to the Carpenter Shop at the Chain of Rocks and the car shed at Bissell's Point was partially replastered.

SETTLING BASINS AND CONDUITS.

During the year, 135,108 cubic yards of sediment was removed from the basins at the Chain of Rocks at a cost of \$2,631.85 or \$0.0195 per cubic yard.

The date of cleaning, depth of sediment, the basins cleaned and cost of cleaning are given in the following table:

Depth of Sediment in Inches.

Date.	Basin 1	Basin 5.	Basin 6.	Cost.
April	24.41"			\$ 437.42
July		10"	32.99"	780.11
September	25.52"			477.66
December		7.99"	25.51"	548.71
March	28.58"			437.95
Total	78.51"	17.99"	58.50"	\$2,631.85

The Baden Storage Reservoir was cleaned in April, 700 cubic yards of sediment being removed at a cost of \$149.00 or \$0.213 per cubic yard.

The basins at Bissell's Point were cleaned during August, a total of 4,000 cubic yards of sediment being removed at a cost of \$531.04 or \$0.133 per cubic yard.

About the 19th of June, the high water in the river backed up the sewers, which found outlets into the Clear Well at Bissell's Point through joints in the west masonry walls under the coping, and also through an abandoned 20" overflow pipe at the N. W. corner of the well and near the top. The basin was immediately taken out of service and pumped out. As soon as the high water in the river had subsided sufficiently, the 20" pipe was broken in several places and plugged with concrete. The joints in the wall were filled and pointed and 18 inches of puddle clay placed behind the wall. The walls and

bottom of the clear well and the interiors of the tunnels leading to Engine Houses 1 and 2 were thoroughly washed down with hose streams and the washings pumped into the sewers. After the well and tunnels were thoroughly clean, they were filled up with clean water charged with copper sulphate and allowed to stand twenty-four hours before being again pumped out and put in service. The well was out of service about three weeks and the cost of cleaning and repairing was \$753.75.

A break occurred in the east wall of Basin No. 8 at the north sewer, during the night of June 2nd, liberating about thirty million gallons of water and washing out some of the railway embankment and some revetment at each of the four sewer outlets from Basins 7 and 8.

Sections of the floor on the north side and the south side of the wing walls enclosing the sewer outlet were carried down into the hole excavated by the escaping water. The water washed the earth from under the wall and carried away the back filling, leaving the wall spanning an opening of about 60 feet at the inside of the basin and 30 feet on the outside. The wall showed no sign of cracking or appreciable settlement. The hole was filled with large stone to serve as foundation, and concrete, great care being taken to leave no voids between the concrete and the bottom of the walls.

The fact that the leak developed at the sewer outlet seems to point conclusively to the fact that the construction at this point was the cause of the trouble. For 35 feet on either side of the sewer the walls are supported on concrete piles driven to refusal and the earth under the footings at these points is subjected to little or no pressure, and offers no resistance to the flow of the quicksand from under the wall, due to small leaks or other cause thereby leaving a clear opening under the wall. The wall not being able to settle as it does at intermediate points, it seems reasonable to conclude that any opening once made would continue to enlarge until enough sand had been removed from beneath the basin bottom to cause it to drop and release the water. The simplest remedy and the one most easily applied is to drive a row of sheet-piling just outside the wall, to prevent any further escape of earth from beneath the wall.

During the twenty-four hours immediately preceding January 12th the water in the river at the Intake Tower fell 4 feet, reaching the unprecedented low-water mark of 72.8, more than a foot lower than any previous record. The water began to come up slowly the next day, but it was not until January 19th that it reached a normal stage of 77.0. The cause of this sudden drop was the formation of an ice gorge near Alton, Illinois, which held back the normal flow of the stream. Fortunately, another gorge formed a few miles below the tower on January 13th, which backed the water up in time to

save the City from a water famine. As it was, for more than twenty-four hours the City was using more than twice as much water as it was possible to get through the gates of the Intake Tower. The sills of the lowest gates in the tower as originally built are at an elevation of 72.0, but after the low stages of water in 1897 and 1898, a new opening was cut at the southeast corner of the tower, closed by a 5x5' gate, with its sill at an elevation of 68.0. But even with this gate, when the river was as low as 72.8, not water enough could be had to keep two of the pumping engines in operation. Although the conditions at this date were abnormal and unlikely to occur again, it would seem to be the part of prudence to cut another opening in the southwest corner of the tower, fully as low as the present 5x5' gate, so that an unusual stage of low water would not threaten the City with a failure in the water supply.

WATER WORKS RAILWAY.

The railroad track was rebalasted with macadam, between Baden and the Chain of Rocks. About 5000 cubic yards of macadam obtained from the Work House quarries was used for this purpose. New rails amounting to 434 feet were placed where needed and 2875 ties were renewed.

A side track 200 feet long was laid about two miles north of Baden to be used as an unloading track for macadam used by the Street Department in re-surfacing Columbia Bottom Road. 304 cars were unloaded from this siding. 2742 cars were handled at an average cost of \$4.24 per car.

Following is the cost of operating the Water Works Railway for the past year, divided between the freight and passenger divisions:

Freight Division.	
Salaries	\$4,155.64
Repairs	188.47
Coal	618.40
Oil, waste, etc.....	51.90
Car inspection and repairs	444.41
Total.....	\$5,458.82
Passenger Division.	
Salaries	\$4,702.60
Repairs	1,105.92
Power	1,943.86
Oil, waste, etc.....	52.04
Total.....	\$7,804.42

257,126 passengers were carried and 3,419 trips made. The cost per passenger was \$0.039 and \$2.194 per trip, or \$0.194 per car mile.

The work of maintenance and repairs to the electrical equipment of the stations, shops and trolley line has occupied the greater part of the time of the electrician and his assistants.

The new work installed has consisted of the wiring of the new Coagulant House for lights and motors, and the erection of switchboard for the same, putting in new switchboard panels with automatic oil-break switches, and two automatic voltage regulators in the Generator House at Baden. Additional cross-arms were put on the poles from Baden to the Chain of Rocks, on which a 300,000 C. M. feeder was strung to carry current to the new Coagulant House. The electric brazed bonds installed on the railroad track in March, 1908, and described in last year's report have fully justified the installation of this type of bond on the seven miles of main track. Not only have none of these bonds been stolen, which thefts heretofore have amounted to about \$225.00 per year, but, figuring on a cost per car trip per passenger basis, there is shown a saving in power during the fiscal year of \$732.00, making a total saving of over \$950.00 per year. On this showing the bonds will pay for themselves in two and a half years.

CHEMICAL LABORATORIES.

The character of the water treated during the year has varied greatly with the rainfall in various parts of the drainage areas of streams contributing to the complex which enters at the Intake Tower. Gauge readings show an extreme variation of 33.3 feet in the stage of the river. At the times of maximum and minimum stage the range of chemical and physical characteristics was as follows:

	Turbidity.	Suspended Solids.	Coefficient of Fineness.	Dissolved Solids.	Color.	Alkalinity.
Flood Stage...	2100	3112	1.48	226	35	120
Low Water...	130	91	.70	421	12	229

Owing to the shifting of the channel with varying stages of the river the figures given do not represent the maxima and minima observed during the year. From Table No. 6 wherein are given monthly variations, it appears that the extreme values are as follows:

	Turbidity.	Suspended Solids.	Coefficient of Fineness.	Dissolved Solids.	Color.	Alkalinity.
Maximum....	3000	3900	1.48	435	60	255 ppm.
Minimum....	50	27	.54	167	12	96

Noteworthy are the minimum turbidity, suspended solids and color, which are the lowest on record for the Mississippi River at this point.

Table No. 7 gives analytical data for the river water for one day each week throughout the year, representing the detail which is averaged by months in Table No. 9. Neutral carbonates (2 to 10 parts per million) occurred on 88 days of the year. On the remaining days, about three-fourths of the year, there was present from one to five parts per million of carbon dioxide in excess of what is required for bi-carbonate alkalinity; these figures show a rather more frequent occurrence of carbon dioxide than in the preceding two years during which data on this point has been collected. It will be observed that the variations in the quantities of these substances are so slight as to be inconsiderable.

The number of bacteria per cubic centimeter ranged from 97,500 in April to 2,750 in November. About 75% of river samples show the presence of the colon bacillus in 1-10 cubic centimeter.

In Table No. 8 are given analytical data for the treated water of one day each week representing the detail averaged in Table No. 9 where a comparison of monthly averages for river and treated water is instituted.

The treated water contained an average of 1.71 parts per million of suspended solids. The tabular statement below shows the maximum and average by months:

Suspended Solids in Treated Water. Parts per Million.		
1908-1909.	Maximum.	Average.
April.....	4	2
May.....	6	1.6
June.....	7	2.3
July.....	12	3.7
August.....	27	2.6
September.....	6	0.9
October.....	4	0.39
November.....	4	1.6
December.....	4	0.9
January.....	2	1.6
February.....	2	0.3
March.....	6	2.7

The maximum amounts of suspended matter in July and August were not characteristic of the treated water, but were due to loosening of accumulated deposit of calcium carbonate from the walls of the conduit occasioned by an unusually heavy draught upon the Bissell's Point basins. This material was not bacteria laden, as the cultures of the corresponding days indicate, and its presence was fraught with no danger. The absence on these three days of July and August of colon bacillus from the water is significant of the unimportance of these variations in suspended matter save from an aesthetic point of view.

In times of high turbidity using as much as seven grains of lime and four grains of iron sulphate, the treated water carries in addi-

tion to precipitates due to softening reactions, small amounts of very fine silicious matter which can be removed only by filtration. To this factor is principally due the high suspended solids of the period May to August; during the five months of high alkalinity and low turbidity (September to January) the conditions were favorable to successful clarification by sedimentation. While the increase of the lime charge to produce high caustic alkalinity would result in the removal of a large part of the residual suspended matter, such a procedure is attended with complications in the way of after reactions to be ill-advised, unless recourse is had to recarbonation to prevent excessive coating of mains, meter gears, valves and the like, which characterized the first two years of clarification in St. Louis, when the incrustation caused was so great as to render meters useless. During the past year meters in service from eighteen months to two years, registering from 85,000 to 100,000 cubic feet, have been found quite free from incrustation.

The present installation contemplates the introduction of each coagulant regularly at but one point in the system; there is no doubt that better results could be obtained by a more flexible system admitting of additional chemical treatment at points subsequent to the distributing well, where at present the lime is added to the water carrying its full charge of iron sulphate.

The occurrence of caustic alkalinity in the treated water has been rare; on but sixteen days has there been such a reaction, and the amounts occurring have been as follows: On five days 1 part per million; on six days 2 parts per million; on three days 3 parts per million; on one day 4 parts and on one day 5 parts per million. The significance of this statement is apparent when it is further noted that of an alkalinity of from 119 to 33 parts per million, the treated water contained from 10 to 42 p. p. m. of neutral carbonates and as much as 107 bicarbonate alkalinity. The predominance of bicarbonate alkalinity appears in Table No. 8 and in the tabular statement of monthly averages here given:

ALKALINITY.

1908-1909.	Caustic.	Bicarbonate.		Average.
	Maximum.	Maximum.	Minimum.	
April.....	0	15	0	7.4 p.p.m.
May.....	1	19	0	10.6
June.....	4	7	0	1.6
July.....	0	9	0	2.6
August.....	0	18	5	11.2
September.....	0	32	4	17.2
October.....	0	25	11	22.0
November.....	3	24	0	12.4
December.....	5	88	0	25.0
January.....	0	107	74	91.0
February.....	0	92	3	26.3
March.....	1	7	0	2.1

In the treatment of the river water during the past year, an average of 50% of the calcium and 30% of the magnesium were removed.

The average color reduction for the year was from 29.3 of the river to 8.87 for treated water. It is of interest that during more than thirty successive days in December and January, while the color of the river was 12, there was attained in the treated water a color of 4.

Bacterial samples from five to eight points in the system are collected daily and subjected to examination, using the ordinarily accepted media. Aesculin has been used to a considerable extent in the attempt to arrive at a rapid confirmation of coli. Thus far the results do not warrant a conclusion as to its adaptability to the identification of the forms of coli-like organisms occurring in our water.

Lactose-bile in fermentation tests with 10 cubic centimeters of water shows negative results in a large percentage of samples from the later settling basins and the clear well.

Results for the past five months are as follows:

Per Cent of Positive Tests with Lactose-Bile in 10 c.c.m. Samples.

	Chain of Rocks Basins.				Bissell's Point Clear Well.
	1	3	5	6	
November	85	55	25	4	4.5 per cent.
December	10	6.6	10	0	2
January	12	0	24	1	.7
February	68	28	12	20	4.5
March	64	28	12	7.8	5
	48	24	17	6.6	3.6

The range of bacteria per cubic centimeter of treated water is shown in Table No. 8, wherein is also given the results of coli confirmation tests for one day of each week.

The average bacterial removals in samples from Basins 1, 3 and 5, drawing gate at the Chain of Rocks and Laboratory tap at Bissell's Point were as follows:

Percentage Removal of Bacteria.

1908-1909.				Chain of Rocks.	Bissell's Point.
	Basin 1.	Basin 3.	Basin 5.	Draw Gate.	Tap.
April	81.9	89.5	92.2		98.5
May	94.2	96.8	97.4		99.7
June	94.2	98.5	97.2		91.6
July	88.5	88.2	94.4		96.9
August	93.4	94.9	97.7		99.0
September	92.5	94.7	98.2	98.5	99.2
October	96.9	98.8	99.1	99.5	99.0
November	95.7	99.2	99.5	99.4	99.5
December	94.5	97.4	98.2	98.1	99.3
January	95.4	96.8	96.8	95.7	96.5
February	93.44	95.64	96.37	95.79	90.75
March	94.40	94.26	92.04	84.77	83.49

The low percentage removals in June were due to contamination of the clear well at Bissell's Point by seepage incident to a flood stage of the river. Eliminating the low percentage of four days the average for the month becomes 98.1.

The removals for July were affected by a mistaken attempt to draw from an uncleaned basin after reversing the flow through the series of basins at the Chain of Rocks. Although the error was corrected shortly afterward, its effect was not entirely removed until late in the month, when the contamination thus introduced was gradually removed by dilution.

The results for February show the effect of two heavy snows in inoculating the storage basins with bacteria capable of growth and rapid multiplication even at the low temperatures which characterized the major part of the month. Removals in the settling basins were almost regular, but coincident with the snowfalls of the month appeared a sudden rise of bacteria in the storage basins at Baden and Bissell's Point, all of which are subject to the inflow of surface water. No colon infection appeared in connection with the increased counts.

In March occurred again a period of rapid increase of bacteria subsequent to treatment. There occurs each year in the late winter or early spring, with the advent of milder weather, and a temperature of 40 deg. F. or more, a development of bacteria in the basins which the present method of treatment cannot overcome. This began late in January, reached a climax in February with the visible disturbance of accumulated deposit in the settling basins, and is only passing in the closing days of March, thirty days after the filling basin was cleaned. Comparison of Table No. 8 illustrates this as also the table of average removals through the basins given on a previous page, where it appears that the percentage removals in the basins at the Chain of Rocks, although slightly lower than in the preceding months, are still higher than in the same water after passing the four small storage basins at Bissell's Point. The rapid development of organisms in the stored water can be overcome by chemical treatment subsequent to the passage of the water to the settling basins after its present initial treatment with iron sulphate and lime.

On June 19th and 20th the Mississippi reached a maximum stage 6.1 feet higher than the coping of the clear well at Bissell's Point. On the 16th, back water was finding its way into the clear well, and the gelatine counts of this and succeeding days showed a gradual rise. On the 19th cultures on litmus-lactose agar at 40° Cent. showed the presence of red, gas-forming colonies; the character of the inflowing water changed to unmistakable sewage. The clear well was taken out of service and the supply for the Bissell's Point Station drawn direct from the conduit. Notwithstanding the danger of serious contamination from this possible source the death rate from

typhoid through the succeeding months varied but little from that of the preceding year. A comparison of the weekly reports from the Health Commissioner's office is given below:

Deaths From Typhoid Fever for the Week Ending—

1907.		1908.	
July 6	1	July 4	1
" 13	2	" 11	2
" 20	0	" 18	2
" 27	4 7	" 25	2 7
Aug. 3	1	Aug. 1	7
" 10	1	" 8	4
" 17	5	" 15	7
" 24	4	" 22	3
" 31	2 13	" 29	2 23
Sept. 7	5	Sept. 5	4
" 14	3	" 12	2
" 21	4	" 19	3
" 28	3 15	" 26	2 11
	35		41

In the course of an extended examination of the water supply, during which samples were examined from 130 points in the distribution system and from wells used by persons in houses where typhoid cases were reported, the hydrant water was found safe, as was the treated water during the entire season save for the exception mentioned.

Two sources of contaminated water supply found are worthy of mention. An open well in densely populated district, sole supply to a household of nine where cases of typhoid were reported was found contaminated with intestinal bacteria. The condition at one resort outside the City was a menace to public health. A spring furnished the supply. It is housed in; but its overflow into a small concrete basin is available to visitors, who dip up the water in a can left by some picnic party. It is hardly possible to obtain a drink without introducing into the basin germs of whatever kind the hands and lips of the visitors may carry. Samples from the basin developed high counts and gave unmistakable evidence of intestinal bacteria, although samples from the spring proper contained few bacteria per cubic centimeter and gave no suspicious colonies on plating, while fermentation tests were negative. These conditions were reported to the management of the resort to the end that another season may find conditions so improved that it will be impossible for a "walking case" or a careless person carrying infection to inoculate the supply.

The Amounts and Cost of Chemicals Used During the Year were as Follows:

	Grains per Gallon.			Average Chemical Cost per Million Gallons.
	Max.	Min.	Ave.	
Iron Sulphate.....	4.25	1.75	2.41	\$1.719
Lime.....	8.00	4.75	5.58	1.812
				Total \$3.531

The apparatus installed in February, 1907, for heating water used in slaking lime with the heat evolved in the slaking reaction is still in use. Hydrant water is passed through a two-inch copper coil submerged in a cylindrical iron tank which receives the effluent milk of lime from the slaking tanks, and thence to a head tank, from which it is distributed to the slaking tanks through orifices admitting of close adjustment. Three and one-half to three and one-quarter pounds of water per pound of lime are supplied to the slaking tanks with the charge of lime. The temperature (in degrees Fahrenheit) registered in hydrant water, head tank, coil tank, and slaking tanks at two-hour intervals during the year averaged as follows:

Temperature in Lime Slaking System.

1908-1909.	Hydrant.	Head Tank.	Lime Slaking Tanks.				Coil Tank.
			1.	2.	3.	4.	
April.....	55.5	95.2	196.4	200.6	195.4	193.0	153.0
May.....	63.8	97.3	197.3	192.1	196.0	190.0	153.8
June.....	73.5	103.1	202.5	206.0	194.5	201.0	165.2
July.....	78.8	102.7	202.1	201.4	199.1	199.6	168.2
August.....	61.4	82.3	202.0	200.8	185.0	197.0	167.8
September.....	77.3	98.5	199.8	197.5	192.0	196.2	164.7
October.....	62.0	93.8	209.0	200.	204.6	189.0	162.5
November.....	51.8	76.3	183.5	193.0	193.5	189.8	156.5
December.....	45.2	80.5	184.3	195.5	-	185.3	147.0
January.....	40.6	75.8	189.0	194.5	193.6	188.5	146.6
February.....	42.7	79.0	187.0	187.4	188.5	182.5	145.0
March.....	46.8	76.5	198.5	198.0	-	183.0	152.4

The system has been even more economically administered during the past year than in the previous year (1907-1908), when a saving of more than \$5,000.00 per annum was shown over the old method of heating with live steam the water used and wasted.

In addition to routine examinations and analysis of water incident to the administration of coagulants and control of chemical and bacterial results a considerable amount of work on other materials has been carried on in this Laboratory.

The analysis of lime from 434 cars sampled gives the following average percentage of calcium oxide available for the several months which are here tabulated with monthly averages of lime from the storage bins, and the average loss by deterioration in storage:

	Cars.	Bins.	Deterioration.
April.....	91.98	90.64	1.29 per cent.
May.....	91.83	89.44	2.39
June.....	91.05	88.74	2.31
July.....	90.27	87.02	3.25
August.....	90.03	87.00	3.03
September.....	92.23	89.05	3.18
October.....	92.20	91.20	1.00
November.....	92.14	90.53	1.61
December.....	92.64	89.13	3.51
January.....	91.57	90.64	0.93
February.....	93.07	90.72	2.25
March.....	92.07	89.47	3.60
Average.....	91.76	89.47	2.29

One hundred and seventy-two samples of oil for use in the Department have been examined prior to acceptance, with other materials of various kinds. A summary of this work is presented in the tables following:

Station.	Description.	Manufacturer.	No. of Samples.
Bissell's Point	Crescent Engine Oil	Crescent Oil Co.	9
Bissell's Point	Black Seal Cylinder Oil	J. D. Street	13
Bissell's Point	Ruby Light Cylinder Oil	J. D. Street	7

DISTRIBUTION SYSTEM.

Wm. E. Rolfe, Francis T. Cutts, Montgomery Schuyler,
Engineer in Charge. Assistant Engineer. Engineer of Tests.

Distribution System expenditures for 1908-9 show a material decrease from the figures of the preceding year. This is the result of the large extensions made during recent years, in response to petitions from property owners, and the policy of laying pipe in advance of street improvement.

This keeping pace with the city's growth naturally results in a decrease of large contract expenditures for extensions, and a much smaller increase in cost of maintenance. Unless the city should enter a period of abnormal growth, this condition may be expected from year to year in future.

The system now comprises 870.5 miles of mains of all sizes, 10,080 fire plugs, 10,479 stop valves and 97,031 taps.

The year's pipe extension work included the laying of 30.1 miles of new mains of which 2.7 miles replaced existing pipes with larger sizes. Of the pipe laid about 10 per cent was the work of the Distribution System force.

Three thousand eight hundred feet of the 36-inch main on Grand Avenue between Hebert Street and Carter Avenue was taken out and replaced with heavier pipe. This was necessary on account of increased pressure in the main due to High Pressure extensions.

A 20-inch main was laid in Manchester and Knox Avenues, extending improved pressure and supply conditions into the southwestern part of the City, the center of the district being occupied by the various eleemosynary institutions. 600 feet of 30-inch pipe at Easton and Leonard Avenues was replaced with 36-inch, and 3400 feet of 20-inch laid in Leonard and Theresa Avenues from Thomas to Lindell. This pipe affords relief to a section heretofore congested and materially improves general supply conditions.

Fire protection facilities have been improved by the setting of 475 new fire plugs, and the system of sprinkling plugs has been extended by the addition of 50.

Much has been done during the year in perfecting the system of maintenance and operation. A supplementary station has been established at 111 Chestnut Street which has proved of material aid in down-town work. There are now six operating stations conveniently located in different sections of the city, each in charge of foremen. Each is fully equipped with an efficient outfit of tools, appliances and vehicles, assuring quick response to routine or emergency demands.

In addition to the purely mechanical improvements, there has been built up in the last two years, a system of co-operation between foremen and responsible employes in all divisions of the Distribution System which is of great value to the work at large.

Much attention has been given to the proper systematizing of cost records, and valuable information hitherto unavailable has been collated. Preliminary plots have been made for the suggested installation of a high pressure fire protection system in the business district of the City.

Much work has been done in collaboration with the Assessor and Collector of Water Rates, in locating and destroying abandoned service connections throughout the older portions of the city.

Plans have been completed and contracts let for an independent system of fire protection for the eleemosynary institutions located on Arsenal Street. The system will include a pumping station, elevated pressure tank and distribution system with the necessary fire plugs. The water supply will be obtained from the regular supply mains. The installation is necessary on account of the low pressure available in the present mains, the location being the highest in the City.

Several breaks in mains and service pipes have occurred, evidently due to electrolytic action.

Some work has been done as a matter of demonstration, in cleaning mains. A section of 10-inch in Broadway between Biddle Street and Franklin Avenue, and a 6-inch main in the Water Works grounds at Bissell's Point, were successfully cleaned, the flow being materially increased. On account of the long service and consequent obstruction of many of the older pipes, this process should be continued energetically.

A large item of work during the year has been the installation of meters under orders from the Assessor and Collector of Water Rates, the Distribution System and Meter and Tap Division dividing the expenditures for labor and material.

The work of the Meter and Tap Division has expanded greatly during the year. Meters were set under orders from the Assessor and Collector of Water Rates. 6077 now being in service. 5549 taps were inserted in mains and 415 abandoned taps were destroyed, making a total of 97,031 in service.

The work of the Inspection Division, consisting of the location of leaks in service pipes and houses, together with prevention of waste of all kinds, has been actively pursued during the year. 146,827 examinations were made.

DISTRIBUTION SYSTEM.

Water pipe laid by Distribution Force on Account of Street Construction and betterment of the System:

3-inch water pipe.....	892 feet
6-inch water pipe.....	12488 feet
12-inch water pipe.....	2801 feet
20-inch water pipe.....	93 feet
36-inch water pipe.....	24 feet

PIPE LAID FOR PRIVATE CONNECTIONS.

3-inch water pipe.....	438 feet
4-inch water pipe.....	487 feet
6-inch water pipe.....	1156 feet
8-inch water pipe.....	40 feet
12-inch water pipe.....	138 feet

PIPES RAISED, LOWERED OR REPLACED.

3-inch water pipe.....	102 feet
6-inch water pipe.....	14476 feet
10-inch water pipe.....	31 feet
12-inch water pipe.....	2753 feet
20-inch water pipe.....	89 feet
36-inch water pipe.....	12 feet

The following work was done on fire plugs, stop valves and sprinkling plugs from April 1, 1908, to April 1, 1909:

	Fire Plugs.	Sprinkling Plugs.	Stop valves.
Cleaned, oiled and packed.....	28896	2734	27666

Breaks repaired.....		

Division of Expenditure for labor employed in the Distribution System for year ending March 31, 1909:

For maintenance of system.....	71%
For extension and improvement of system.....	10%
For private work.....	6%
For engineering and contracts.....	11%
For miscellaneous and special work.....	2%

WORK OF THE MUNICIPAL TESTING LABORATORY FOR THE YEAR 1908-1909.

For the purpose of maintaining a City Testing Laboratory \$15,000.00 was added to the appropriation of the Water Department for the last year. Previous to this the laboratory had been supported by the Street, Sewer and Water Departments through an approximate division of the pay roll and cost of supplies; an engineer from the last-named department having supervision under the direction of the Water Commissioner. With the recognition of the Laboratory as a fiscal division of the Water Department, its control lodged more directly in the hands of the Water Commissioner and the records of the users of tested cement and brick furnished the basis for a division of cost at the end of the year.

The existence of a separate appropriation for the Laboratory made possible constant engineering supervision, which, by this time had become necessary through the increased use of materials of construction by the City and the recognition of the value of ultimate refinement in the methods of testing. The present manner of testing cement has been in force for two years and the increase in accuracy of the values obtained is perhaps best illustrated by the following table which gives the per cent variation on briquettes at three periods. Constant engineering supervision went into effect in April, 1908.

	April, 1907.	April, 1908.	April, 1909.
Neat—7 days	17.2	9.1	8.6
Band—7 days	9.3	10.2	7.8

A degree of efficiency has now been reached beyond which we must look for improvement mainly in the testing machines.

A rearrangement of the space in the laboratory building was found necessary through having to accommodate the Chemical Laboratory of the Street Department. The room originally intended for the testing of Water Meters has been fitted up for the routine testing of cement. In it has been erected a storage tank, with a capacity of 4200 briquettes, constructed of water-proofed cement mortar. A water heater burning gas has been connected to the tank which maintains a constant flow of water through it at 70° F. Three moist closets have been constructed of the same material as the tank and with it have been giving excellent service.

A motor-driven Cement Sieve Agitator, a new Brick Rattler and a Positive Pressure Blower have been added to the equipment and

considerable carpenter work, as tables, closets, cabinets and briquette racks, has been done. Six three-gang two-inch cube molds have been procured and constant testing has been carried on on the compressive strength of cement mortars.

Besides the routine testing of cement and brick, continual experimental work has been forwarded with the view of increasing the first hand information at the disposal of the laboratory and with the ultimate idea of simplifying and rendering more certain the present methods of testing. A lead seems to have been found in an accelerated tensile test on cement mortars which promises excellent results as an index of the final strength. Tests are also under way with the object of changing the present specifications for Vitrified Paving Brick to agree with the standard methods of the National Paving Brick Manufacturers' Association.

A satisfactory system of cement warehouse inspection has been devised which, though maintaining the essentials of the original plan of the Cement Testing Committee of the Board of Public Improvements, has resulted in reducing the average number of men detailed for this purpose. The saving resulting from this change has materially aided in reducing the cost per barrel of testing cement.

The manner of sampling cement at the warehouses has remained unaltered and according to the recommendations of the American Society of Civil Engineers. At the request of the laboratory the St. Louis Portland Cement Company has installed an automatic cement sampler on the conveyor line at their mills. It is proving highly efficient and replaces the uncertain methods in force before this which depended upon the ability of the city inspector to leave the packing house while shipments for city work were under way.

During the last year considerable trouble has been met with in the cement offered for test, and about 7000 barrels failing to meet the City requirements have been condemned. This is in contrast to the rejections for the year previous, when but 150 barrels were found unfit.

Acting under orders from the Cement Testing Committee of the Board of Public Improvements, the product of the Continental Portland Cement Company has been sampled and tested preliminary to its admission for regular testing for use on City work.

*The degree of fermentation in water analysis is an index of the amount of contamination with sewage bacteria, especially the Colon Bacillus. It has been shown that the presence of Colon Bacilli in drinking water will produce, when grown on suitable media, 50 per cent. or more of gas. Since the Colon Bacillus is associated with the Bacillus of typhoid fever, its presence or absence is of especial interest.

ANNUAL REPORT
OF THE
President, Board of Public Improvements
FOR THE
Fiscal Year 1908-1909.

St. Louis, April 28, 1909.

HON. FREDERICK H. KREISMANN, Mayor.

Sir:—Herewith in conformity with Charter and Ordinance provisions, I have the honor to transmit the annual reports of the Members of the Board of Public Improvements for the fiscal year 1908-1909, including those of the

President,
Street Commissioner,
Water Commissioner,
Sewer Commissioner,
Park Commissioner,
Harbor and Wharf Commissioner,

and of the

Supervisor of City Lighting,
Supervisor of Plumbing.

Respectfully,

MAXIME REBER,

President, Board of Public Improvements.

St. Louis, April 12, 1909.

HON. MAYOR AND MUNICIPAL ASSEMBLY.

Gentlemen:—I herewith hand you the annual report of this department for the information of the Honorable Mayor and Municipal Assembly, as required by the Charter of the City of St. Louis.

Accompanying herewith are the separate reports from persons in charge of the divisions of the work of this department, to-wit:

Assistant to the President, Mr. Fred Gabel,
Second Assistant, Mr. C. M. Talbert,
Secretary of the Board of Public Improvements, Mr. W. B. Dryden,
Assessor of Special Taxes, Mr. Joseph Pasquier,
Superintendent in charge of the disposal of garbage, Mr. P. M. Lally.

and my statement in relation to work under the general supervision of the President of the Board of Public Improvements, is as follows:

STREET DEPARTMENT.

The Street Commissioner has continued the policy inaugurated some years ago to use wooden block pavement on cross-walks on granite paved streets in the retail business sections of the City. The wooden pavement for this purpose has proven more acceptable to pedestrians than the rough granite block surface and is better and safer than granite blocks with a smooth dressed surface.

Granite paving in the manufacturing and business districts has been extended. The noise of traffic over granite paving being objectionable on streets where retail business, hotels and office buildings are located, wooden blocks and sheet pavement, either asphalt or bitulithic, are being substituted as the necessary legislation is secured. Detailed statements of these changes, as well as the extensions of these classes of pavement and the paving by vitrified brick, are given in the report of the Street Commissioner.

The cleaning of the streets by the block system of sweepers and the scouring by water pressure tanks appears to be the best method for the granite, sheet and the brick and wooden block pavements, but is not applicable to macadam or telford surfaced streets. It is noticeable that where telford or macadam streets intersect streets paved with asphalt or bitulithic, great difficulty is experienced in maintaining the paved streets in the best condition on account of the quantity of gritty matter carried on the paved streets, thus increasing the rapidity with which the wearing of the surface proceeds.

SEWER DEPARTMENT.

The solution of the problem of the disposal of sewage from districts outside the jurisdiction of the City in streams that form natural water courses flowing through the City, appears to depend ultimately upon the extension of the jurisdiction of the City to include all the territory within the water sheds so drained. The cost of the disposal of this sewage and rain water should be borne by the districts where it is created or falls. This subject has been called to the legislative and administrative attention in my several previous annual reports and need not be further discussed here.

Sewer work in general, where the sewage and surface waters to be disposed of were from districts wholly within the jurisdiction of the City, has progressed as satisfactorily as the means of the City would permit.

WATER DEPARTMENT.

The usual extensions of the pipe lines of the distribution system have been carried on and as far as funds for the purpose have become available.

A coagulating plant of a permanent character has been completed and is now in use at the Chain of Rocks pumping station. The northern half of the new settling basin was damaged shortly after it was put in service and temporarily rendered unserviceable on account of some slight leakage of water which found its way into an unknown bed of quicksand, causing a small portion of the bottom to drop. This accident did not interfere with the supply of clear water for all the needs of the City, including fire protection.

The reconstruction of the boiler plants at the High Service Station at Bissell's Point has been progressing as well as that at the Chain of Rocks, each with a view of greater economy in operation and to insure the ultimate elimination of smoke.

PARK DEPARTMENT.

During the past year several small parks and playgrounds have been acquired through funds raised by a bond issue for the purpose.

An additional public bath house and swimming pool has been erected and will shortly be completed, and its management placed in the hands of the Park Commissioner. More of these bath houses are much needed.

HARBOR AND WHARF DEPARTMENT.

The work of this department appears to have proceeded along the time honored lines. There has been but little demand for improvements, as our river traffic has not increased to a point where much of an extension has been needed. Several sections of the wharf have been leased to commercial enterprises.

An appropriation has been made from the funds of this department for the construction of a swimming pool on the levee, the funds of the department being much greater than its necessities require.

MUNICIPAL BRIDGE.

Work on surveys and plans has been in progress during the year.

It is unfortunate that the United States Engineers' Department has required that the Bridge have a two thousand foot waterway and a clearance far in excess of that of the Eads Bridge, as the requirements do not improve or facilitate navigation, but materially increases the cost of the Bridge.

No legislation has been secured through the Illinois Legislature authorizing the City of St. Louis to operate and maintain a highway or steam railroad bridge in the State of Illinois. This, however, may not be necessary.

ELIMINATION OF GRADE CROSSINGS.

Much careful attention has been given to the subject of the elimination of grade crossings by the Members of the Board, but on account of lack of funds on the part of the City, no measures could be put through that would involve the City in any obligation to pay any large amount or become liable for damages of large proportions on account of the change of street grades.

MUNICIPAL IMPROVEMENTS.

Contracts have been let and work is in progress on the Insane Asylum, a Maniacal Building, the Fireproofing of the Poor House, several Fire Engine Houses, and several Public Comfort Stations, and items of work of less importance. Plans have been made for additions to the City Hospital and a Municipal Courts Building, but the estimates of the cost of these works have not been completed.

DISPOSAL OF GARBAGE.

At the close of the fiscal year ending April 12, 1908, a contract was awarded to the Standard Reduction & Chemical Company for the disposal of garbage at the rate of twenty-seven cents per ton.

I am informed that the prolonged period of high water has delayed and hindered the completion of the plant in a satisfactory manner, and the garbage is being disposed of in the meantime by being dumped on Chesley Island at the expense of the contractor. The penalty for non-compliance with their contract provides for a forfeiture of \$10.00 per day.

We see from Mr. Lally's report that 51,000 tons of garbage were disposed of during the year.

FINANCIAL.

The business transacted through this department during the fiscal year is represented by a total expenditure of \$5,808,333.07.

Very respectfully,

A. J. O'REILLY,

President, Board of Public Improvements.

ANNUAL REPORT OF
ANNUAL REPORT.
OF THE
ASSISTANT TO THE PRESIDENT.
OF THE
BOARD OF PUBLIC IMPROVEMENTS.
For the Fiscal Year Ending April 12, 1909.

President's Office,
Board of Public Improvements.
St. Louis, Mo., April 12, 1909.

HON. A. J. O'REILLY,

Dear Sir:—I have the honor to present herewith the following report for the fiscal year ending April 12, 1909.

The expenditures of the President's Department during the year were as follows:

SALARIES—President, Secretary, Assistant, Second Assistants, Assessor and Deputy Assessor of Special Taxes, Special Tax Clerks, Clerks, Stenographer, Draughtsmen, Civil Engineer and Surveyor.....	\$49,541 80

**ANNUAL REPORT
OF THE
SECOND ASSISTANT TO PRESIDENT
OF THE
BOARD OF PUBLIC IMPROVEMENTS.**

IN CHARGE OF ENGINEERING AND CONSTRUCTION DIVISION.

HON. ANDREW J. O'REILLY,

President Board of Public Improvements.

Dear Sir:—I have the honor to present herewith the Annual Report of the Engineering and Construction Division of your Department for the Fiscal Year ending April 12, 1909.

The personnel of the office has consisted of Engineers, Draughtsmen, Surveying Party and Inspectors.

This office received the following Requisitions for Repairs and Emergency Work for the various Institutions and Buildings:

Fire Department.....	70	Four Courts.....	125
City Jail.....	31	2322 Clark Avenue.....	0
Work House.....	6	Bacteriological Building.....	8
House of Detention.....	11	City Hospital.....	45
Industrial School.....	13	(3 of these for Emergency Hospital).	
Morgue.....	10	Female Hospital.....	41
City Markets.....	32	Insane Asylum.....	39
New City Hall.....	286	Poor House.....	31
Old City Hall.....	59	Quarantine Hospital.....	4
Court House.....	73		

Total number of Requisitions Received..... 884

These requisitions comprise the ordinary smaller repair work on the City Buildings as enumerated.

The work of this office in connection therewith has included the receiving, filing and numbering of the requisitions; the investigation of the work called for; the ordering of the emergency work; the writing of specifications and letting of contracts for the larger work; the inspection of the work during its progress and the approval of the bills for payment.

ENGINEERS AND DRAUGHTSMEN.

There has been during the year an average of twelve Engineers and Draughtsmen employed in the office. They have been engaged in various miscellaneous work of repairs and alterations, and certain larger work as follows:

PLANS AND SPECIFICATIONS FOR:

Engine House No. 4.....	Underpinning Walls of Building.
Engine Houses No. 8, 10, 23 and 24.....	Installing New House Heaters.
Engine House No. 11.....	Wrecking of Old and Erection of New Building.
Engine House No. 17.....	New Hose Tower.
Engine House No. 37.....	Erection of Building.
Engine House No. 47.....	Erection of Building.
Engine House No. 48.....	Erection of Building.
Engine House No. 49.....	Erection of Building.
City Hospital.....	Drug Store Fixtures.
Female Hospital.....	Installing New Plumbing.
Female Hospital.....	Frame Stable, Fence, Etc.
Insane Asylum.....	Telford Road.
Insane Asylum.....	Granitoid Floors in Basement and in Kitchen Building.
Insane Asylum.....	General Repairs to Cottage.
Insane Asylum.....	Frame Stable.
Insane Asylum.....	Bowling Alley.
Poor House.....	Granitoid Floors in Basement of Kitchen Building.
Poor House.....	Reconstructing and Fire Proofing West Wing of Main Building.
Quarantine Hospital.....	New Boiler House.
Quarantine Hospital.....	New Boilers.
Quarantine Hospital.....	New Dynamos and Engines with Connections.
Quarantine Hospital.....	Cold Storage Box.
Industrial School.....	New Boiler.
New City Hall.....	Cabinet and Lockers for Police and Fire Alarm Office.
New City Hall.....	Alterations in License Commissioner's Office.

Court House.....	Remodeling Portions of the South Wing, Second Floor.
Court House.....	Judges Benches and Court Room Fixtures.
Union Market.....	Repairing Fire Damage.
Union Market.....	Painting and Repairing.
Work House.....	New Reinforced Concrete Cell House.
Bath House No. 1.....	Additional Showers.
Carr Square.....	Entrance and Public Comfort Station.
Fountain Park.....	Tool House.
Lafayette Park.....	Shelter House.
Yeastman Square.....	Alterations to Old Building into Shower and Tool Room.
Hyde Park.....	Tool House.
Carondelet Park.....	Boat House.
St. Louis Place.....	Band Stand.
Forest Park.....	Concrete Foot Bridge.
Forest Park.....	Tool Room in Lindell Pavilion.
Forest Park.....	New Stable.
1st District Police Court.....	Judges Bench and Audience Seats.
Garbage Reduction Plant.....	Scale House.

All the above mentioned work was completed with the exception of two items, the schemes of which were abandoned before the plans were completed. In addition to these a large number of working details have been made as the various contracts have progressed. Also the following plans and specifications have been received from outside Architects:

Insane Asylum.....	Extensions to.
Insane Asylum.....	Maniacal Building.
City Hospital.....	Extension and Additions to.
City Hospital.....	Heating System for Extension.
City Hospital.....	Extensions and Additions to (Ward Buildings.)
City Hospital.....	Extensions and Additions to (Clinic Building.)
City Hospital.....	Nurses Quarters.
Municipal Courts Building.....	
City Jail Building.....	
Soulard Street Swimming Pool.....	

The work done on these plans and specifications has been as follows:

Insane Asylum, Extension to and Maniacal Building—These were checked in detail and prepared for presentation to the Board. Since the contracts have been let the shop drawings and details of iron and reinforced concrete work have been checked and approved.

City Hospital, Additions To—A fairly comprehensive study was made of all the plans and specifications presented, but no changes or corrections were made on any of them.

Municipal Courts Building—The plans and specifications have been checked in detail with the architects and are ready for presentation to the Board.

Jail Building—Plans and specifications have been partly checked but the work is not quite completed.

Soulard Street Swimming Pool—These plans and specifications were checked and forwarded to the Board for approval. Since the contract was let a number of details have been checked.

In addition to the specific work mentioned above, the Engineers who have engaged in checking and designing the reinforced work, have made a number of computations and tables to be used in connection therewith. These tables give the moment of resistance of slabs of 3½" to 10" thick, with sizes of bars from ¼" to ¾" and spacing of bars from 2½" to 15" and are intended to facilitate the work of designing and checking this class of work. When these are fully completed they will have involved quite an amount of labor, and a further and fuller report will be made thereon.

SURVEYING PARTY.

The surveying party has consisted of one Engineer and three Rodmen. Their work has consisted in making surveys to cover contemplated new work; the locating of new buildings to be erected; the giving of grades and locations for sewers, side-walks, roadways, floors, etc., and the obtaining of such information as may be necessary in carrying on the work of the Department.

The more important work done by the party during the year is as follows:

At the Insane Asylum: The locations were given for the new Extension and new Maniacal Buildings and all of the locations and elevations of footings and foundations for columns and walls were checked. Survey was made for new sewer line and the grades worked out. A new road was located and the construction supervised. Measurements were made for a large amount of extra foundation and sewer work. A new stable was located and grades given.

At the City Poor House—Several smaller surveys and plans were made for placing granitoid floors and other work was done in connection with the fire proofing of the main building.

At the Female Hospital—A detail survey was made of the grounds; the lines of the property were located for erecting new boundary fences. Other work was done in connection with the widening of January Avenue and the erection of the new stable.

At the City Work House—A survey was made for a new sewer line to connect the new Cell House with the River. The new Cell House was located and elevations given.

The original surveys were made and the locations were given for the erection of Soulard Street Swimming Pool; Tool House in Lafayette Park; Concrete Foot Bridge in Forest Park; Reconstruction of old building in Yeatman Square; Park Entrance and Comfort Station in Carr Square; Tool House in Hyde Park; Tool House in Fountain Park and some smaller work in other parks.

Surveys were made of the lots and the locations for the buildings were given for Engine Houses 11, 37 and 47 and surveys were made of the lots for Engine Houses Nos. 48, 49, 50 and 51.

Surveys and cross sections were made of the two blocks on which is to be located the Municipal Courts Building.

On the City Hospital grounds a survey was made of that portion on which is to be located the new hospital additions and of the location for the new Nurses' Lodge.

INSPECTORS.

During the first half of the past fiscal year there were about six Inspectors employed in this department. The starting of the work on the Insane Asylum Extension and the Maniacal Building has about doubled this and there are at the present time thirteen Inspectors on the roll. They have been engaged in inspecting and supervising the construction of the various works which have been carried on during that time. These are as follows:

CONTRACTS ENTERED INTO DURING FISCAL YEAR 1908-1909.

Engine House No. 17.....	Erection of New Hose Tower.....	\$799 00
Engine Houses Nos. 8 and 19.....	Installing House Heaters.....	423 00
Engine House No. 11.....	Wrecking Old and Erecting New Building.....	11,459 00
Engine House No. 11.....	Installing Steam Heating System.....	837 00
Engine House No. 47.....	Erection of Engine House.....	15,884 00
Engine House No. 47.....	Installing Steam Heating System.....	823 00
City Hospital.....	Coal Storage Cellar.....	4,732 00
City Hospital.....	Drug Store Fixtures.....	437 00
Female Hospital.....	Plumbing Work, etc.....	577 00
Female Hospital.....	Frame Stable, Picket Fence, etc.....	3,360 00
Insane Asylum.....	Telford Road.....	1,458 26
Insane Asylum.....	Granitoid Floors in Basement and Kitchen.....	1,043 25
Insane Asylum.....	Repairs to Cottage.....	497 00

Insane Asylum.....	Frame Stable.....	1,138 00
Insane Asylum.....	Foundation and Equipment of Bowling Alley.....	991 00
Insane Asylum.....	Erection of Maniacal Building.....	70,410 00
Poor House.....	Granitoid Floors in Basement Kitchen Building.....	460 39
Poor House.....	Pews, Altar Rail, etc., for Chapel.....	657 00
Poor House.....	Reconstructing East Porch Room Wing.....	17,478 00

Poor House.....	Reconstructing West Wing of Main Building.....	\$ 29,860 00
Quarantine Hospital.....	Storage Box.....	598 00
Quarantine Hospital.....	Construction of Boiler House.....	4,294 00
Quarantine Hospital.....	Two Boilers and Boiler Setting.....	2,850 00
Quarantine Hospital.....	Conduit, Steam and Return Pipes.....	5,500 00
Quarantine Hospital.....	Pumps, Heater, Hot Water Tank.....	2,190 00
Industrial School.....	Installing and Connecting Boiler.....	1,890 00
New City Hall.....	Repairs and Alterations to Steam Heater.....	447 00
New City Hall.....	Two Motor Generator Sets.....	543 00
New City Hall.....	Alterations in Coroner's Office.....	218 00
New City Hall.....	Alterations in License Commissioner's Office.....	297 00
Court House.....	Remodeling Portions of South Wing, Second Floor.....	7,079 00
Union Market.....	Repairs to Market Building (Fire Damage).....	1,250 00
Union Market.....	Painting and Glazing.....	2,059 00
Union Market.....	Repairs to Market Building.....	958 00
Street Department.....	Erecting One-Story Brick Building.....	1,949 00
Bath House No. 1.....	Additional Marble Work for Showers.....	2,280 00
Bath House No. 1.....	Partitions for Nine Showers on Woman's Side.....	884 00
Soulard Swimming Pool.....	Erection of Building.....	48,492 00
Carr Square.....	Construction of Park Entrance and Comfort Station.....	10,788 00
Carr Square.....	Installing Plumbing Fixtures in Comfort Station.....	2,273 00
Fountain Park.....	Constructing Concrete Tool House.....	740 00
Lafayette Park.....	Erection of Shelter House.....	5,925 00
Forest Park.....	Constructing Concrete Foot Bridge.....	2,076 00
Hyde Park.....	Erection of Tool House.....	1,345 00
Forest Park.....	Toilet Room in Lindell Pavilion.....	1,893 00
Yeatman Square.....	Alterations.....	1,520 00
Yeatman Square.....	Plumbing and Sewering.....	750 00
Total.....		\$1,237,238 90

Of the above work, the following remains incomplete and in the course of construction at the present time:

Engine House No. 47.....	Erection of Engine House.....	\$15,884 00
Engine House No. 47.....	Installing Steam Heating System.....	823 00
Insane Asylum.....	Erection of Extension.....	962,827 00
Insane Asylum.....	Erection of Maniacal Building.....	70,410 00
Poor House.....	Reconstruction of West Wing of Main Building.....	29,860 00
Court House.....	Remodeling Portions of South Wing, Second Floor.....	7,079 00
Street Department.....	Erecting One-Story Brick Building.....	1,949 00
Bath House No. 1.....	Partitions for Nine Showers on Women's Side.....	884 00
Soulard Swimming Pool.....	Erection of Building.....	48,492 00
Carr Square.....	Construction of Park Entrance and Comfort Station.....	10,788 00
Carr Square.....	Installing Plumbing Fixtures in Comfort Station.....	2,273 00
Forest Park.....	Constructing Concrete Foot Bridge.....	2,076 00
Hyde Park.....	Erection of Tool House.....	1,345 00
Total.....		\$1,154,690 00

Contracts entered into previous to 1908 and 1909, but were completed this year:

City Hospital.....	Terrace Steps, Paving and Iron Fence.....	\$2,730 00
Poor House.....	Reconstruction of East Wing of Main Building.....	24,084 00
Poor House.....	Erection of Carpenter Shop and Chapel.....	3,797 00
Insane Asylum.....	Erection of a Convenience near Ball Grounds.....	1,736 00
Quarantine Hospital.....	Erection of Brick Hospital Building.....	58,880 00
Quarantine Hospital.....	Two Engines, Generators, Switchboard, etc.....	3,905 00
Quarantine Hospital.....	Low Pressure Heating System for New Hospital.....	3,641 00
Quarantine Hospital.....	Radiators, Pipes, etc., for Dormitory and Superintendent's Residence.....	1,068 00
		\$99,841 00

Respectfully submitted.

C. M. TALBERT,
Second Assistant.

St. Louis, Mo., April 13, 1909.

HON. A. J. O'REILLY,

President, Board of Public Improvements.

Sir:—I herewith present my report for the fiscal year ending April 12, 1909.

MEETINGS.

84 meetings of the Board were held.

PERMITS.

2777 permits were issued by the President for areaways, sidewalks, etc., and his action approved by the Board, 3 refused and 11 cancelled.

REPAIR REQUISITIONS.

790 repair requisitions were approved by the Board.

INFORMAL LETTINGS.

35 lettings were advertised and let by the President and the President also received bids on 83 requisitions, the total number of bids received were 508, involving an expenditure of \$39,842.31.

PETITIONS.

343 petitions for street and alley improvements, water pipe and district sewers were presented and referred to the respective commissioners having charge of the work.

HEARINGS.

13 public hearings were held and 407 petitions, either on Board's motion, or of interested property holders were heard and referred.

ORDINANCES.

Drafts of 505 ordinances were approved by the Board and forwarded to the Municipal Assembly for passage.

LETTINGS.

447 lettings were advertised and bids were received on 42 separate meetings; the number of bids received being 3009, involving an expenditure of \$12,670,266.485.

PRIVATE SEWERS.

113 plans for private sewers to drain the premises of property owners were submitted and approved by the Board.

DEDICATIONS.

46 plats of dedications and sub-divisions were approved.

STREET RAILWAYS.

22 plans for special work at various places were approved.

STEAM RAILWAYS.

2 plans for switches were approved.

Respectfully submitted,

W. B. DRYDEN,

Secretary.

St. Louis, Mo., April 12, 1909.

HON. ANDREW J. O'REILLY,

President Board of Public Improvements.

Dear Sir:—I have the honor to submit herewith the statement of special taxes arranged in tabular form for the fiscal year ending April 12, 1909. During that time 20032 bills were issued for street, alley, sidewalk and sewer work amounting in the aggregate to the sum of \$2,413,310.89.

The present report shows an increase of \$432,718.26 in the total amount of work as compared with that of the preceding year and a corresponding increase of 4128 special tax bills.

The assessment of the sprinkling tax for the season of 1909 amounted to \$245,141.00 and 95386 bills were issued at an average rate of 4.555 cents per linear foot.

Respectfully,

JOSEPH PASQUIER,

Assessor of Special Taxes.

HON. A. J. O'REILLY,

President, Board of Public Improvements.

Dear Sir:—Herewith please find report for fiscal year 1909, of the amount of Garbage and Dead Animals handled; also showing number of trips made by steamboat and amount of fuel used for fiscal year ending March 31, 1909:

For Installing and Maintaining Call Bells, Buzzers, etc.....	2,000.00
For Testing, Sealing and Stamping Gas Meters.....	4,500.00
Aggregating	\$64,500.00

The estimate for Electric Arc Lights includes the operation of 325 Magnittite Arcs to be installed by the Downtown Lighting Association.

GENERAL SUMMARY.

Under the new contracts recently let for a period of ten years, beginning September 1, 1910, for lighting streets, alleys, parks and public places, the savings accomplished are as follows:

For mantle lamps, \$1.19 per thousand mantle lamp hours, making a total saving of \$957,363.12 for ten years, based on the number of lamps installed at the present time.

For arc lights on the various streets, the net saving will amount to \$615,040.00 for the ten year period.

For lighting of public buildings in the district north of Washington Avenue based upon the consumption of the present year, which prices under the new contract are cut from 5½ cents to 3½ cents per kilowatt hour, \$2,828.82; and on the contract for the district South of Washington Avenue, there will be a yearly saving of \$2,781.39, making a total of \$5,608.21 or \$56,082.00 for the ten year period.

This will make a net saving under the new contracts for the ten year period beginning September 1, 1910, of \$1,628,485.00.

Under a new system being worked out by this department, we will still further reduce the cost of incandescent alley lighting about \$10,000.00 per year, as it is the intention to place arc lights upon the streets at the mouth of each alley thus doing away entirely, wherever practicable, with incandescent alley lighting. This will not only afford better illumination, but at the price of arc lights under the new contract, will allow us to practically double the number of arcs.

The new Metallic Arc which has recently been investigated by a Committee from the Board of Public Improvements and this department, if finally adopted by the Board, with the great reduction in price per arc per year, will place the City of St. Louis among the best lighted cities of the United States in its downtown district.

Respectfully submitted,

H. S. SANDERSON,
Supervisor of City Lighting.

ANNUAL REPORT OF THE Supervisor of Plumbing FOR THE Fiscal Year Ending April 12th, 1909.

A comparison of the above table shows a decrease in the appropriations, notwithstanding an increase in the Street Mileage.

STATEMENT OF STREET AND ALLEY CONSTRUCTION AND RECONSTRUCTION.

STREET CONSTRUCTION.

20.62 miles	Vitrified Brick	\$1,116,252.90	
2.01 miles	Asphalt	105,731.47	
3.74 miles	Bituminous Macadam (Bitullthic)	256,648.12	
2.49 miles	Granite Blocks	172,006.79	
			\$1,649,639.28
28.86 miles	Authorized by Ordinance		
0.91 miles	Work done under private contract.		
29.77	Total number of miles.		

STREET RECONSTRUCTION.

6.19 miles	Vitrified Brick	\$ 217,968.10	
0.35 miles	Bituminous Macadam (Bitullthic)	22,836.22	
0.88 miles	Granite Blocks	54,216.49	
0.34 miles	Wood Blocks	21,720.65	
			316,741.46
7.76 miles	Authorized by Ordinance.		
0.15 miles	Work done under private contract.		
7.91	Total number of miles.		

ALLEY CONSTRUCTION.

15.24 miles	Vitrified Brick	\$ 303,260.19
-------------	-----------------------	---------------

ALLEY RECONSTRUCTION.

0.58 miles	Vitrified Brick	11,385.40	
			\$314,645.59

TOTAL MILEAGE FOR THE YEAR.

STREETS.

26.81 miles	Vitrified Brick.	
4.09 miles	Bitullthic.	
2.01 miles	Asphalt	
3.37 miles	Granite Block.	
0.34 miles	Wood Block.	
36.62 miles	Built under authority of Ordinance.	
1.06 miles	Built under authority of Board of Public Improvements.	
37.68	Grand Total.	

Alleys 1582 miles Vitrified Brick.

The above mileage of street and alley improvements is larger than that recorded in any previous year, and the work has resulted in making it possible to reach any section of the city over well paved streets.

The accompanying chart indicates the mileage of hard pavements laid each year from the adoption of the Scheme and Charter in 1876, and shows the rapid progress that has been made in street work during the past six years.

All paving contracts provide for a five-year guarantee of the workmanship and materials used and that the contractor shall make all repairs at a stipulated price.

The City should be authorized to make all necessary repairs for causes other than defective workmanship and materials. To do this would necessitate the operation of a municipal asphalt plant. Such a plant, having a capacity of 1,000 yards per day, could be installed for \$25,000, and I earnestly recommend that the Honorable Board of Public Improvements give this matter careful consideration.

STREET REPAIRS AND MAINTENANCE.

Street pavements cannot be laid sufficiently strong to wear indefinitely, which means that they must be continually cared for. A pavement in need of a few repairs, if neglected, deteriorates rapidly and in a short time is in a very bad condition.

The following data for the cost of repairs (for wear and tear and disintegration, due to the breaking up of the bituminous cement) for the year, is somewhat interesting:

PAVING COMPANY	MATERIAL	Sq. Yds. UNDER MAINTENANCE	PER CENT OF TOTAL AREA RE- PAVED	COST PER Sq. Yd. BASED ON TOTAL AREA
Barber Asphalt Co.....	Asphalt	649,209 00	6%	5½c.
Parker Washington Co.....	"	274,137 00	1%	1c.
Trinidad Asphalt Co.....	"	166,823 00	2%	2c.
Granite Bituminous Paving Company.....	Bitulithic	639,272 00	1%	1c.

Cost for repairs based on an estimate of 90c per square yard for top and binder. (See Table No. 15 for detailed statement.)

STREET SPRINKLING.

Water on street pavements from excessive sprinkling does more harm than traffic, due to the softening of the binding material.

To overcome the dust nuisance and to reduce the cost of street maintenance, I recommend the use of heavy residuum of oils on macadam and telford streets. The oil should have some cementing properties and this can only be obtained in the heavy gravity oils. This method of laying the dust is less costly than sprinkling with water and the results, when the work is properly done, are much more satisfactory.

The average cost per mile per year for street sprinkling is \$500; cost of water not included. The cost of oiling varies according to the grade of oil; but will not exceed the cost of street sprinkling and will materially decrease the cost of maintenance.

STREET CLEANING.

Nothing contributes more to public comfort than the sanitary maintenance of the streets and alleys. This branch of municipal work has received special attention. The success of the work depends on the organization.

The city owns a well equipped plant for street cleaning and garbage collection. It should, however, be enlarged to the extent that all machines, wagons and stock necessary to carry on the work be owned by the city.

In connection with the municipal cleaning plant, there has been leased a tract of land in St. Louis County, which has been turned into a retreat for condemned horses. Formerly, the Fire Department and other divisions of the municipal government, having horses temporarily incapacitated sold them at a nominal price. Today, this stock is taken by the Street Department and by it sent to the "Retreat Farm" where, in the course of a few months, the horses are in a condition to be used in street work.

MATERIAL YARDS AND BUILDINGS.

The city continues to rent improved and vacant property for offices and yards for material, and during the past year a very creditable office building and material yard was established at the corner of Michigan avenue and Gasconade Street.

It is very important that a yard should be established along one of the railroads in the western part of the city, of sufficient size for an asphalt plant and a stock of materials. Also property should be purchased in North St. Louis for an office building and material yard.

KINGSHIGHWAY (Boulevard.)

The scheme for Kingshighway boulevard is now being carried out under process of condemnation proceedings. A number of the Commissioners' reports have been completed, as well as the necessary surveys, and it can be expected that this important belt highway will shortly become the most important thoroughfare of our city.

I desire to express my appreciation of the services rendered by the gentlemen associated with me in conducting the work of this Department.

For information relating to the different divisions of the Department, I respectfully invite your attention to the accompanying reports of Mr. George B. Stroup, Assistant Street Commissioner; Mr. O. W. Childs, Bridge Engineer; Mr. John F. Laemmel, in charge of Drafting Division; Mr. Andrew Meyer, Jr., City Forester; Mr. Max Thavonat, Superintendent Excavation Division; Mr. Allen Trail, in charge of Sidewalk Divisions and Mr. Patrick Fitzgerald, Superintendent of Sprinkling Division, and the accompanying tables numbered from 1 to 19 inclusive.

Respectfully submitted,

JAS. C. TRAVILLA,

Street Commissioner.

ANNUAL REPORT OF REPAVING AND CLEANING STREETS.

Office of Assistant Street Commissioner.

St. Louis, Mo., April 13, 1909.

HON. JAS. C. TRAVILLA,

Street Commissioner.

Dear Sir:—I have the honor to report herewith the operations of this branch of the Street Department, for the fiscal year ending April 12, 1909.

The disbursements amounted to \$541,889.98 for street repairs, and \$716,300.91 for street and alley cleaning; a grand total of \$1,258,190.89.

MILEAGE OF PAVED STREETS.

70.00 miles or 147,299.82 squares granite.	
53.74 miles or 115,171.64 squares asphalt.	
33.92 miles or 77,653.82 squares Bitulithic.	
133.49 miles or 267,000.62 squares Vitrified Brick.	
2.84 miles or 4,999.83 squares Wood.	
74.03 miles	Telford.
8.74 miles	Novaculite.
194.06 miles	Macadam and Limestone.
miles	Blocks.

570.82 — Total number of miles.

For detailed information, relative to the number of squares of hard pavements maintained by the City Street Railway Company, by contractors and under Special Contract, see Table Number Nine.

MAINTENANCE OF STREETS.

The following work was done under the above caption and the total cost thereof is shown in each case, to-wit:

ASPHALT.

Farber Asphalt Paving Company	45,392.39 Sq. Yds. cost	\$45,812.63
Heman Construction Co.	4,537.71 Sq. Yds. cost	4,574.89
Parker-Washington Co.	3,307.27 Sq. Yds. cost	4,192.98

WOOD BLOCKS.

Parker-Washington Co.	55.88 Sq. Yds. cost	\$178.73
----------------------------	---------------------	----------

BITULITHIC.

Granite Bituminous Paving Company	10,327.06 Sq. Yds. cost	\$11,955.26
---	-------------------------	-------------

The City maintains 276.83 miles of Telford, Novaculite and Macadam pavements. For cleaning these streets, \$251,658.78 was expended.

The cost of material used in repairing these pavements amounted to \$541,889.98, including cost for hauling and freighting. 34,934 loads of macadam from the workhouse quarries were used in street repairs.

Material acquired on Requisitions through the Supply Commissioner were as follows:

9,123 squares of macadam, 20 squares crushed limestone, 10 tons crushed granite, 5,560 squares gravel, 25 squares binder gravel, 124 squares torpedo gravel, 6100 cubic feet riprap, 1200 squares slag, 117 carloads of cinders, 600 wagon loads cinders, 6 squares of creosoted pine blocks, 454,250 paving bricks, 742 squares granite blocks, 411 squares cedar blocks, 367 squares of pine blocks, 1706 lineal feet of granite curb, 79,272 lineal feet of rough lumber, 5,448 lineal feet of oak boards, 1300 lineal feet of flooring, 24,590 lineal feet of pine boards, 50,100 lineal feet pine planks, 10,000 lineal feet of stringers, 640 lineal feet of partition boards, 2,080 lineal feet of cypress lumber, 3,620 barrels cement, 91 barrels of tar, 4 barrels paving pitch, 8,336 lineal feet sewer pipe of all sizes, 69,689 gallons of oil for road purposes, 1,000 street sign boards and 1,188 street signs.

CLEANING OF PAVED STREETS AND ALLEYS.

293.99 miles of permanent improved streets and 107.80 miles of alleys were cleaned by the department last year at a cost of \$464,642.13; of this amount, \$169,662.22 was used exclusively for maintaining the block system of about 100 miles of pavements. Streets are generally cleaned from two to three times a week in the business district; while a cleaning once a week is sufficient for the residence districts.

The City worked 6-day and 4-night gangs flushing streets and alleys. A gang comprises the following:

4 flushing machines.....	@	\$7.00 per day	\$28.00
4 dirt wagons.....	@	4.50 per day	18.00
6 laborers	@	1.50 per day	9.00
1 inspector	@	3.00 per day	3.00

Total.....\$58.00

In addition to this, the City employs four gangs doing pick-up work, also two alley-flushing gangs.

The average cost to the City per great square for flushing the pavements during the past year was \$1.48. This estimate is based upon the number of squares flushed per month, without regard to paving materials, or to the location of the streets so cleaned. The average cost for machine-broom sweeping has been about ninety-two cents per great square.

BLOCK SYSTEM.

The cost of labor per day employees in this division is \$1.50 per man. About five City blocks is the average cleaning capacity of a laborer, counting three hundred feet to a block. The cost of a great square has been about 30 cents.

After acquiring, in the fiscal year 1907-1908, a new flushing and sweeping machine, called a "Squeegee", for use on Asphalt, Brick and Bitulithic pavements, this department, satisfied with the work accomplished by it, bought a second "Squeegee", and the work has been done to the satisfaction of this department.

GARBAGE DIVISION.

Since the City of St. Louis acquired the plant of the Excelsior Hauling and Transfer Company, under authority of Ordinance Number 21420, approved March 30, 1904, the property has been generally much improved by adding an office building, a garbage wagon washing plant, a boiler-house, wagon shop, equipped with all necessary machinery and appliances for building and repairing of all kinds, and a garage. The Superintendent of the Garbage Division has been furnished with an automobile, to enable him to more thoroughly oversee the collection of garbage.

The City owns at present 90 horses, 297 mules, 9 buggies, 95 garbage wagons, 26 sprinklers, 21 flushers, 13 snowplows and 96 wagons of all kinds, besides machinery of all kinds, necessary to handle the plant successfully.

During the fiscal year 1908-1909, a total of 33,958 loads of garbage were collected, averaging about one and one-half tons per wagon, or 50,937 tons. About 94 garbage wagons were used daily during the summer months, 66 in the spring and fall, and 46 during the winter months.

The garbage was delivered on barges at the foot of Warren and Gratiot streets, until the work of delivering it to the Standard Reduction and Chemical Company was commenced. By Ordinance Number 23526, approved September 30, 1907, the Board of Public Improvements was authorized to provide by contract for the disposal of garbage for a term of years ending September 1, 1918. On the 3rd day of March, 1908, the Standard Reduction and Chemical Company, a corporation, was awarded the contract by the Board of Public Improvements; which contract was approved by the Mayor and Council on March 10, 1908. By the terms of the contract, the said Company was to receive from the City at suitable places or at receiving stations, the garbage collected by garbage wagons of the City, and to transport and dispose of the same by a process of reduction; the said contractor to furnish all necessary tools, labor and machinery in the performance of the contract. The contract price, 27 cents per ton for all garbage delivered at receiving stations, to be paid by the city. The receiving stations were located at Chouteau avenue and the Railroad tracks, and at Mullanphy street and the Railroad Tracks. After some of the garbage had been received for trial at the reduction plant, the regular delivery of all garbage collected was inaugurated on March 11, 1909.

During the fiscal year 1908-1909, the following number of dead animals were collected: 3,550 horses, 25 colts, 364 mules, 213 cows, 41 calves, 10 sheep, 46 goats, 8 deer, 4 hogs, 3 elk, 1 buffalo, 10,219 dogs and 1,400 cats. One dead ostrich was also collected.

Respectfully submitted,

GEO. B. STROUP.
Assistant Street Commissioner.

ANNUAL REPORT OF BRIDGE ENGINEER.

St. Louis, April 13, 1909.

HON. JAS. C. TRAVILLA,
Street Commissioner.

Dear Sir:—I submit herewith the following report of the Bridge Division, for the fiscal year ending April 12, 1909.

There are 81 bridges and 240 culverts now in existence which are maintained by the Street Department. They are distributed as follows: Over railroad tracks, 18 bridges; over River Des Peres, 15 bridges; over various creeks, 48 small bridges; over various creeks, 37 large culverts.

The remainder of the culverts, being small ones, are located at ravines and depressions where drainage is needed. The small bridges are, in the main, in satisfactory condition.

The River Des Peres bridges are all in fair condition.

The bridges over railroad tracks are, in the main, in fairly good condition.

During the fiscal year 1908-1909, the south half of the Eighteenth Street Bridge over the railroad tracks has been rebuilt as authorized by Ordinance Number 22969. The steel superstructure was constructed by the Missouri Bridge & Iron Company, under Contract Number 7998, at a cost of \$60,910.28. The re-inforced concrete and pavements on spans were constructed by C. V. Mersereau, under Contract Number 7993, at a cost of \$10,740.34. The cement for this work was furnished

by the City, and this, in addition to the reconstruction of the substructure, south approach and painting, all done by the City employes, made a cost of \$19,957.77.

The north half of the Eighteenth Street Bridge should be re-built in the near future. The cost of this work will be about \$100,000.

The Twelfth Street, Fourteenth Street, and Jefferson Avenue Bridges should also be rebuilt at an early date.

Kingshighway Bridge, over the Missouri Pacific and Frisco Railroads, requires extensive repairs, unless it can be replaced by a new bridge at once.

Expenditures for the year have been as follows:

Salaries	\$ 5,200.00
Office Expenses.....	489.96
Miscellaneous and Repairs.....	49,852.68
18th. Street Bridge—New Steel.....	60,910.28
18th. Street Bridge—Concrete, etc.....	10,740.34
18th. Street Bridge—Substructure, etc.....	19,957.74
Total.....	\$147,151.00

The most important items of "Miscellaneous and Repairs" during the year have been as follows:

Reconstructed Picadilly Avenue Bridge, over the River Des Peres, at a cost of \$1847.00.

Painted Jefferson Avenue Bridge at a cost of \$2029.00.

Re-floored and re-paved Twenty-first Street Bridge, at a cost of \$2586.00.

Constructed a bridge over the River Des Peres at Sutherland Avenue, at a cost of \$1500.00.

Reconstructed store-house and shop at Bridge Yard, at a cost of \$3400.00.

Considerable work has been done during the year on surveys and plans for the reconstruction of bridges, and for new bridges in connection with grade-crossing elimination work.

Respectfully submitted,

O. W. CHILDS,
Bridge Engineer.

St. Louis, Mo., April, 1909.

HON. JAS. C. TRAVILLA,

Street Commissioner.

Dear Sir:—The annual report of the work done in the Office Division is respectfully submitted.

During the year, four hundred and seven plats were constructed, the necessary surveys made and estimates prepared for information at fourteen public hearings held by the Board of Public Improvements, for the purpose of considering, on petition, or on its own motion, street, alley and sidewalk improvements, establishing and opening streets, alleys, etc.

There were drafted four hundred and sixty-five ordinances for public improvements.

STATEMENT OF ORDINANCES DRAFTED

ORDINANCES DRAFTED FOR	1905-1906	1906-1907	1907-1908	1908-1909
Street and Alley Construction and Reconstruction.....	152	271	251	295
Street and Alley Openings.....	44	57	60	45
Granitoid Sidewalks.....	43	80	68	72
Boulevards.....	11	17	45	53
Width of Roadways, Street-grades, etc.....	11	28	45	53
Total.....	250	453	424	465

The street paving ordinances provided for thirty-eight miles of hard pavements, and the alley improvement ordinances provided for seventeen miles of hard pavements. The Municipal Assembly failed to pass ordinances for four miles of street paving.

There were prepared seventeen publications of work to be let, providing for three hundred and seventy-five lettings for street and alley improvements, granitoid sidewalks, street sprinkling, bridges, etc.

Surveys were made and plats constructed from which tracings were made for the use of the Commissioners in assessing damages and benefits in opening twenty-six streets and twenty alleys.

Thirty-seven plats of additions, subdivisions and dedications were examined and returned to the Board of Public Improvements, with reports applicable thereto.

Plats prepared for final measurement of work completed during the fiscal year for streets, alleys and sidewalks, were as follows:

Streets, improvement and reconstruction.....	143
Alleys, improvement and reconstruction.....	123
Streets, for sidewalk construction.....	26
Total.....	292

Twenty-two plans, showing location of street railway tracks and special work submitted by the Railway Companies, were reported upon.

The Legal Department was furnished with sixteen plats of special surveys made necessary by parties having instituted suits against the city for alleged damages due to personal injury, damage to property by changes in street grades, etc.

In this connection, the work of the City Photographer has been of great value, there having been made two thousand views during the year. Some of the views were made at the request of other Municipal Departments.

The work of the Department has been very materially increased, without a corresponding increase of the office force. I, therefore, desire to express my appreciation of the work done by the employes of this Division.

Respectfully submitted,

J. H. LAEMMEL,

In Charge of Drafting Division.

St. Louis, April 13, 1909.

HON. JAS. C. TRAVILLA,
Street Commissioner.

Dear Sir:—I respectfully submit the following report of the operations of this division of the Street Department, for the fiscal year ending April 12, 1909.

During the fiscal year 1908-1909, 16371 permits for excavations in streets and alleys were issued, also 1582 permits for temporary use of streets and alleys for building purposes.

The sum of \$22,439.91 for repairs of excavations made in improved streets and alleys, and \$11,446.62 was collected for inspection fees.

The City Treasurer has on deposit the sum of \$32,397.04 from plumbers and other parties, and the sum of \$18,850.00 for occupying streets and alleys with building material, in compliance with Ordinance Number 21394, Section Number 125.

Respectfully submitted,

MAT. PHAVONAT,

Superintendent, Excavation Division.

St. Louis, April 13, 1909.

HON. JAS. C. TRAVILLA,
Street Commissioner.

Dear Sir:—I respectfully submit report of the operations of the Sidewalk Division of the Street Department, for the fiscal year ending April 12, 1909.

Official notices for the repair and reconstruction of sidewalks and lowering of water and gas stop boxes were mailed to property owners or their agents as follows:

1st	District Brick.....	500	
2nd	District Brick.....	502	
3rd	District Brick.....	508	
4th	District Brick.....	916	Two inspectors part of time.
5th	District Brick.....	1,336	Two inspectors part of time.
Central	District Granitoid.....	1,076	
Total.....		4,838	

In addition to the above, the following number of complaints were investigated:

Police reports.....	396
Private complaints.....	89
Reports (Special Inspectors).....	967
Total.....	1,452

161 permits were issued for the repair of granitoid sidewalks, aggregating 17,422 square feet.

On re-inspections it was found that 3718 notices had been complied with, within the prescribed time, and to the satisfaction of the inspectors.

All other business or correspondence referred to or received by this division received prompt and careful attention.

Respectfully submitted,

ALLEN TRAIL,
In Charge, Sidewalk Division.

St. Louis, April 13, 1909.

HON. JAS. C. TRAVILLA,
Street Commissioner.

Dear Sir:—I herewith respectfully submit the following as my annual report of the Sprinkling Season 1908-1909, for sprinkling the streets of the City of St. Louis.

Total cost.....	\$246,889.00
Deductions by Superintendent.....	\$5,201.46
Deductions—Streets withdrawn by Commissioner.....	1,281.58
Deductions—Repairing Sprinkling Plugs.....	7,995.00
	14,478.04
Net amount paid contractors, ending January 31, 1909.....	\$231,910.96
Number of miles sprinkled.....	532.27
Average cost per mile.....	\$435.70
City wagons used during 1908-1909.....	107.
Private wagons used during 1908-1909.....	16.

Respectfully submitted,

PAT. FITZGERALD,
Superintendent of Sprinkling.

Annual Report of the City Forester

Fiscal Year 1908-1909.

HON. J. C. TRAVILLA,

Street Commissioner, St. Louis.

Dear Sir:—I have the honor to submit herewith the third annual report of the Forestry Division of the Street Department for the fiscal year ending April 12th, 1909.

A comparison of the records of the year just closed with those of the preceding year discloses the fact that there has been a falling off in tree planting of approximately 20 %. This decrease does not, however, indicate that there has been any less interest taken in the matter of tree planting, but is largely due to the climatic conditions and also the persistent efforts of the department to discourage the planting of what are known as forest or swamp trees. Reasons for planting nursery grown trees in preference to the latter have been set forth in the annual report of last year, and will therefore be omitted here.

The protracted dry spell which we experienced last fall prevented nurserymen from lifting trees and consequently most of that work had to be deferred until this spring. The result is that much of the work will be carried over into next year and will be enumerated in the subsequent report.

Many self-styled gardeners who have been in the habit of getting trees from the woods and river bottoms and palming them off on the unsuspecting property holders as nursery grown trees, now find it difficult to operate. The consequence is that this character of work is confined to fewer and at the same time more responsible persons, with the ultimate result that better work as well as superior quality of trees are secured.

A total of 5,468 trees have been planted on the streets during the year, and in very few instances were there more than two trees planted by a single applicant for permit.

Before issuing permits information was invariably demanded concerning the identity of the person or firm that had been engaged to perform the work or furnish the trees, and in this manner many property holders are protected from being defrauded by unscrupulous persons.

A thorough inspection of all work done under permit has been made and detailed reports concerning same are on file in the office. From these reports a directory of gardeners and nurserymen is being compiled which will give the rating of each person or firm according to ability to execute work and quality of stock furnished. Frequent requests are made to recommend responsible persons to plant or prune trees, and a directory of this nature will be a matter of great convenience to the public as well as the department.

While we now have authority to regulate the planting of trees on many streets with a view of obtaining uniformity in reference to variety, yet we cannot designate the particular size that a tree should have or the distance at which it must be planted from its neighbor. Both of the latter items must be taken into consideration where it is the desire to obtain a uniform condition in every respect. Legislation tending to make the planting of trees on the sidewalk compulsory or compelling the planting of trees of a stipulated size would, in all probability be held unconstitutional, and the ultimate solution of the problem will be to place the matter entirely under municipal control.

In transplanting trees it is highly important that proper attention be given to the various details, such as character of soil with reference to fertility and moisture conditions suitable to growth; size and depth of holes; protection of roots from sun and air while being transported from original to new location, and reduction of crown to compensate for loss of roots sustained in digging up. Neglect of any of the foregoing details by the gardener will result in disappointment for the property holders, and numerous weak-looking, half-fed, diseased specimens of trees on the streets to-day are evidence of this neglect. There are, indeed, many persons that plant trees who do not realize the importance of preparatory work or who do not care to incur the expense of providing proper soil. Intelligent and systematic treatment is therefore essential for successful results, which can only be had by placing the matter entirely under the control of this department.

With official approval I shall take this matter up with the newly elected Commission of Free Holders with a view of having incorporated in the new charter provision granting this department full authority over all trees on the public streets, including also the right to plant new ones and care for them.

The spacing of street trees is also a question of great importance. It is usually the desire of tree planters to secure immediate effect and it is a matter of common occurrence to find two and even three trees planted in front of a twenty-five foot lot. This naturally means that in a comparatively few years the crowns will be crowded and the individual beauty of each tree will be spoiled. Pruning will only elevate the situation temporarily. The dense shade will make it difficult to maintain good lawns, and worse still, greater facilities for the spread of insect pest and plant disease are furnished.

A total of 10,102 street trees have been pruned by authority of permits, which, in comparison with the records of the preceding year indicates a decrease of approximately 10%. Severe pruning is not so much in evidence and wherever reports have been made to that effect investigation developed the fact that the work was done by the property owner or at his special request. The ensuing year will see the elimination of that character of pruning especially on streets where uniform selections of trees have been made. By authority of City Ordinance No. 24207 which was approved exactly one month prior to the close of the fiscal year, the department has the power to prune, spray, cultivate or treat trees in any manner necessary, that are located on such streets as above mentioned. A number of disastrous results to trees from throwing salt-water in gutters has come to our notice which resulted in the drafting of an ordinance making it a misdemeanor to deposit salt-water in the gutters, especially in close proximity of trees. This ordinance was also passed and approved on the 12th of March, 1909, and is known as City Ordinance No. 24208.

Aside from regulating the planting and pruning of street trees our efforts have been principally directed towards the control of insect pest and plant diseases. The latter in particular prevails more or less throughout the entire city and is chiefly due to injudicious pruning and failure to properly treat wounds caused from such pruning. Also branches that are broken off by wind storms or from heavy sleet usually leave actured ends with much heartwood exposed, and where the scores of various fungi find lodgement. Many wood-boring insects attack the trees at these wounds from where they pass on down into the trunks. The channels which they make admit moisture and in the dejecta which they leave in these channels the spores of many fungi germinate.

The elimination of this character of disease therefore necessitates the removal of all dead wood and the application of antiseptic solution to the wounds.

Excellent progress has been made in this work and as evidence I can report that 32,611 street trees were relieved of dead wood and the wounds carefully treated with wood preservatives, and 1,549 trees

which were found to be entirely dead were cut down and all of the wood hauled to the nearest public dump where it was burned. This work was done with a force of eight men and two teams at a cost of \$6,722.12 or an approximate average cost of 19 3/5 cents per tree, including cost of hauling.

Spraying operations were carried on whenever there was urgent necessity, and with most satisfactory results particularly with leaf-eating insects.

During the month of June the Poplar worm (*acronyia populi*) was discovered to be causing considerable damage to the poplars in the territory bounded by Grand Avenue, Cass Avenue, Palm Street and Jefferson Avenue. One application of Arsenate of Lead and water in the proportion of six pounds to one hundred gallons was sufficient, and no trouble was experienced the balance of the season. During the latter part of the same month and extending into July spraying was carried on in the west end on the following streets: West Pine, Lindell Boulevard, Maryland, McPherson, Waterman, Boyle, Whittier and part of Kingshighway, where the Bag worm (*Thyridopteryx ephemeraeformis*) was feeding voraciously. The same solution was used for this insect as with the Poplar worm with excellent results. Examination of the remaining cocoons in the sprayed district reveals them to be all empty, and in fact from the preceding year's generation.

The Fall Web Worm (*Hyphantria cunea*) and the White Marked Tussock caterpillar (*orgyia leucostigma*) which caused us much concern the previous year were very rare this year, or at least did not appear in sufficient numbers to warrant spraying.

Some attention was also given to spraying against scale insect namely the Tarrapin, Oyster Shell and San Jose scales. The first named will be found on approximately 75% of the sycamores in the city and especially where this variety of tree is thickly located. Experience in spraying shows this scale to be very much more persistent than other species of scale that prevail in this locality, and requires a stronger solution to kill it.

Spraying was carried on last fall in the district bounded by Cass Avenue, Eleventh Street, St. Louis Avenue and Twentieth Street, in which there are practically nothing but sycamores. Investigation at this time indicates that not over 60% of the scale are dead and it is the intention to give these trees another application as soon as is consistent. The trees here are all in weakened condition due to lack of nourishment and also from the congested condition of this locality with reference to buildings. The houses are all built adjoining each other with no yards and consequently there is very little air circulation. The streets, which are very narrow, are paved with material which excludes moisture, and the sidewalks are paved from lot line to curb leaving no room for cultivation, so that, as a matter of fact there is very little chance for improvement in the condition of the trees. However, as long as they last they will afford much comfort to the residents of that section on the sweltering days of summer, and I therefore deemed it advisable to rid them of insect pests which are rapidly sapping the life away.

Spraying operations were also carried on this spring on the south side in the vicinity of Grand and Lafayette Avenues, where both the San Jose and Oyster Shell scales are causing considerable damage. However, after two days of spraying we were compelled to abandon this work, and in compliance with your request assigned all of the employees of the department to cleaning out the large trees in Fair Grounds Park. One month's time was consumed at the latter place and on completion of the work the season was too far advanced to resume spraying.

The park trees showed evidence of having been neglected for many years and were in urgent need of thorough renovation. More than 200 loads of dead and diseased wood was cut from them and 222 dead trees were cut out and burned on the site. In all, 1,754 trees were treated

in some manner or other at a total cost of \$1,117.37 or an approximate average cost of 63½ cents per tree. The cost of this work was borne by the Park Department.

Street trees sprayed during the year for the elimination of various insect pests numbered 4,979, the cost thereof being \$628.75, or an average cost of 12 3/5 cents per tree including the cost of chemicals.

A few exceptionally cool, damp nights in the early part of last May were responsible for a leaf fungus identified as *Gloeosporium nervisequum*, which defoliated a large number of sycamores causing no little alarm to property holders. Fortunately, however, this spell was of short duration and was followed by hot dry weather which had a tendency to check the disease.

On comparatively few streets, indeed, has there been any concerted action in the planting or especially pruning of trees, and as a result most of the streets, with respect to trees, present a chaotic condition. Immediately after the beginning of the new fiscal year steps will be taken to bring about a more harmonious condition by judicious and intelligent pruning on the streets where uniform varieties of trees have been designated for future planting, and namely where we have authority to operate in accordance with the newly enacted ordinance herein previously mentioned.

In order to carry out the tentative plans it will be necessary to increase the number of employees very materially. With that object in view I have placed the estimates of appropriations for the ensuing year at nearly double the amount which we had to work with last year.

The following are the appropriations, expenditures and balances on hand April 1st, 1909:

OFFICE ACCOUNT.

By Annual Appropriation, Ordinance No. 23599.....	\$ 5,800.00	
By Special Appropriation, Ordinance No. 24185.....	1,000.00	
To Amount Transferred to Street Cleaning, Labor and Carts		
Account	\$ 570.00	
To Expense, Forester, Assistant, Clerk and Inspectors.....	6,230.00	
	<u>\$ 6,800.00</u>	<u>\$ 6,800.00</u>

LABOR ACCOUNT.

By Annual Appropriation, Ordinance No. 23599.....	\$10,000.00	
To Expense, Labor and Incidentals.....	\$ 8,775.00	
To Amount Transferred to Street Cleaning, Labor and Carts		
Account	1,100.00	
To Balance	125.00	
	<u>\$10,000.00</u>	<u>\$10,000.00</u>

Trusting the above report will meet with your approval, I am,

Very Respectfully,

ANDREW MEYER, JR.,

City Forester.

REMARKS.

The Central Traction Co. of St. Louis was incorporated March 11, 1898. Its name was changed to United Railways Co. of St. Louis July 8, 1899.

By Ordinance No. 19352, vetoed by His Honor, the Mayor, April 8, 1898, but passed over his veto by the Municipal Assembly April 12, 1898, the Central Traction Co. of St. Louis was authorized to acquire and convey by lease, purchase or sale its own property and franchises, or the property and franchises of other Street Railway Companies in the City of St. Louis, and to operate the same.

After acquisition of all the other Street Railway Companies excepting the 4th St. and Arsenal Railway Co. and the St. Louis and Suburban Railway Co. System, the property was leased to the St. Louis Transit Co., incorporated March 6, 1899. The lease began October 1, 1899, and was to expire April 1, 1939, but the lease was relinquished and the property reverted back to the United Railways Co. in October 1904, by which it is operated now.

Since January 1st, 1907, the United Railways Co. operates also the St. Louis and Suburban Railway System, which it acquired by purchase in October, 1906.

In the suit of the City against the Fourth St. and Arsenal Railway Co. (quo warranto proceedings) the suit has been decided in favor of the City, but the proceedings have not been closed as an appeal has been taken to the U. S. Supreme Court.

TABLE No. 14.
GENERAL INFORMATION.

AREA OF THE VARIOUS CITY LIMITS—

Territory within the limits of 1839	0.75 square miles or	447.25 acres
" " " " 1841	4.48 " " "	2365.10 "
" " " " 1855	13.94 " " "	8823.25 "
" " " " 1870	17.98 " " "	11504.76 "
" " " " 1876	61.37 " " "	39276.25 "

DISTANCES—

Length of river front	19.15 miles
" " western city limits	21.37 "
" " city from extreme north to south, air line	17.00 "
" " city from extreme east to west line	6.62 "

ELEVATIONS—

The city directrix, upon which all elevations are based, was the top of a square flat stone located on the west side of the wharf, between Market Street and Walnut Street. It was established in 1826 by Rene Paul and by Ordinance No. 1257 in 1843.

The elevation of the same was 0.00 feet, being the high water mark of 1826. The stone was destroyed in 1890, on account of building the elevated railroad. The height of the city directrix above mean tide, Gulf of Mexico, as determined by the Mississippi River Commission, is 412.731 feet.

Zero of Government gauge is 379 feet above mean tide, Gulf of Mexico, a difference of 3.731 feet between gauge and directrix.

STAGE OF THE RIVER—

Highest stage of the river recorded was June 27, 1844—7.58 feet above city directrix.

Stage of the river June 10, 1903, was 4.27 feet above city directrix.

Lowest stage of the river was January 2, 1903—35.77 feet below city directrix.

Difference between lowest and highest stage of river 43.37 feet.

POPULATION OF ST. LOUIS—

In 1810 it was	700 inhabitants
In 1830 it was	5,852 "
In 1850 it was	77,824 "
In 1870 it was	310,864 "
In 1890 it was	451,770 "
In 1900 it was	551,238 "
In 1905 it was	700,000 "

ANNUAL REPORT
OF THE
Commissioner of Public Buildings
FOR THE
Fiscal Year Ending April 10, 1909.

St. Louis, Mo., May 6th, 1909.

HON. FREDERICK H. KREISMANN,
Mayor, City of St. Louis.

Dear Sir:—I have the honor to submit herewith, report of the office of the Commissioner of Public Buildings, as required by the Charter, for the Fiscal Year ending April 10th, 1909.

Respectfully yours,
JAS. A. SMITH,
Commissioner of Public Buildings.

The building operations at the close of the Fiscal Year show an increase over the previous year of \$1,940,767.00, and an increase in the total number of permits issued of 670.

The receipts of the office amounted to 60½ per cent of the expenditures.

The following plans and specifications for buildings were drawn by this department:

Elghth District Police Station.
Public Bath House, located at Levee and Franklin Avenues.
New Court Room, West Wing, of the Four Courts Building.

Estimates were given to the Law Department on the following buildings, for which this department received no compensation:

One hundred and seventeen (117) buildings, located between 13th and 14th Streets on Market Street and Clark Avenue—Estimated cost.....	\$108,811.00
Seventeen (17) buildings, located on the west side of Chouteau Avenue, between Tiffany and Old Manchester Road—Estimated cost.....	15,000.00
Nine (9) buildings, located on Division Street, O'Fallon Street, 22nd Street, 23rd Street—Estimated cost.....	5,000.00
Twenty-two (22) buildings, located on 9th, 10th, Ann Avenue and Shenandoah Avenue—Estimated cost.....	35,000.00
Thirty-two (32) buildings, located on 10th, 11th, Carr and Biddle Streets—Estimated cost.....	95,000.00
Thirteen (13) buildings, located on 8th, 9th, Soulard and Julia Streets—Estimated cost.....	43,000.00
Forty-one (41) buildings, located on Carlsbad, Schoenlau, Gravois and Elenore Street—Estimated cost.....	23,140.00

NUMBER OF PERMITS, FEES COLLECTED FOR SAME AND TOTAL VALUE OF IMPROVEMENTS DURING THE FISCAL YEAR ENDING

Department at the close of the fiscal year 1907-1908.....	15,081.45	
The area paved with granite during the fiscal year 1908-1909.....	258.63	
Total area paved with granite by the Harbor and Wharf		
Department at the close of the fiscal year 1908-1909.....	15,340.08	
The area paved with granite by the steam railroad company at		
the close of the fiscal year 1908-1909.....	1,161.38	
Aggregate paved with granite to date.....		16,501.46

HARBOR BOAT.

The Harbor Boat "Erastus Wells" did good service during the past fiscal year, removing sediment from the wharf and towing and dumping street dump boats.

CLEANING LEVEE AND REMOVING OBSTRUCTIONS.

The process that has been in vogue for some years past in keeping the levee free from river deposit, was continued during the past fiscal year.

SCAVENGER DUMPS CONSTRUCTION AND REPAIRS.

The Department has continued in service the following scavenger dumps: at the foot of Ferry Street, Mullanphy Street, Chouteau Avenue and Barton Street, dump boats are maintained. At the foot of Steins Street a stationary dump is maintained.

Following are the number of loads dumped during the fiscal year at the locations stated:

Ferry Street.....	12,662
Mullanphy Street.....	24,333
Chouteau Avenue.....	40,842
Barton Street.....	37,448
Steins Street.....	2,919
Total.....	118,209

STREET CLEANING FLOATING DUMPS.

During the past year only one street dump was maintained for the Street Department, which was located at the foot of Morgan Street, from which 8,164 loads were dumped. The landing boats which were located at North Market and Gratiot Streets are still at these locations, but are being used by the Garbage Division.

The receiving boats of the Morgan Street and North Market Street dumps were taken out on the docks during the past fiscal year and thoroughly repaired. They are now in number one condition.

REVENUE.

	1907-1908	1908-1909	Loss	Gain
Misc. Bills.....	\$78,465 62	\$75,736 06	\$2,729 56	
Lumber Bills.....	330 95	283 60	47 35	
Wood Bills.....	331 35	490 25		\$168 90
	\$79,117 92	\$76,509 91	\$2,776 91	\$168 90

\$76,509.91 represents the amount of bills issued during the fiscal year, bills to the amount of \$71,260.74 were collected, making a loss of \$5,139.59 compared with the collection of previous year. Bills for enough to cover this amount remain in the hands of the City Collector for collection at the close of the fiscal year.

GENERAL REMARKS.

By referring to Statement No. 10, it will be noticed that the highest stage of the river was on the 19th, 20th, and 21st days of June, 1908, when the gauge, which is located on the wharf immediately south of Market Street, and opposite No. 4 South Wharf, registered 34.80 feet. The lowest stage of the river was on January 12th, 1909, when the gauge registered 1.30 feet below zero. The zero mark is 33.81 feet below the curb at Market Street and Levee.

A WORD OF THANKS.

The Department desires to acknowledge its thanks to Mr. Edw. H. Bowie, Local Forecaster, for his kindness in supplying, both this and the Levee Office with the Official Weather map during the past year.

It is with pleasure that I acknowledge my obligation to the various officers and employees of the Department, who have assisted faithfully to promote the interests of this Department.

The following tabulated statements will be found in an appendix to this report.

No. 1. Statement of packet companies and boats operated by them and packets, steamboats and barges arrived at St. Louis during the fiscal year 1908-1909, and tonnage of same.

No. 2. Statement of steam tug boats and sand companies doing business at St. Louis during the fiscal year 1908-1909.

No. 3. Statement showing condition of Annual Agreements for Repairs of Dykes, Wharf and River Bank, authorized by annual appropriations, during the fiscal year 1908-1909.

No. 4. Statement of the amount of lumber, shingles, laths, pickets and logs brought to St. Louis, by river during the fiscal year 1908-1909.

No. 5. Statement of the amount of fire-wood received on the wharf at St. Louis and the amount of wharfage charged thereon, during the fiscal year 1908-1909.

No. 6. Statement of wharf privileges granted under special ordinances yielding revenue to the City of St. Louis, in force at the end of the fiscal year 1908-1909.

No. 7. Statement of wharf privileges granted under authority of Section 380 of the Revised Code of St. Louis, approved March 19th, 1907, and yielding revenue to the City and in force at the end of the fiscal year 1908-1909, subject to cancellation at the option of the Harbor and Wharf Commissioner.

No. 6. Statement of wharf privileges granted under special ordinances yielding no revenue to the City of St. Louis through the Harbor and Wharf Department, and in force at the end of the fiscal year 1908-1909.

No. 9. General information relating to the water front and wharf.

No. 10. Statement presenting the daily gauge readings of the Mississippi River at St. Louis during the fiscal year 1908-1909.

JOS. P. WHYTE,
Harbor & Wharf Commissioner.

ANNUAL REPORT
OF THE
SEWER COMMISSIONER
FOR THE
Fiscal Year Ending April 12th, 1909.

Office of the Sewer Commissioner.
St. Louis, Mo., September 7th, 1909.

Honorable Board of Public Improvements.

Gentlemen: I have the honor to submit the following report of operations for the fiscal year ending April 12th, 1909.

The following exhibits accompany the report:

No. 1. Total expenditures for the construction of sewers and for current and miscellaneous expenses during the fiscal year.

No. 2. Public sewer work completed during the fiscal year.

No. 3. District sewer work completed during the fiscal year.

No. 4. Joint district sewer work completed during the fiscal year.

No. 5. Public and district sewer work in progress and under contract at the end of the fiscal year.

No. 6. Public sewer work authorized by ordinance but not under contract at the end of the fiscal year.

No. 7. Lengths and diameters of public, joint district and district sewers constructed from 1849 to the close of fiscal year April 12th, 1909.

At the close of the previous fiscal year, the following work was in progress, viz:

PUBLIC SEWERS.

Harlem Creek Sewer:—In Bircher Street, from the west line of Bulwer Avenue to a point about 600 feet west of the west line of Broadway (completed June 27th, 1908).

Harlem Creek Sewer:—In Bircher Street, from the west line of Bulwer Avenue to the west line of West Third Street (by railroad companies interested; not completed April 12th, 1909).

Harlem Creek Sewer:—In Bircher Street, from a point about 600 feet west of the west line of Broadway west to Florissant Avenue, thence northwardly to Bircher Street running west from Florissant Avenue (not completed April 12th, 1909).

Rocky Branch Sewer:—Reconstruction and enlargement, from the Mississippi River westwardly to Elliot Avenue (contract closed June 27th, 1908).

Glaise Creek Sewer:—In certain streets and rights of way for sewer from the River Des Peres northwardly to Robert Avenue (completed December 14th, 1908).

JOINT DISTRICT SEWER.

In Manchester Avenue Joint Sewer District (completed April 22nd, 1908).

DISTRICT SEWERS.

In Nebraska Avenue Sewer District Number Five (completed May 1st, 1908).

The following sewer work was begun and completed during the past fiscal year, viz:

"EMERGENCY WORK"—OUTLET SEWERS TO SEWER DISTRICTS.

In Stein Street Sewer District Number Thirteen.
In Rock Spring Sewer District Number Sixteen.
In Harlem Creek Sewer District Number Three.
In Fillmore Street Sewer District Number Six, and
In South Mill Creek Sewer District Number Forty-eight.

"EMERGENCY WORK"—INLETS AND MANHOLES WITH LATERALS.

At various places in the city, 229 inlets and catch basins, and 28 manholes, with laterals.

"EMERGENCY WORK"—DIAMOND CORE DRILLING.

Along the alignment of proposed River Des Peres storm and foul water sewers.

DISTRICT SEWERS.

In Wyoming Street Sewer District Number Twenty-one.
In Stein Street Sewer District Number Thirteen.
In Branch Street Sewer District Number Thirty-seven.
In Rock Spring Sewer District Number Sixteen.
In Ellendale Sewer District Number One.
In Harlem Creek Sewer District Number Three.
In Fillmore Street Sewer District Number Six.
In Osage Street Sewer District Number Three.
In South Mill Creek Sewer District Number Forty-eight, and
In Gimblin Road Sewer District Number Three, and during the past fiscal year certain sewers, built as private sewers, were adopted as district sewers, viz:
In Rocky Branch Sewer District Number Fifteen.
In Wyoming Street Sewer District Number Twenty-two.
In Gravois Avenue Sewer District Number Three, and
In Bowen Street Sewer District Number Two.
At the close of the fiscal year April 12th, 1909, the following work was in progress, viz:

PUBLIC SEWERS.

Harlem Creek Sewer:—(Second Section), in Bircher Street from a point about 600 feet west of Broadway westwardly to Florissant Avenue, thence northwardly to Bircher Street running west from Florissant Avenue.

Harlem Creek Sewer:—(Third Section), in Bircher Street and in right of way for sewer from the west wall of the St. Louis Water Works aqueduct in Hall Street westwardly to a point in the west line of West Third Street.

Harlem Creek Sewer:—(Railroad Companies' Section), in Bircher Street between the west line of West Third Street and the west line of Bulwer Avenue.

Glaise Creek Sewer:—(Second Section), in Carondelet, from Robert Avenue northwardly through certain rights of way for sewer and through Carondelet Park to a point in Kansas Street west of Grand Avenue.

"Emergency Work":—Inlets and manholes with laterals, at various places in the city. 43 inlets and catch basins, and 3 manholes, with laterals.

DISTRICT SEWERS.

In Cora Avenue Sewer District Number Two, and
In Harlem Creek Sewer District Number One.

The expenditures during the fiscal year on account of sewer construction work were:

For public sewers	\$228,356.24
For joint district sewers	85,814.76
For district sewers	33,924.49
Total amount	\$348,095.49

At the close of the fiscal year April 12th, 1909, the following work was authorized by ordinance but not under contract, viz:

River Des Peres Foul Water Sewer:—From the Mississippi River westwardly in Catalan Street and in certain rights of way for sewer to Alabama Avenue.

CLEANING FORCE.

The average force employed throughout the year was as follows, viz: 1 superintendent of sewer cleaning and repairs, 4 assistant superintendents of sewer cleaning, 1 clerk, 20 sewer cleaners, 72 laborers, 16 horses and carts, and 6 teams with wagons.

During the year 27,999 inlets were cleaned, from which were removed 20,093 cart loads and 6,480 wagon loads of street washings, 18,219 inlets and basins were washed, 338 brick and pipe sewers were washed, 205 depressions in streets and alleys were filled, 41 manhole covers were changed, 2,196 complaints were looked after, 216 private sewers were found to be blocked and the owners were notified, 185 depressions reported were found to be over private sewers and connections made by plumbers and drainlayers, and the Street Department was so notified.

All the ditches over the completed public, joint district and district sewer work were flushed, taking time of cleaners, 180½ days, laborers, 115 days, and carts, 137 days.

The number of days labor with the engineers on field work was 3,013½, and the time of horse and wagon hauling men was 489 days.

Rock sounding or boring (as data for engineers' estimates) took time of cleaners, 1,251 days, laborers, 2,381½ days, and carts, 41½ days.

Making special examinations of sewers, inlets and manholes, reported as needing immediate attention took time of cleaners, 57 days, laborers, 314½ days, and carts, 68 days.

At the manholes or snow-dumps, on the days in January and February, 1909, when the Street Department teams were dumping snow into the sewers, it took 103 days of labor opening and closing manholes, maintaining flow in sewers, etc., and 14½ days of horse and cart hauling men and tools.

On making forms for the reinforced pipe tested for sewer work, it took 25 days' time of the carpenter employed.

The time of laborers employed in doing miscellaneous work not included in the above, was as follows, viz:

Watchmen at branch offices at No. 2322 Clark avenue, No. 1453 Academy avenue, and No. 2510 South Jefferson avenue.....	2,190 days
Lamping and guarding depressions caused by cave-in of sewers.....	81 days
Time of one man in charge of the tools, hose, etc., at No. 2322 Clark avenue	313 days
Time of one man in charge of checking up police reports, complaints, etc.....	230 days
In polling 1,153 blocked sewer inlets, laborers were employed.....	67 days

The following amounts were expended on account of cleaning force:

Labor	\$65,705.52
Teams and carts	20,419.44
Tools, hose, etc.....	3,332.98
Total amount	\$89,457.94

CLEANING CHANNEL OF THE RIVER DES PERES.

Ordinance No. 24110, approved December 18th, 1908, authorized and directed the Sewer Commissioner to have the channel of the River Des Peres, within the city limits, cleaned, and appropriated the sum of \$10,000.00 for the work.

During January, February, and March, 1909, that part of the channel beginning at Knox and Manchester avenues and extending southwestwardly to a point in the channel about 7,000 feet southeast of the Frisco Railroad crossing at Lindenwood, was thoroughly cleaned. Large quantities of brush, logs, loose rock and other material that obstructed the channel and retarded the flow of the stream, were removed from the channel. The total length of channel cleaned was 21,400 lineal feet.

The following amounts were expended on account of sewer cleaning force:

Labor	3,130½	days @	\$2.00 =	\$6,261.00
Labor	30	days @	2.50 =	75.00
Teams	210	days @	4.25 =	892.50
For rubber boots used				299.70
Total amount				\$7,528.20

The balance of appropriation that reverted back to municipal revenue was \$2,471.80.

The channel from which debris was removed could, at a slight expense, be kept in a fairly sanitary condition. In order that the work of cleaning the channel of the River Des Peres might be continued in 1909, a small appropriation for this purpose was asked.

REPAIRS AND MAINTENANCE OF SEWERS.

The "emergency work" required for the maintenance of sewers, sewer inlets, manholes and appurtenances, and the work of making necessary repairs requiring prompt attention of sewers, sewer inlets, manholes and appurtenances during the year July 1st, 1907, to July 1st, 1908, was done under contract No. 8005.

The summary of work done during April, May and June, 1908—the first three months of the past fiscal year—and the cost of the repairs during said three months under the terms and at the prices under the said contract No. 8005, will be found below.

On June 16th, 1908, bids were received under letting No. 9068, for the same kind of work to be done during the year July 1st, 1908, to July 1st, 1909. All bids received under said letting were, on June 19th, 1908, rejected by the Board of Public Improvements. (In the lowest proposal received under said letting, the unit prices bid on the various classifications of work to be done or material to be furnished, were quite at variance with the department's estimates, and it was deemed best for the city's interests to reject the bids).

Under the authority of the charter and general ordinances of the city, the Sewer Commissioner had the work done by laborers et al., approved by the President of the Board of Public Improvements, and with material purchased through the Commissioner of Supplies.

The summary of sewer repairs, etc., done from July 1st, 1908, to April 1st, 1909, and the cost of same during said nine months at the prices paid for laborers et al. employed and material purchased in the manner above stated, will be found below:

Character of Work	Total for Three Months	Total for Nine Months
	Contract No. 8,005	By Sewer Department Force
New cast iron manhole caps	18	58
New cast iron solid manhole covers	7	25
New cast iron grated manhole covers	11	34
New cast iron inlet plates	9	26
New cast iron inlet covers	4	17
New cast iron adjustable inlets		15
New wrought iron manhole bands	18	58
New wrought iron manhole steps	58	60
New wrought iron inlet bars	123	168
New stone inlet tops	136	126
New stone inlet sills	66	73
New stone inlet corbels	327	500
New inlets built		11
New catch basins built		13
New manholes built		9
New 6-inch pipe, lineal feet		2
New 8-inch pipe, lineal feet		70
New 12-inch pipe, lineal feet	133	1,027
New 15-inch pipe, lineal feet	20	140
New 18-inch pipe, lineal feet	22	23
Old manhole caps reset	297	427
Old inlet stones reset	247	637
Old adjustable inlets reset		2
Old inlets reconstructed	37	80
Old catch basins reconstructed	2	13
Old inlets repaired	18	24
Old catch basins repaired		2
Old manholes repaired	3	4
Old snow-dumps repaired		2
Old sewers and laterals repaired	19	37
Old 12-inch pipe relaid		137
Cost of above work	\$7,683.88	\$15,700.91
Add percentage that had been retained on the nine preceding estimates under contract No. 8,005, paid July 31st, 1909	1,387.89	

Total amount 9,071.77

Total amount paid out on account of repairs.....\$24,772.68

The following force was engaged in doing the sewer repair work during the last nine months of the past fiscal year, viz:

Sewer cleaners	40 days	
Laborers	2,538 days	
Bricklayers	386 days	
Bricklayer's helper	235 days	
Sewer repair man	235 days	
Costing		\$ 8,827.00
Teams and drivers	484 days	
Horse and drivers	285 days	
Costing		2,840.75
The amount of bills rendered for material purchased on requisitions and tool account was		4,033.16

Total amount paid out.....\$15,700.91

The sewer repairs, etc., done by the Sewer Department force during the last nine months of the past fiscal year, if done under a contract and at the unit prices of the lowest proposal under letting No. 9068 (which proposal was rejected as hereinbefore stated), would have cost the sum of \$19,216.95, or about \$3,500.00 more than the amount expended by the city for said work.

SURVEYS UNDER ORDINANCE NO. 14846.

The sum of \$10,000.00 was appropriated for the expenses of making surveys of proposed public and joint district sewers during the past fiscal year. The amount expended for same was as follows, viz:

For engineers and field force	\$7,005.04
For instruments	609.50
For sundries—meals for men, etc., while working in county ..	246.25
Total amount	\$7,860.79

Surveys have been made in the following water sheds, viz: Baden Creek, Harlem Creeks, and River Des Peres.

RIVER DES PERES.

Before going into the question of the River Des Peres sewer survey proper, a thorough study of all the conditions relative to the work was made from the preliminary surveys that had previously been run and the things necessary or that seemed necessary of accomplishment in the proposed survey were canvassed. Chief among these things were the following, viz:

(1) The shortest feasible route between the Mississippi River and Manchester and Mitchell avenues consistent with the ground and economic construction of the proposed sewers in order that as great a rate of slope could be established as possible, thereby increasing the velocity and consequently decreasing the size and cost of sewers, but more especially to secure a cleaning velocity in the foul water sewer. The natural fall in the present river, the length of which, following the meanderings of the stream, was calculated to be 12.17 miles between above mentioned points, was only 39 feet difference in elevation.

(2) A survey of the drainage areas collectively and individually should be made and all the separate streams and dry draws located and their rates of slope measured, so that the runoff could be figured to ascertain the amount of water each separate area contributed to the river and to provide adequate openings in the sewers for the reception of this water.

(3) An accurate establishment of all streets and property lines through which the sewer would travel, as most of this property had not been surveyed for years.

(4) A re-surveying of the city boundary line, in order to locate the monuments on this line as they are at the present time. Most of these monuments project from 12 to 18 inches above the surface, and the appearance of the stone indicated that some movement had taken place by the action of frost and other causes.

(5) A survey of the present location of the River Des Peres, tied up to the city boundary line, similar to survey made by Mr. Thomas Featherson in 1878-1879. This was deemed necessary because it was learned that a large part of the deeds to the property abutting this river described that stream as a boundary; in building the sewers, the old location of the river would in time be obliterated, and in the event of litigation, Mr. Featherson's maps and the record of this survey could be used in determining the location of the stream or the changes made in its course during the intervening 30 years.

A party was organized and put in the field for the purpose of re-establishing the city boundary line and locating the center line of the proposed sewers. For this purpose, a theodolite, reading to 5 seconds, was used, and the boundary line run from stone to stone, beginning at stone No. 1 and finishing at stone No. 64.

Between stones No. 64 and No. 94, a random line was run to form a closure with the sewer line at its northern terminus, and only enough of the boundary line was established to effect a tie. This boundary line was used as a base line for the sewer line and a closure was made at convenient intervals to insure accuracy. Beyond stone No. 64, we were not able to use the boundary line as a base because of the great distance between the two lines.

The zero of the storm water sewer was located at the confluence of the Mississippi River and the River Des Peres, and was set at the edge of water-elevation minus 24.2 feet, which represents a stage 11.2 feet on the U. S. Government gauge at the foot of Market Street, there being about 2 feet fall in the Mississippi River between these two points.

The course of this sewer line, which was designated the "main line" to distinguish it from other lines, followed the general course of the River Des Peres to a point near Manchester and Mitchell Avenues, or at Station No. 411 plus 37, a distance of 7.79 miles. This effected a saving in distance of 4.38 miles, as the length of the present stream, scaled along its meanders, was 12.17 miles.

From Station No. 411 plus 37, the bearing of the line leaves the course of the river, following the direction of the creek that parallels Dale Avenue, thence northwardly, crossing Clayton road on the right of way of the old World's fair railroad, skirting the foot of Art Hill, through "Mining Gulch" and diagonally across the low ground, through the bridge of the Rock Island Railroad, where it connects again with the River Des Peres, thence northwardly in what is known as "Des Peres Avenue" to Delmar Boulevard, thence to a connection with the city limits' line just north of Clemens Avenue.

The maximum of 10° curves was run, so that no compensation for flow would be necessary, and also to avoid extra work of forms in building sewer.

All streets, roads and property lines that could be established were surveyed and the same tied in to the main line. At convenient intervals, a closure with the city boundary line was made, so as to avoid accumulative errors as much as possible.

Three foul water sewer lines were also run, the first located at the water's edge in the prolongation of Lorentz Street, thence westwardly in Lorentz Street to a connection with the main line near Minnesota Avenue. The second line was located at the low water's edge on a 10° curve to the south of Catalan Street, thence westwardly in Catalan Street to a connection with the main line just west of Virginia Avenue. The third line was located at the water's edge in the prolongation of Davis Street, thence westwardly in Davis Street to a connection with the main line just east of the mouth of Gravois Creek.

The Lorentz Street and Davis Street lines were abandoned after it was found that it was impracticable to build the sewer on either street on account of the sub-surface material.

The Catalan Street line, although poor in itself, was accepted as the best route. This determination, however, was not made until examination with diamond drills and punching rods was made in every east and west street as far north as Steins Street.

A line, known as the "Tower Grove extension," was also surveyed, starting with zero equal Station No. 411 plus 37 on main line, running eastwardly, following the course taken by the River Des Peres, to the south line of Forest Park, crossing the right of way of the St. Louis & San Francisco Railway first near Knox Avenue, thence eastwardly on the south side and approximately parallel to the said road, crossing the tracks a second time at the railroad bridge near the outfall of the Tower Grove sewer, which is connected to this line.

Another line, known as the "Euclid and Union Avenue extension," was run from the outfall of the Euclid Avenue sewer in Forest Park westwardly, following the course taken by the River Des Peres, to a connection with the main line at the coal testing plant in "Mining Gulch" in Forest Park. This line also connects with the outfall of the Union Avenue sewer in Forest Park.

A tie line was run, connecting Kingshighway Boulevard, Lindell Avenue, and the south line of Forest Park, with the Tower Grove extension and the Euclid and Union Avenue extension, the whole forming a closure with the main line.

A party was organized and placed in the field for the purpose of taking the topography and cross-sections along the lines of proposed sewer, also the location and cross-sections of the River Des Peres.

The cross-sections of the stream proper were made in order to establish its channel, and the location and cross-sections made by ordinates at right angles to the main line where the line ran adjacent to

the stream; but where the stream detoured a considerable distance from the main line, a traverse line was run and the elevation and distances checked by stadia measurements. These traverse lines started from and were tied in again to the main line as a base.

All cross-sections were made 200 feet on each side of the main line at every station, and at plus stations where changes in the surface made it necessary between the Mississippi River and the Frisco Railroad tracks in Maplewood; 100 feet each side of the main line from Maplewood to Manchester Avenue near Mitchell Avenue; and 50 feet each side of the main line from there to the city limits.

The location of all small streams and the extent of all small interior drainage areas were measured; all bridges, buildings, and other minor obstructions were located.

A party was organized and placed in the field for the purpose of running the drainage areas of the River Des Peres in St. Louis County, which was done by stadia measurements.

There are three principal drainages, comprising about 84.65 square miles in the county, and their locations are as follows, viz:

Gravois Creek:—Emptying into the River Des Peres near Tennessee Avenue and its water shed spreads out, following closely the Weber and Telegraph roads to a point near the Jefferson Barracks, thence westwardly following the Sappington Barracks road, crossing Gravois road just west of Sappington, thence through Windsor Springs to Kirkwood, thence eastwardly across country through Afton and back to the city boundary line about opposite Grand Avenue.

West Fork:—Entering the city near the city boundary line at Maplewood, and its drainage shed is very broad, following the water shed of Gravois Creek and diverging at Kirkwood, thence northwestwardly across country to Des Peres at Manchester and Dallas roads, thence northwardly, closely paralleling the Dallas road to Olive Street road, thence eastwardly along Olive Street road and an unnamed road on the south, through Clayton, to the city boundary near the Clayton road.

North Fork:—Entering the city near Maple Avenue, and its drainage shed joins the northern boundary of the area just described at Stratman on the Olive Street road, thence northwardly and eastwardly through Lackland along the Lackland and St. Charles rock road to Normandy Heights, thence to the city boundary near Maple Avenue.

All the streams were located and their elevations measured to determine their length and rate of slope, as this was needed in calculating the runoff and the amount of water delivered to the River Des Peres in the city from the county.

In addition to the surveys for the River Des Peres' sewers proper, it was necessary to survey the following tributary streams in order to lay out a comprehensive scheme for the future sewerage of their respective districts and providing adequate openings in the main sewer. The creeks and areas are known and referred to as Glaise Creek, Rock Creek, Dale Avenue, Macklind Avenue, and Clifton Heights.

The areas covered by these creeks lie within the corporate limits of the city, and as a considerable portion of the territory in each area is thickly inhabited, it is only a question of a little while before sewers will have to be constructed; in fact, these districts are in a very unsanitary condition at the present time.

These surveys are being platted on mounted paper, on a scale of 100 feet to the inch, and the platting is done by co-ordinate lines 1,000 feet apart. The courses are figured by latitudes and departures and checked by closure before being platted.

A record of these calculations is being compiled for future use. A copy of this map will be made as soon as the original has been completed, for the use of the Commissioners in condemning the rights of way.

GLAISE CREEK.

One of the drainage sheds within the River Des Peres' water shed is Glaise Creek, which contains 1,857 acres.

It was deemed advisable by the Board of Public Improvements, in order to lessen the special tax bills for the joint district sewer, that a public sewer be built from the present River Des Peres through Carondelet Park to Kansas Street. This sewer is being constructed at the present time as described under "public sewer work."

Rights of way have been secured for the joint district sewer from George J. Gould, Missouri-Pacific Railway Company, St. Joseph's Orphan Asylum, and Busch Railway Association to a point near Taft Avenue, in all a distance of 7,500 feet; and survey has been made and plans are in course of preparation.

At Taft Avenue, there are two branches of Glaise Creek; it was deemed advisable to extend the joint district sewer in two directions, but have been unable to secure rights of way to the present time for either branch; in all probability, if they are not secured in the near future, there will have to be a second contract let for the joint district sewer.

DALE AVENUE.

The Dale Avenue water shed is bounded by Clayton Avenue on the north, Manchester and Plateau Avenues on the south, Kraft Street and the city limits on the west, and Childress Avenue and Childress Avenue produced on the east.

Survey was commenced in May, 1908, in this water shed, in order that a joint sewer district might be laid out. It was found that the old surveys did not agree, some of the surveys overlapping each other as much as ten feet; on this account, it was impossible for this department to lay out the joint sewer district, as the lines had not been officially located. The President of the Board of Public Improvements was requested to make a special survey and locate certain points whereby we might lay the sewers and have the points agree with the special tax surveys when assessments are made.

BADEN CREEK.

Before it was possible to design the main stem, or public sewer, for the Baden Creek water shed, it was necessary to make a survey of the entire water shed, so as to ascertain the number of acres to be drained and the flow to be taken care of.

It was found, on making this survey, there are 2,300 acres in the drainage shed of Baden Creek in the county reaching the main stem of Baden Creek at or near Oberbeck Street, about 300 feet west of Broadway.

There being two forks to the creek, it was found necessary that the south fork be taken care of first on account of it being more densely populated than the north fork.

It was found in surveying the area between the ridge on the south line and the north fork, and the ridge between North Harlem Creek and the south fork of Baden Creek, that the taxable area is as follows: Calvary Cemetery equals 559,516 squares, Property Owners equals 404,394 squares. Total equals 963,910 squares, or 2,212.833 acres.

The amount of drainage area in the country which will drain into the south fork of Baden Creek is 928.36 acres.

HARLEM CREEK.

The water shed of Harlem Creek is very similar to that of Baden Creek, there being two stems making a junction with the main stem at Newstead Avenue and Bircher Street.

During the winter of 1904-1905, a survey was made of the drainage shed in the county, both of the north and south forks of Harlem Creek, and found that there are 828 acres in the south fork, and 42 acres in the north fork.

In the early part of the past fiscal year, a survey was made for the alignment of what is known as "South Harlem Joint Sewer District," which extends from Newstead Avenue to Bircher Street through the following streets and rights of way which have been secured from the various property holders, viz:

Newstead avenue,
Dryden avenue,
Proposed Kossuth avenue,
Spalding avenue,
Alsace avenue,
Euclid avenue,
Lorraine avenue,
Kings Highway,
Right of way from Kings Highway westwardly to Union boulevard,
Union boulevard,
Westwardly in proposed Ashland avenue to Belt avenue,
Proposed Ashland avenue to Clara avenue, and
Proposed Lexington avenue westwardly to the city limits.

A survey was made of the north fork of Harlem Creek, commencing at Newstead Avenue and Bircher Street and extending up Bircher Street to Rosalie Street, thence along the rights of way secured from St. Louis Terminal Railway Association, Combination Land Improvement Company, Mississippi Valley Trust Company, and various property holders along the line, to Union Boulevard, thence northwardly in Union Boulevard to Bircher Street, thence westwardly in Bircher Street to Beacon Avenue, thence westwardly in rights of way, north of Bircher Street, to Wren Avenue, and thence in the alley in city block No. 5385 to Partridge Avenue, at which point the joint district sewer ends; from the end of the joint district sewer to city limits will be made into a sewer district, as this would practically make the lateral for the district west of the joint district sewer the same as the laterals for the other districts that will empty into the North Harlem Joint District Sewer.

In this connection, I would respectfully recommend that one of the departments be authorized to make surveys for all departments, and furnish any department that might require same a correct location of all streets, so that it will not be necessary for each department to re-locate streets which might not agree with the surveys of other departments, thereby giving cause for litigation.

There should be base lines run through the city north and south, and east and west, corner stones laid on same, and all pieces of property tied to these base lines; in this way, law suits will be avoided in the future.

This is of vital importance to the Sewer Department, inasmuch as the larger part of its work is paid for by special tax. In case sewers are laid on private property or on property that has not been dedicated, which we are not always able to determine from the old surveys, it would involve the tax bills, thereby creating a hardship on the contractor; in all probability, the contractor would be unable to get from the city the amount of money that he spent on the work.

Inasmuch as there are about 20,000 acres of ground in the City of St. Louis that have no sewer districts and that are building up very rapidly, this survey work will necessarily have to be done at once.

On account of the rapid growth of the city, it is deemed advisable, from a sanitary as well as an economical standpoint, that the whole city be laid out and tentative plans made for taking care of the drainage.

One of our greatest troubles and cause of delay in building district sewers is on account of lots and plots of ground not being subdivided; if they are subdivided, the streets being private and not being able to secure rights of way for sewers. This could be avoided if tentative plans were made and suits instituted to open these streets and alleys, so that as soon as the property did build up, the Board of Public Improvements could install sewers.

This will not only secure better health but at the same time will save the people money, as a great many of the sewers cost more than they should on account of not being able to get rights of way and having them run contrary to the direction the sewers should run.

PUBLIC SEWER WORK.

HARLEM CREEK SEWER.

First Section:—In Bircher Street, from the west line of Bulwer Avenue westwardly to a point about 600 feet west of the west line of Broadway, under authority of ordinance No. 22345.

This work was let to Hoffmann-Hogan Construction Company under contract No. 7604, dated June 7th, 1906, and completed by said Company on June 27th, 1908.

The amount appropriated for this work was \$225,000.00; the total cost was \$189,330.44, of which amount \$39,254.85 was expended during the past fiscal year.

The total work done, as shown per final estimate, was, concrete sewer, re-inforced with steel bars; 1,294 lineal feet of 27 feet by 18 feet 1½ inches, 577 lineal feet of 25 feet by 16 feet 10½ inches.

Vitrified clay pipe laterals and connections: 296 lineal feet of 18-inch pipe, 532 lineal feet of 15-inch pipe, 4 manholes.

The balance of appropriation that reverted back to municipal revenue was \$35,669.56.

Second Section:—In Bircher Street, from a point about 600 feet west of the west line of Broadway westwardly to Florissant Avenue, thence northwardly to Bircher Street running west from Florissant Avenue, under authority of ordinance No. 22897.

This work was let to The Prendergast Contracting Co., under contract No. 8006, dated June 21st, 1907.

The sewer is of concrete, re-inforced with steel bars, and in size is 20½ feet in mean diameter. Of the estimated length (2,100 feet), only 875 feet, with one manhole, have been completed, costing \$76,810.53. The amount expended during the past fiscal year was \$55,331.63; previous expenditure was \$9,957.32, and percentage retained is \$11,521.58. The total appropriation for this section is \$200,000.00.

The work has progressed slowly, and, on account of the bad character of the ground, an agreement was entered into March 30th, 1909, for the "emergency work" of driving steel sheet piling to hold the banks and facilitate progress of work.

Third Section:—In Bircher Street and in right of way for sewer from the west wall of the St. Louis Water Works' aqueduct in Hall Street westwardly to a point in the west line of West Third Street, under authority of ordinance No. 23577.

This work was let to Hoffmann-Hogan Construction Company, under contract No. 8411, dated June 3rd, 1908.

The estimated length is 1,015 feet, of which 165 feet was to be closed sewer, and 850 feet open sewer.

The closed sewer, of concrete re-inforced with steel bars, in size 29 feet by 18 feet 7½ inches, has been completed; and about 400 feet of the open sewer was finished.

The amount expended during the past fiscal year was \$20,879.46, and the percentage retained is \$3,684.61. The amount appropriated for this section is \$50,000.00.

On account of the high water in the Mississippi River the past summer and the same backing up and flooding the site of the work, an agreement was entered into November 25th, 1908, for the "emergency work" of driving sheet piling, so that excavation and construction work in the channel of Harlem Creek could be done.

Railroad Companies' Section:—In Bircher Street between the west line of West Third Street and the west line of Bulwer Avenue, under the provisions and authority of ordinances Nos. 21512, 22345 and 23585.

This work was let to Hoffmann-Hogan Construction Company by the Chicago, Rock Island & Pacific Railway Company and the St. Louis, Kansas City & Colorado Railroad Company, and the work is being done at the expense of said railroad companies under a contract.

The sewer is of concrete, re-inforced with steel bars, and in size is 29 feet by 18 feet 7½ inches. Of the estimated length (687 feet), only 212 feet have been completed—163 feet the previous fiscal year at a cost of about \$108.00 per lineal foot, and 49 feet the past fiscal year at a cost of about \$82.00 per lineal foot. The total estimated cost of this section of the sewer, to the railway companies interested, is \$72,000.00.

GLAISE CREEK SEWER.

First Section:—In Carondelet, from the River Des Peres northwardly in certain streets and rights of way for sewer to Robert Avenue, under authority of ordinance No. 23031.

This work was let to the Myers Construction Co., under contract No. 8004, dated June 4th, 1907, and completed by said Company December 14th, 1908.

The amount appropriated for this work was \$100,000.00; the total cost was \$98,587.84, of which amount \$42,603.03 was expended during the past fiscal year.

The total work done as shown per final estimate, was 2.256½ lineal feet of 12¼ feet in mean diameter concrete and brick sewer, with 6 manholes.

The percentage retained (\$4,929.39) will be due and payable December 14th, 1909, and the balance of appropriation that reverted back to municipal revenue was \$1,412.16.

Second Section and Branches:—In Carondelet, from Robert Avenue northwardly through certain rights of way for sewer and through Carondelet Park to a point in Kansas Street west of Grand Avenue, under authority of ordinance No. 23431.

This work was let to The George G. Prendergast Construction Company, under contract No. 8347, dated April 14th, 1908.

The sewer is of concrete and brick, 12¼ feet in mean diameter, with pipe laterals and connections. Of the estimated length of main sewer (3,320 feet), only 450 feet have been completed, together with most of the pipe laterals.

The amount expended during the past fiscal year was \$17,802.40, and the percentage retained is \$3,141.60. The total appropriation for this section is \$140,000.00.

The work has progressed slowly, and, on account of quicksand encountered, an agreement was entered into January 12th, 1909, for the "emergency work" of driving pine or steel sheet piling necessary to hold banks and facilitate construction of sewer.

OUTLET SEWERS.

Outlet sewers to district sewers were constructed as follows:

To Stein Street Sewer District Number Thirteen:—By Fruin & Colnon, under contract No. 8346, dated April 15th, 1908. The work was completed May 4th, 1908, at a cost of \$24.88.

To Rock Spring Sewer District Number Sixteen:—By Robert Wycoff, under contract No. 8382, dated May 12th, 1908. The work was completed June 22nd, 1908, at a cost of \$126.82.

To Harlem Creek Sewer District Number Three:—By McIntyre-Teese Construction Co., under contract No. 8460, dated July 28th, 1908. The work was completed September 5th, 1908, at a cost of \$1,270.06.

To Fillmore Street Sewer District Number Six and South Mill Creek Sewer District Number Forty-eight:—By McIntyre-Teese Construction Co., under Contract No. 8602, dated November 30th, 1908. The work was completed January 2nd, 1909, at a cost of \$211.95 (5 per cent of which —\$10.60—is payable July 2nd, 1909).

The above were let as "emergency work", and for said outlet sewers (816 feet in length, with 2 manholes), the city, during the past year, expended \$1,623.11. (See Exhibit No. 2).

SEWER INLETS, CATCH BASINS, MANHOLES AND LATERALS.

During the past year, 229 inlets and catch basins, 28 manholes, and 11,899 feet of pipe lateral to same were constructed as "emergency work" by The Prendergast Contracting Co., under contracts Nos. 8005, 8428, 8461, and 8573. Wm. F. Riley Construction Co., under contract No. 8492, and Heirsch & Micotto, under contract No. 8644.

Total Cost of this work was \$19,940.84. (See Exhibit No. 2).

DIAMOND CORE DRILLING.

Diamond core drilling done during the past year was as follows:

Along the line of proposed River Des Peres sewer, from Manchester and Mitchell avenues to the Rock Island Railroad bridge at Des Peres Avenue about 200 feet north of Lindell Avenue, 77 holes (a total depth of 7,001 feet) were drilled. The work was let to Jacob G. Leonhardt, under contract No. 8421, dated June 15th, 1908. The work was completed November 5th, 1908, at a cost of \$8,751.69.

Along the line of proposed River Des Peres foul water sewer, in Catalan Street and certain rights of way for sewer from the Mississippi River westwardly to Idaho Avenue, 34 holes (a total depth of 2,237 feet) were drilled. The work was let to H. R. Ameling Prospecting Company, under contract No. 8586, dated November 17th, 1908. The work was completed December 16th, 1908, at a cost of \$2,796.11.

Both of the above contracts were let as "emergency work," and the total cost of work done under same was \$11,548.40.

This core drilling was necessary that the department might have correct data upon which estimates are to be based, of the extent and character of the materials to be encountered in excavation work for the said sewers.

The total amount of the "emergency work" paid for during the past year was \$33,112.35.

JOINT DISTRICT SEWER WORK.

MANCHESTER AVENUE JOINT DISTRICT SEWER.

This work was let to The George G. Prendergast Construction Company, under contract No. 7695, dated September 1st, 1906, and authority of ordinances Nos. 22529 and 22530. This work was completed April 22nd, 1908—at the beginning of the fiscal year.

It drains 331.50 acres and cost \$85,814.76, of which the city paid \$4,389.76, and the balance was assessed against the other property owners in the said joint sewer district. (See Exhibit No. 4).

DISTRICT SEWER WORK.

NEBRASKA AVENUE SEWER DISTRICT NUMBER FIVE.

This work was let to The George G. Prendergast Construction Company, under contract No. 8314, dated March 6th, 1908, and authority of ordinances Nos. 23366 and 23367. The work was 5 per cent complete at the beginning of the fiscal year and was completed May 1st, 1908, at a total cost of \$3,444.05. It drains an area of 10.04 acres.

WYOMING STREET SEWER DISTRICT NUMBER TWENTY-ONE.

This work was let to Robert Wycoff, under contract No. 8345, dated April 15th, 1908, and authority of ordinances No. 23429 and 23430. It drains an area of 4.33 acres. Contractor was given notice to begin work on April 23rd, 1908, and work was completed May 4th, 1908, at a total cost of \$939.96.

STEIN STREET SEWER DISTRICT NUMBER THIRTEEN.

This work was let to Fruin & Colnon, under contract No. 8346, dated April 15th, 1908, and authority of ordinances Nos. 23433 and 23434. It drains an area of 3.65 acres. Contractors were given notice to begin work on April 23rd, 1908, and work was completed on May 4th, 1908, at a total cost of \$1,057.00.

BRANCH STREET SEWER DISTRICT NUMBER THIRTY-SEVEN.

This work was let to Hoffmann-Hogan Construction Company, under contract No. 8407, dated May 15th, 1908, and authority of ordinances Nos. 23586 and 23587. It drains an area of 3.02 acres. Contractors were given notice to begin work on May 25th, 1908, and work was completed on June 1st, 1908, at a total cost of \$409.23.

ROCK SPRING SEWER DISTRICT NUMBER SIXTEEN.

This work was let to Robert Wycoff, under contract No. 8382, dated May 12th, 1908, and authority of ordinance No. 23370, No. 23588 amending same, and No. 23371. It drains an area of 8.46 acres. Contractor was given notice to begin work on May 18th, 1908, and work was completed on July 10th, 1908, at a total cost of \$4,690.07.

ELLENDALE SEWER DISTRICT NUMBER ONE.

This work was let to Robert Wycoff, under contract No. 8383, dated May 12th, 1908, and authority of ordinances Nos. 23490 and 23491. It drains an area of 32.39 acres. Contractor was given notice to begin work on June 16th, 1908, and work was completed on August 24th, 1908, at a total cost of \$7,382.11.

HARLEM CREEK SEWER DISTRICT NUMBER THREE.

This work was let to Wm. F. Riley Construction Co., under contract No. 8459, dated July 24th, 1908, and authority of ordinances Nos. 23618 and 23619. It drains an area of 24.37 acres. Contractors were notified to begin work on July 31st, 1908, and work was completed on September 24th, 1908, at a total cost of \$7,513.55.

FILLMORE STREET SEWER DISTRICT NUMBER SIX.

This work was let to Wm. F. Riley Construction Co., under contract No. 8632, dated November 30th, 1908, and authority of ordinances Nos. 23929 and 23930. It drains an area of 4.04 acres. Contractors were notified to begin work on December 8th, 1908, and work was completed on December 15th, 1908, at a total cost of \$1,230.98.

OSAGE STREET SEWER DISTRICT NUMBER THREE.

This work was let to Herbert & Son, under contract No. 8641, dated December 1st, 1908, and authority of ordinances Nos. 23925 and 23926. It drains an area of 9.93 acres. Contractors were notified to begin work on December 10th, 1908, and work was completed on January 2nd, 1909, at a total cost of \$1,117.19.

SOUTH MILL CREEK SEWER DISTRICT NUMBER FORTY-EIGHT

This work was let to Wm. F. Riley Construction Co., under contract No. 8633, dated November 30th, 1908, and authority of ordinances Nos. 23931 and 23932. It drains an area of 4.01 acres. Contractors were notified to begin work on December 8th, 1908, and work was completed on January 2nd, 1909, at a total cost of \$1,083.59.

GIMBLIN ROAD SEWER DISTRICT NUMBER THREE.

This work was let to Wm. F. Riley Construction Co., under contract No. 8631, dated November 30th, 1908, and authority of ordinances Nos. 23927 and 23928. It drains an area of 15.86 acres. Contractors were notified to begin work on December 8th, 1908, and work was completed on January 18th, 1909, at a total cost of \$5,056.76. (See Exhibit No. 3).

CORA AVENUE SEWER DISTRICT NUMBER TWO.

This work was let to Wm. F. Riley Construction Co., under contract No. 8755, dated March 12th, 1909, and authority of ordinances Nos. 24138 and 24139. It drains an area of 37.76 acres. Contractors were notified to begin work on March 17th, 1909, and at the end of the fiscal year the work in this sewer district was about 50 per cent complete.

HARLEM CREEK SEWER DISTRICT NUMBER ONE.

This work was let to Fruin-Colnon Contracting Co., under contract No. 8760, dated March 17th, 1909, and authority of ordinances Nos. 24163 and 24137. It drains an area of 245.25 acres. Contractors were notified to begin work on March 29th, 1909, and at the end of the fiscal year a start had been made. Estimated cost of the work is \$123,200.00. (See Exhibit No. 5).

ADOPTED DISTRICT SEWERS.

Certain private sewers, constructed in accordance with plans approved by the Board of Public Improvements, were adopted by ordinance and declared to be a part of the sewer system of the city. Acceptances of the provisions of ordinances and deeds, conveying sewers to the city, have been filed with the Register. Said sewers are in the following districts, viz:

ROCKY BRANCH SEWER DISTRICT NUMBER FIFTEEN.

This work was done by Myers Construction Co., for Lindell Fair Grounds Realty & Investment Co., under permits Nos. 81364, 81365 and 82319. Area of the sewer district as established by ordinance No. 23788 is 24.28 acres. Acceptance of the provisions of ordinance No. 23789 and deed of conveyance were signed September 18th, 1908.

WYOMING STREET SEWER DISTRICT NUMBER TWENTY-TWO.

This work was done by Robert Wycoff, for Diedrich Steilmke, under permit No. 80250. Area of the sewer district as established by ordinance No. 23919 is 4.57 acres. Acceptance of the provisions of ordinance No. 23920 and deed of conveyance were signed December 11th, 1908.

GRAVOIS AVENUE SEWER DISTRICT NUMBER THREE.

This work was done by Alfred Bushell, for Elizabeth Boka, under permit No. 82021. Area of the sewer district as established by ordinance No. 24320 is 5.00 acres. Acceptance of the provisions of ordinance No. 24321 and deed of conveyance were signed April 15th, 1909.

BOWEN STREET SEWER DISTRICT NUMBER TWO.

This work was done by Robert Wycoff, for J. P. Richardson, under permit No. 71135. Area of the sewer district as established by ordinance No. 24335 is 1.97 acres. Acceptance of the provisions of ordinance No. 24336 and deed of conveyance were signed April 9th, 1909. (See Exhibit No. 3).

PRIVATE DRAINS.

Permits for sewer connections were issued during the year to the number of 4,229, of which 64 were cancelled, making 4,165 connections actually made, as follows, viz:

8	4-inch
3,900	6-inch
133	8-inch
62	9-inch
16	10-inch
30	12-inch
7	15-inch
4	18-inch
1	21-inch
2	24-inch
1	3 feet mean diameter.
1	4½ feet mean diameter.

Of the above number of permits issued, 108 were for private sewers (over 100 feet in length or to be used by more than one party), the plans for which were approved by the Board of Public Improvements, and one was for a district sewer in Thirteenth Street, Olive Street and Fourteenth Street, built to take the place of the old sewer that was abandoned when excavation was made for the new public library building.

Where slants were put in brick sewers or saddles on pipe sewers in making connections, inspectors were sent to see that the work was properly done, and 639 slants and saddles were so inspected during the past year.

The total number of permits issued by the department to April 13th, 1909, is 87,435.

PRIVATE SEWERS.

The sizes and length of the 108 private sewers (over 100 feet in length or to be used by more than one party) that were completed during the past fiscal year are as follows:

4 x 5 feet brick	538 feet.
3 x 4 feet brick	373 feet.
2½ x 3½ feet brick	182 feet.
2½ x 3½ feet brick	238 feet.
30-inch pipe	725 feet.
24-inch pipe	409 feet.
21-inch pipe	378 feet.
18-inch pipe	1,312 feet.
15-inch pipe	3,605 feet.
12-inch pipe	7,812 feet.
10-inch pipe	2,493 feet.
9-inch pipe	2,669 feet.
8-inch pipe	8,487 feet.
6-inch pipe	848 feet.

A total length of 30,069 feet, or 5.69 miles.

There were built in connection with same 23 inlets and 54 man-holes.

The cost of inspection of the above, paid by the owners or builders of the private sewers, amounted to \$1,296.00.

On account of the building of the new public library, 384 feet of 2½ by 3½ feet brick sewer on the site of the work was abandoned, and 460 feet of new 2½ by 3½ feet brick sewer was built in the north side of Olive street from the sewer in Thirteenth Street to the east side of Fourteenth Street, thence northwardly to sewer in the alley north of Olive Street. The cost of inspection was \$41.40. The total cost of the work was paid by the St. Louis Public Library.

PROPOSED PUBLIC SEWERS.

RIVER DES PERES.

After making a survey of the River Des Peres, it was decided to construct a foul water sewer from the Mississippi River through Catalan Street to the River Des Peres, thence following the valley to Manchester and Mitchell Avenues.

This sewer will be of the following sizes, viz: 10 feet, 8 feet, 7 feet, 6 feet, and 5 feet.

Plans and specifications have been prepared and approved by the Board of Public Improvements, and ordinance (No. 24333) passed on March 30th, 1909, for the construction of the first section of the foul water sewer, in Catalan Street and in certain rights of way for sewer from the Mississippi River westwardly to Alabama Avenue. The sewer is to be constructed of brick and concrete and will be of horse-shoe shape, in size 1,164 feet of 10 feet mean diameter, and 3,941 feet of 8 feet mean diameter.

The appropriation made for this section of sewer is \$215,000.00.

From that point, we have designed a re-inforced concrete pipe sewer with a vitrous lining, the vitrous lining being placed in the pipe in order to keep the acids that may be in the foul water from attacking the concrete; in addition to this, it will give a greater carrying capacity, as it will give a larger velocity than a concrete surface. Plans are in course of preparation for sewer to Bancroft Avenue, and same will be completed about September 15th, 1909.

As this only takes care of the foul water and dry weather flow in the river between the above mentioned points, it is necessary to design and construct an open channel sewer. While the sizes of the sewer have not been definitely determined, the approximate dimensions of this channel may be taken as follows.

Location	Width		Depth Feet	Capacity Cubic Feet Per Second
	On Top Feet	On Bottom Feet		
Mississippi River to Station No. 73	126	70	25	25,000
Station No. 73 to Station No. 250.	112	70	21	20,000
Station No. 250 to Station No. 330	106	70	18	16,000
Station No. 330 to Station No. 411	98	70	14	10,000

From Manchester and Mitchell Avenues, it was deemed advisable, on account of going through Forest Park and from the fact that the Euclid and Union Avenue sewers empty into the park at the present time, to construct a combined system, i. e., a closed sewer that will take care of the foul water and storm water.

There are two routes which might be taken from Manchester and Mitchell Avenues to the city limits—one as described under "River Des Peres survey", which is known as the "tunnel scheme."

This scheme, in order to make a complete drainage of Forest Park and vicinity, necessitates carrying the Euclid Avenue sewer to the Union Avenue sewer and the Union Avenue sewer to the main sewer of the tunnel scheme at the old cement testing plant in Forest Park at the end of the "Mining Gulch."

The other scheme is to follow the valley of the River Des Peres from Manchester Avenue opposite Mitchell avenue, which course bears eastwardly to a point near Macklind Avenue, hence diagonally across Macklind and Manchester Avenues, Barron Avenue and East road, following the course of the River Des Peres to a point where the Euclid Avenue sewer enters Forest Park, thence westwardly along the valley of the River Des Peres in Forest Park to a point just north of the McKinley bridge in Forest Park, thence in a diagonal line and northwesterly direction towards the Lindell bridge in Forest Park, where it

connects with the tunnel line as mentioned under "River Des Peres survey," on which it continues to the city limits near Clemens Avenue; the Euclid Avenue sewer and Union Avenue sewer being connected to the valley line by extending them only a few hundred feet.

Either of these two schemes is feasible and will cost practically the same amount of money, the tunnel scheme probably being a few thousand dollars cheaper.

ROCK CREEK.

One of the water sheds within the River Des Peres' water shed needing immediate attention is Rock Creek.

In order that the special tax bills may be practically the same as in other districts, it will be necessary to construct about 6,000 feet of public sewer.

Surveys in this drainage area are under way, and we have hopes of securing rights of way for sewer, or in case they cannot be secured have them condemned, and constructing the public sewer in the early part of 1910.

BADEN CREEK.

Plans and specifications have been prepared for a public sewer from the Mississippi River to Oberbeck Street, a distance of 4,700 feet, this being the main stem of the two branches of Baden Creek as mentioned under "surveys."

At a point about 500 feet from the Mississippi River, just west of the Burlington railroad tracks, Maline Creek joins Baden Creek. On account of the great amount of territory drained by Maline Creek and the amount of territory drained by Baden Creek, it was necessary that the sewer be made larger at this point; in order that this might be constructed at an economical cost, an open sewer was designed, consisting of retaining walls, instead of a closed sewer.

From this point, at Station No. 4 plus 75 as shown on plans, the sewer known as the "23-foot section" has an area of 271 square feet, a carrying capacity of 3,600 cubic feet per second, and on a .002% slope. On account of the amount of water coming in, it was deemed necessary to change the size of this section at Station No. 31 plus 54.95. This section continues to the Water Works' conduit and is used up to Station No. 31 plus 54.95.

From this station on to Oberbeck street, on account of the great fall, being .006%, the size of the sewer could be reduced to what is known as the "18-foot section," with an area of 166 square feet and a carrying capacity of 3,400 cubic feet per second.

A joint district sewer was originally designed from Oberbeck Street through Calvary Cemetery to the city limits, but on account of not being able to secure a right of way from the Calvary Cemetery Association if special tax bills would be issued against it, it was deemed advisable, on consultation with the Law Department and the Board of Public Improvements, to extend the public sewer from Oberbeck Street to Florissant Avenue, making an additional length of 4,557.15 feet; this sewer to be what is known as the "14-foot section," with an area of 127 square feet, carrying capacity of 2,200 cubic feet per second, and .005% grade.

In case this scheme is carried out, the public sewer will be 9,257.15 feet long. This, as far as public sewers are concerned, will complete the outlet for what is known as the "Baden Creek water shed."

PROPOSED JOINT DISTRICT SEWERS.

GLAISE CREEK.

An ordinance will be introduced about September 16th, 1909, and expect to commence work in the late fall on the joint district sewer to be constructed from Station No. 32 plus 61.26 (Kansas Street) to Station No. 106 plus 00 (near Neosho Street).

This sewer will be of re-inforced concrete, of the following lengths and sizes, viz: 2,508.74 feet of 15-foot elliptical sewer, 1,030.00 feet of 13-foot elliptical sewer, 2,300.00 feet of 12-foot elliptical sewer, 1,500.00 feet of 11-foot elliptical sewer.

HARLEM CREEK.

Plans and specifications have been prepared for what is known as "North Harlem Joint Sewer District." This sewer will connect to the Harlem Creek public sewer at Newstead Avenue and Bircher Street.

There will be 4,793 feet of 12-foot re-inforced concrete sewer, 3,557 feet of 10-foot re-inforced concrete sewer, 475 feet of 8-foot brick sewer, 1,737 feet of 7-foot brick sewer, 718 feet of 5-foot 6-inch brick sewer, and 808 feet of 44-inch by 66-inch brick sewer.

This sewer will cost approximately \$250,000.00. The city's share of which will be approximately \$11,000.00. Ordinance will be introduced about September 16th, 1909.

As soon as the Comptroller is able to furnish the necessary funds, an ordinance will be introduced for the construction of South Harlem Joint District Sewer.

This sewer will be built of re-inforced concrete, of the following lengths and sizes, viz: 6,488 feet of 16-foot sewer, 2,980 feet of 14-foot sewer, and 4,072 feet of 12-foot sewer.

It will cost approximately \$438,000.00. The city's share of which will be approximately \$140,000.00.

ROCK CREEK.

The Rock Creek water shed contains 1,857 acres. After the public sewer is built, it will be necessary to extend same as a joint district sewer.

The joint district sewer will be designed at the same time the public sewer is designed; however, sewer districts will have to be laid out in order to ascertain the flow that will enter the public and joint district sewers, so as to determine the sizes of sewer necessary at various points.

Sewers are a necessity in this particular water shed on account of the western and northern ends being laid out in subdivisions and being built up very rapidly.

Plans for this sewer cannot be completed until rights of way have been secured for same; as soon as they are completed, ordinance will be introduced, and we are in hopes of seeing this work in progress not later than the spring of 1910.

PROPOSED DISTRICT SEWERS.

DALE AVENUE.

Surveys have been made for a district bounded by the city limits on the west, Forest Park on the north, Kraft Street on the east, and Dale Avenue on the south, to be known as "Dale Avenue Sewer District Number One."

On account of a great many of the streets and alleys not being open and some of the blocks not being subdivided, it is with great difficulty that a sewer district can be laid out in this vicinity.

MACKLIND AVENUE.

Another drainage shed of the River Des Peres is bounded approximately by Manchester Avenue, Kingshighway Boulevard, Pierce Avenue, and the boundary line of the Tower Grove sewer district. This is known as "Macklind Avenue Sewer District Number One."

This territory is in need of sewers at the present time; it has not been laid out before now on account of the condition of the streets, and also on account of a great deal of the property not having streets or alleys and not being able to secure rights of way for sewers; however, from a sanitary point of view, it becomes absolutely necessary that something be done at once.

Plans will be prepared in the near future, and if the rights of way for sewer cannot be secured from the property owners, condemnation proceedings will have to be instituted. This, of course, if it becomes necessary to condemn the rights of way, or open the streets and alleys by condemnation proceedings, will materially lengthen the time in which the sanitary situation may be improved.

GLAISE CREEK.

Rights of way for sewer have been secured and as soon as the plans are completed, ordinance will be introduced for the construction of a district sewer in the Glaise Creek water shed bounded on the south by Bates Street and Fillmore Street, on the east by Colorado Avenue, on the west by the St. Louis, Oak Hill & Carondelet Railroad tracks, and on the north by Dover Street.

In the Glaise Creek water shed, the district bounded by Kansas Street, Colorado Avenue, Fillmore Street, and Grand Avenue, is in need of sewers, but we have been unable to secure the necessary rights of way. The plans cannot be completed until rights of way are secured; as soon as they are completed, ordinance will be introduced for the construction of this sewer.

BADEN CREEK.

A sewer district has been laid out in the Baden Creek water shed, bounded on the south by Florissant Avenue, on the north by the city limits, on the east as follows:

Beginning at the point of intersection of the center lines of Partridge and Florissant Avenues, thence westwardly along the center line of Partridge Avenue to the center line of Harney Avenue, thence northwardly along the center line of Harney Avenue to the intersection of a line 30 feet north of the south line of Kingshighway northwest, thence westwardly along said line to the center line of Emma Avenue, thence northwardly along the center line of Emma Avenue to the center line of Mimika Avenue, thence westwardly along the center line of Mimika Avenue to its intersection with a line 250 feet east of and parallel to the east line of Lucille Avenue, thence along said line to the city limits.

On the west as follows.

Beginning at a point in the center of Florissant Avenue on the north line of Geraldine Avenue produced, thence westwardly to the east line of the north and south alley in city block No. 5081, thence northwardly along the east line of said alley to a line half way between Bernays and Geraldine Avenues, thence westwardly along the said line to a point 450 feet west of the west line of Harney Avenue, thence northwardly along a line 450 feet west of and parallel to the west line of Harney Avenue to the north line of alley in city block No. 5083, thence westwardly along said north line to the center line of Thekla Avenue, thence northwardly along the center line of Thekla Avenue to the north line of Emerson Avenue, thence westwardly along the north line of Emerson Avenue to the center line of Lillian Avenue, thence along the center line of Lillian Avenue to the center line of Genevieve Avenue, thence along the center line of Genevieve Avenue to the west line of Strodman Heights First Addition, thence northwardly along said line to a point in the center of Thrush Avenue, thence westwardly along the center line of Thrush Avenue to its intersection with the line between lots 14 and 15 and 7 and 8 in city block No. 5397.

thence northwardly along said line to the center line of Plover Avenue, thence westwardly along the center line of Plover Avenue to the center line of Prange Avenue, thence northwardly along the center line of Prange Avenue to the center line of Wren Avenue, thence westwardly along the center line of Wren Avenue to the center line of Amelia Avenue, thence northwardly along the center line of Amelia Avenue to the north line of Partridge Avenue (30 feet wide), thence along said north line of Partridge Avenue to a point 520 feet east of the west line of Frueh Avenue, thence northwardly along said line 520 feet east of the west line of Frueh Avenue and parallel thereto to the city limits.

On account of the water shed in the county and the Calvary Cemetery Association not giving a right of way through their grounds, it is imperative that a public sewer be built from Oberbeck Street to Florissant Avenue. On account of this additional cost to the city, it is impossible for the city to construct a joint district sewer from Florissant Avenue to the city limits and pay for the drainage area in the county; therefore, it was deemed advisable by the Board of Public Improvements, as well as a majority of the property owners within the above mentioned boundaries, that the entire water shed be laid out into one large sewer district.

In this connection, improvement associations within the above boundaries have called special meetings, asking the various property holders to sign petitions in which they request the Board of Public Improvements to build a district sewer. This will work a hardship on the people who have not subdivided their ground, but on the whole it will be a benefit to a majority of the inhabitants.

If these petitions are completed and the Legal Department advises that there will be no likelihood of the special tax bills being void, plans will be completed and ordinance introduced for the construction of this sewer about September 16th, 1909.

This, when completed, will fulfill a long-felt want in this particular part of the city.

HARLEM CREEK.

In the South Harlem Creek water shed, survey has been made for a district sewer in the territory bounded by Euclid Avenue, Spalding Avenue, Greer Avenue, and the block line east of Union Boulevard. Rights of way have been secured for this sewer, and as soon as the plans are completed, ordinance will be introduced for the construction of same.

Survey has been made for a district sewer in the South Harlem Creek water shed in the territory bounded by Shreve Avenue, Alsace Avenue, Kingshighway Boulevard, and Penrose Street. Rights of way have been secured, plans are in course of preparation, and ordinance will be introduced some time in the Fall.

All the territory within the boundaries of both North and South Harlem Creek water sheds is being laid out at the present time. Plans will be prepared, and if we are not able to secure rights of way for the sewers, the matter will be turned over to the Street Department in order to commence condemnation proceedings for the opening of the streets and alleys.

It is hoped that all the districts in the above mentioned territory will be under way some time in the following year.

FILLMORE STREET.

Survey has been finished in Fillmore Street Sewer District Number Seven, bounded by Elwood Street, Kansas Street, Michigan Avenue, and the alley west of Broadway. All rights of way have been secured, and as soon as the plans are completed, ordinance will be introduced for the construction of this sewer.

Respectfully,
H. R. FARDWELL,
Sewer Commissioner.

EXHIBIT NO. 1.
TOTAL EXPENDITURES FOR CONSTRUCTION OF SEWERS AND FOR CURRENT AND MISCELLANEOUS EXPENSES FOR THE FISCAL YEAR ENDING APRIL 12TH, 1909.

PUBLIC SEWERS.		
RETAINED PERCENTAGES ON WORK COMPLETED PREVIOUS YEAR:		
Arsenal Street Sewer:	Extension from eastern terminus of sewer eastwardly across the wharf to the Mississippi River.	
	Ordinance No. 22894	Contract No. 7985..... \$ 702 08
Seventh Street Deep Drainage Sewer:	From Biddle Street sewer southwardly to the alley between Lucas and Washington Avenues.	
	Ordinance No. 22898	Contract No. 8003..... 2,178 48
Rocky Branch Sewer:	Reconstruction and enlargement from the Mississippi River westwardly.	
	Ordinance No. 22346	Contract No. 7606..... 16,491 96
	Total on retained percentages on work completed previous year.....	\$19,372 52
ON WORK COMPLETED:		
Harlem Creek Sewer (First Section):	In Bircher Street, from the west line of Bulwer Avenue westwardly to a point about 600 feet west of the west line of Broadway.	
	Ordinance No. 22345	Contract No. 7604..... 39,254 85
Glaise Creek Sewer (First Section):	In Carondelet, from the River des Peres northwardly in certain streets and rights of way for sewer to Robert Avenue.	
	Ordinance No. 22031	Contract No. 8004..... 42,803 03
"Emergency Work:"		
Outlet Sewers:	To Stein Street Sewer District Number Thirteen.	
	Ordinance No. 23599	Contract No. 8346..... 24 88
To Rock Spring Sewer District Number Sixteen.	Ordinance No. 23599	Contract No. 8382..... 126 82
	To Harlem Creek Sewer District Number Three.	
Ordinance No. 23599	Contract No. 8460.....	1,270 06
	To Fillmore Street Sewer District Number Six and South Mill Creek Sewer District Number Forty-eight.	
Ordinance No. 23599	Contract No. 8602.....	201 35
	Sewer Inlets, Catch Basins, Manholes and Laterals:	
Ordinance No. 23599	Contract No. 8005.....	257 36
	Ordinance No. 23599	Contract No. 8005..... 2,924 84
Ordinance No. 23599	Contract No. 8005.....	4,269 79
	Ordinance No. 23599	Contract No. 8005..... 2,137 60

St. Louis, May 7th, 1909.

HON. FREDERICK H. KREISMANN,
Mayor, City of St. Louis,

Dear Sir:—In compliance with the provisions of the City Charter, I have the honor to submit herewith, my report of the business of this Office for the Fiscal Year ending March 31st, 1909.

Very Respectfully,
JULES BARON,
Coroner.

Transient Prisoners.....	6 0
Total.....	\$5,751 13

NOTE.—Owing to the fact that the appropriation for the payment of costs in criminal cases had been exhausted, no bills for maintenance of prisoners have been paid the city since July 1st, 1908. These costs are paid by the State Treasurer, and for the period elapsed, fees to the amount of about \$10,000.00 are still due.

SUMMARY.

Expenditures.....	\$38,771 56
Receipts.....	5,751 13
Net Cost to City.....	\$33,020 43
Appropriations.....	\$39,752 25
Expenditures.....	38,711 56
Balance Reverting to General Revenue.....	\$ 980 69

AVERAGE.

Daily Average Number of Prisoners.....	185
Daily Average Cost of Feeding One Person.....	\$.154

REPAIRS.

Considering the age of this building, the Jail proper, it is to be expected that repairs are in frequent demand. During the past fiscal year no large repairs were made, because we have continued our same policy, by giving prompt attention wherever necessity required it.

IMPROVEMENTS.

The feeding of prisoners, seated at tables, has been continued with good results, notwithstanding that the number of prisoners fed daily during the past fiscal year greatly exceeds the daily average of the previous year.

The iron stairway leading into the jail, consisting of five steps, were considerably worn and very smooth, causing them to be very dangerous, especially in rainy weather. On visiting days the utmost care had to be taken to prevent persons from falling and possibly doing themselves great bodily harm. We realized this danger to the people, and probable legal proceedings against the City from possible accidents. The steps are now covered with Mason's Patent Safety Tread, which fact relieves us of a great deal of anxiety.

ORDER AND DISCIPLINE.

It affords me extreme satisfaction to state that order and discipline is very good. The prisoners are let out of their cell five times each day, three times for meals and twice for exercise. Taking into consideration that from two hundred to three hundred prisoners are out on the floor at the same time, nevertheless peace and quiet prevails, and at a given signal each one proceeds to his cell, we therefore feel at liberty to congratulate ourselves to have matters well in hand.

LIBRARY.

No teacher is better than a good book. Following that theory, we keep our library well supplied, and at the present time consists of over one thousand volumes. When a book gets into a bad condition we replace it with another, of which we usually have an abundance on hand, all received through the kindness of Mr. Frederick M. Crunden, Public Librarian.

Papers and magazines are thankfully accepted and delivered to the prisoners from different church denominations and individuals, and the inmates are permitted to make their selection from the various reading matter.

In conclusion I desire to state that the same faithfulness and loyalty to duty will be rendered in the future, as in the past.

Respectfully submitted,

CASPER J. WOLF,
City Jailer.

ANNUAL REPORT OF THE Smoke Abatement Department FOR THE Fiscal Year Ending April 12th, 1909.

June 22, 1909.

HONORABLE FREDERICK H. KREISMANN,
Mayor, City of St. Louis.

Dear Sir: Attached hereto find list of manufacturing concerns and other plants in this city that are using smoke preventing devices at the present time, the character of which is shown. This list covers practically all stationary plants that were violators of the law, devices having been installed since this office was created. It also shows heating plants in St. Louis that are using smoke preventing devices, or that are burning smokeless fuel, giving the number of boilers in each plant and the combined rated horse power.

The statement will show that there are:

1129	Plants,
1061	Boiler Plants,
48	With Cast Iron Heaters,
1012	Boilers with Steam Jets,
617	Boilers with Down Draft Furnaces,
239	Boilers with Automatic Stokers,
120	Boilers with Fire Brick Arches,
23	Boilers with Shaving Feeders,
14	Boilers with Air Blast Devices,
62	Boilers using Smokeless Fuel,
1.92	Average number of Boilers per Plant,
159	Average Horse Power per Boiler,
305.6	Average Horse Power per Plant,
2077	Total number of Boilers,
58	Heaters using Smokeless Fuel,
3	Heaters with Down Draft Furnaces.

Per cent of Boilers equipped with Steam Jets	49
Per cent of Boilers equipped with Down Drafts	30
Per cent of Boilers equipped with Stokers	11
Per cent of Boilers equipped with Brick Arches	6
Per cent of Boilers with Scattering methods	4

100

The Department has prosecuted 494 cases against violators of the law, defendants in nearly all of them being found guilty in the Court of Criminal Correction.

For the greater efficiency of this Department, we would recommend the following ordinances:

1st. An ordinance requiring all plans for the construction, reconstruction or alteration of any boiler or heating plant to be submitted to proper authorities for approval. This also to include the height and dimensions of smokestacks and chimneys.

2nd. An ordinance requiring all locomotives operating in the city to use electric motive power.

3rd. An ordinance to examine and license all firemen, both of boiler and heating plants where soft coal is burned.

4th. Additional inspectors, as four men, the present number, are not sufficient for the work required.

Some action should be taken looking toward the better compliance on the part of the City with its own requirements, as several of the city institutions have been constant violators of the law.

Very Respectfully,

C. H. JONES,

Chief Smoke Inspector.

Fuel Wagons.....	11
Hauling Wagons.....	7
Spring Wagons.....	2
Officers' Wagons.....	13
Automobile	1
The following apparatus are equipped with rubber tires:	
Hose Wagons.....	22
Steamers	2
Hook and Ladder Trucks.....	8
Fuel Wagons.....	3
Officers' Wagons.....	13

APPARATUS IN RESERVE.

Steamers	10
Combination Hose Wagons and Chemical Engines.....	7
Hose Reels and Chemical Engines.....	2
Hose Reel	1
Hose Wagon	1
Fuel Wagons.....	1
Officers' Wagons.....	4
One Horse Spring Wagons.....	2
Hook and Ladder Trucks (Aerial).....	2
Hook and Ladder Trucks (City Service).....	2
Automobile	1

HOSE IN SERVICE.

$\frac{3}{4}$ inch rubber chemical hose.....	8,250 feet.
1-inch rubber	1,150 feet.
$2\frac{1}{2}$ inch cotton rubber lined.....	85,850 feet.
3-inch cotton rubber lined.....	9,400 feet.
$3\frac{1}{2}$ inch cotton rubber lined.....	120 feet.

HOSE IN RESERVE.

$\frac{3}{4}$ inch rubber chemical hose.....	775 feet.
$2\frac{1}{2}$ inch cotton rubber lined.....	28,050 feet.
3-inch cotton rubber lined.....	8,800 feet.
$3\frac{1}{2}$ inch cotton rubber lined.....	120 feet.

Will state that all of the hose couplings in the department are of the National Protection Association Standard thread for fire hose.

HORSES.

There are 312 horses in service and reserve. During the year 65 were bought, 45 condemned and 13 died.

HOUSES.

There are forty-three houses being used by the department, all of which are the property of the city.

During the year a storage house was built at 22nd and North Market Streets, and a new house for Engine Company No. 11, on Bismarck and Barton Streets, to replace house that became dilapidated by age.

Contracts have been let for the erection of Engine houses at the following locations: Florissant Avenue, between Calvary and Geraldine Avenues, Shawmut Place and Ridge Avenue, and Magnolia and Vanderburgh Avenues.

Plans are being prepared by the Board of Public Improvements for the erection of Engine Houses, on Newstead Avenue between Duncan Avenue and Forest Park Boulevard and Morganford Road and Eichelberger Street.

Contract will be let shortly for the erection of a new house for En-

gine Company No. 37, on Broadway and Baden Avenue, to replace the old and dilapidated frame building.

Creosoted wood paving blocks were installed in the apparatus room of the following houses: 10, 16, 22 and 23, the stalls of Engine House No. 25, and the floor and stalls of the Horse Hospital.

General repairs were made on the following houses: 10, 15, 16, 17, 20, 22, 23 and 25.

PAINTING.

During the year we expended \$4,328.98, for employing union painters and purchasing material sufficient to enable us to paint fourteen houses.

DEATHS.

Five deaths occurred during the year as follows:

Theodore Birnbrier Watchman No. 15, died June 15th, of blood poisoning. He became a member of the department, July 16th, 1897.

Patrick Larkin, Ladderman Hook and Ladder Company No. 2, killed by street car accident while responding to an alarm of fire on September 15th.

William Meehan, Stoker Engine No. 21, died November 4th, of pneumonia. He became a member of the department August 17th, 1901.

John Finnegan, Captain Hook and Ladder Company No. 10, died January 22nd, of kidney trouble. He became a member of the department June 19th, 1879.

James Kelly, Captain Engine Company No. 30, died February 5th, of cancer of the stomach. He became a member of the department December 1st, 1883.

ACCIDENTS.

Accidents occurred to various members of the department while in the discharge of their duties as follows: Slight, 41, Severe, 30, Serious, 19, Fatal, 1.

RECOMMENDATIONS.

There has been lots purchased in the following locations: Arlington Avenue and North Market Street, Ninth and Buchanan Streets, Jefferson Avenue north of Cass Avenue and Taylor and Margarett Avenues, on which to erect Engine Houses.

I would respectfully recommend that the additional bonds allotted to this department, be sold to enable the erection of Engine Houses thereon.

I desire to thank the Honorable Mayor, the Municipal Assembly, the Police Department, the Fire Alarm Department and the Salvage Corps, for the assistance rendered this department and commend the officers and members of the Fire Department for the excellent service rendered and discipline maintained by them. I have the honor to be,

Yours respectfully,

C. E. SWINGLEY,
Chief Fire Department.

ANNUAL REPORT
OF THE
Supt. of Fire and Police Telegraph.
FOR THE
Fiscal Year Ending April 12th, 1909.

St. Louis, Mo., April 20, 1909.

HON. F. H. KREISMANN,
Mayor, City of St. Louis.

Dear Sir:—I have the honor to submit herewith, the Annual Report of the Fire and Police Telegraph Department, for the fiscal year ending April 12, 1909.

Very respectfully,
ROBT. QUAIN,
Supt. Fire & Police Telegraph.

FIRE AND POLICE TELEGRAPH.

This Department has twenty-two (22) salaried employees at an annual salary account of \$24,300.00, viz: One Superintendent, one Chief Fire Alarm Operator, three Fire Alarm Operators, three Assistant Fire Alarm Operators, three Telephone Operators, one Chief Telephone Inspector, two Telephone Inspectors, three Fire Alarm Inspectors, one Chief of Construction, three Line Repairers and one Batteryman.

An ordinance creating the positions of Assistant Superintendent, Superintendent of Cables and Chief Fire Alarm Inspector, and increasing the salaries of Chief Telephone Inspector and Chief of Construction, was passed during the year, but does not become effective until May 1, 1909.

A force of extra labor (foremen, linemen, groundmen, etc.,) averaging thirty-three men monthly, were employed, during the past year at a cost of \$30,423.82.

The Department has been maintained and operated in a manner entirely satisfactory to all concerned, and the various services under its care have been advanced and improved as far as appropriations would permit.

The Construction Division has been constantly occupied building new lines, making extensions, taking down old iron wire and replacing same with copper wire, repairing, maintaining and testing all lines and apparatus, installing fire alarm signal and police telephone boxes, telephones, etc., and doing a great variety of work incident to keeping the system in proper and efficient working order.

The Operating Division has been given careful and faithful attention and the service has been accurate and first-class in every particular.

The following improvements for the betterment of the service were made during the past year:

A system of pilot lamps have been installed in the operating room and connected with fire alarm signal circuit board, thereby adding another safeguard against missing an alarm, and should "trouble" occur on any signal circuit it will be indicated instantaneously by means of these lamps.

Gas has been installed in the operating room as a measure of protection should the electric lights fail.

The passage of an ordinance was secured, appropriating \$18,000.00 for the purchase and installation of No. 10 hard drawn, insulated copper wire, to replace old iron wire now in service; 60,000 pounds (249 miles) were purchased; in addition to this, 24,529 pounds (102 miles) of copper wire was purchased out of regular maintenance funds, and 5400 pounds (22½ miles) was purchased by the Police Department to be used for rebuilding police telephone lines. 64,398 pounds (267 miles) of copper wire were strung during the year rebuilding circuits, and the balance is now being rapidly installed and the old iron wire taken down. Seventy-three miles of iron wire were used for building telephone circuits, fifty-three miles of wire were transferred on poles, and two hundred and sixty-seven miles of old iron wire were taken down.

The passage of an ordinance was secured, authorizing the Superintendent of this Department to alter, repair or install laterals and appurtenances to conduits and manholes in which there are ducts and cables for this Department, whenever necessary, for the proper and efficient working, the maintenance of the improvement of the underground service.

An ordinance was also passed and contract let by the Board of Public Improvements for the installation of 1704 feet of iron lateral pipes and the construction of three manholes, at a cost of \$1,600.00. This was done for the purpose of replacing old aerial cables on Seventh Street from Carr Street to Wash Street, and on Wash Street between Sixth and Seventh Streets, and to connect Engine Houses Nos. 4 and 13 with the underground system. In addition to the above, iron lateral pipes were installed and three fire alarm signal boxes, located at 22nd and Franklin Ave., 22nd and Pine Streets, and 22nd and Market Streets, that were heretofore on aerial circuits, have been connected with the underground system.

2,470 feet of iron pipe laterals and 5,315 feet of cable were installed during the year.

Sixty-one (61) fire alarm signal boxes were installed in new locations, the fire risk being taken into consideration in every case.

Twenty (20) fire alarm signal boxes of old and obsolete patterns have been replaced with new and modern boxes.

Keyless doors on six (6) fire alarm signal boxes have been replaced with doors with keyguard attachment.

Two (2) gongs were installed in new locations.

Seventeen (17) telephones were installed for the Fire Department and different municipal departments. The old style transmitters on municipal telephones are being replaced with the latest improved transmitters; the factory that furnished the phones (Dean Electric Company) are supplying the new transmitters without extra charge. 160 transmitters have been replaced and the balance will be changed in a short time. The telephones connected with the municipal service are owned by the City.

Nineteen Telephones were installed for the Police Department; the telephones connected with this service are leased from the Kinloch Telephone Company.

Thirty-five (35) poles were set for the construction of new lines, and thirty-four (34) old poles were replaced with new poles; ninety-five (95) poles were reset and forty-one (41) poles and one (1) guy stub were taken down and City's wires transferred to other poles in the immediate vicinity.

Thirty-three hundred and fifty-five (3355) fire alarms were received and transmitted to the Fire Department during the year.

The following is a list of instruments and fixed property in service and under the care of this Department:

1275 fire alarm signal boxes, of which 64 are private boxes.

116 gongs.

51 engine house joker sets.

46 engine house chain droppers.
 211 Telephones in service in the different municipal departments.
 595 telephones in service in the Police Department.
 2150 miles of wire on poles.
 2663 poles erected in streets and alleys.
 250,315 feet of underground cable in service.
 22,839 feet of iron pipe laterals in service.
 8 manholes.

IMPROVEMENTS CONTEMPLATED.

As to improvements contemplated for the betterment of the service during the coming year, in my estimate to the Comptroller I have requested that an appropriation of \$16,400.00 be allowed for the purchase of No. 10 copper wire, this, if allowed, will be used to rebuild fire alarm circuits and the balance of old iron wire now in service will be dispensed with.

It has been three years since the fire alarm signal boxes and pedestals have been painted and in order to protect them from the weather, keep them from rusting and becoming unsightly, they should be painted every second year. During the coming summer they will be painted and all traces of rust removed.

A special appropriation of \$14,000.00 has been requested for the purchase and installation of a storage battery plant to replace the present gravity battery plant.

A special appropriation of \$52,833.80 has also been requested for the purpose of extending the underground system from Twenty-second Street on the east, Market Street and Laclede Avenue, including an extension on Jefferson Avenue to No. 10 Engine House, and an extension on Theresa Avenue to Manchester Avenue to take care of No. 21 Engine House on the south, Grand Avenue on the west, and Wash Engine House on the south, Grande Avenue on the west, and Wash Street and Franklin Avenue, including an extension on Leonard Avenue to No. 17 Engine House, on the north.

APPROPRIATIONS AND EXPENDITURES FOR FISCAL YEAR, 1908-1909.

	Appropriation	Expenditure	Balance
or labor and material for reconstructing, repairing and maintaining lines and apparatus now in use, replacing wornout apparatus, office expenses, printing, stationary, car-fare, keeping and shoeing horses, replacing horses and vehicles useless for further service, repairing vehicles and harness, hire of horses and vehicles, telephone rental and time service.....	\$36,000.00	\$35,988.88	\$ 11.12

ENGINE HOUSES AND FIRE ALARM SIGNAL BOXES CONNECTED WITH UNDERGROUND SYSTEM.

The following engine houses and fire alarm signal boxes that were formerly on aerial circuits, were connected with the underground system during the year:

No. 4 Engine House, 22nd and Wash Streets.
 No. 13 Engine House, No. 1015 N. Eleventh Street.
 Fire Alarm Signal Box No. 194, 22nd and Franklin Avenue.
 Fire Alarm Signal Box No. 1326, 22nd and Pine Streets.
 Fire Alarm Signal Box No. 1327, 22nd and Market Streets.

UNDERGROUND WORK.

The following amount of cable was installed for the purpose of making extensions and connections to the underground system:

1 Pair	100 feet
2 Conductors	2,105 feet
2 Pair, 4 Conductors.....	972 feet
19 Pair	137 feet
22 Conductors	445 feet
22 Pair, 4 Conductors.....	830 feet
Total	4,589 feet

The following amount of Cable was installed for the purpose of renewing defective cables:

1 Pair	30 feet
2 Conductors	410 feet
2 Pair, 2 Conductors.....	240 feet
16 Pair	45 feet
Total	725 feet

The following amount of iron lateral pipe was installed for the purpose of making extensions and connections to the underground system:

2-inch pipe	383 feet
2 1/2-inch pipe	277 feet
3-inch pipe	1,810 feet
Total	2,470 feet

Three (3) manholes were built at the following locations:

	Size of Manhole.
W. S. Seventh Street North of Carr Street.....	4'x4'x5'
E. S. 21st Street at Alley between Wash and Carr Streets.....	4'x4'x5'
In Alley North of Wash Street between 21st and 22nd Streets.....	4'x4'x5'

The following amount of cable was taken out of ducts and disconnected from the underground system:

1 Pair	125 feet
4 Conductors	125 feet

Total 250 feet

1,000 feet of aerial cable was also taken down.

CIRCUITS REBUILT WITH COPPER WIRE.

During the past year seven fire alarm signal box circuits, four joker or engine house register circuits, five fire department telephone circuits, and two police telephone circuits have been rebuilt with No. 10, hard-drawn, double braided, copper wire, and old iron wire taken down correspondingly. Circuits rebuilt numbered as follows:

- No. 9 Fire Alarm Signal Box Circuit.
 No. 17 Fire Alarm Signal Box Circuit.
 No. 24 Fire Alarm Signal Box Circuit.
 No. 27 Fire Alarm Signal Box Circuit.
 No. 28 Fire Alarm Signal Box Circuit.
 No. 31 Fire Alarm Signal Box Circuit.
 No. 36 Fire Alarm Signal Box Circuit.
 No. 2 Joker or Engine House Register Circuit.
 No. 5 Joker or Engine House Register Circuit.
 No. 6 Joker or Engine House Register Circuit.
 No. 7 Joker or Engine House Register Circuit.
 No. 1 Fire Department Telephone Circuit.
 No. 3 Fire Department Telephone Circuit.
 No. 6 Fire Department Telephone Circuit.
 No. 10 Fire Department Telephone Circuit.
 No. 16 Fire Department Telephone Circuit.
 No. 1 Trunk Line from Police Headquarters to First District Police Station.
 No. 50 Line from Police Headquarters to W. R. Faulkner's Office, Mounted Police District Stables.

FIRE ALARM SIGNAL BOXES INSTALLED IN NEW LOCATIONS.

During the past year sixty-one (61) fire alarm signal boxes were installed in new locations, as follows:

Box No.	Location.
1257	Palace Theatre—No. 1310 Franklin Avenue (private box).
1332	Ewing and Manchester Aves.
1513	Butler Bros.—Olive and 20th Streets (private box).
1514	Butler Bros.—Olive and 20th Streets (private box).
1516	Butler Bros.—Olive and 20th Streets (private box).
3126	Madison and 12th Streets.
3161	LaBeaume and 9th Streets.
3162	Warren and 9th Streets.
485	Michigan Avenue and Delor Street.
486	Hamburg and Gravois Aves.
487	Grand Avenue and Bates Street.
4153	Virginia Avenue and Fillmore Street.
5192	Delmar and Academy Aves.
5247	Goodfellow Avenue and Natural Bridge Road.
5322	Spring and Easton Aves.
5331	Taylor and McPherson Aves.
5332	Lindell Boul. and Whittier Street.
5344	Lexington and Paris Aves.
5345	Florissant and Euclid Aves.
5349	Slevin and Euclid Aves.
5446	Union Avenue and Portland Place.
5451	Delmar and Clara Aves.
5452	Kingshighway and Laclede Avenue.
5453	Walton and Washington Aves.
5525	Red Bud and Florissant Aves.
5526	Newstead and Taylor Aves.
5545	Marcus Avenue and Bircher Street.
5614	Holly Avenue and Rosalie Street.
5615	Pope Avenue and Rosalie Street.
5632	Labadie and Cora Aves.
5633	Warne and Sullivan Aves.
695	Hell Packing Co.—Missouri Ave. and LaSalle St. (private box).
6162	Arkansas Avenue and Utah Street.
6163	Arkansas Avenue and Hartford Street.
728	Insane Asylum—Office.
7127	Kingshighway and Oak Hill R. R. Tracks.
7128	Chippewa Street and Oak Hill R. R. Tracks.
7129	Bingham Avenue and Morganford Road.
7137	Spring Avenue and Utah Street.
7138	Laclede-Christy Co.—Manchester and Sulphur Aves. (private box).
7139	Gravois and Beethoven Aves.
7213	Humphrey Street and Morganford Road.
7215	Schiller Place and Morganford Road.
7216	Russell Place and Junata Street.
7221	Spring Avenue and Wyoming Street.
7224	Gustine Avenue and Wyoming Street.
7231	Grand Avenue and Humphrey Street.
7242	Old Manchester Road and Sarah Street.
7243	Vandeventer Ave. and Forest Park Boul.
7432	McCausland and Dale Aves.
7631	Flora Avenue and Klemm Street.
8114	Penrose and 19th Streets.
8164	Hornsby and Newby Aves.
8324	Garesche and Partridge Aves.
8325	Lucille and Mimika Aves.
8427	Destrehan Street and Wharf.

Box No.	Location.
8431	Destrehan Street and Broadway.
8441	Branch and 14th Streets.
9167	Lemp Avenue and Victor Street.
9168	Menard and Lami Streets.
9217	St. Louis Refrigerator Car Co.—Dorcas and Lyon St. (private box).

1275 fire alarm signal boxes are in service, of which 64 are private boxes.

OLD FIRE ALARM SIGNAL BOXES REPLACED BY NEW BOXES.

Twenty (20) fire alarm signal boxes of old and obsolete patterns were taken down and replaced with new and modern boxes, at the following locations:

Box No.	Location.
83	Poplar and 7th Streets.
246	Lucas Avenue and 22nd Street.
247	Olive and 21st Streets.
289	Mullanphy and 22nd Streets.
318	Jefferson Avenue and O'Fallon Street.
319	Cass and Elliott Aves.
327	Olive Street and Garrison Ave.
328	Lucas and Compton Aves.
334	Beaumont and Chestnut Streets.
348	Scott and Ewing Aves.
349	Channing Avenue and Olive Street.
364	Clinton and First Streets.
394	Broadway and Dickson Street.
395	Washington Avenue and 19th Street.
415	Courtols and Virginia Avenues.
531	Grand Avenue and Morgan Street.
5514	Grand and Carter Aves.
728	Insane Asylum—Engine Room.
7153	Old Manchester Road and Ellendale Ave.
924	Trudeau and DeKalb Streets.

FIRE ALARM SIGNAL BOXES ON WHICH DOORS WITH KEYGUARD HAVE BEEN PLACED.

Six (6) doors with improved Keyguard attached (key is trapped in lock) have been placed on old fire alarm signal boxes at the following locations:

Box No.	Location.
29	Wash and Sixth Streets.
1294	Market and Eighteenth Streets.
5154	Boyle Avenue and Olive Street.
941	Pestalozzi and Ninth Streets.
964	Soulard and Fourteenth Streets.
9155	Dorcas Street and Wharf.

NEW GONG STATIONS.

Two (2) gong stations were installed in new locations during the past year, making a total of one hundred and sixteen (116) gong stations in service at present. New gong stations located as follows:

United Railways Company Trouble Station—Spring Avenue and North Market Street.

Asst. Chief Salmon, residence—No. 3525 Connecticut Street.

NEW TELEPHONE STATIONS—MUNICIPAL DEPARTMENTS.

Seventeen (17) telephones were installed during the past year in municipal departments. Two hundred and eleven (211) telephones (including two switchboards) are at present connected with this service.

New Telephone Stations located as follows:

Chief John O. Glanville, Office, No. 1 Salvage Corps.
 Asst. Chief Salmon, residence, No. 3525 Connecticut Street.
 Asst. Chief Barry, Office, No. 21 Engine House.
 Asst. Chief Rucker, Office, No. 12 Engine House.
 Asst. Secretary Fire Department, Office, City Hall.
 Herman Schmidt, Fire Alarm Operator, residence, No. 4141 Flad Avenue.
 W. L. Townsend, Telephone Inspector, residence, No. 3962 Morgan Street.
 James Dugan, Fire Alarm Inspector, residence, No. 4404 North Second Street.
 A. J. O'Reilly, Pres. B. P. L. residence, No. 2207 S. Grand Avenue.
 Supervisor of Plumbing, Office, City Hall.
 Mayor's Private Office, City Hall.
 West Side Dispensary—4919 Easton Avenue.
 Dispensary—907 Manchester Avenue.

Poor House, Office.
 Insane Asylum—Construction Office.
 Water Department, Chestnut Street, Street Service.
 Work House—Quarry Office.

NEW TELEPHONE STATIONS—POLICE DEPARTMENT.

Nineteen (19) telephones were installed during the year for this Department. Five hundred and ninety-five (595) telephones (including fifteen switchboards) are at present connected with this service.

New Telephone Stations located as follows:

Patrol House, Central District.
 Construction Office, 12th District.
 Dr. W. R. Faulkner's Office, Mounted Stables.
 Jas. J. O'Brien, residence, 5647 Wells Avenue.
 Captain's Office, Mounted District.
 Mounted Sub-Station, Forest Park.
 Switchboard Set, 12th District Station.
 Patrol House, 5th District Station.
 Circuit Attorney's Office, Room No. 22, Four Courts Bldg.
 Patrol Box—Union and St. Louis Aves.
 Patrol Box—Page and Euclid Aves.
 Patrol Box—Rear of No. 3803 Washington Ave.
 Patrol Box—Buschmann and Ferry Streets.
 Patrol Box—Spring Ave. and Wyoming Street.
 Patrol Box—Lillian and Beacon Aves.
 Patrol Box—Cass Avenue and 18th Street.
 Patrol Box—Branch Street and 11th Street.
 Patrol Box—Mallinckrodt and 14th Streets.
 Patrol Box—Grand Avenue and Burlington R. R. Tracks.

FIRE ALARM SIGNAL BOX LOCATIONS—ABANDONED.

Box No.	Location.
4147	St. Louis Sanitary Works—Foot of Montana Street.
557	Fair Grounds.
5198	DeBaliere and DeGiverville Aves.
5199	DeBaliere and Lindell Aves.

GONG STATIONS—ABANDONED.

Asst. Chief Salmon, residence, No. 3525 Connecticut Street.
 Asst. Chief Shockey, residence, 1217 Goodfellow Avenue.
 Cullen & Kelly, No. 4524 Easton Avenue.
 Patrol House—Four Courts.
 Chestnut Street Police Station.

ABANDONED TELEPHONE STATIONS—MUNICIPAL DEPARTMENTS.

Asst. Chief Shockey, residence, No. 1217 Goodfellow Avenue.
 Chief Operator's Desk, Fire Alarm Dept.
 Water Department—Douglas Street, Street Service.

ABANDONED TELEPHONE STATIONS—POLICE DEPARTMENT.

Chestnut Street Station Patrol House.
 Four Courts Patrol House.
 Construction Office, 12th District.
 Switchboard Set, Old 12th District Station.
 A. C. Maroney, residence, No. 5064 Cabanne Avenue.
 Grand Avenue and Burlington R. R. Tracks, Patrol Box.

TELEPHONES AND GONGS TRANSFERRED BY REMOVALS.

Twelve (12) telephones and three (3) gongs were transferred from old to new locations during the year, as follows:

TELEPHONES TRANSFERRED.

From 3732 Arsenal Street to W. S. Michigan Avenue, South of Gasconade Street, for Street Department, First District Office.
 From 4921 St. Louis Ave., to 3307 Vista Ave., Asst. Chief Barry's residence.
 From 1601 Hogan Street to 4605 Page Ave., Asst. Chief Coughlin's residence.
 From 4605 North Market Street to 1710a Cora Ave., W. C. McCarty's residence.
 From Sarah and North Market Streets to Sarah Street and Garfield Ave.—Patrol Box.
 From 3324 Alabama Avenue to Alabama Avenue and Hurck Street—Patrol Box.
 From Wharf and Angelrodt Street to Hall and Mallinckrodt Streets—Patrol Box.
 From Mullanphy and 14th Streets to Cass Avenue and 14th Streets—Patrol Box.
 From 11th Street bet. Cass Ave. and Mullanphy St., to Cass Ave. and 10th St.—Patrol Box.
 From Main and Florida Streets to Broadway and Florida Street—Patrol Box.
 From North Market and 2nd Streets to Levee and North Market Street—Patrol Box.
 From Benton and 20th Streets to North Market and 20th Streets—Patrol Box.

GONGS TRANSFERRED.

From 4921 St. Louis Ave., to 3307 Vista Avenue, Asst. Chief Barry's residence.
 From No. 1601 Hogan Street to 4605 Page Avenue, Asst. Chief Coughlin's residence.
 From 763 Walton Avenue to 737a Euclid Avenue, W. T. Dowdall's residence.

LOCATION OF POLES SET—NEW LINES.

Thirty-five (35) poles were set for the purpose of building and extending new lines, at the following locations:

	No. of Poles.	Length Feet.
W. S. Kingshighway under Oak Hill R. R. Bridge.....	1	25
S. W. Corner 22nd and Pine Streets.....	1	30
E. S. Morganford Road South of Schiller Place.....	1	35
W. S. Morganford Road South of Eichelberger Street.....	1	35
N. S. Eichelberger Street West of Morganford Road.....	4	35

N. S. Delor Street West of Michigan Avenue.....	1	35
In Alley West of Michigan Avenue North of Delor Street.....	1	35
S. S. Antelope Street East of Broadway.....	1	35
W. S. Garrison Avenue North of Greer Avenue.....	2	35
W. S. Garrison Avenue South of Greer Avenue.....	1	35
E. S. Klemm Street between Flora and Flad Avenue.....	2	35
E. S. Cora Avenue South of Labadie Avenue.....	3	35
E. S. Cora Avenue North of Labadie Avenue.....	1	35
W. S. Whittier Street South of Maryland Avenue.....	2	35
N. S. Destrahan Street West of Wharf.....	3	35
N. S. Destrahan Street East of Hall Street.....	3	35
E. S. Walton Avenue South of Delmar Avenue.....	2	35
E. S. Mimika Avenue North of Lucille Avenue.....	2	35
E. S. Leonard Avenue between Franklin Ave. and Morgan Street	1	40
W. S. Minnesota Avenue South of Poepping Street.....	1	40

2663 poles and guy stubs are at present erected in streets and alleys.

LOCATION OF POLES SET—RECONSTRUCTION.

Thirty-four (34) old poles were replaced with new poles in the general reconstruction of all lines, at the following locations:

	No. of Poles.	Length Feet.
S. E. Corner Wisconsin and Wyoming Streets.....	1	35
W. S. Conduit South of Humboldt Street.....	1	35
Christian Brothers College Grounds, West of Kingshighway.....	2	35
N. S. Neosho Street East of Michigan Avenue.....	1	35
S. S. Blow Street West of Minnesota Avenue.....	1	35
E. S. Macklind Avenue South of Columbia Avenue.....	1	35
E. S. Macklind Avenue North of Columbia Avenue.....	2	35
S. S. Kossuth Avenue West of Warne Avenue.....	2	35
S. S. Kossuth Avenue East of Warne Avenue.....	1	40
Mounted District (Police) Grounds.....	1	40
E. S. Mississippi Avenue North of Russell Avenue.....	1	40
E. S. Leonard Avenue between Franklin Ave. and Morgan Street..	3	40
E. S. California Avenue North of Eads Avenue.....	1	40
E. S. California Avenue South of Park Avenue.....	1	40
E. S. California Avenue bet. Park Ave. and Henrietta Street....	6	40
W. S. California Avenue South of Utah Street.....	1	40
N. S. Bowen Street West of Michigan Avenue.....	1	40
W. S. Minnesota Avenue South of Poepping Street.....	1	40
E. S. Alabama Avenue South of Haven Street.....	2	40
W. S. Kingshighway South of Papin Street.....	1	40
N. S. Manchester Avenue West of Grand Avenue.....	1	50
N. S. Manchester Avenue West of Laclede Avenue.....	1	50

LOCATION OF POLES ABANDONED.

Forty-one (41) poles and one (1) guy stub were taken down during the year, City's wires being transferred to other poles in the immediate vicinity. The old poles were formerly located as follows:

	No. of Poles.	Length Feet.
S. W. Corner 22nd and Pine Streets.....	1	30
E. S. Garrison Avenue North of Greer Avenue.....	2	35
S. S. Biddle Street West of Broadway.....	1	35
S. S. of Alley North of Russell Avenue, West of Oregon Ave.....	1	35
W. S. Oregon Avenue North of Russell Avenue.....	1	35
S. S. Laclede Avenue between Garrison and Compton Aves.....	7	35
S. S. Laclede Avenue between Compton and Channing Aves.....	2	35
S. S. Laclede Avenue between Compton and Channing Aves.....	5	40
W. S. Florissant Avenue North of Queens Avenue.....	1	40

	No. of Poles.	Length Feet.

ANNUAL REPORT

OFFICE OF PARK COMMISSIONER
CITY

To the Honorable Board of Public Improvement

GENTLEMEN—In conformity with the herewith report of the work done and the this Department for the fiscal year ended

The acquisition of several properties, the number of nine, and in extent amount at a total cost of \$1,393,356.23, testifies development of the City's public recreation undersigned would be remiss were not the the Department extended to the Honorable and the Honorable James Y. Player, Compt interest, resulting in the purchase of the formerly owned by the St. Louis Agricultural Association, and situated well within the Grand Avenue, Natural Bridge Road, Avenues, containing 128.94 acres, at a cost original offer for this property eighteen months \$1,700,000. To the City Counselor and his department is also indebted for obtaining building city blocks in the thickly congested portion total area of these city blocks amounting to the City \$582,933.73. These sites have not and all buildings razed, but plans for two and work about to begin. Not only will be cared for by the acquisition of these several public health as well should derive benefit

Road work at this time is no less intense than elsewhere, and has called for serious a

of the Department. The roadway extending from what is known as Concourse Drive, southwesterly to Skinker Road, in Forest Park, formerly a narrow roadway, 5,000 feet in length, has been considerably broadened, resurfaced, oiled and lighted. Experiments with light and heavy oils, asphaltic treatment, as well as Tarvia, etc., have been made, and the general maintenance of the gravel roads has been cared for. It is believed that oil, or some dust-laying product, will before long supplant the gravel roads, pretty though they may be, since the maintenance cost due to heavy travel does not seem to justify their continuance.

The Department has planted some 4,000 trees; in addition, considerable work in the feeding and nourishing of trees has been undertaken, as well as the cutting down of dead trees to the number of 450.

It is with pleasure that the Department notes that with the passage of Ordinance Number 24,191, authority was given by which the City was enabled to secure the services of a landscape architect and necessary assistants to prosecute the work of laying out new parks and public grounds, including the sites for the Municipal Courts Buildings, Insane Asylum and City Hospital grounds, to say nothing of the importance of the treatment to be accorded to the Kingshighway Boulevard scheme. Confirming the provisions of said ordinance, Mr. George E. Kessler, of Kansas City, has been appointed to the position of Consulting Landscape Architect, and to him will be entrusted, it is hoped, the ground plans for all City work.

His Honor, the Mayor, has selected and approved the names for the new parks, as follows:

FAIRGROUND Bounded by Kossuth Avenue on the north, Grand Avenue on the east, Natural Bridge Road on the south and Fair Avenue on the west.

RIVERSIDE PARK In City Blocks, partly No. 2859 and all of Blocks 2860 and 2888, bounded by Broadway, Dover Street, Mississippi River and property occupied and owned by the Century Boat Club.

COLUMBUS SQUARE City Block No. 262, bounded by Tenth, Biddle, Carr and Eleventh Streets.

SOULARD PLACE City Block No. 374 south, bounded by Julia, Seventh, Soulard and Eighth Streets; and also City Block No. 381 south, bounded by Julia, Eighth, Soulard and Ninth Streets.

PONTIAC SQUARE City Block No. 837, bounded by Ninth Street, Ann Avenue, Tenth and Shenandoah Streets.

MULLANPHY SQUARE In City Block No. 602, bounded by Mullanphy, Tenth, Eleventh Streets and alley.

DE SOTO PLACE City Block No. 1684, bounded by O'Fallon, Twenty-second, Division and Twenty-third Streets.

The City has also acquired the past year a small triangle at the intersection of Chouteau Avenue, Manchester Avenue and Sarah Street, naming same Rock Springs Triangle—this has been planted to trees and shrubbery.

The opening by ordinance of Forest Park Boulevard from Grand Avenue to Boyle Avenue has been authorized, and considerable work on the roadways completed. This soft roadway leading from Grand Avenue to Forest Park, it is hoped, will provide adequate facilities for the horse-loving portion of the community.

The failure of ordinances to pass the Assembly, having for their object the providing of refreshment pavilions in Forest Park, is much deplored, and said ordinances will be again recommended at the next session of the Assembly.

LIGHTING Additional lamps in City Parks have been installed to the number of over 300, thereby increasing the safety and comfort of the public using the parks after nightfall.

DONATIONS The Department is indebted to many citizens for donations to the Zoo and Aviary.

UNIFORMING EMPLOYEES Uniforming of all park employees has been undertaken, and has proved of value to the men as well as beneficial to the service.

**WORLD'S FAIR
GROUNDS**

Your Honorable Board of Public Improvements has authorized the Louisiana Purchase Exposition Company to substitute a pavilion, to be erected on the site occupied by the Missouri Building during the Exposition—this in lieu of the monumental gateway formerly offered to the City. This building, costing approximately \$40,000, will contain accommodations for a vast number of people, comfort stations for both sexes, and a look-out tower, as well as a section reserved where it is hoped light refreshments will be served. Your Honorable Board further agreed that if said Exposition Company will expend a sum not less than \$200,000 in erecting a memorial to Thomas Jefferson, in recognition of his services in behalf of the Government by which the United States of America secured the vast territory of Louisiana for the sum of fifteen millions of dollars, then your Honorable Board of Public Improvements will have considered restoration of Forest Park, as provided by ordinance, complete.

ART MUSEUM

The Art Museum in Forest Park, formerly under control of a private Board of Governors or Directors, has, by order of the Supreme Court, passed into the hands of the City, and becomes a free Public Museum for our people.

LINDELL ROAD

The Department secured the passage of an ordinance having for its object the broadening of the private roadway commonly known as Lindell Avenue, from Union Avenue to Skinker Road. The owners of said property have agreed to dedicate the roadway, now 30 feet broad, and the adjoining planting space, amounting in all to 50 feet, to public use, and further to undertake the reconstruction and broadening of said road to a width of 50 feet at their own cost—this roadway will then become part and parcel of Forest Park.

LAFAYETTE PARK Within this park and conveniently located has been completed a pavilion combining keeper's lodge and comfort station, costing approximately \$7,000. This was opened to public use March, 1909.

BATH HOUSE NO. 2 Bath House No. 2, at Seventh and Soulard Streets, which will accommodate some 200 people at one time will, it is expected, be completed shortly. Additional bath facilities at Bath House No. 1 are now under way.

FOUNTAIN PARK A keeper's lodge and shelter, costing \$740, has been erected during the past year.

FOREST PARK A new tile roof has been placed on Laclede Pavilion, which it is believed has added not only to the comfort of the public, but to the beauty of the building. Additional comfort station facilities have been provided in Lindell Pavilion.

NEW WORK Appropriations have been asked for the following new work for the coming year, and it is earnestly hoped that necessary funds will be provided:

Comfort and shelter station, Benton Park.....	\$ 2,500 00
New boat house, Carondelet Park.....	3,000 00
New sidewalks, painting fence, Carr Square	1,000 00
Foundation bird cage, Forest Park	3,000 00
Extension of Forest Park Boulevard, Grand Avenue to Boyle Avenue.....	2,500 00
Plumbing and fixtures, tool house, Hyde Park.....	1,000 00
Keeper's house and comfort station, Jackson Park...	4,000 00
Painting fence and hand stand, Lafayette Park.....	3,000 00
New boat house, O'Fallon Park.....	5,000 00
Flag pole, O'Fallon Park.....	700 00
Retaining wall for island, O'Fallon Park.....	600 00
Reconstruction of sidewalks along Broadway, O'Fallon Park.....	1,200 00
Comfort station, O'Fallon Park.....	4,000 00
Comfort station, St. Louis Place.....	3,000 00
Heating plant, Carr Square.....	400 00
Carnegie Place pergola.....	300 00
New stable, Forest Park.....	15,000 00
Construction Bath House No. 3, with comfort station, at Twenty-third and O'Fallon Streets.....	25,000 00

UNION STATION It is again recommended that a plaza be early provided in front of Union Station that the visitor's first view of our City may be indicative of the beauties within the portal.

COURT HOUSE GROUNDS Formerly in the care of the Building Commissioner, have been taken over by the Park Department.

CARONDELET PARK Area of the lake at Carondelet Park has been approximately doubled in water surface.

GAMES The tennis courts continue to be popular—individuals to the number of 21,000 participating in the games. Baseball and football fields have been improved, and eight new picnic grounds opened in Forest Park, this being the first year the facilities for picnics have been afforded since before the World's Fair, owing to the ground being in possession of the Louisiana Purchase Exposition Company.

BENCHES Five hundred additional benches have been provided and band concerts to the number of 126, as compared with 127 last year, have been given. Music was appreciated, as shown by approximate attendance of 600,000.

The thanks of the undersigned are extended to the officers and employes of the Park Department and Public Recreation Commission for their assistance and co-operation in the public work entrusted to our care.

Respectfully submitted,

PHILIP C. SCANLAN,
Park Commissioner.

SUPERINTENDENT'S REPORT.

Honorable Park Commissioner:

DEAR SIR—I herewith present a detailed report of the work under my supervision for the year ended April 12, 1909:

BENTON PARK Benches have been repaired and repainted. Bridge, music stand, comfort station and fences have been painted. Walks have been resurfaced with torpedo gravel. Approximately 7,000 plants and shrubs have been planted here. Would recommend a new band stand, comfort station and shelter house; also a privet hedge to take the place of old wire and pipe.

CARNEGIE PLACE A sewer system has been installed, flower beds have been planted, old fence has been lowered and wire placed on same to protect the new privet hedge which is to replace the fence.

CARONDELET PARK Lake has been enlarged; old house formerly used by gardener has been remodeled, same having been changed into a comfort station. About 400 assorted shrubs have been planted, and flower beds have been altered and replanted.

CARR SQUARE Walks have been resurfaced with torpedo gravel. Park entrance and shelter house are under way. More benches are needed. Band stand, flag pole and chain around lake have been painted. I recommend that iron fence be painted next year; also that new walks be laid.

COURT HOUSE SQUARE Part of privet hedge has been replaced. Flower beds are in fine condition, considering their location. Kiosk containing U. S. weather indicator has been completed.

DAKOTA PARK Nothing has been done here, owing to location, but as the neighborhood improves expect to accomplish something for its betterment in the near future.

FOREST PARK BOULEVARD A strip of parking 30 feet wide. Same has been extended from Grand Avenue to Boyle Avenue, and a curb has been placed around it. Grass, trees and shrubs planted.

FOREST PARK The concrete bridge over River des Peres, near Wells Spring, is under way. Carr Lane bridge has been entirely reconstructed. Jefferson bridge has been redecked. Two red signal lights have been placed near the Wabash bridge. Laclede Pavilion has been reroofed. The comfort station in Lindell Pavilion has been completed. The music pavilion has been repaired and repainted, as have also the fences around the buffalo, deer and elk paddocks. Repairing and painting is under way at the greenhouses.

The resurfacing and reconstruction of roads is well under way, much having been accomplished in this direction. Drainage has been arranged for the Faulkner Drive, emptying into the River des Peres. Relaying of the sewer at Grand Drive and Jefferson has been completed. Water system has been installed in the ten new picnic grounds. The fire plug at east side of the Music Pavilion has been repaired.

Coke bins have been completed at the palm house. The pruning and mulching of trees and shrubs is under way. Many plants have been transplanted and all flower beds rearranged. Plants have been given to the City Hospital and to the engine houses, and grounds surrounding these institutions have been planted.

Heavy winds on May 11th and heavy rains on May 14th caused a loss of over \$2,000 to trees and shrubbery.

FOUNTAIN PARK A new tool house has been erected. All dead trees have been replaced. Walks have been resurfaced with torpedo gravel. Flower beds have been replanted. Would recommend that fountain basin be enlarged eight feet.

FRENCH MARKET PLACE Poplar trees have been planted here to replace the maples, which would not grow in this locality. Privet hedge has been replanted in places where it has died.

FAIRGROUND Was opened to the public on April 11th, 1909.

GAMBLE PLACE This park is used more as a thoroughfare than a recreation spot by the adult population. Its chief use is as a playground for children.

GRAVOIS PARK Fences and keeper's lodge have been repaired. Comfort station has been put in a sanitary condition and walks have been resurfaced.

HYDE PARK The basin of the fountain has been replaced by one of good concrete structure. The shelter, band stand and tool house have been repainted. Would suggest more benches.

JACKSON PARK A small circular recreation spot in the northeastern part of the City.

KENRICK GARDEN A triangle bounded by Lindell, Vandeventer and McPherson Avenues. A special effort has always been made to keep this in attractive shape.

LACLEDE PARK The old wooden rider fences have been replaced with privet hedges. Walks have been resurfaced.

LAFAYETTE PARK Many trees and shrubs have been planted; lawns have been topped with tea-waste; flower beds have been rearranged; new shelter and comfort station has been erected. Would recommend the removal of old comfort station and men's toilet.

LYON PARK This park is in first-class condition.

O'FALLON PARK The tennis courts here are in fine condition. Many trees and shrubs have been planted, and arrangement of flower beds has been altered. The stable has been re-roofed. Would recommend a concrete

bridge be constructed over the ravine near tennis courts, and that the roads on the hills throughout the park be resurfaced.

PAGE AVE. PLACE Have transplanted some soft maple trees from this place to Yeatman Square very successfully.

ROSE HILL PLACE This place has been maintained in good condition.

SOUTH ST. LOUIS SQUARE The fence has been painted and some new shrubbery planted.

ST. LOUIS PLACE The fences here have been painted. Would recommend more benches and the erection of a comfort station.

UTAH PLACE This has been maintained in good condition and some shrubbery planted.

WASHINGTON SQUARE Trees planted some years since are making slow progress. This most likely is due to the smoke and dirt. The privet hedge, however, flourished.

Respectfully submitted,

GEO. OSTERTAG,

General Superintendent.

REPORT OF THE PUBLIC RECREATION COMMISSION.

1908-1909.

To the Public Recreation Commission:

GENTLEMEN—I have the honor to submit herewith a report of the work of the Public Recreation Commission for the year ending April 12, 1909:

PLAYGROUNDS.

FOLK DANCING

The most important innovation in the conduct of the playgrounds during this season was the introduction of Folk Dancing for the girls. This was introduced late in the season, after the playgrounds were well under way, and met with hearty response from the children and their parents. An attempt was made to adapt dances native to the country from which the parents came, in those districts of the city where there is a distinctly foreign element. For example, in Lyon Park, an adaptation, suitable to children, of the Bohemian dances was tried, the instructor of dancing herself receiving valuable hints from some of the men and women of the neighborhood. The dancing was done on the grass, the music supplied by a phonograph. For the "Meet" the last day of the vacation session, the Industrial Band played for the dancing.

GAMES

Indoor baseball proved the most popular game, with girls as well as boys. The large, soft ball, and the impossibility of driving it far, make baseball possible in a small, crowded playground.

In several of the playgrounds the number of swings was doubled—the swings being universally popular. To the equipment of Carr Square, a merry-go-round was added, one which the children themselves propel. It was supposed to carry six-

teen, but often carried forty children. The only serious accidents of the year were two broken arms and a rather serious splinter. This with a total attendance of 660,821.

INDUSTRIAL WORK

Raffia, reed, beads, worsted, scraps of cloth, cigar boxes, pictures, were used in the construction of simple, quickly-made things, which the children call their "work." Some of the things made out of the Sunday newspapers and seed catalogues and tooth-powder boxes were quite wonderful. A child could choose what he or she should make, but he or she must finish and finish well what was begun. This year each playground made scrap-books for the Children's hospitals and derived much pleasure from giving of their own skill and sufficiency to the children who had less.

The use of gymnasium suits has spread rapidly. The girls and their mothers are heartily in favor of them, and their use extends, in some cases, throughout the year.

EXCURSIONS

The excursions to the large outlying parks were continued this year, to the great benefit of the children. The Harbor Boat, however, was the chief means of finding fresh air and something new to see. The new boat, the "Erastus Wells," carried one hundred children at a time on the river, one afternoon of every week. Many of the children who live within a mile of the river had never been on it; some had never seen it.

HOURS

The playgrounds are in session from 9:00 a. m. to 5:00 p. m., six days a week during the vacation season, and after school hours until 5:00 p. m. during September and October. Carr Square and Mullanphy playgrounds are open daily the year round, and during the vacation season until 9:00 p. m.

Each playground has its own "atmosphere," depending partly on its physical aspects, partly on the character of the neighboring population, partly on the director and instructors.

Each ground is a part of the City system and conforms to the general plan of work, but an endeavor has been made to keep for each one its own individuality.

**CARNEGIE PARK PLAY-
GROUNDS**

Indiana Avenue and Utah Street

The children here are mostly of German or German-American parentage. At first, the mothers sent the girls in their best clothes for sewing classes. Within a week the same girls were enthusiastic gymnasts, forgetting sewing, of which they were not reminded, these girls having enough of that elsewhere.

The relations of the playgrounds with the parents of the children are pleasant and intimate. The mothers send in "refreshments" when there is a special exhibition, and come themselves to assist the instructors. One of them said she would pay higher rent if necessary to be near a playground and know the children were safe and happy and "learning something."

**CARR SQUARE PLAY-
GROUNDS**

Fifteenth and Carr Streets

With a small play space and a number of children that can be handled only by crowds that require constant manipulation lest they become mobs, Carr Square is nevertheless not the most difficult of the playgrounds. The children are obedient and responsive. They like to work, and are especially good at basket making. The playground is in the heart of the most densely crowded district of the City, the children are mostly of Russian Jewish parentage, with a growing number of Italians.

After school was opened, these grounds were used during school hours by four kindergarten classes from neighboring schools and one from a social settlement, the children coming with their teachers. It is hoped this use of the grounds may be extended.

**FOREST PARK PLAY-
GROUNDS AND
NURSERY**

**Lindell and De Baliviere
Avenues**

This ground was used every day in the week as an excursion ground for some one of the downtown playgrounds or from some child-helping institution. Among the last were most of the Orphan Homes in the City, the Industrial School, the Mis-

sion Free School, the Girls' Industrial Home, the babies from the nursery of the Jewish Educational Alliance, the Bethesda Home, etc., etc. This is the only playground in the City with a building adapted to the needs of very young children and the grounds would more than justify itself if it could be made a convalescent station for some of the sickly babies of the crowded districts.

LYON PARK PLAY- GROUNDS

Second and Utah Streets

watching the games and work of the children of the playground. Whole families meet here for the luncheon hour, the father coming in from work in the neighboring shop, and after the meal the children return to play, the parents watching. The addition of a few small tables would transform this into a family garden.

This is another of the homelike, much-used small parks of the City, and the people, largely of Bohemian extraction, find an additional pleasure in

GAMBLE PARK PLAY- GROUNDS

**Gamble Street and Garrison
Avenue**

makes a fair running track, and is used for races nearly every day. The neighborhood is still largely American, but is being encroached upon by the Jewish element of the population which is itself being driven westward by the Italian.

The plan of this park is perhaps least adapted to playground uses. The granitoid walk through the center, which divides around the fountain,

MULLANPHY PLAY- GROUNDS

**Tenth and Mullanphy
Streets**

less to say baseball is the most popular sport among the boys. A team of young men used the field Sunday mornings, and as they made no trouble but were often of great assistance, especially on concert nights, they were very welcome.

Mullanphy Playgrounds is in a neighborhood originally Irish, gradually becoming Polish. Of all the grounds, this one has the only ball field; need-

Mullanphy Playgrounds had the first shower baths, and, as with everything in the playgrounds, as time goes by, they are more and more used. After 6:00 o'clock at night the showers are used by men—another evidence that Public Bath No. 1, three blocks away, is overcrowded.

Mullanphy Playgrounds is the only one which has gardens. About 150 of these were assigned to the first 150 children who applied. It was known they would be given to some one else if the first owners did not take care of them properly, consequently very few were neglected. These gardens flourish in a remarkable way, considering that this is one of the most crowded and smoky districts of the City, and they have had a beneficent effect on many of the surrounding back yards and back porches. The children take their plants home in the fall, tend them all winter and bring them back in the spring—often in an anemic condition, hoping they “will get well again in good dirt.”

**SECOND STREET PLAY-
GROUNDS**

**Second, between Cedar and
Gratiot Streets**

These playgrounds, in this hot, crowded, most neglected district of the City, are possible because of the generosity of a friend of the children who loans the use of a vacant lot, and of a vacant tenement across the street. The neighborhood was once German, but is now almost entirely Syrian and Greek. Only the very simplest handicraft could be tried here. The boys have never learned “team work,” and succeed better at such things as jumping where each one works alone. The thing that really succeeds is the shower baths.

**YEATMAN SQUARE PLAY-
GROUNDS**

**Leffingwell Avenue and North
Market Street**

This is the first small park in which a playground was planned—not laid on as an afterthought. The play-space is small and the games are always bursting bonds, but in this park is the City's first wading pool. There are also shower and toilet rooms. The neighborhood is on the edge of a good German district, which is rapidly being turned over to factories.

**CHILDREN'S GARDENS
FOREST PARK**

North of Green Houses

The Children's Gardens, in the short period of their existence have occupied four different sites. It is hoped they are now permanently placed. There are about 300 plots of seven by fifteen

feet each, and the boys raised an astounding amount and variety of vegetables; these they took home. The instruction gardens, where such things as kaffir corn, cow-peas and peanuts were raised, proved a valuable feature. It is hoped to extend this work in the new and permanent site.

SMALL PARKS The five small parks, the purchase of which was authorized by the bond issue voted on July 12, 1906, and the sites of which were recommended to the Mayor of the City by the Park Commissioner and the Public Recreation Commission on May 23, 1907, were purchased this year. (For cost, acreage, see table, "Total Cost of Parks in St. Louis.")

PUBLIC BATHS.

PUBLIC BATH NUMBER 1
Tenth, Between Carr
and Biddle Streets

The figures for the attendance for the first complete year of Public Bath No. 1 fully attest its usefulness and the appreciation of the people who know of it. The bath house was closed one week in January and three weeks in February in order to alter and complete the hot-water system. To offset this, from June 2 to August 31—14 weeks—the bath house was open from 7:00 a. m. to 11:00 p. m.—16 hours, week days, and from 7:00 a. m. to 1:00 p. m. on Sunday. The rest of the year it was open from 9:00 a. m. to 9:00 p. m. week days and from 9:00 a. m. to 12:00 noon Sundays.

The record of attendance and of the rent of towels is kept by a check system. The bath check serves the double purpose of giving the person his bath in proper turn and recording the number of baths taken.

The period of largest attendance during the day is, as it has been from the opening of the house, between 1 and 5 p. m. The

heaviest attendance during the week is still the Sunday morning period, and the most crowded whole day is Saturday. June, July and August, with a total of 74,358, 49.3% of the total attendance for the year, are the crowded months. During these months it was necessary to exclude children after 5:00 p. m. week days and on Sunday morning. The rest of the year they were excluded after 5:00 p. m. on Saturday.

The largest attendance was 1,568, on Friday, July 31st; the smallest, 26, on Monday, January 11th, on which day there fell the heaviest snow of the year. The average number of baths per day of 12 hours, 449, as against 328 of last year.

SOAP AND TOWELS The sale of soap and rental of towels has proved to be a convenience almost entirely for the men. Of the 47,589 cakes sold, 44,786 were sold to men; and of the 52,179 towels rented, the men used 49,562. Of the men attending, nearly 70% bought soap and rented towels, as against 40% last year.

Of the 1,800 towels purchased in the twenty months since the bath house was opened, all except about one hundred are still on hand and in very good condition. The disinfection of the towels by live steam instead of by chemicals lengthens their term of usefulness. The loss of towels by theft is a fairly negligible quantity, much less than the loss from the same cause in the average hotel. Of the 52,179 towels rented about 75 "disappeared."

WATER Of the approximate daily consumption of 19,000 gallons of water, an average of about 1,500 gallons was used for cleaning purposes at night, the remainder for the baths during the day. The average number of gallons used per bath varies widely. July 31st, the day of the largest attendance during the year, 1,568 persons, the temperature out of doors at noon being 95 degrees, the average number of gallons used per bath was 25. November 13th, the temperature being 32 degrees and the number of baths 308, the average number of gallons used per bath was 50. This is explained by the fact that much

longer time for bathing was allowed for each person during the slack season. During the heavy season the water is regulated by a check-valve system operated by the attendants and runs only a specified time for each set of bathers.

COST PER BATH The contracts having been let for the installation of additional showers on both the men's and women's sides of the bath house, which will complete the entire possible equipment, makes justifiable the expectation that with a slight increase of cost of operation, and a larger number of baths given, the cost per bath next year may be reduced.

PUBLIC BATH NUMBER 2
Seventh St., Between Scouard
and Carroll Streets Public Bath No. 2 is rapidly nearing completion, and it is hoped that it will be possible to open both showers and pool to the public by the time the hot weather sets in.

LEVEE POOL
Levee at the foot
of Franklin Avenue The ordinance authorizing the building of an open-air swimming pool on the Levee at the foot of Franklin Avenue was approved July 1, 1908. It is hardly probable that this can be completed for use this summer, owing to the high stage of the river.

CARR SQUARE COMFORT STATION
Fifteenth and Wash Streets This Public Comfort Station, entirely under ground, with the entrances masked by a gateway, is so far nearing completion that it should be open to the public early this coming season.

RECOMMENDATIONS.

PLAY GROUNDS The City is still without playgrounds for negro children. Negotiations are now under way by which it is hoped this lack will be partly remedied this summer. There are two sections in which grounds are badly needed, one between Twelfth Street and Jefferson Avenue, along Lucas Avenue and Morgan Street, and

the other between Eighteenth and Twenty-eighth Streets and along Chestnut and Market Streets.

The new small parks will afford relief for the present to the overcrowded playgrounds.

PUBLIC BATHS The City should add to its municipal equipment public baths in the various districts of the City in sufficient number to supply the wants of the people. A site has already been purchased on Twenty-third and O'Fallon Streets, and plans for the much-needed public bath in this neighborhood should be drawn at once. Another bath is urgently needed in the southeast of the City in the neighborhood of Ann Avenue and Shenandoah Street.

PUBLIC COMFORT STATIONS This need is entirely inadequately supplied. The sites where such stations are most immediately needed are: Washington Avenue, at the entrance to Eads Bridge; the old French Market site, on Broadway, south of Chouteau Avenue; the Round Top Market site, on Broadway and O'Fallon Street.

Respectfully submitted,

CHARLOTTE RUMBOLD,

Secretary.
